HANDBOOK 2017

In association with

AL-NOOR CARGO CITY GWADAR

Mastering Gwadar Seaport

From January 2008 to January 2017

GWADAR HANDBOOK 2008-17

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

25	26	27	28	29	30 Pak-China CSA to boost trade and investment (Daily Times)	31

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

First cargo ship anchors off Gwadar

By Saleem Shahid

QUETTA, March 14: The first cargo ship carrying 73,000 tons of wheat from Canada arrived at the Gwadar port on Friday.

The ship was anchored about 18 kilometres offshore because the port cannot yet handle such a heavy ship.

Chairman of the Gwadar Deep Sea Port Admiral Ehsan Saeed said that small vessels would take wheat to Karachi while trucks would transport the grain to areas in Balochistan and Sindh.

After the ship is offloaded, it

Continued on Page 3

First cargo ship anchors off Gwadar

Continued from Page 1

would be brought to the port.

Balochistan's caretaker Chief Minister Sardar Mohammad Saleh Bhootani and senior officials visited the vessel.

Sardar Bhootani said that the Gwadar port would make markets in Central Asia globally accessible, besides providing a way to the world for energy resources.

Highlighting commercial pros-

pects of the Gwadar port, Admiral Saeed said that initially it would handle 100,000 containers, 300,000 tons of general cargo and half a million ton of food grains.

The caretaker chief minister also presided over a meeting of the board of directors of the Balochistan Coastal Development Authority.

Decisions were taken to make the Balochistan coastline more attractive for tourists.

گواور بندر گاہ مکمل طور پر آئٹل ہو گئی

گواور (ناٹنگ ٹیڈ) گواور پورٹ پر پہلا بحری جہاز ٹکرا کر اٹل ہونے کے بعد گندم اتارنے کا کام جاری ہے اور ملک کی تیسری بندرگاہ آئٹل ہو گئی ہے۔ گواور پورٹ کی تعمیر کا کام 22 مارچ 2001ء کو شروع ہوا تھا۔ اسے چینی تعمیراتی کمپنی نے تقریباً 6 سال کے عرصے میں تیار کر کے گزشتہ سال حکومت پاکستان کے حوالے کیا تھا۔ گواور پورٹ کو چلانے کی ذمہ داری پورٹ آف سنگاپور کے سپرد کی گئی تھی اور 15 مارچ کو پورٹ کا کام شروع کر دیا۔ کینیڈا سے آنے والے 235 میٹر لمبے بحری جہاز پوس گوری کا وزن ایک لاکھ آٹھ ہزار ٹن ہے اور اس کے ذریعے 72 ہزار ٹن گندم لائی گئی ہے۔ جہاز سے گندم اتارنے کا کام سات سے دس روز میں مکمل کر لیا جائے گا۔

مشرقی بحری گواور بندر گاہ کا دورہ کرینگے

اسلام آباد (این این آئی) صدر مشرف علی بدھ کو گواور بندر گاہ کا دورہ کرینگے جہاں وہ گواور پورٹ پر ٹکرا کر اٹل ہونے والے بحری جہاز سے گندم اتارنے کے عمل کا جائزہ لیں گے۔

گواور میں گہرے پانی کی بندرگاہ

نے کام شروع کر دیا، 70 ہزار ٹن سے زائد گندم لیکر پہلا جہاز تیار کیا

کوئٹہ (آن لائن) گواور میں گہرے پانی کی بندرگاہ نے گزشتہ روز سے کام شروع کر دیا ہے۔ پہلا جہاز 70 ہزار ٹن سے زیادہ گندم لے کر بندرگاہ پر پہنچا۔ بی بی سی کے مطابق مقامی لوگوں نے روزگار کے حوالے سے اپنے خدشات کا اظہار کرتے ہوئے کہا ہے کہ کراچی سے بڑی تعداد میں مزدوروں کو گواور لایا گیا ہے۔ بلوچستان کے محکمات ذریعہ ملے ہوئے گندم سے گواور میں بحری جہاز کو خوش آمدید کہا ہے۔ گواور سے ٹیلیفون پر محکمات ذریعہ ملے ہوئے بی بی سی کو بتایا ہے کہ بحری جہاز پاکستان کی تاریخ میں پہلی مرتبہ اتنی زیادہ مقدار میں گندم لایا ہے اور اس سے بدلتی ہوئی صورتحال کی بھرتی ہوئی ہے۔ بلوچستان کے لوگوں کے لیے خوشی کا مقام ہے کیونکہ اس سے معاشی گرمیاں تیز ہوں گی۔ ہزاروں لوگوں کو روزگار ملے گا۔

گندم کی سرکاری خریداری کا ہدف 50 لاکھ ٹن مقرر کر دیا گیا

گندم کی خریداری کے لئے مجموعی طور پر 63 ارب 75 کروڑ روپے خرچ ہونگے

پشاور (آن لائن) وفاقی حکومت نے رواں مالی سال میں گندم کی سرکاری خریداری کا ہدف 50 لاکھ ٹن سے کم کر پچاس لاکھ ٹن مقرر کر دیا ہے۔ ذرائع کے مطابق یہ فیصلہ ملک میں کسان تنظیم کے پیش نظر گندم کے پیداواری ہدف دو کروڑ پچاس لاکھ ٹن حاصل نہ ہونے کے بعد تحفظات کے پیش نظر کیا گیا ہے۔ ذرائع نے بتایا ہے کہ اس سلسلے میں محکمہ خوراک صوبہ سرحد کو بھی اس گندم کی سرکاری خریداری کے لئے امدادی قیمت 510 روپے فی کلو چالیس روپے مقرر کی ہے۔ اس کے حساب سے پچاس لاکھ ٹن گندم کی خریداری کے لئے مجموعی طور پر 63 ارب 75 کروڑ روپے خرچ ہونگے۔

لے رواں مالی سال گندم کی خریداری کے لئے حکومت کو بنکوں سے قرضے لینے کے لئے معمرت کی شرح بارہ فیصد مقرر کی ہے۔ واضح رہے کہ وفاقی حکومت کی جانب سے گندم کے چالیس کلو خریداری کے لئے امدادی قیمت 510 روپے مقرر کرنے پر کاشتکار تنظیموں، غور ملوں اور گندم کی خریداری سے متعلق سرکاری محکموں نے تحفظات کا اظہار کیا ہے کہ اس قیمت پر وفاقی حکومت اور وزارت خوراک کے صوبائی محکموں کو گندم نہیں ملے گی۔ اس وقت دیگر ممالک سے درآمد کی جانے والی گندم پاکستان پہنچ کر فی کلو گرام قیمت 1680 روپے ہیں اور اگر حکومت نے نظر جاتی کر کے گندم کی امدادی قیمت مانی منڈی کی قیمت کے مطابق نہیں کی تو ملک میں بڑی مقدار میں گندم سبوتاہ ہوگی۔

گواذر بندر گاہ پر نئی تاریخ کے سب سے بڑے بحری جہاز سے گندم اتاری جا رہی ہے اس کی لمبائی 235 فٹ ہے

گواذر بندر گاہ نے باقاعدہ کام شروع کر دیا
کینیڈا سے 73 ہزار ٹن گندم لیکر
پہلا بحری جہاز گواذر پہنچ گیا

گواذر (خاندانہ) بلوچستان کے جنوب مغربی ساحلی شہر گواذر میں چین کے مانی تھوان سے بننے والی نئی بندر گاہ نے جمعہ سے باقاعدہ کام کا آغاز کر دیا ہے۔ حکام کے مطابق کینیڈا سے 73 ہزار ٹن گندم لے کر پہلا بحری جہاز گواذر کے لیے پہنچا جہاں حکمران وزیر اعلیٰ سردار صالح بھوٹانی اور دوسرے حکام نے اسے خوش آمدید کہا۔

بقیہ نمبر 34

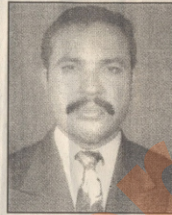

ہے لیکن بد قسمتی سے ہمارے عوام بے خبر ہیں، عوام میں شعور اجاگر کرنے کیلئے ہم چلائی جائے گی، اس سلسلے میں پہلا پانچ روزہ "گوارڈ پرموشن فیئول" اگلے ماہ لاہور میں منعقد کراہیں گے، بلوچستان میں اس وادمان کی صورتحال کو گوارڈ کے ساتھ منسلک نہیں کرنا چاہیے۔ ہم گوارڈ کے حوالے سے حکومت کی پالیسی سے مطمئن ہیں۔ ان خیالات کا اظہار گوارڈ پرموشن ایئس کے رہنما ڈاکٹر ڈیپلر ز نے گزشتہ روز "ایکسپریس فورم" میں کیا، میزبانی کے فرائض اجمل ستار ملک اور شاہ جاوید ڈسکوی نے ادا کئے۔ اس موقع پر الاصل ڈیپلر ز کے ایگزیکٹوز سیکرٹری باقر بلال حسین نے کہا کہ گوارڈ کے حوالے سے پاکستانی عوام میں جو شعور اجاگر ہوتا جا رہا ہے قیادہ نہیں ہو پانچ بجے غیر ملکیوں کو اس منصوبے کی اہمیت کا اندازہ ہے۔ انہوں نے بتایا کہ اس وقت امریکہ، چین اور عرب ملک وہاں سرمایہ کاری کر رہے ہیں مگر ہمارے کاروباری طبقے نے اس موقع کا فائدہ نہ اٹھایا تو ان کے پاس بچتھادے کے سوا کچھ باقی نہیں رہے گا۔ گوارڈ کے حوالے سے حکومت نے جو پالیسی اپنائی ہے ہم اس سے مطمئن ہیں وہاں تیزی سے ترقیاتی کام ہو رہے ہیں، گوارڈ ڈیپلٹمنٹ اتھارٹی اپنی ذمہ داریوں کو بخوبی احسن طریقے سے نبھا رہی ہے، کوئل ہائی وے ریکارڈز میں پایہ تکمیل تک پہنچی۔ انور کارگوٹی گوارڈ کے ڈائریکٹر مارک ٹنگ ابرار خان نیازی نے کہا کہ اس حوالے سے لوگوں کے جو تحفظات ہیں وہ بے بنیاد ہیں، بعض لوگوں نے گوارڈ میں سرمایہ کاری کے وقت غلط فیصلے کئے، انہوں نے اتھارٹی سے زمین خریدنے کی بجائے باہر سے زمین خریدی اور مشکلات کا شکار ہوئے۔ ایک سوال کے جواب میں انہوں نے بتایا کہ اس وقت کل 67 ملین ڈالر جن کو این اوی حاصل ہے اور وہ جی ڈی اے سے منظور شدہ اتھارٹی ہیں آج تک کوئی ایسا فراڈ سامنے نہیں آیا جن میں ان منظور شدہ

اتھارٹوں کا نام آیا ہو۔ ملین ڈالروں میں دیکھیں اور زمین ان لوگوں سے خریدیں جن کے پاس این اوی موجود ہے۔ ٹی ایس ڈیپلر ز کے پروڈیجٹ ڈائریکٹر چودھری خالد محمود نے کہا کہ گوارڈ پرموشن پوری دنیا کیلئے انتہائی اہمیت کی حامل ہے اور پوری دنیا کی نظریں اس پر جمی ہوئی ہیں، اس منصوبے کی تکمیل سے پاکستان کے اندر معاشی انقلاب آئے گا پاکستان کا معاشی اور صنعتی مستقبل اب گوارڈ کے ساتھ وابستہ ہے۔ گوارڈ نہ صرف بلوچستان کے لئے بلکہ پنجاب کے لئے بھی گیٹ وے کا کردار ادا کرے گا حکومت ہمیں اپنے ساتھ لے کر چلے، وائٹ پرل کے ڈائریکٹر مارک ٹنگ علی رضائے نے کہا کہ عوام کے اندر اس حوالے سے شعور بیدار کرنے کے لئے ہم نے باقاعدہ کام کا آغاز کر دیا ہے اس سلسلے میں پہلا پانچ روزہ "گوارڈ پرموشن فیئول" جن میں لاہور میں منعقد کراہیں گے اس کے بعد ملک اور بیرون ملک بھی یہ سلسلہ جاری رہے گا۔ چائے وٹلج کے جنرل میجر سعید مغل نے کہا کہ حکومت گوارڈ میں کام کرنے کے لئے ہمیں مزید سہولیات فراہم کرے قیادہ اتھارٹی مشنری پر ڈیوٹی ختم کی جائے، اشتہاری ہم کے دوران ہمیں سہولت فراہم کی جائے۔ بیادوٹن کے ڈائریکٹر مارک ٹنگ قاری سعید الرحمان نے کہا کہ ایئس بنانے کا مقصد گوارڈ کے حوالے سے متنی رجحان کا خاتمہ اور مثبت خبروں کی فراہمی ہے تاکہ عوام کے تحفظات کو دور کیا جاسکے۔ انہوں نے کہا کہ عوام کو یہ بات اچھی طرح سمجھ لینی چاہیے کہ گوارڈ کوئی فراڈ نہیں بلکہ یہ پاکستان پر اللہ کی نعمت ہے۔

روزنامہ "لیڈر" (6) 30 مئی 2006ء

گودار پراجیکٹ کی تکمیل پاکستان میں معاشی انقلاب کا باعث بنے گی

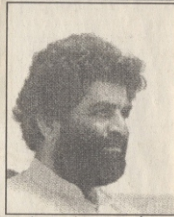

پراجیکٹ 70ء میں شروع کیا جاتا تھا اور دینی کی طرح مقام کا حال ہو گا، گودار پروجیکٹ کے انجینئروں نے انجینئر، علی رضا، جباری، سعید الرحمن کا "لیڈر" فورم میں اظہار خیال

ابراہیم خان یار (ڈائریکٹر مارکیٹنگ انفرکاسٹریکچر) اور سعید الرحمن (انجینئر) گودار پراجیکٹ کے انجینئروں نے انجینئر، علی رضا، جباری، سعید الرحمن کا "لیڈر" فورم میں اظہار خیال

آگے بڑھ رہے ہیں۔ بلوچستان جو کہ معدنی ذخائر کی دولت ہے، اہل ہاں ہے اس صنعت میں بھی سرمایہ کاری کی ضرورت ہیں ہم اس فورم سے لوگوں تک یہ پیغام پہنچانا چاہتے ہیں کہ آج وہاں جا میں اور ملکی معیشت کی قسمت بدلنے والے پراجیکٹ کی تیز تکمیل کو خود دیکھیں اور اس عظیم منصوبے میں سرمایہ کاری کریں جو کسی بھی خطے میں ہو سکتی ہیں مستقبل میں گودار کی اہمیت سے انکار ممکن نہیں ہوگا۔ سرمایہ کاروں کیساتھ ساتھ عام آدمی کو بھی اس سہری موقع سے فائدہ اٹھاتے ہوئے وہاں سرمایہ کاری کرنی چاہیے۔ گودار پروجیکٹ کے قیام کا مقصد یہی ہے کہ لوگوں میں گودار کے حوالے سے شعور راجا کر دیا جائے اور میڈیا کو اپنے ساتھ لے کر چلتے ہوئے گودار پراجیکٹ کو آگے بڑھنے اور گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم

کاری ہو رہی ہے اسے شیت درج دینے کی ضرورت ہے ہماری میڈیا سے گزارش ہے کہ جس مقصد کے لیے ہم نے گودار پروجیکٹ کو شروع کیا اس کے پلٹ فارم سے اپنی جدوجہد کا آغاز کیا اس میں شعور اجاگر کر کے، بی بی سی ایس ایس کو ایک تحریک کاروبار دینے کے لیے کوششیں کر رہے ہیں ہماری حکومت سے درخواست ہے کہ گودار پراجیکٹ کو آگے بڑھنے اور گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم

ابراہیم خان یار (ڈائریکٹر مارکیٹنگ انفرکاسٹریکچر) اور سعید الرحمن (انجینئر) گودار پراجیکٹ کے انجینئروں نے انجینئر، علی رضا، جباری، سعید الرحمن کا "لیڈر" فورم میں اظہار خیال

بدلتے ہوئے عالمی حالات کے تناظر میں گودار بارے، حکومتی اقدامات قابل ستائش ہیں

پانچ روزہ گودار فیسٹیول کا مقصد عوام میں پراجیکٹ کے حوالے سے شعور اجاگر کرنا ہے

گودار پراجیکٹ میں صدر اور وزیراعظم خصوصی دلچسپی لے رہے ہیں

میڈیا کو اپنے ساتھ ساتھ لے کر چلتے ہوئے گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم کو ہم گودار پراجیکٹ کے انجینئروں نے انجینئر، علی رضا، جباری، سعید الرحمن کا "لیڈر" فورم میں اظہار خیال کرتے ہوئے گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم

مسلحہ کی سلامتی اور دفاع کیلئے جاکر قرار دیتی رہی ہیں تو بدلتی ہوئی اقتصادی دنیا میں اس کی کئی اہمیت بھی نمایاں ہوئی ہے ہاسکوائے، شنگ آباد، قدر حاد اور گودار تک ریلوے لائن کا تذکرہ ہے تو مسلم لیٹائی ریاستوں سے مل کر سیٹائی کی باتیں بھی زبان زد عام ہیں بیجنگ سے شاہراہ کراچی کے راستے تھمڑت کا حوالہ بھی دیا جاتا ہے اور پھر اسی عدم علاقہ کو دشمن کی صف سے دور دھکی کر مگر نہانے کا مزمع کا اظہار بھی

جن کی بنیاد پر گودار کی ترقی کے ساتھ شعیر

اور اس کو مستقبل کا اقتصادی ماہرین کا خیال

ہے گودار پراجیکٹ میں پانچ روزہ گودار فیسٹیول کا مقصد عوام میں پراجیکٹ کے حوالے سے شعور اجاگر کرنا ہے

میڈیا کو اپنے ساتھ ساتھ لے کر چلتے ہوئے گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم کو ہم گودار پراجیکٹ کے انجینئروں نے انجینئر، علی رضا، جباری، سعید الرحمن کا "لیڈر" فورم میں اظہار خیال کرتے ہوئے گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم

کی صورت حال سے آگاہی کے لیے ہم میں کرنی کی ہے انہوں نے مزید کہا کہ گودار پراجیکٹ کے انجینئر، علی رضا، جباری، سعید الرحمن کا "لیڈر" فورم میں اظہار خیال کرتے ہوئے گودار کی ترقی کے حوالے سے اپنا کردار بہتر طریقے سے ادا کر سکیں اور اسی عزم

پاکستان اور چین کے سیاسی اور سٹریٹجک اہداف ایک جیسے ہیں: گورنر

دونوں ممالک کی دوستی شدید سے بھی زیادہ بڑھتی ہے: چین کے میڈیا وفد سے بات چیت

لاہور (خصوصی رپورٹر) عوامی جمہوریہ چین کے ایک میڈیا وفد نے آج گورنر ہاؤس لاہور میں پنجاب کے گورنر یلینٹ جنرل (ر) خالد مقبول سے ملاقات کی۔ چائینیز انٹرنیشنل ڈیپارٹمنٹ آف فوک اینڈ کچر کی ڈائریکٹر سزینگ وانگ (Ping Wang) کی قیادت میں پاکستان کے خبر سگالی دورے پر آئے ہوئے اس وفد میں شنگھائی انسٹی ٹیوٹ فار سٹریٹجک سٹڈیز، چائنا آرمر کنٹرول اینڈ ڈس آرمانٹ ایسوسی ایشن کے نمائندے، ورلڈ نیوز جرنل اور لگ وی میگزین سے شملک صفائی شامل ہیں۔ گورنر خالد مقبول نے وفد کی لاہور کا خیر مقدم کرتے ہوئے کہا کہ پاکستان اور چین کے سیاسی اور سٹریٹجک اہداف ایک جیسے ہیں۔ یہ بہت اچھی بات ہے کہ چین اور پاکستان ایک دوسرے کی سیاسی خود مختاری کے احترام پر کامل یقین رکھتے ہیں۔ گورنر نے کہا کہ وقت کی بہت سی آزمائشوں سے کامیابی کے ساتھ عہدہ برآ ہونے کے بعد دونوں ممالک کے مابین دوستانہ مراسم اتنی مضبوط بنیاد پر استوار ہو چکے ہیں کہ بلاشبہ یہ دوستی کوہ ہمالیہ سے کہیں زیادہ بلند، بحر الکاہل سے کہیں زیادہ گہری اور شدید سے بھی زیادہ بڑھتی ہے۔ گورنر نے کہا کہ پاکستان کے صوبہ بلوچستان کے ساحل پر گوادر پورٹ کی تعمیر پورے خطے کی اقتصادی ترقی کے لئے بہت زیادہ اہمیت رکھتی ہے۔ اس منصوبے کی تکمیل میں چینی انجینئرز نے نمایاں طور پر حصہ لیا ہے۔ مستقبل میں چین کی تجارتی مصنوعات گوادر پورٹ کے ذریعے ہی مشرق وسطیٰ، وسطی ایشیا اور پوری دنیا تک پہنچیں گی جبکہ مشرق ایشیا کی ریاستوں سے تیل، گیس اور توانائی کے دیگر وسائل اسی بندرگاہ کے ذریعے عوامی جمہوریہ چین تک پہنچائے جائیں گے۔ درس اثناء الابرار سفر فار پولیٹیکل سٹریٹجی مصر کے خصوصی نمائندے ڈاکٹر حسن احمد ابو طالب کی قیادت میں مصری میڈیا کے ایک وفد نے بھی آج لاہور میں گورنر خالد مقبول سے ملاقات کی۔

تعمیراتی کاموں میں شروع ہو گا، منصوبے پر 5 ارب ڈالر کی آئینی 8 ہزار افراد کو روزگار ملے گا۔

یاؤٹ 2.066 ڈالر کا ہو گیا

لندن (مانیٹرنگ سیل) برطانوی پاؤنڈ 2.066 ڈالر کی
26 سالہ بلند ترین سطح پر پہنچ گیا۔

پاکستان کے 25 فیصد شیئر ہونگے، منصوبے سے 5 سے 8

وزیراعظم سواتی تجاویز اور اقتصادی ترقی کے سالہ منصوبے پر پاک چین اتفاق

پاکستان اور چین سے تعلقات کو مزید مضبوط بنانے کیلئے ٹرانزٹ ٹریڈ معاہدہ کی طرف پیش رفت کر لی ہے: وزیر خارجہ شاہ محمود قریشی

ریٹھ (اسے پی پی) پاکستان اور چین نے اپنے ٹریڈ معاہدہ کی بنیاد پر ایک سالہ منصوبہ پر اتفاق کیا۔ وزیر خارجہ شاہ محمود قریشی نے چین کے نائب وزیر خارجہ کی قیادت میں وفد کو گوارہ سے چین تک شاہراہ

مطابق 18 ستمبر 19

قرارداد کے ساتھ ساتھ دہلی سے لائن اور کس پاکستان بھائی جانے اور اس سلسلے میں امکانات کا جائزہ لیا گیا۔ صدر پرویز مشرف جو چین کے 6 روزہ دورہ پر ہیں، نے چینی رہنماؤں کے ساتھ چار بات چیت کے دوران مختلف معاملات پر اہم فیصلہ کیے۔ صدر مشرف نے باؤ فورم کے سالانہ اجلاس میں شرکت اور شیا میں چینی صدر ہوجن تاؤ سے بات چیت کے بعد دارالحکومت بیجنگ میں وزیراعظم باؤس میں چین کے وزیراعظم ون جیا باؤ سے ملاقات کی۔ دونوں رہنماؤں نے تمام شعبوں میں اسے تعلقات کو مزید مضبوط بنانے کے لئے اپنے عزم کا اعادہ کیا۔ صدر مشرف نے کہا کہ وہ چین کی تیز رفتاری اور ترقی دیکھنے کے لئے آئے ہیں۔ چینی وزیراعظم نے کہا کہ صدر مشرف کے دور سے دووں ممالک کے درمیان دوستانہ تعلقات کو مزید فروغ ملے گا۔ وزیر خارجہ شاہ محمود قریشی نے "اسے پی پی" کو بتایا کہ بات چیت کے حدود اور اس میں فریقین نے پاک چین تجارتی دہلی دوڑ کرنے کے لئے مناسب اقدامات کرنے کی ضرورت پر بھی بات چیت کی۔ انہوں نے کہا کہ دونوں ممالک نے تجارت اور اقتصاد کی ترقی کے لئے پاک چین معاہدے سے اتفاق کیا اور اس درجے میں آنے والے منصوبوں کو ماحولیاتی قرضے دینے جائیں گے۔ پاکستان اور چین نے 2006ء میں آزادانہ تجارتی معاہدے پر دستخط کیے تھے۔ دہلی تجارت کا حجم اس وقت تقریباً 7 ارب ڈالر ہے۔ دونوں ممالک نے خزانہ، شماری منصوبہ بندی اور تعمیرات کی وزارتوں اور پی پی وی و جائیدادیں ملٹی وچین کے درمیان تعاون کے لئے مزید چین معاہدوں پر دستخط کیے۔ ٹیکس کے بارے میں معاہدے کا مقصد دونوں ممالک کے بینکاری شعبوں کو پالیسیاں وضع کرنے، معلومات کے تبادلے اور عالمی مالیاتی اداروں کے ساتھ چین دین میں رابطے کرنے کے حوالے سے قریب لانا ہے۔ سی ڈی ایس اور چین کی ایکٹیو فارم ایڈوائز ان کے درمیان معاہدے سے سی ڈی ایس کو ماحول کی ڈی انکلیک اور ٹاؤن پلاننگ میں مدد ملے گی۔ بات چیت کے دوران فریقین نے گوارہ بندرگاہ کو چین کے ساتھ ملانے کے لئے شاہراہ اور قراقرم کے ساتھ ملنے لائن تعمیر کرنے کی ضرورت پر مشرف کی تجویز کو عملی شکل دینے پر بھی تبادلہ خیال کیا۔ چین کی ایک قریبی پہلے ہی فریقین ملٹی کرائی سے اور اپنی تجارت صدر ہوجن تاؤ کو چین کر دی ہے۔ صدر مشرف نے کہا کہ یہ منصوبہ مکمل ہونے پر دنیا کو اس جوہر کا بارہا بات چیت کے دوران پاکستان اور چین کے مابین ویزا، ریس اور دیگر معاملات میں آسان بنانے کے لئے کام کر رہی ہیں۔ چین کے امکان پر بھی غور کیا گیا۔ دونوں ممالک نے شاہراہ قراقرم کے ساتھ کس پاکستان بھائی کے مابین باہمی جائیداد

گواڈر بندرگاہ نے باقاعدہ کام شروع کر دیا -- خبریں

بلوچستان کے جنوب مغربی ساحلی شہر گواڈر میں چین کے مالی تعاون سے بننے والی نئی بندر گاہ نے جمعے سے باقاعدہ کام کا آغاز کر دیا ہے۔ حکام کے مطابق کینیڈا سے 73 ہزار ٹن گندم لے کر پہلا بحری جہاز گواڈر کے لیے پہنچا جہاں نگران وزیر اعلیٰ سردار صالح بھوٹانی اور دوسرے حکام نے اسے خوش آمدید کہا۔ تاہم مجموعی طور پر ایک لاکھ ٹن سے زیادہ وزنی یہ جہاز گواڈر بندر گاہ سے 10 ناٹیکل میل کے فاصلے پر کھڑا کیا گیا ہے جس کی وجہ بتاتے ہوئے گواڈر پورٹ اتھارٹی کے چیئر مین ایڈمرل احسان سعید نے کہا کہ کہ بندرگاہ اس وقت 50 ہزار ٹن کارگو کو ہینڈل کرنے کی استعداد رکھتا ہے اور ہانگ کانگ کی ایک شپنگ کمپنی کی ملکیت یہ جہاز پاکستان کی تاریخ میں پہلی مرتبہ اتنی زیادہ مقدار میں گندم لے کر پہنچا ہے۔

ان کا کہنا تھا کہ اس جہاز سے چھوٹے بحری جہازوں میں گندم اتاری جا رہی ہے تاکہ اس کا وزن کم ہو اور ایک دو روز میں گواڈر کی بندر گاہ پر باقاعدہ لنکر انداز ہو۔ ان کا کہنا تھا کہ کراچی کے پورٹ قاسم پر صرف 35 ہزار ٹن تک کے جہاز آ سکتے ہیں۔ ادھر گواڈر سے صحافیوں نے بتایا ہے کہ مقامی لوگوں نے بندر گاہ میں روزگار کے حوالے سے تحفظات کا اظہار کیا ہے ان کے بقول گندم سے لدے بحری جہاز کو خالی کرنے کے لئے کراچی سے 700 کے لگ بھگ مزدوروں کو گواڈر لایا گیا ہے۔

واضح رہے کہ چین کی جانب سے 248 ملین ڈالر کے مالی تعاون سے گواڈر میں گہرے پانیوں کی بندرگاہ پر کام کا آغاز 2002ء میں ہوا تھا اور گزشتہ سال مارچ میں صدر پرویز مشرف نے اس کا افتتاح کیا تھا

Nidaia -- روسی جہاز پہنچ گئے، آج گوادری پورٹ کو فنکشنل کرنے کا اعلان ہو گا**Waqat**

گوادر (ندائے وقت رپورٹ) گوادر پورٹ پر ہفتہ کی شام 2 روسی جہاز 55 ہزار میٹرک ٹن یوریا لیکر پہنچ گئے ہیں۔ وفاقی وزیر پورٹس اینڈ شپنگ نبیل احمد گبول آج ایک تقریب میں گوادر پورٹ کو فنکشنل کرنے کا اعلان کریں گے، جس کے بعد باقاعدہ طور پر دونوں جہاز پورٹ پر یوریا اتارنے کا عمل شروع کریں گے۔ یہ بات وفاقی وزیر نے صحافیوں سے گفتگو کرتے ہوئے کہی۔ نبیل احمد گبول نے کہا ہے کہ بلوچستان کے عوام کے ساتھ پیپلز پارٹی کی حکومت نے جو وعدے کئے تھے ان کو پورا کیا جا رہا ہے۔ گوادر کے عوام کو روزگار کی فراہمی کے لئے میرٹ کی بنیاد پر ملازمتیں فراہم کی جائیں گی۔

All Day

Daily Jang -- گزشتہ نو ماہ میں گوادر پورٹ سے 12 لاکھ ٹن یوریا درآمد کی گئی

20 دسمبر 2008 سے 30 ستمبر 2009 تک گوادر پورٹ سے 12 لاکھ ٹن سے زائد یوریا کھاد درآمد کی... گوادر گنی شپنگ ذرائع کے مطابق پورٹ آف سنگا پور، گوادر کی ناکامی اور حکومت بلوچستان کے اصرار پر پورٹ آپریشنل بنانے کے لیے یوریا کھاد کی درآمد کا سلسلہ 20 دسمبر 2008 سے شروع کیا گیا تھا اور اب تک اس عرصے میں پورٹ پر 42 جہاز لنگر انداز ہو چکے ہیں۔ ذرائع کے مطابق اب تک 12 لاکھ 14 ہزار ٹن یوریا کھاد کی درآمد بذریعہ گوادر پورٹ کی گئی ہے تاہم قومی خزانے کو اس ضمن میں شدید نقصانات کا سامنا رہا ہے جس کی اہم وجہ گوادر سے کراچی آمد و رفت کی مد میں بھاری اخراجات کے ساتھ ٹی سی پی کی جانب سے پورٹ چارجز اور پی ایس اے گوادر سے مذاکرات نہ کیا جانا ہے۔ شپنگ ذرائع نے بتایا کہ مزید چھ لاکھ ٹن یوریا کھاد کی درآمد کا سلسلہ رواں ماہ کے اواخر سے شروع ہو کر دسمبر میں مکمل ہو جائے گا اور اس طرح دسمبر 2008 سے دسمبر 2009 تک کل درآمد 18 لاکھ ٹن سے تجاوز کر جائے گی۔

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

BBC Urdu -- گوادر میوزیم کے لیے امداد، نوادرات

نوادرات گوادر قلعے میں قائم عجائب گھر میں رکھی جائیں گی اومان نے گوادر کے ساحلی شہر میں عجائب گھر کے قیام کے لیے بیس ہزار ڈالر امداد کے علاوہ کئی قیمتی نوادرات پاکستان کے حوالے کی ہیں۔ اسلام آباد میں تعینات اومان کے سفیر محمد الواتی نے امداد رقم اور نوادرات جمعرات کے روز سیکرٹری ثقافت کے ساتھ ایک ملاقات میں ان کے حوالے کی۔ اومان کے سفیر نے جو نوادرات پاکستان کے حوالے کی ہیں ان میں ایک بندوق، ڈھال، خنجر اور زیورات شامل ہیں۔

یہ نوادرات گوادر قلعے میں قائم عجائب گھر میں رکھی جائیں گی۔ امدادی رقم عجائب گھر کی تزئین و آرائش پر خرچ کی جائے گی۔

حکومت پاکستان نے شاہی تمپ اور مری قلات سے ملنے والے نوادرات بھی جو اس وقت کراچی میں محکمہ آثار قدیمہ کے پاس رکھے ہیں گوادر کے عجائب گھر منتقل کرنے کا ارادہ کر رکھا ہے۔ گوادر قلعہ اس وقت پولیس کے زیر استعمال ہے۔

گوادر عجائب گھر کی تزئین و آرائش کے بعد باقاعدہ افتتاح توقع ہے کہ آئندہ تین ماہ میں کر دیا جائے گا۔ اس سے توقع ہے کہ اس دلکش ساحلی شہر کی اہمیت میں اضافہ ہوگا۔

اگرچہ صوبہ بلوچستان کی آثار قدیمہ کے اعتبار سے اہمیت کسی سے ڈھکی چھپی نہیں لیکن بدقسمتی سے پورے صوبے میں کوئی باقاعدہ عجائب گھر موجود نہیں۔ حکومت صوبائی دارالحکومت میں بھی ایسے ہی ایک

عجائب گھر کی عمارت کے لیے اراضی حاصل کرنے کی کوشش کر رہی ہے۔

Gwadar Oil City Project -- ISLAMABAD - APP

Gwadar oil city project

Gwadar oil city project stumbles By Khalid Mustafa ISLAMABAD: A mega oil city at Gwadar port, which is the most strategic project with an investment of \$40 billion, has hit snags as the process of acquiring land has been delayed because of a massive rise in prices of real estate. The Government of Balochistan has informed the federal government that the cost of land for the oil city has increased manifold, which is why it is not possible to acquire land on nominal rates. The government wants to establish at the Gwadar port the biggest crude and refined oil storage base in the region, for which it had allotted 12,500 acres of land in 2006. It had announced that the required land be made available on lease at nominal rates to interested parties for setting up refineries or making investment in oil logistics and storage facilities. But in the latest scenario, the cash-strapped Balochistan government has no money to pay the high cost of the land needed for the project. An official said the Balochistan administration had told the Centre that it had identified 100,000 acres of land for the project at a cost of Rs38,000 to 40,000 per acre. Balochistan also requested for release of Rs3.8 billion to acquire the land and warned of more increase in land prices if funds were not released timely. Under the plan, the official said, the project would be executed in two phases. In Phase-1, a petrochemical city will be set up with an initial investment of \$12.5 billion. In this city, a big refinery, along with petrochemical, oil logistics and storage complexes will be set up. In the first three years, the refinery will be able to refine 10.5 million tonnes of oil annually. This capacity will be increased up to 21 million tonnes in seven to nine years. The official said Chinese Petroleum Chamber would come up with a \$12.5 billion investment plan for the project. On behalf of China, Great United Petroleum Holdings Company Limited (GUPC) is working on the feasibility study of the petrochemical city project. The official said GUPC would first conduct the feasibility study and preparation work for the project and then both countries would enter into a formal agreement for materialising the petrochemical city project. The official said GUPC would also build 1,000-2,000 service stations in Pakistan as service terminals for the petrochemical city.

Govt Seeks Foreign Capital in Balochistan -- ISLAMABAD - The News

Govt Seeks Foreign Capital in Balochistan

Thursday, January 15, 2009

By By our correspondent

ISLAMABAD: State Minister for Industries and Production, Dr Ayatullah Durrani, has said the government has invited foreign investors to invest in Balochistan, which provides many opportunities of investment, particularly in the field of mines and minerals.

Besides the education sector, he said, various development schemes had been launched in Balochistan and Gwadar port was one of them. After the start of the port, he said, business activities had increased in the province, "which is a good sign for the people of Balochistan."

گواہر بندرگاہ: ریل اور سڑکوں کے رابطے مکمل کیے جارہے ہیں -- خبریں

گواہر پورٹ اتھارٹی کے چیئرمین ریٹائرڈ ایڈمرل احسان سعید کا کہنا ہے کہ گہرے پانیوں کی زیر تعمیر نئی بندرگاہ اس وقت تک مکمل فائدہ مند ثابت نہیں ہوسکتی جب تک اسے ریلوے اور سڑکوں کے ذریعے ملک کے دوسرے علاقوں سے نہیں ملایا جاتا۔

انہوں نے بتایا ہے کہ بنیادی طور پر یہ بندرگاہ وسطی ایشیائی ممالک اور افغانستان کے ساتھ ٹرانزٹ تجارت کے لیے بنائی گئی ہے، اور ان ممالک کی طرف کوئٹہ اور چمن تک راستے بنانے میں مزید کئی سال لگ سکتے ہیں۔

اس حوالے سے یہ بات اہم ہے کہ 'وائس آف امریکہ سے بات چیت میں ایڈمرل (ر) احسان سعید نے کہا کہ: گواہر کے ساتھ سڑک کے ذریعے رابطہ ہو۔ اس بندرگاہ کا اہم مقصد ہے وسطی ایشیائی ریاستوں سے ٹرانزٹ ٹریڈ، جس کے لیے سڑک کے رابطے کا ہونا لازم ہے۔ جب یہ رابطہ بحال ہوگیا تب ہی کمرشل رابطے شروع ہوں گے۔

احسان سعید کا کہنا تھا کہ اب تک بندرگاہ پر سرکاری کارگو کے بارہ بڑے جہاز لنگر انداز ہوئے ہیں جس پر درآمد کیے جانے والا گندم اور کیمیائی کھاد لدا ہوا تھا اور اس سے علاقے میں بڑے پیمانے پر روزگار اور ٹرانسپورٹیشن کے مواقع پیدا ہوئے۔ مگر ان کا کہنا تھا کہ وفاقی حکومت نے گواہر کی طرف بحری جہازوں کا رُخ اسے فعال بنانے کے لیے کیا ہے جس پر بھاری سبسڈی دی جارہی ہے۔

ان کے بقول، اس وقت گواہر بندرگاہ سے تقریباً پندرہ ہزار ٹن کیمیائی کھاد روزانہ ملک کے دوسری حصوں کو بھجوا رہا ہے، جب کہ عنقریب گندم اور کوئلے سے لدے مزید بحری جہاز بھی گواہر پر لنگر انداز ہوں گے۔

یاد رہے کہ چین کے مالی تعاون سے بننے والی بندرگاہ ایک ماہ قبل فعال کردی گئی تھی۔

Development of Gwadar Port road linkages NHA's top priority -- The News

Development of Gwadar Port road linkages NHA's top priority

Tuesday, February 17, 2009

ISLAMABAD: The National Highway Authority (NHA) was attaching top priority to development of road linkages to the Gwadar Port which can prove backbone of the country's economy in the near future.

The source said construction work would be started on Kallat-Quetta-Chaman road in few days while the roads from Khanozai to Qilla Saifullah and Gwadar to Jewani have been completed. He also said work on Gwadar-Gabd and Qilla Saifulah-Zhob is near completion, as the Federal Government has released funds. The road from Ratodero to Shahdadkot is also nearing completion and would be opened within one month.

Gwadar as Capital -- The News

Gwadar as capital

Saturday, May 16, 2009

A proposal is on to make the port city of Gwadar on the Makran Coast Balochistan's winter capital. The plan could bring big economic gains for the area, currently one of the least developed in Pakistan, and for the province as a whole. For these reasons the plan should be encouraged. Using two centres as administrative capitals is after all not unique, and was the established practice in colonial times when the entire administrative apparatus shifted with the first heat-laden winds of summer from New Delhi to Simla.

Balochistan will soon become regional -- QUETTA - The News
Balochistan will soon become regional

Wednesday, May 20, 2009
trade gateway: Raisani

: Balochistan will be connected through a railway network with other provinces and also Iran and Afghanistan following which the province will become trade gateway in the region, said Balochistan Chief Minister Nawab Muhammad Aslam Raisani on Tuesday.

Speaking on the occasion, Bilor said preliminary work on Zhob-Dera Ismail Khan and Chaman-Kandahar railway track had been completed while work on the remaining portion of the railway line would be started soon.

Bilor said the Cargo-Container Train Services (CCTS) would be started between Islamabad and Tehran on August 14, 2009, adding the CCTS would run from Islamabad via Quetta and Taftan following which it would enter Iran.

Referring to the Gawadar-Mastung railway track, the federal minister said its preliminary feasibility report had been prepared which had also been sent to the planning division for consideration and subsequent approval.

Gwadar to be linked through rail, road networks: PM -- ISLAMABAD - Daily Times

Gwadar to be linked through rail, road networks: PM
18.06.09 -

ISLAMABAD: The government plans to link the Gwadar seaport with the rest of the country through rail and road networks, Prime Minister Yousaf Raza Gilani said on Wednesday.

Responding to a suggestion of Pakistan Muslim League-Quaid (PML-Q) parliamentarian Ghous Buksh Mehar during the debate on the 2009-10 budget in the National Assembly, he said the government would develop the infrastructure in Balochistan and link Gwadar to other parts of the country. He said the Gwadar port was being used to import wheat and fertilizer, adding it would be transformed into a business and economic hub that would generate employment opportunities for the local population.

Pakistan, Tajikistan sign joint protocol

ISLAMABAD, Jul 21 (APP): Pakistan and Tajikistan on Tuesday signed a joint protocol at the end of Pak-Tajik Joint Economic Commission (JEC) meeting for further cooperation in many areas. The protocol was signed by Minister for Water and Power Raja Pervez Ashraf and Tajik Minister for Energy and Industry Gul Sherali.

Both sides decided to establish Joint Business Forum between the business community of both countries. Tajik Government invited businessmen from Pakistan to participate in exhibition in Dushanbe during late part of this year.

Both sides agreed to sign the Preferential Trade Agreement (PTA) 2009.

To facilitate trade between the two countries Tajik side offered warehouse facility to Pakistan at Panji Poyon and requested for similar facility for Tajik business community at Gwadar Port. Pakistani side noted the request for further action.

China agree to cooperate for modernization of Pakistan -- BEIJING APP

China agree to cooperate for modernization of Pakistan Railways: Haji Bilour
BEIJING, July 28 (APP): Pakistan and China have agreed to cooperate for modernization of Pakistan Railways network, said Railways Minister Haji Ghulam Ahmed Bilour. Haji Bilour who are currently visiting China at the invitation of Chinese government while talking to APP said Tuesday that during his meeting with Chinese Railways Minister Liu Zhi Jun he exchanged views with him on modernization, strengthening and converting existing Pakistan Railways tracks to meet the international standard. He pointed out that the Chinese said has agreed and assured their readiness for cooperation for modernization of Pakistan Railways. It has also been decided to constitute a consortium in this regard in which both Pakistan and China will be partners.

He pointed out that China has nominated their experts to help assist Pakistani side for carrying out technical feasibility studies for cooperation and modernization of railways projects. The projects would be put on place under BOO (Build-Own-Operate) basis, he noted. Bilour said that Pakistan Railways wanted to strengthening and expansion of Torkham railway line to meet the international standard, Quetta-Chaman-Kandahar section, Quetta-Iran, and Quetta-Peshawar railway link via Zhob- D I Khan-Bakhar. He pointed out that by doing so we would be able to help better facilitate passenger traffic and transportation of cargo from Gwadar port to various parts of the country as well as adjoining regional countries. Bilour said that by replacing the existing Karachi-Peshawar track to meet the international standard, Pakistan Railways will be able to facilitate people of the two provinces to have comfortable journey and swift transportation of cargo from Karachi port. The Chinese sides during the meeting stressed the need for initiation of laying a railway network from Havalian to Khanjrab pass on priority. The railways minister said that Chinese side emphasized the need for early laying of Torkham-Jalalabad railway track as they wanted to connect this section with Afghanistan so that they could use the Pakistan Railways network for transporting their goods and equipments for development of copper mines and various other projects launched in Afghanistan. Bilour said that the government wanted to invite Chinese side to launch railways projects under joint ventures. The present government, Bilour said did not want to opt unnecessary for obtaining loans, instead prefer to launch various schemes under joint ventures and cooperation. Regarding loan for the 75 locomotives to be purchased from China, the railways minister said that all impediments in this regards have been removed.

Pak-Iran-Turkey freight train from Aug 14: Bilour -- ISLAMABAD - The News

Pak-Iran-Turkey freight train from Aug 14: Bilour

Updated at: 0430 PST, Wednesday, August 05, 2009

ISLAMABAD: Minister for Railways Haji Ghulam Ahmed Bilour here on Tuesday said the Pakistan Railways would launch Islamabad-Tehran-Istanbul international freight train service from August 14, and it will reach its destination within 15 days.

He was addressing at a press conference, the minister said that Iran will provide transshipment facilities in Zahedan till a standard gauge line is laid between Zahedan and Mirjaveh.

The Minister also told about the successful visit of China, said that with the cooperation of China government six projects would be launched soon for the development of the country.

Pakistan and China would construct these projects including, Hoshab to Rawalpindi, Karachi to Torkham, Torkham to Kabul and Tajikistan, Gawadar to Quetta, Quetta to Iran and Quetta to Peshawar.

He said that six-member committee would look after the completion for these projects, three members from China and three from Pakistan, while China has finalized and Pakistan would soon finalize the names of three members.

He said out of total 6,506 kilometers Islamabad-Istanbul rail track, the train service would cover about 1,900 km of the distance in Pakistan, 2,570 km in Iran and 2,036 km in Turkey.

The minister said the planned train service will be operated as pilot project of Economic Cooperation Organization (ECO) in line with agreement signed by the three countries in March this year.

He said the service would be of great advantage to the business community of Pakistan, Turkey and Iran because earlier the containers used to be sent to Karachi by ship and after unloading them here used to be sent forward to respective destinations in the country either by road or rail and this was costing them quite high.

Shah Zain Bugti to Support PML-N -- LAHORE - The News

Wednesday, August 05, 2009

By By Faizan Bangash

LAHORE: Shah Zain Bugti, the president of the Jamhoori Watan Party (JWP), Balochistan, and a grandson of slain Baloch leader Nawab Akbar Bugti, has demanded the trial of former president Pervez Musharraf for subverting the Constitution and allegedly killing the people of Balochistan.

In an interview with The News the other day, he supported the stance of Nawaz Sharif on democracy and the Federation, saying his party would back all the positive steps taken by the PML-N.

Shah Zain alleged that the establishment was conspiring to form another faction of the JWP, led by Sardar Aali Bugti, to serve its interests. But, he added, the new faction was being formed under a man who ditched his own people and had no political standing.

He said formation of the new faction was aimed at dividing the real party of Akbar Bugti, led by Nawab Talal Bugti, who was nominated by the central executive committee of the party. He alleged that Aali Bugti had provided information about the location of Akbar Bugti to the military.

SHAH Zain Bugti, grandson of Nawab Akbar Bugti, has alleged that Indian involvement is being claimed in Balochistan to justify the military operation. -- Lahore Daily Times

Thursday, August 06, 2009

By By Our Correspondent

LAHORE

SHAH Zain Bugti, grandson of Nawab Akbar Bugti, has alleged that Indian involvement is being claimed in Balochistan to justify the military operation. He said the government should prove the allegations about the Indian interference in Balochistan with cogent evidences.

He negated the allegations of target killing of Punjabis in Balochistan. The allegations were wrong because Balochs did not hate Punjabis and considered them their brothers, he said.

Balochistan wants 250mmcf of Iran gas for Gwadar -- ISLAMABAD - Business Recorder

Balochistan wants 250mmcf of Iran gas for Gwadar: National Assembly informed ZAFAR BHUTTA

ISLAMABAD (August 08 2009): Balochistan government has requested the federal government to allocate 250 mmcf gas for Gwadar port, out of the gas to be imported through Iran-Pakistan (IP) gas pipeline project. In the 8th steering committee/subcommittee meeting of the Economic Co-ordination Committee (ECC), Balochistan Chief Minister requested for allocation of 250 mmcf gas for Gwadar port, Advisor to Prime Minister on Petroleum and Natural Resources Dr Asim Hussain told National Assembly in a written reply on Friday.

He informed the lower house that the ECC supported the proposal, subject to clearance of price affordability issue, adding that afterwards the matter would be taken up by the ECC and the Cabinet for allocation of additional gas to Gwadar port. Soon after the approval of additional volume, gas would be supplied to the port of Gwadar, the Advisor said responding to a question raised by Maulvi Asmatullah.

About Saindak project, he said that royalty amounting to Rs 787,268,000 had been paid to Balochistan government by MRDL from 2004 to December 2008, and no amount remained unpaid against the Chinese company. The Chinese company earned Rs 38,989.938 million during last five years, against expenditure of Rs 33,377.14 million.

He said that according to information furnished by Saindak Metals Limited, total amount of Rs 36,580,000 has been spent by Chinese company, MCC, out of its income from Saindak project on the provision of facilities to locals like education, medical, electricity and water. He told National Assembly that oil marketing companies (OMCs) and oil refineries had earned Rs 14770464 during last six months, from December 8 to May 9.

The limping Gwadar port By Syed Fazl-e-Haider -- APP

The limping Gwadar port By Syed Fazl-e-Haider
Monday, 10 Aug, 2009 | 09:33 AM PST |

In view of the port operations, which have boosted the trucking activity, the Gwadar Development Authority (GDA) needs to build a truck stand in the port area. — File The arrival and anchorage of first commercial cargo ship Al-Fahdah carrying 650 tons of dates at the Gwadar deep-sea port on July 22 indicated that the port can handle big cargo vessels. Presently, three berths are functional but significant issues in making the port fully operational have yet to be addressed.

‘There are two key issues in port operations: one is land connectivity and other is land acquisition’, said Khurram Abbas, director PSA Gwadar, while talking to this scribe on phone. He said, ‘the land under possession of Pakistan Navy and coast guards has not yet been handed over to the Singapore Port Authority (PSA) for development of free zone and other port-related infrastructure.’ ‘Without port connectivity through rail and road links, goods cannot be transported to Afghanistan, the Central Asian States and other regional countries’, he added. Abbas said, ‘we need land for the development of a free zone for the port related facilities at East Bay of Gwadar. Without land acquisition, the PSA is unable to develop offices, residential facilities, port back up area in the proposed free zone and provide the traders, industrialists, businessmen, shipping companies, stevedoring firms, transporters with all possible facilities for doing business at Gwadar’. The ball is in government’s court to make the port fully functional. Under the concession agreement signed with PSA in February 2007, the government was committed to hand over 923 hectares of land to the Singaporean firm by June 2008 on lease for the development of a free zone. The Gwadar Port Authority (GPA) is bound to acquire 350 hectares for ‘free zone area’ in addition to 584 acres in the possession of Pakistan Navy and 70 acres with the coast guards.

Multi-Billion Dollar Pakistan China rail link moving forward -- APP
Multi-Billion Dollar Pakistan China rail link moving forward

November 15, 2009 by Moin Ansari

Pakistan is working with China to hook up the Pakistan Railways to the Trans Asian Railway Network. This will facilitate trade to the Central Asian Republics, Russia and China.

* Chinese president describes relations with Pakistan as 'high priority'

Pakistan Railways linked to Trans Railway Network (TARN). Fibre-optic line, oil & gas pipeline rail track linking Karakorum Highway to Gwadar. the Federal Minister informed that in this connection a six-member committee comprising equal number of experts from both China and Pakistan was already constituted to move forward in this regard. China has already prepared a feasibility report of laying a railway track in the difficult terrain of Karakoram linking both the states through Khunjarab Pass. To another question, Bilour said that it was the policy of Pakistan Railways that in future it would lay all the new tracks as per the international specification. He explained that at present the existing railway tracks in the country were of broad gauge whereas internationally the narrow gauge tracks are in vogue.

He said that initially they would be planning to establish a rail link with China and at later stage they could connect Torkhum with Jalalabad from where they could go into Central Asian states up to Russia.

To a question he said that India was also expressing interest in getting Rail link with Iran and Turkey from Pakistan and hoped that this would help boost the country's economy.

Khalifa oil refinery project: UAE decides to go ahead

ISLAMABAD (November 16 2009): The United Arab Emirates (UAE) has decided to go ahead with the construction of a 5-billion-dollar oil refinery in Balochistan, officials said Sunday. The refinery with an output capacity of 250,000 barrels per day was postponed in January, due to the global recession and a row over management issues with Islamabad.

Pakistan, Thailand to sign investment MoU

In order to promote tourism and hotel facilities a Thai company, Invision Hospitality, showed interest in making investment in Pakistan and hoped to create facilities of hotels at Gwadar Port, Gilgit-Baltistan, Swat and the adjoining areas of Murree and the NWFP.

Navy establishes medical facility at Gwadar

Pakistan Navy has established a medical facility for the local population of Gwadar. The facility includes free medical check up and provision of medicines to the people who are unable to meet basic medical needs due to inadequate financial resources. Apart from male doctors, a lady medical officer has especially been appointed for medical check up of female patients.

The medical facility is a continuation of the efforts that Pakistan Navy has been making for long to help people along the coastal belt in basic healthcare and education, spokesperson, Inter Services Public Relations, said on Thursday.

The spokesman added that a school would also be set up at Ormara and free medical camps and establishment of 'Naval Utility Centres' in various coastal cities would be set up as well.

ISLAMABAD - Daily times / APP

Germany assures cooperation in railway, CDM, HRD sectors

ISLAMABAD: A German delegation Friday called on minister for Railways, Haji Ghulam Ahmed Bilour and discussed matters of mutual interests and future cooperation in railways, Clean Development Mechanism (CDM) and human resources development. The delegation comprised German Consular Head Press and Economic Section Dr Gregor Schotten and Minister Counselor Deputy Head of Mission Stephan Roken. During the meeting, the Railways' Minister sought German cooperation in CDM and infrastructural development including signaling, environment and low carbon emission. He requested the German government to provide grants or soft loans in these sectors and also sought cooperation in freight train management, adding that in 1970, the Islamabad Carriage Factory was established following technical and economic cooperation by the German government. The delegation assured the government of Pakistan for maximum possible cooperation in CDM, human resource development and hinted at support for standard gauge for new railway lines from Gwadar to Afghanistan, Iran and Havelian to China. The delegation said Pakistan railways is environment friendly so it could be realised that investment could be made by German government in Pakistan's railways sector to make it more environment friendly and pollution-free. The delegation also reassured cooperation in Rolling Stock and highlighted various aspects of Pak-German historic ties in economic and other sectors, hoping that these relations would enrich in future. Secretary Ministry of Railways and chairman Pakistan Railway briefed the delegation about functioning of Pakistan Railways and its ongoing projects with the cooperation of different international partners. app

China's assistance remarkable for Balochistan's development: Zardari -- APP

China's assistance remarkable for Balochistan's development: Zardari

ISLAMABAD, Dec 10 (APP): President Asif Ali Zardari on Thursday said China's invaluable assistance and support for Gwadar Port project had contributed towards the socio-economic development of Balochistan and would stand as a living testimony of Pak-China friendship for generations to come. Talking to Sun Ziyu, President China Harbour Engineering Company at Aiwan-e-Sadr, the Prime Minister said, "We envisage developing Gwadar not only as a trans-shipment port but also an energy port which can serve the economic interests of both Pakistan and China."

He said the success of Gwadar Port can serve as a catalyst for Chinese exports from its western regions to the rest of the world, adding "we would like Chinese enterprises to undertake developmental projects and increased Chinese investment in the area."

President Zardari said Pak-China friendly relations and mutual cooperation had become a shining example of friendly co-existence between two neighboring states. Minister of States for Ports and Shipping Sardar Nabil Ahmed Gabol, Secretary General to the President Salman Faruqui and Spokesperson to the President former Senator Farhatullah Babar were also present during the meeting.

Balochistan package: PC proposes allocation of Rs 31 billion for 36 projects -- Business Recorder

Balochistan package: PC proposes allocation of Rs 31 billion for 36 projects (ZAFAR BHUTTA)

ISLAMABAD (December 12 2009): The Planning Commission has proposed allocation of Rs 31 billion under the Balochistan package, which is Rs 7.8 billion less than the package allocated for the Prime Minister's constituency, Multan, informed sources told Business Recorder on Friday. The Planning Commission has finalised a list of 36 projects valued at Rs 31 billion under the Balochistan package. This list will be submitted to Central Development Working Party (CDWP) for approval and recommendation to the Executive Committee of the National Economic Council (Ecneec). The special meeting of CDWP was scheduled to meet on December 9, but was postponed as the venue of the meeting was changed from the Planning Commission to Balochistan.

"We are waiting for clearance from the Balochistan government to convene a special meeting of CDWP," sources said, adding that the Prime Minister would also participate in the meeting. The Federal government intends to signal the Federation's commitment to the development of Balochistan province and its people.

The Rs 31 billion Balochistan package compares unfavourably with the Rs 38.180 billion allocated for Multan. Under the Multan package, Rs 13.2 billion funds will be released during the 2009-10 fiscal year. The Larkana package is valued at Rs 9.6 billion and the government has already allocated Rs 2.1 billion during the current financial year, said the sources.

Under the Balochistan package, the Planning Commission identified five projects in food and agriculture, one in education, 12 projects in industry and commerce, four projects in physical planning, 14 projects in transport and two projects in the water sector.

In mining sector, the CDWP will consider Reko Diq gold and copper, costing Rs 5.892 billion with foreign exchange component of Rs 2.947 million. According to joint venture agreement of Reko-Diq project, Chilean mining company, Antofagasta, and Canadian company, Barrick Gold, jointly hold 75 percent and the Balochistan government 25 percent shares.

The two foreign companies estimated an investment of five billion dollars over a period of five years with an investment of one billion to three billion dollars in the first phase to produce 72,000 tons of copper per annum. After full commissioning of the project, the annual export of copper is forecast at 400,000 tons.

The Planning Commission focused on development of road infrastructure that is considered essential to boost trade activities in Gwadar Port. The CDWP will consider construction/upgradation of Dirgi-Shabozai (N-70) to Taunsa project, costing Rs 7.478 billion; reconstruction of the 110-kilometre-long National Highways N-30 worth Rs 4454.631 million; and construction of Sibbi-Dhadar section costing Rs 1,008.8 million.

The other projects include: construction of Kanj irrigation scheme in Mawand area of district Kahlua worth Rs 16.437 million; six dispersal structures on Nario river-Phase ii worth Rs 1.172 billion; and construction of Ghazi Khokhor dispersal structures costing Rs 859 million.

In food and agriculture sector, fisheries sector has been given more importance and "strengthening of fisheries infrastructure along Sindh and Balochistan" worth Rs 1,999.64 million will be tabled before the CDWP. Balochistan province is rich in oil, gas and mineral reserves and the CDWP is likely to approve "acquisition of three drilling rigs for Geological Survey of Pakistan" costing Rs 238.561 million.

وفاقی حکومت نے آغاز حقوق بلوچستان پیکج پارلیمنٹ میں پیش کر دیا ہے جس کے تحت بلوچستان میں دہشت گردی کیخلاف جنگ کے سوا تمام آپریشن اور نئی چھاؤنیوں کی تعمیر پر پابندی، سوئی سے فوج واپس بلانے، لاپتہ افراد کی تلاش کیلئے عدالتی کمیشن، فرنٹیئر کور اور کوسٹ گارڈز وزیراعلیٰ کے ماتحت، نواب اکبر بگٹی کے قتل کی تحقیقات کیلئے کمیشن قائم کرنے، ڈیرہ بگٹی کے بے گھر افراد کی بحالی کیلئے ایک ارب روپے فراہم، سنگین جرائم میں ملوث افراد کے علاوہ تمام سیاسی کارکنوں کو رہا اور جلاوطن رہنماؤں کی واپسی آغاز حقوق کی سفارشات اور تجاویز دی گئی ہیں۔ پارلیمنٹ کے مشترکہ اجلاس میں سینیٹر رضا ربانی نے پیکج پیش کرتے ہوئے اپنے خطاب میں کہا کہ پیکج صوبائی خودمختاری کا متبادل نہیں، وسائل پر 'بلوچستان صوبوں کا حق تسلیم کر لیا، پیکج کے تحت صوبے کی ترقی کیلئے انتظامی، سیاسی اور مالیاتی اقدامات کئے جائیں گے، وسائل پر صوبوں کا حق تسلیم کیا گیا ہے جس کیلئے آئینی اصلاحات کمیٹی کی سفارشات پر آئین میں ترمیم کی جائیگی، گواہ میں زمین کی تقسیم کی تحقیقات ہوگی، میگا پراجیکٹس میں گریڈ ایک سے 16 تک کی بھرتیوں میں مقامی لوگوں کو ترجیح دینے کے ساتھ ساتھ وفاقی حکومت بلوچستان کے نوجوانوں کیلئے فوری طور پر 5 ہزار نئی آسامیوں کا انتظام کریگی، گیس ڈویلپمنٹ سرچارج کی مد میں بلوچستان کو 12 سال میں 120 ارب روپے جبکہ ڈیرہ بگٹی کے بے گھر ہونے والے افراد کی بحالی کیلئے ایک ارب روپے فراہم کئے جائیں گے۔ انہوں نے کہا کہ پیکج میں سنگین جرائم میں ملوث افراد کے علاوہ تمام سیاسی کارکنوں کو فوری طور پر رہا کیا جائیگا۔ جلاوطن سیاسی رہنماؤں کو وطن واپسی کیلئے سہولیات فراہم کی جائیں گی۔ انہوں نے بتایا کہ وفاق کی طرف سے صوبے کو 4 ارب 60 کروڑ روپے سرکاری شعبہ کے ترقیاتی پروگرام کے تحت دینے گئے ہیں اور 2 ارب 80 کروڑ روپے اوچ کی رائٹ کیلئے بقایا جات کی مد میں دینے گئے ہیں، یہ بقایا جات 1995ء سے بقایا تھے جبکہ بلوچستان کے ذمہ اور ٹرافٹ کے ساڑھے 17 ارب روپے معاف کر دینے گئے تاہم ہمیں یہ ادراک ہے کہ یہ صوبائی خود مختاری کے متبادل نہیں ہو سکتا۔ انہوں نے کہا کہ صوبے کی تمام سیاسی قیادت سے مذاکرات کا آغاز کیا جائیگا تاکہ ان کو قومی دھارے میں لایا جاسکے۔ انتظامی معاملات کے حوالہ سے رضا ربانی نے بتایا کہ وفاقی حکومت کی طرف سے فوری طور پر وفاقی اداروں کے کردار کا جائزہ لیا جانا چاہیے اور دہشت گردی کیخلاف لڑنے کے علاوہ دیگر تمام آپریشن فوری طور پر روک دینے چاہئیں۔ وفاقی حکومت کو اعلان کرنا چاہئے کہ سوئی کے علاقے سے فوج کو واپس بلانی جائے اور ان کی جگہ ایف سی کے اہلکار تعینات کئے جائیں جو موجودہ حالات میں امن و امان برقرار رکھنے کیلئے کردار ادا کریں۔ انہوں نے کہا کہ لاپتہ افراد کے حوالہ سے ایک کمیشن تشکیل دیا جانا چاہئے جس کی سربراہی بلوچستان کی اعلیٰ عدالت کے ایک جج کو دی جائے جبکہ اس میں وفاقی وزیر دفاع، وزیر داخلہ اور بلوچستان کے سیکرٹری داخلہ شامل ہوں۔ اس کمیٹی کا اجلاس ان کیمپوں میں ہونا چاہئے۔ لاپتہ افراد کے نام فوری طور پر سامنے لانے چاہئیں اور جن افراد کو حراست میں رکھا گیا ہے اور جن پر کوئی الزامات نہیں ہیں ان کو رہا کیا جانا چاہئے۔ جن افراد پر الزامات ہوں ان کو سات یوم کے اندر اندر عدالت میں پیش کیا جانا چاہئے، ان افراد کو ان کی مرضی کے وکلا کی خدمات حاصل کرنے کی اجازت دی جانی چاہئے۔ ان کے خاندان کے افراد کو بھی ان سے ملاقات کی اجازت دی جانی چاہئے۔ انہوں نے کہا کہ وفاقی حکومت نے بلوچستان کے سیاسی کارکنوں غلام محمد، لالا منیر اور منیر احمد کے قتل کے علاوہ صوبہ میں ٹارگٹ کلنگ کی عدالتی تحقیقات کا حکم دیدیا ہے جبکہ نواب اکبر بگٹی شہید کے قتل کے حقائق جاننے کیلئے سپریم کورٹ یا ہائی کورٹ کے ریٹائرڈ جج کی سربراہی میں فیکٹ فائنڈنگ کمیشن قائم کیا جائیگا، فی الوقت صوبہ بلوچستان کے علاقوں سوئی اور کوہلو میں فوجی چھاؤنیاں تعمیر کرنے کا کام روک دیا گیا ہے اور سوئی میں ایف سی کو ڈیوٹی حوالے کرنے کے بعد فوج واپس بلانی جائیگی جبکہ تعمیر شدہ چھاؤنیوں کو بھی ایف سی کے حوالے کیا جائیگا۔ انہوں نے کہا کہ صوبائی حکومت کی طرف علاقوں میں تبدیل کرنے کے فیصلہ کا وقتاً فوقتاً جائزہ لیا جائے گا جبکہ شہری "اے" علاقوں کو "بی" سے علاقوں میں ریگولر پولیس تعینات کی جائے گی۔ انہوں نے سول آرڈر فورسز کے کردار کے حوالہ سے کہا کہ قانون نافذ کرنے کے سلسلہ میں ایف سی وزیراعلیٰ کے ماتحت کام کرے گی اور اسے کسٹم ایکٹ کے تحت حاصل اختیارات واپس لئے جائیں گے۔ اس طرح کوسٹ گارڈ سرحدوں اور ساحلی علاقوں میں اسلحہ اور منشیات اسمگلنگ کی نگرانی کا کام کرے گی اور قانون سے ماوراء ان کی قائم کردہ چیک پوسٹوں کو ختم کرایا جائے گا۔ انہوں نے کہا کہ سرحدوں کی مؤثر نگرانی کو یقینی بنانے کیلئے وفاقی و صوبائی حکومت اور ایف سی کی طرف سے سرحدوں کی دوبارہ حد بندی کی ضرورت ہے۔ انہوں نے کہا کہ گواہ میں اراضی کی الاٹمنٹ کے حوالہ سے اعلیٰ عدلیہ کے ذریعے انکوائری کی جائیگی۔ انہوں نے کہا کہ وزیراعلیٰ بلحاظ عہدہ گواہ رپورٹ اتھارٹی کے چیئرمین ہوں گے، بورڈ آف ڈائریکٹرز میں صوبے سے 7 ارکان کو شامل کیا جائے گا جبکہ گواہ ڈویلپمنٹ اتھارٹی کے چیئرمین کی نامزدگی صوبائی حکومت کریگی۔ انہوں نے کہا کہ سوئی کے علاقے کے مسلح افواج کو ایک طریقہ کار کے مطابق علاقے سے 'لئے ایک خصوصی ترقیاتی پیکج پیش کیا جانا چاہیے نکالا جانا چاہیے۔ انہوں نے کہا کہ وفاقی حکومت صوبے کے لئے ملازمت کی پانچ ہزار آسامیاں فوری طور پر کارپوریشنوں اور دوسرے 'خود مختار' نیم سرکاری 'سرکاری ملازمت بالخصوص فارن سروس' پیدا کرے گی اداروں میں ملازمت کے لئے صوبائی کوٹے پر قواعد اور قانون کے مطابق عمل کیا جائے گا اور اس حوالے سے کسی بھی قسم کی تفریق کا ازالہ کیا جائے گا۔ پیکج کے حوالے سے سفارشات میں کہا گیا ہے کہ وفاقی صوبائی حکومت اور دیگر ایسے ادارے اور محکمہ جو ان سفارشات پر عملدرآمد کے ذمہ دار ہوں گے 'حکومت وہ پارلیمانی کمیٹی برائے قومی سلامتی کو ماہانہ بنیادوں پر عملدرآمد کی صورتحال کے بارے میں بریفنگ دیں گے۔ وفاقی اور صوبائی حکومتیں ہر تین ماہ بعد پارلیمنٹ کے دونوں ایوانوں میں اپنی رپورٹ پیش کریں آئینی امور سے متعلق '11 صفحات پر مشتمل ہے جس میں 39 شقیں ہیں "آغاز حقوق بلوچستان پیکج" گے۔ سیاسی معاملات سے متعلق پانچ اور انتظامی معاملات سے متعلق تیرہ جبکہ اقتصادی امور پر شقوں کی 'تین تعداد 14 ہے۔

PM announces Rs1bn fund for Karachi blast victims

GWADAR: The federal cabinet at a meeting held here on Wednesday approved the Gwadar Port Authority (GPA) bill and discussed issues concerning Balochistan, particularly the implementation of the Aghaz-i-Huqooq-i-Balochistan package. According to the GPA bill, the authority's board will comprise 15 members, including seven from Balochistan, with chief minister of the province as its chairman. The special cabinet meeting held on board a Pakistan Navy ship anchored at the Gwadar port was attended by federal ministers and the four chief ministers. It was presided over by Prime Minister Yousuf Raza Gilani. The prime minister said the democratic government had come up with the Aghaz-i-Huqooq Balochistan package to end Baloch people's sense of deprivation. He said the meeting's agenda and venue had been decided with the objective of highlighting and addressing the issues of Balochistan. He thanked Balochistan Chief Minister Nawab Aslam Raisani and Federal Minister for Ports and Shipping Babar Khan Ghori for making elaborate arrangements for the meeting. The prime minister said that development of Balochistan was a priority of the government which was committed to addressing the demands of the Baloch people. Talking to a number of delegations, the prime minister said the government was seriously working to alleviate the suffering of the people of the province who had been neglected in the past.

Historic NFC Award inked -- APP

Historic NFC Award inked

By: Bari Baloch | Published: December 31, 2009

QUETTA – The historic 7th National Finance Commission Award was signed on Wednesday by the representatives of Federal Government and four provinces at a

simple but dignified ceremony held in port city of Gwadar which is deemed a great step to bolster the Federation. The historic ceremony was attended by Prime Minister Syed Yousuf Raza Gilani, Punjab Chief Minister Shahbaz Sharif, Sindh Chief Minister Qaim Ali Shah, NWFP Chief Minister Ameer Haider Khan Hoti and Balochistan Chief Minister Nawab Aslam Raisani, members of Federal and Balochistan Cabinets. Under the NFC Award, provinces will get 56 per cent share from the federal revenues and 44 per cent share has been allocated for the Centre.

Under the new formula, the Federation and the provinces of Punjab, Sindh and NWFP realised the difficulties of Balochistan and agreed to provide the province 83 billion rupees (9.09 per cent) of the provincial pool. Addressing the gathering after the historic signing of the NFC Award, Prime Minister Gilani congratulated the nation, federal minister for finance and chief ministers of the four provinces for reaching a consensus on the Award. "The Federal Government is committed to empower all four federating units and they will also be given provincial autonomy which will further strengthen the country," he added. He assured the 17th Amendment and 58-2B would be abolished as a constitutional committee was working in this regard. He said they would remove restrictions on becoming prime minister for the third time. He said 1973 Constitution was an achievement of Shaheed Zulfikar Ali Bhutto which strengthened the Federation and added that incumbent government was firmly believed in politics of reconciliation. "Consensus after 19 years over NFC Award is a proof of the success of our reconciliatory policy," the Premier maintained. He pointed out the country would develop only if all institutions work within their limits and the government was committed to eradicate corruption from the country. Regretting the toppling of democratic governments, Gilani said that Ayub Khan had disqualified all the politicians who had played a significant role in creation of Pakistan. He said former President General (r) Musharraf removed the government of Nawaz Sharif on charges of kidnapping. He said Nawab Akbar Khan Bugti was a big supporter of the Federation but he was brutally murdered and stressed that those who were responsible for his murder must be tried in a court of law.

NFC Award will usher in new era of prosperity in Balochistan: Raisani -- ISLAMABAD - APP

NFC Award will usher in new era of prosperity in Balochistan: Raisani
ISLAMABAD, Dec 31 (APP): Renowned Baloch leader Senator Mir Lashkari Raisani has termed unanimous approval of NFC Award a victory of democracy, adding that all political workers of the country consider the day of signing of the award a historic event. Talking to Radio Pakistan, he said that the NFC Award was the result of democratic government established after a long struggle of the democratic forces. He hoped that if the democratic process continues to function uninterrupted, Balochistan will usher in a new era of development and prosperity. He said that all sane political workers as well as people of Balochistan have a great respect for what happened during the democratic set-up and they view it a new era for Balochistan.

'Signing NFC is a historical event' -- LAHORE - The News **'Signing NFC is a historical event'**

Updated on: 31 Dec 09 06:51 PM

On News Beat with Meher Bokhari

LAHORE: Syed Sumsam Ali Shah Bokhari has said that the agreement of all the provinces on the National Finance Commission Award and its signing ceremony in Gwadar is a historical event in the history of the country.

He said that the Pakistan People's Party (PPP) has always fought against the

dictators. "We have not supported any step of former president, Pervez Musharraf." He said that his party follows the policy of reconciliation and this policy should be same for all the Pakistanis.

"We are committed to the cause that the constitution of 1973 would be revived in its original shape. We are against all those people who distorted the constitution," he said and added that the constitutional committee is working on the amendments in the constitution. The PPP refers to Nawab Akbar Bugti as Shaheed and his name is also mentioned in the text of the Balochistan package. The government is working to establish road and rail links which could link Gwadar with other parts of the country. The party thinks that Pakistan could move forward only by following the policy of reconciliation, he added.

Hasil Bizengo said that NFC Award is a good step as the formula of NFC has been changed for the first time. That change in the NFC formula would benefit in addressing the reservations of the people of Balochistan. It is a good step in the right direction. But there is still a way ahead for more steps. The government needs to address the legal and constitutional matters and to make constitutional changes to address the concerns of the provinces. The government should also ensure the return of all the missing persons, he added. SAMAA

Prime Minister House? -- ISLAMABAD - Business Recorder

What about a Prime Minister House at Gwadar?

ZAFAR BHUTTA

ISLAMABAD (January 06 2010): The cash starved country is going to have another Prime Minister House at Gwadar Port as Balochistan government has allocated five acres of land to carry out the project, Business Recorder has learnt. Sources said that it was revealed to the federal cabinet that met on December 30, 2009 at Gwadar Port. "Chief Minister Balochistan has allocated five acres of land for Prime Minister House at Gwadar," the cabinet was told.

Sources said that cabinet was apprised that many steps had been taken for economic uplift of Balochistan province. It was noted that proposal for provision of gas to the gas producing districts had been agreed and 10 percent of the net profits would be spent on development projects in the producing areas. The projects would also be opened to third party audit to ensure transparency.

"Proposals for imparting technical training to local youth for employment in Gwadar Port Authority (GPA), Gwadar Development Authority (GDA) and special economic zone were agreed and a PC-I was submitted to NAVTEC, the cabinet was apprised. It was also revealed that proposal for apportionment of Gwadar revenue for development of Balochistan was being processed by Ports and Shipping Division.

"Proposals for the construction of two jetties for fishermen and Fisheries Training Centre have been processed for which funds need to be released expeditiously," the cabinet noted. It was also briefed that proposal for Sui special development package had been submitted to the Planning Commission.

The Proposal for overseas employment against Balochistan quota had been taken up with Establishment and Labour & Manpower Divisions. The Federal Government has agreed that from its 50 percent shares in Saindak Project, 30 percent would be given to Balochistan and the project on completion would be owned by the province. "Proposals regarding special incentives for local tribes of Kohlu district to facilitate exploration in the area have been submitted and are under process with Ministries, of Interior and Petroleum and Natural Resources," the cabinet was informed.

**ECNEC likely to approve construction of new Gwadar Int'l Airport --
ISLAMABAD - Daily times**

ISLAMABAD: The Executive Committee of the National Economic Council (ECNEC) in its meeting on January 21 is likely to approve construction of new Gwadar International Airport (GIA) and allied facilities with initial cost of Rs 7.5 billion including Rs 1.312 billion as Foreign Exchange Component (FEC).

The scheme envisages construction of state of the art GIA, along with allied facilities over a piece of land already acquired measuring 4300 acres. The airport would be developed as a green-field airport and all major components of an airport would be developed as part of this project. The sources claimed that the NGIA would be the business gateway to Pakistan through the city of Gwadar. The government has already allocated Rs 750 million in the PSDP 2009-10 for its construction. Official sources claimed that the government attached high priority to the development of Gwadar Airport. They said that the new airport would be six times larger than the existing airport in Gwadar, which would be completed in three years after its initiation.

Master plan for the project, for which a PC-1 of Rs 7.5 billion has already been approved with an allocation of Rs 750 million in the current Public Sector Development Programme (PSDP), has been finalized and the survey completed. The passenger terminal for Gwadar International Airport is perceived to facilitate 350,000 per year passenger traffic. The Prime Minister at Gwadar was informed that Oman, which had already contributed \$ 17.5 million for the project, is ready to provide another \$ 100 million after beginning construction of the airport. The revised scheme envisages acquisition of around 4,300 acres of land for construction of GIA at Gurandani, 26 km east of Gwadar City.

The construction of New Gwadar International Airport forms an integral part of the overall objective of the transport sector in providing easy and efficient access to the southern region of Balochistan. The new airport would augment the airport facilities in Pakistan and as an advantage of its construction; a network of roads and other essential infrastructure would be developed.

Gwadar, which is strategically located has an enormous trade potential, which could not only help alleviate poverty and boost the socio-economic uplift of Balochistan but can contribute in the national economy through transit trade.

Pakistan and Turkey agreed Monday to undertake a US \$ 20 billion project to upgrade a railway link -- ISTANBUL (Turkey) - Pakistan Times

ISTANBUL (Turkey): Pakistan and Turkey agreed Monday to undertake a US \$ 20 billion project to upgrade a railway link from Islamabad to Istanbul, basically to speedily transport cargo from Pakistan to Turkey and ultimately to Europe. This was decided in a meeting between President Asif Ali Zardari and his Turkish counterpart Abdullah Gul. The five-year rail project envisages to curtail travel time between Islamabad and Istanbul, via Tehran, from the current 11 days. A comprehensive presentation was given to the Pakistani and Turkish Presidents on the 6,566 kilometres Rail project from Islamabad to Istanbul, via Tehran, with 1,990 kilometres track situated in Pakistan, 2,570 kilometres in Iran and 2,006 kilometres in Turkey. This rail link will strengthen Pakistan's economic as well as people to people ties with not only brotherly Muslim countries but also onwards to Europe. Iran, Pakistan to ink gas deal in Turkey

Sun, 07 Feb 2010 11:25:46 GMT

The Pakistani Federal Minister for Petroleum has declared that Pakistan and Iran will sign a deal in Turkey before February 15 to construct a gas pipeline between the two countries.

Naveed Qamar said that the construction of the pipeline will take between four and five years.

He noted that the natural gas shortage is damaging Pakistan's economy and Islamabad is determined to start the import of natural gas from Iran as soon as possible, Daily Times reported.

Gilani lauds Chinese cooperation for developing Gwadar Port

KARACHI, Feb 8 (APP): Prime Minister Syed Yusuf Raza Gilani has lauded Chinese cooperation in the development of Gwadar Port. He was speaking as chief guest at the induction ceremony of PNS Shamsheer at the Naval Dockyard here on Monday. The keel of the vessel was laid in July 2008 in Hudong Shipyard of China. The Prime minister also admired the Chinese cooperation in the development of Gwadar Deep Sea Port which has significantly contributed towards strengthening the maritime infrastructure in Pakistan.

Prime Minister Gilani said the port has opened new avenues of growth and prosperity in Balochistan. The port would serve as a vital link in developing over-land trade route from Makran coast to the western region of China and the Central Asian republics, he added.

The Prime Minister said he was aware that the Pakistan Navy was also focusing on the development of coastal areas through its projects like development of Jinnah Naval Base and other support establishments.

He said the Navy's lead role in contributing towards maritime awareness among the people of Pakistan was another positive undertaking that would accrue long term benefits for the nation.

Gilani reiterated the government's commitments towards development of the maritime sector and emphasised upon the Navy not only to defend the sea frontiers but also ensure safe conduct of maritime activities during peace time.

Zahedan, Quetta sign trade MOU -- THE MEHR NEWS AGENCY
Zahedan, Quetta sign trade MOU

ZAHEDAN, Feb. 19 (MNA) – The first joint border trade committee between Iran and Pakistan signed an MOU by the provincial directors of the commerce organizations of Iran's Sistan-Baluchestan and Pakistan's Quetta customs offices. The Mehr News Agency quoted the director of the commerce organization of Sistan-Baluchestan Province as saying that in the two-day conference between the two sides the public and private sectors discussed various subjects including railway transportation, transit of goods, trade and customs.

Iraj Hasanpour said that according to the MOU both countries will send trade and investment delegations to one another and hold permanent joint specialized exhibitions.

Other agreements included building large warehouses for goods in the customs offices of the two countries and increasing railway transportation, he said.

The Iranian official said quarantine quarters for the Pakistani side across from the Iranian side will be built and a waterway will be established between Chahbahar Port in Iran and Gwadar Port in Pakistan.

The Pakistanis also agreed to facilitate the transit of Iranian goods through Pakistan to India, he noted

Automated port ops can change destiny of country: PCA -- ISLAMABAD - APP

Automated port ops can change destiny of country: PCA

ISLAMABAD (March 03 2010): President Pakistan Computers Association (PCA) Munawar Iqbal on Tuesday said deep sea port in Gwadar has the potential to become the main trade hub for this area. This brilliantly planned project having radically distinctive economic and strategic importance can change the destiny of Pakistan, says a news release issued here on Tuesday. Speaking at a meeting of PCA, Munawar Iqbal said that Gwadar is located only 180 nautical miles from the Strait of Hormuz through which 40 per cent of world's oil passes. "The port thus emerge as the key shipping hub in the area providing mass trade to Central Asian Republics as well as across Pakistan and China," he said. He further said that large ports with huge cargo handling capacities can attract business community if efficient, modern and transparent customs services were also made available. "The efficiency, transparency and speed that has become available to Customs today through the Automated Customs system of PaCCS, was the only logically solution for Gwadar," said Munawar Iqbal. Munawar Iqbal said that the multi-billion- rupee projects of Gwadar port and Rs 7.5 billion Gwadar Airport should be connected to the rest of the country through world class network and roads. "These facilities should be fully automated so that importers as well as exporters can carry out business activities successfully and with peace of mind. He said that capacity of 4,300-acre Gwadar airport should be increased to handle 1.5 million passengers and 70,000 tons of cargo a year. Business community hope that political leadership will use their acumen to pacify negative feelings among some locals to get maximum advantage of the project, said Iqbal.

Oman to provide \$45m for Gwadar airport -- ISLAMABAD - APP

Oman to provide \$45m for Gwadar airport

By Sajid Chaudhry

ISLAMABAD: Pak-Oman Joint Ministerial Commission (JMC) has decided that Oman would provide \$45 million grant for construction of Gwadar International Airport and other development projects.

This has been agreed in the 6th session of Pak-Oman JMC which concluded here on Tuesday. It has also been decided that Oman Oil Company will make investment of \$19.4 million in Pakistan's energy sector.

The Pakistani delegation was headed by Hina Rabbani Khar, minister of state for finance and economic affairs, whereas Oman's delegation was led by Mohammed Bin Nasser Al Khasibi, secretary general for Ministry for National Economy, Oman.

Addressing a joint media briefing, Khar said both sides had agreed to enhance collaboration between the trade bodies of Pakistan and Oman for promoting trade and investment. She said a Memorandum of Understanding (MoU) for establishment of Joint Business Council between Pakistan and Oman would be signed shortly.

“Working Groups of experts from both countries in the fields of commerce, agriculture, livestock and fisheries have been established to further enhance cooperation in these sectors,” she said adding that Oman will hire its additional requirement of manpower from Pakistan, on priority basis. State Minister said that Ministry of Labour and Manpower and the Omani Authority would sign an MoU soon to materialize the proposal.

She further added that Oman had sought assistance from Pakistan Railways for construction of Railways in Oman. “Pakistan will provide assistance in planning, designing, consultancy services, construction and operation of railways, etc,” she maintained.

Pakistani side requested support from Oman side for early finalization of Free Trade Agreement (FTA) with Gulf Cooperation Countries (GCC). The Omani side pledged to support Pakistan to ink FTA with GCC.

Gwadar Immigration Office opens

QUETTA - Federal Interior Minister Rehman Malik has said no activity against the integrity of the country would be tolerated. He expressed these views on Saturday in Gwadar after inauguration of Immigration Office there.

Responding to a question, he said Aghaz-e-Haqooq Balochistan Package was the start of steps initiated by the government for the solution of Balochistan's problems and all nationalist leaders would be taken into confidence in this regard.

He reiterated that the federal government would utilize all its resources for the progress and prosperity of Balochistan.

In addition, Malik also announced to build a housing society in Gwadar for the federal government employees. The approval in this regard would be given by the Prime Minister, he added. He also visited Gwadar Port.

PM Directed to complete the Gwadar-Ratodero Road and Gwadar airport early -- ISLAMABAD - APP

Wednesday, March 10, 2010

Prime Minister Yousaf Raza Gilani urges timely completion of Gwadar-Ratodero Road and Gwadar Airport

ISLAMABAD: The government gives top priority to the economic development of the backward areas, Prime Minister Yousaf Raza Gilani said on Tuesday.

He stressed on the need for acceleration of development projects and directed officials to complete the Gwadar-Ratodero Road and Gwadar airport early, so that the people of Balochistan could be economically empowered. The prime minister said these mega projects would help bring the people of different regions closer to each other and strengthen the federation.

It was observed in the meeting that capacity of the provincial governments for timely utilisation of allocated funds needs to be improved so that inter-provinces harmony could be strengthened. The meeting decided that the provinces needed to use the capital generated by them to accelerate the process of economic prosperity and help them attract local and foreign investment.

CDWP approves 74 projects worth Rs 510.2 bln -- ISLAMABAD - APP

CDWP approves 74 projects worth Rs 510.2 bln

ISLAMABAD, Mar 18 (APP): The Central Development Working Party (CDWP) Thursday approved 74 projects costing Rs 510.2 billion, with a foreign aid component of Rs. 125.1 billion. The CDWP meeting, chaired by Deputy Chairman of the Planning Commission Sardar Assef Ahmad Ali, approved 36 projects costing Rs.326.0 billion of infrastructure sector, 26 projects costing Rs.158.0 billion of social sector and 12 projects costing Rs. 26.3 billion related to agriculture and industry sector.

With implementation of six power sector projects costing Rs 87 billion, shortage of power in the country would be controlled by efficient distribution and enhancement system of electricity by DESCOS.

Sixteen projects of transport and communication sector with a total cost of Rs 56.6 billion including mainly projects of Gwadar Deep Sea Water Port, Extension of M-4, Rehabilitation of Rasheed Wagon-Nasirabad Roads, Karachi Transport Improvement Projects, Kolpur Bypass and Bridge Across River Swan linking Attock and Chakwal were approved.

Similarly, REKO DIQ Gold and Copper project costing 8.7 billion was also approved. It will produce 38,000 tons of copper, 15,000 ounces of gold per year. Upon completion, income from the project will be about Rs 15.0 billion per year.

The CDWP also conceptually cleared projects of establishment of facilities for coal cleaning, coal gasification and coal combustion project to improve Financial Reporting and Auditing (PIFRA-II) (Phase-II).

Of the 74 projects, 63 projects costing Rs 365 billion will be financed by the federal government through federal PSDP while 11 projects costing Rs 145 billion will be financed by the provinces through respective provincial ADP.

Antofagasta sees Reko Diq operational in 2015 -- <http://tribune.com.pk/>
Antofagasta sees Reko Diq operational in 2015

Balochistan is apprehensive about foreign companies mining Reko Diq site.
By Reuters
April 09, 2010

Santiago: Antofagasta Minerals is confident it will start producing copper at Pakistan's Reko Diq mine by 2015 despite friction with local authorities. The development of the mine has been opposed said the company's CEO Marcelo Awad said on Wednesday.

Pakistan's government is keen about seeing the project through, despite opposition by the regional government of the Baluchistan province, said Awad.

"There were a lot of rumours and a lot of negative press earlier this year, but that was a misunderstanding of a cabinet resolution of the Baluchistan province ... we've met the chief minister and he's still very supportive to see the project up and running," Awad said. A provincial government official told Reuters in January that the project may be canceled, but Awad later said that view was held by a small minority pressing for independence of Baluchistan.

He said that regardless of the friction with Baluchistan officials Antofagasta hopes to bring the Reko Diq mine on stream in 2015.

Antofagasta and Canada's Barrick Gold Corp each have a 37.5 per cent stake in the project, with the provincial government holding the remaining 25 per cent.

"We're at this moment finalising the feasibility study and the environmental impact assessment. We plan to apply for a mining licence to the Baluchistan government during the middle of this year," he said.

London-listed Antofagasta expects Reko Diq to produce by itself roughly as much as the whole group churns out currently. Antofagasta produced 442,500 tons of copper last year and expected production of 540,000 tons in 2010 due to the expansion of its flagship Los Pelambres mine in Chile.

Based on 2008 production figures, a move to one million tons would make Antofagasta the world's fourthbiggest copper producer.

Handling of \$100 million Saudi urea at Gwadar: TCP, PSAG and stevedore companies in litigation -- Business Recorder

Handling of \$100 million Saudi urea at Gwadar: TCP, PSAG and stevedore companies in litigation

ISMAIL DILAWAR

KARACHI (2010-04-27) : The smooth handling of thousands of tonnes urea imported from Saudi Arabia on deferred payment of around \$100 million may be clouded at Gwadar Port where the clash in relevant rules is said to have brought the Singaporean operator and local users at loggerhead with each other.

The sources told Business Recorder that two stevedoring companies, M/s Portstar and M/s Waqar and Company, have sued the Trading Corporation of Pakistan (TCP) in a local court for what they claim breaching a one-year stevedoring agreement signed between the two on July 17 last year.

They said the stevedores had pleaded that the state importer had violated the pact through awarding an 'out of tender' stevedoring contract to the Port of Singapore Authority Gwadar (PSAG), the concessionaire of Gwadar Port, for the handling of at least 0.25 million tonnes importable cargo at the deep seaport.

They said under the post-tender agreement the TCP had awarded a one-year stevedoring contract to the lowest bidder, M/s Portstar and M/s Waqar and Company, for cargo handling at Gwadar Port at the rate of Rs 798 per ton. "TCP awarded work to the PSA Gwadar out of tender ignoring an agreement with the stevedoring firms that would expire in July this year," the sources said.

They claimed that the Corporation was enticed by an offer of Rs 725 per ton from the PSAG's which, unlike the other private firms, was not liable to pay any taxes under the Concession Agreement. However, Sindh High Court is said to have issued a stay order to the respondents, the TCP and the PSAG, also made a party to the case, directing the former not to assign further vessels to the latter till next hearing which is scheduled on the 13th of next month.

The court, in what the sources said its interim judgement, further directed that next vessel at the port should be allocated to the petitioners at arrival. The sources in TCP told Business Recorder that the court's order was implemented last Saturday and since then the petitioners were discharging the vessel, M/v Tala carrying 26,558 tonnes urea.

"In fact the matter is between the PSAG and the stevedores... we awarded the work to PSA after taking a nod from the PPRA which allowed us to go for direct negotiations with the PSA," the TCP officials said. The dispute arose when the Singaporean port operator pressed on its "sole and exclusive right" to stevedoring work at Gwadar Port under Article 4.1 of the Concession Agreement.

Whereas the two stevedoring companies try to make their point by referring to their one-year contract with the TCP, the officials in PSAG reject the contract as invalid saying the stevedores were not qualified for the contract that requires a bidder to have a license from the competent authority, namely Gwadar Port Authority.

"In its tenders TCP's eligibility criterion requires a bidder to possess license of work at the concerned port," they said. On the other hand, the sources said, the stevedoring firms question the PSAG over lack of equipment, like bagging plants, grips etc, and the resultant slow rate of discharge which the TCP officials, however, said on a satisfactory average of over 3,000 tons per day.

The PSAG officials also rejected the claim as baseless saying the gear had never been a problem for an internationally-reputed port operator like the PSA. All said and done, the dispute would keep haunting efficiency of the cargo-starved Balochistan-based deep seaport until and unless the relevant rules are clearly defined and are respected by all concerned in a letter and spirit.

China has taken the lead in developing Pakistan's Gwadar port city as an emerging energy hub -- APP

China has taken the lead in developing Pakistan's Gwadar port city as an emerging energy hub with oil refining capacity, tanker capacity, and transit point for the recently announced Iran-Pakistan natural gas pipeline. It is expected that China seeks to take full advantage of the Gwadar facilities by establishing a network of pipelines to Xinjiang in order to reduce its dependence on the long and insecure sea route that it must currently rely upon for some 80% of its energy imports.

China to build two 650-MW Nuclear Reactors in Pakistan - Chashma-3 and -4. -- nuclear reactors pakistan china chashma

Wednesday, April 28, 2010

China to build two 650-MW Nuclear Reactors in Pakistan - Chashma-3 and -4. After the completion of 300 MW Chashma-I and Chashma-II Nuclear reactors China today signalled building of two more Nuclear Reactors. Pakistan Deal Signals China's Growing Nuclear Assertiveness

A mum US watches the pending Sino–Pakistan reactor deal turn into reality and reflects the growing confidence and assertiveness of China's nuclear energy program. Contrary to guidelines adopted in 1992 by nuclear equipment supplier states in the Nuclear Non-Proliferation Treaty (NPT), China is poised to export two 650 MW Nuclear power reactors to Pakistan. This transaction is about to happen at a time when China's increasingly ambitious nuclear energy program is becoming more autonomous.

Guidelines of the Nuclear Suppliers Group (NSG), representing 46 NPT states, call on parties to the NPT not to supply nuclear equipment to non–nuclear-weapon states without comprehensive IAEA safeguards, including Pakistan. China joined the NSG in 2004.

The United States and other NSG states may object to the pending transaction but they cannot prevent China from exporting the reactors. Senior officials in NSG states friendly to the United States said this month they expect that President Barack Obama will not openly criticize the Chinese export because Washington, in the context of a bilateral security dialogue with Islamabad, may be sensitive to Pakistan's desire for civilian nuclear cooperation in the wake of the sweeping U.S.–India nuclear deal which entered into force in 2008 after considerable arm-twisting of NSG states by the United States, France, and Russia. The United States may also tolerate China's new nuclear deal with Pakistan because Obama wants China's support for United Nations Security Council sanctions against Iran this spring.

China's Civilian Nuclear Industry On The March:

The pending Sino–Pakistan reactor deal reflects the growing confidence and assertiveness of China's nuclear energy program as it establishes a track record of reliability in reactor construction and operation. Chinese nuclear entities are wary of interference from the International Atomic Energy Agency (IAEA) in their programs and are keen to establish their freedom of action vis-à-vis cooperating foreign governments and firms. China within a few years also wants to become a global nuclear equipment exporter.

If China succeeds, ten years from now it will likely become the world's second-biggest nuclear power generator after the United States. After years of bilateral disputes over nonproliferation issues, in 1998 the U.S. Congress allowed a 1985 Sino–U.S. nuclear cooperation agreement to enter into force. After that, U.S. nuclear cooperation with China dramatically increased, culminating in China's 2006 selection of a consortium of companies led by Westinghouse to build four AP1000 power reactors in China. Westinghouse bested bidders from France and Russia in a competition set up by China to determine which of the three would provide the technology blueprint for the future standardized development of China's nuclear power industry.

China chose Westinghouse after it agreed to transfer to China ownership of the technology for the new and untried 1,000-MW reactor. China then awarded contracts to Westinghouse and its partners to build four AP1000s in China. The first two are scheduled to be finished in 2013. Westinghouse scored another coup when in 2008 China selected AP1000 for China's first raft of inland power reactors.

Westinghouse's apparent emergence as primus inter pares among foreign reactor vendors in China in 2006 was linked to the fortunes of the State Nuclear Power Technology Co. (Snptc). It was set up by China's State Council of Ministers to take

charge of technology selection and transfer for China's future nuclear power program, after two decades during which China organized a handful of "boutique" reactor projects in cooperation with Canada, France, Japan, and Russia.

China also does not share NRC's view that a terrorist attack on reactors, using a hijacked passenger aircraft as a weapon, is a realistic enough scenario to warrant modifying the design. Right now, China operates only eleven reactors representing about 9 gigawatts (GW) of installed generating capacity, but these have established a record of reliability, and have convinced China's leaders that nuclear power is safe, efficient, and profitable. Fed by galloping energy demand and concerns for global warming among Chinese leaders, China's appetite for nuclear power is now increasing. In 2005 China expected to have 40 GW on line by 2020. Chinese officials and executives now routinely assert that by 2020 China will have a total installed capacity over 70 GW. If China succeeds, ten years from now it will likely become the world's second-biggest nuclear power generator after the United States.

Shortly after China selected Westinghouse to shape its nuclear future, rival Areva made a separate deal with China to build two of its new EPR reactors in Guangdong Province in China's southeast, where French nuclear firms have been engaged since the late 1980s. Unlike Westinghouse, Areva also offered China a suite of fuel cycle technology options, and French officials hoped that a mammoth fuel cycle deal would coax China to continue building the EPR.

In line with plans by China to build more reactors, China promulgated that it would follow the path of France, Russia, and Japan and embark on commercial-scale plutonium separation from China's spent fuel, and recycle of the plutonium as reactor fuel. Areva offered China to help set up a reprocessing industry in China, modeled on its own experience in France. More recently, Russia has made a counteroffer to do the same, vowing to integrate Chinese labs into advanced fuel cycle R&D work now ongoing in Russian centers.

China's nuclear power program has become more aggressive, politically organized, and independent of its foreign partners in the wake of recent changes in China's decision-making structure. China will certainly build more reactors than it anticipated when beginning in 2003 it organized the competition leading to selection of Westinghouse. But many or most of these set up this decade will likely not be AP1000s or EPRs but instead be based on the original French design built in Guangdong and now dubbed China Pressurized Water Reactor or CPR-1000. To meet China's higher targets for more nuclear capacity, China is now replicating these CPRs.

Rumors in Beijing circulated last month that China will therefore go back on its plan to permit Westinghouse to build all of the first group of inland power reactors in the country. Chinese officials won't confirm that, but utility executives—including at China Power Investment Corp. (CPI), a major AP1000 investor—said that China through 2020 will shift resources away from more AP1000s and instead toward cookie-cutter construction of the CPR at many Chinese locations, including at inland sites.

In the meantime, the ambitious construction schedule for the U.S.-designed reactors in China has come under heavy pressure.

In part out of Chinese concern to keep construction on track, China's nuclear regulator, the National Nuclear Safety Administration (NNSA), will not agree to a proposal, favored by the U.S. Nuclear Regulatory Commission (NRC) and Westinghouse, to modify the design of the containment structure of the AP1000 to provide improved protection against an air crash. In the United States, NRC, after a design review prompted by post-9/11 concerns about terrorist threats, asked Westinghouse to change the design of a shield building which is part of the containment and to use stronger materials. Westinghouse then urged China to also follow that advice.

China will not do that, Beijing officials said last month after consultations with

Westinghouse and U.S. regulators. "China will build Revision 15," the AP1000 design version originally approved for construction in both the United States and in China, one official said. "It will not approve Revision 17," which incorporates the c

China's Pakistan Corridor -- China Pakistan investment moid ansari review and analysis copper balochistan

Friday, April 30, 2010

China's Pakistan Corridor

Even though Pakistan is fighting its war on terror China is investing in Pakistan's economy like there is no tomorrow. China's main interest in the treacherous territory of Balochistan are the copper mines and the Gwadar Port on the Arabian Sea.

In the Pakistani province of Balochistan, South Asia and central Asia bleed into the Middle East. Bordered by Afghanistan, Iran and the Persian Gulf, and well endowed with oil, gas, copper, gold and coal reserves, Balochistan is a rich prize that should have foreign investors battering at the gates. But for a half-century it has been the exclusive playground of the Pakistani government and its state-owned Chinese partners. China would prefer it to stay that way.

China is Pakistan's oldest military and political ally, but in the last two decades it is the economic component of the alliance that has taken center stage. Pakistan, and in particular Balochistan, is China's physical link to its sizable investments in Iranian gas, Afghan hydropower and Gulf oil. Explains Andrew Small, a fellow at the German Marshall Fund, the Sino-Pak relationship "matters more now, because of India's economic growth. Pakistan being a trade and energy corridor means that possible pipelines and projects [in Pakistan] have a strategic significance beyond the specific investments." Chinese control of Pakistan's commodities corridor can "bind India down in South Asia, restricting its capacity to operate elsewhere."

Chinese companies have poured at least \$15 billion into Baloch projects: an oil refinery, copper and zinc mines and a deepwater port at Gwadar, in the Gulf of Oman. "They wanted Gwadar to be another Dubai," says Khurram Abbas, the port's managing director, "to capture the transit trade with countries that are landlocked, like Afghanistan, and to encourage transshipment trade from the Persian Gulf to East Africa."

China's Tianjin Zhongbei Harbor Engineering has invested \$200 million to build the first three berths and plans to invest a total of \$1.6 billion to expand the port in the future. But business at Gwadar has been slow. Though the three berths have the capacity to handle \$2 billion worth of cargo a year, the port saw only \$700 million in 2009. "The challenge," says Abbas, "is that Gwadar is not yet linked to the rest of the country. The government was supposed to provide road connectivity. Without roads there can be no commercial activity [in Balochistan]. And we need commercial activity, investors to set up factories around Gwadar, to get cargo for the port."

China is taking matters into its own hands, starting to build a highway from Gwadar to the capital of Balochistan, Quetta, on the Afghan border, where it will connect to Pakistan's national highway network, and from there to the Karakoram Highway that leads into China. China's Harbor Engineering Corps is also working on a new airport at Gwadar, due to open in 2013.

Infrastructure is not the only challenge that Chinese investors in Balochistan face. The province is a key battleground in the wars currently threatening Pakistan. Quetta is rumored to be hiding wanted leaders from the Afghan Taliban. Small towns in the Baloch heartland, meanwhile, are a launchpad for a decades-old separatist movement that capitalizes on populist resentment of federal agencies and foreign investment Chinese firms can usually weather these threats. Explains the German Marshall Fund's Small, "They are less concerned about security than the U.S. because they have faith in the Pakistani military's ability to look out for their interests, a level of faith that Chinese workers will get privileged levels of protection even amidst destabilizing [political] circumstances." Unsaid: China is willing to play in the bribery culture traditional to the area.

Moreover, China recruits local figures as managers. Muhammad Sanjrani, the managing director of China's Saindak copper mine in Chagai, Balochistan, is also the head of the local tribe, with historic control of the Chagai region, and has

worked to sell the project to the populace.

Beijing is willing to play hardball to protect its position in Balochistan. That's a lesson learned the hard way for Tethyan Copper, a joint venture between Canada's Barrick Gold (ABX - news - people) and Chile's Antofagasta. In 2006 Tethyan signed a deal to survey, and then develop, the Reko Diq reserve in Balochistan, estimated to hold \$70 billion in copper and gold.

Though the provincial government holds a 25% stake in the venture, the deal was signed between the federal government and Tethyan's foreign execs, and no prominent tribal authorities are involved. As a result, the mine has been unusually unpopular, exacerbating threats to other foreign investments in the province, including China's highway project.

In January the Baloch government, struggling politically and looking to appease separatist hardliners, announced it would cancel Tethyan's license and force investors to absorb a \$3 billion loss. Almost immediately the U.S. intervened, putting pressure on the Pakistani central government to dissuade Quetta from doing this. U.S. diplomats believe the sanctity of the Tethyan deal is essential to its efforts to encourage Western investment in Pakistan as a counter terror tool.

For China, however, American intervention was an alarm bell, confirming longstanding suspicions in Beijing that Pakistan's alliance with the U.S. in Afghanistan would come at the expense of China's relationship with the Pakistani military establishment and its exclusive access to Pakistan's wealth and strategic location.

But the confrontation between Pakistan's central government, responding to U.S. pressure, and a more intransigent provincial leadership also presented China with an opportunity. The giant Metallurgical Corp. of China, which controls the Chinese stake in the Saindak site, bid to take over the Reko Diq site from Tethyan, too.

Though the provincial and federal governments have yet to agree, MCC made a compelling case. In private meetings with Baloch leaders the Chinese representatives agreed to build a railroad and a power plant in Balochistan as well as to waive any requirements for sovereign guarantees. Says a frustrated William N. Center, the U.S. State Department's foreign commercial attaché in Pakistan, "These are terms that no private company could compete with."

Push to the Sea

A highway from Gwadar to Quetta will serve as a pipeline for China. Metallurgical Corp. of China, a stakeholder in the Saindak copper mine, is aiming to take over Barrick's Reko Diq site.

Reko Diq :

Reko Diq is a small town in Chagai District, Balochistan, Pakistan, in a desert area 70 kilometres north west of Naukundi, near to the Iran-Afghan border.

Reko Diq, also the name of an ancient volcano, literally means sandy peak, but this is something of a misnomer. It could be called Tangav Diq, or gold peak, because according to development expert Syed Fazl-e-Haider, below the sands lie some 12.3 million tons of copper and 20.9 million ounces of gold. The copper-gold deposits at Reko Diq are believed to be even bigger than those of Sarcheshmeh in Iran and Escondida in Chile.

Reko Diq is a large copper-gold porphyry mineral deposit on the Tethyan belt, located in southwest Pakistan in the province of Balochistan in which Barrick holds a 37.5% interest. A pre-feasibility study was completed in third quarter 2009; a full feasibility study is being finalized and is under review and progress continues with the expansion studies and the baseline environmental and social impact assessment which is expected to be completed in the first half of 2010.

Barrick's share of measured and indicated and inferred gold resources are 9.5

million ounces¹ and 6.4 million ounces¹, respectively and its share of measured and indicated and inferred copper resources are 11.7 billion pounds¹ and 8.4 billion pounds.

How quickly can Pakistan tap into huge coal reserves -- APP

How quickly can Pakistan tap into huge coal reserves

Posted on 30 April 2010

Vision needed to use huge coal reserves to build Carbon-Chemical industry
Should Pakistan burn coal or use coal set up carbon-chemical industry which could be utilized to export value added materials to the planet and used for domestic consumption. Burning coal is like burning sandal wood. How quickly can Pakistan wean itself off the "burning coal" paradigm—perhaps after using it to meet the immediate energy needs. A lack of vision would just burn the carbon—smart people can come up with a lot of innovation.

Pakistan coal reserves are estimated at 175 billion tons which according to the Vice-Chancellor (VC) of Punjab University, Professor Dr Mujahid Kamran equal 618 billion barrels of crude oil. According to the most reliable analytical reports Saudi Arabian crude oil reserves are estimated at around 260 billion barrels. At 60 Dollars per barrel this equates to 3708 Billion Dollars or approx. 4 Trillion Dollars (at current prices). At future prices these reserves will be worth 8 or 24 Trillion Dollars. This is enough money to build the most modern infrastructure, the best roads, the best hospitals, the best education, the best universities, the best hi-speed rail system and the best public transportation system on the planet

ISLAMABAD – President Islamabad Chamber of Commerce and Industry Zahid Maqbool Friday said there is need to utilise Thar coal as it has the potential to produce 100,000 MW for 300 years, which is the solution of the power crisis. He observed this while presiding over a meeting of ICCI Sub Committee on Energy. "According to the Geological Survey of Pakistan (2005), Pakistan has huge coal reserves of about 185b tons bulk of which are located in Sindh," he informed, He said that all South Asian economies including Pakistan are confronted with a massive crisis of power shortage leading to excessive load shedding due to which their economies are badly suffering. However, they can overcome this problem if they agree to a single point agenda of utilising untapped energy potential found in Pakistan and Nepal, he opined.

Not only Pakistan but Nepal also has the largest hydropower potential in South Asia, as it possesses 83,000 MW of hydroelectric power potential he said and added that both the countries have the potential to meet the energy needs of the entire South Asian region, but due to financial constraints, they could not tap this potential.

He stressed that to exploit this massive energy potential coal and water in Pakistan and Nepal, South Asian countries including India, Pakistan, Nepal, Bangladesh and Bhutan should pool their financial resources and technical expertise and start mega energy projects in Pakistan and Nepal and develop a consensus energy distribution formula for meeting their energy needs.

He said there are many examples of power sharing among countries of Africa, Latin America, Central Asia and South East Asia and South Asian countries should also take benefit from such arrangements.

KARACHI: The Thar Coal and Energy Board has constituted a committee to prepare a formula for determining Thar coal price based on international best practices.

The committee consists of Murad Ali Shah, Secretary Irrigation and Power and Asad Ali Shah, a private member of the board.

Board's secretary Aijaz Ali Khan told Dawn that while Ogra is regulatory regime for determining prices of oil and gas, there is no coal pricing agency or pricing formula in place for Thar coal.

He said that the absence of regulatory regime for Thar coal is one of the barriers in determining tariff for coal-fired power plants to be set up at Thar.

In the past a Chinese company, which had reached an advance stage of setting up a power plant at Thar, was refused a reasonable tariff by a federal agency, which compelled the company to pack off.

Meanwhile, the Thar Coal and Energy Development department is preparing detailed information guidelines, which will provide specific information on legal and regulatory framework as well as commercial benefits to the national and international investors participating in international bidding for Thar Coal Block I. The board has decided to offer 20 per cent Internal Rate of Return (IRR) to firms which achieve financial close before Dec 31, 2015 for power plants based on Thar coal.

It will offer 25 per cent IRR to firms, which achieve financial close by 2014.

Two international and two local companies are working in various Thar blocks to set up coal-fired power plants. A UK firm Cougar Energy is exploiting Block III for underground coal gasification, which will lead to a 400mw power plant.

UK firm Oracle Gas Fields also plans to develop 1.4 billion tons coal in Block V1 integrating the mine with the construction of a mine-mouth power plant.

The Thar Coal Power Project (TCPP) would attract over \$20 billion foreign investment within next six months, an official of Sindh Coal Authority Board (SCAB) told Business Recorder on Sunday. According to Sharjeel Memon, one of the SCABs governors, a host of interested companies from United States, China, Britain, Singapore, South Korea, Germany, Poland, Australia etc would invest over \$20 billion in the Tharparkar-based energy project.

Memon, who is also the member of provincial assembly of Sindh, revealed that even the neighbouring India had shown interest in the attractive coal-based power generation project, TCPP. He, however, opined that tension at border and an ongoing blame-game between the two nuclear-armed South Asian neighbours were likely to keep New Delhi away from the project. The SCAB official also linked the expected investment with an early end to the ongoing political turmoil in the country.

"Lots of MoUs have been signed and a host of foreign firms keen to invest in the coal sector are visiting the Chief Minister on almost daily basis... work is underway on war footing basis," he added. Also, he said, President Asif Ali Zardari, during his recent visit to China, had inked different MoUs with the investors in Beijing.

He said a nine-member Korean delegation, which had held a "fruitful" meeting with Chief Minister Syed Qaim Ali Shah last Thursday, would soon start boring for mining in Blocks 4 and 8 of the site.

The coal exploration work would follow the power generation process that, the MPA said, was a federal subject and would be carried out by Islamabad.

According to Memon the TCPP would help Sindh province generate at least 7000-8000 MW electricity by 2012, which would not only cater to the countrys 3,500MW power shortage, but would also be exported to the neighbouring countries. He said the provincial government had undertaken a fast track infrastructure development in Thar, along with a coal based mine-mouth thermal power plant by a Korean firm at an estimate cost of \$3 billion. According to Asad Ali Shah, another SCAB member, a coal-based power generation plant in Thar would help Pakistan save a huge sum of \$8 billion it was presently paying for imports of oil to run its power generation units. A recent study has revealed that Tharparkar has 175 billion tons of coal reserves with a best power generation quality, he added.

Foreign Minister Makhdoom Shah Mahmood Qureshi has said that the feasibility report of the Thar Coal will be ready by June this year for submission to Sindh Government. Qureshi said that he has very good interaction with China's top corporate leaders here in Beijing and also held talk with a top official whose company is carrying out the feasibility report on Thar coal. The company will finish the work on feasibility report by June and thereafter it will be submitted to the Sindh Government. The foreign minister said that he has discussed the prospects of utilizing the Thar coal for generating thermal power and was pleased to learn that the quality of Thar coal is far better than the imported coal being presently used for the purpose.

"So the chances for using Thar coal for power generation is very bright, according to initial report", the foreign minister told APP in an exclusive interview during his stay in Beijing.

Pakistan to get Shadow Drones and 18 F-16's from the US ! -- pakistan moid ansari F 16 frigate terrorism USA US military aid

Tuesday, March 30, 2010

Pakistan to get Shadow Drones and 18 F-16's from the US !

Pakistan is scheduled to get 18 of the Block 52 F-16s, Oliver Hazard Perry Class frigate by fall and is expected to receive Shadow Drones within a year, a Pentagon official has said. Islamabad is set to receive all this military help under the enhanced US-Pakistan strategic cooperation.

"I would like to think that we would get them (Pakistan) within the year," the official said on Monday. "Shadow (Drone) is one of the things that they had asked for, and as we expanded and talked about other UAV platforms to be able to use is when they said: Well, let's take a look at them and then let's make sure we're picking the right one," the official said, adding that Shadow drones may in fact be the right platform at the end of the day.

In the last three years, the US has provided 14 F-16s, five fast patrol boats, 115 self-propelled howitzer field artillery cannons, more than 450 vehicles, hundreds of night- vision goggles, day and night scopes, radios, protective vests and first aid items to Pakistan's security forces. "Other significant military assistance to be provided later through this year through our Foreign Military Sales and Foreign Military Financing programs includes the delivery of the first batch of 18 of the Block 52 F-16s scheduled for the Pakistan Air Force, to arrive sometime this summer; and an Oliver Hazard Perry class frigate, the first for Pakistan Navy, this fall," the official said.

In fiscal year 2008, the US provided in excess of USD 1 billion as grants to Pakistan in security assistance and training. It, then, doubled in the last fiscal to just over USD 2 billion, and the figure is now projected to surpass this year.

"This significant commitment highlights the importance we place on our strategic long-term relationship and support for Pakistan," the official said, while observing that this was being done to assist Islamabad in the fight against terrorism.

The Obama Administration values Pakistan's strategic insight when it comes to Afghanistan and the region, and continues to consult their leaders closely, as exemplified by numerous visits by senior US officials to Islamabad, the official said. "Pakistan, is a key ally, and we face a common enemy and a common goal: a stable and secure Pakistan and the region," he added.

The Pentagon official said Pakistani officials were recently shown models of some drones in Afghanistan so that they would articulate their requirements. However, the US would not provide Pakistanis with drones having strike capabilities. "On the strike capability of drones, it's not US policy to be able to give any lethal capabilities with any of the drone technology that we do for any of the countries," the official said in response to a question.

Tajikistan offered use of Gwadar Port -- ISLAMABAD - APP

Tajikistan offered use of Gwadar Port

Saturday, May 01, 2010

ISLAMABAD: Interior Minister Rehman Malik has said Pakistan and Tajikistan have been facing common challenges.

Talking to media in Dushanbe on Friday, the minister said, "I conveyed the best wishes of the people of Pakistan, President and Prime Minister to the President of Tajikistan." He said: "Tajikistan and Pakistan are great friends, we share common religion, share borders and now we share hearts."

While appreciating the leadership qualities of the Tajik president, the minister said the challenges for these two countries are common. "Especially his leadership, wisdom has steered out Tajikistan from many challenges and problems," he said.

Rehman Malik said he held fruitful meeting with minister of defence, head of security and the interior minister.

"We discussed and worked out a roadmap to further enhance cooperation in the field of extremism as they exist in the region. We also worked out ways and means to curb human trafficking, drug trafficking and any heinous crimes." He said the two countries will not allow any act of terrorism from the soil of both countries. "We treat enemies of Tajikistan as enemies of Pakistan."

Answering a question, he said Tajikistan is helping out and pointing out in taking action against the terrorists." Replying to another question, he said there is no doubt that certain Tajik and Uzbek extremists are fighting out in Swat and Fata. The minister said there was no room for terrorists in both countries and they will continue their action.

He said terrorists are enemies of humanity and they have no religion and boundaries. "They have their own motives and follow their masters. They want to destabilise Pakistan, Afghanistan and the region," he asserted. Rehman Malik said Pakistan has left no stone unturned to fight terrorism and extremism and has broken their backbone.

"There are many challenges and we have to face it. There is no room for extremists." He said the people of Pakistan appreciate the cooperation being extended by Tajikistan.

The minister said cooperation between Afghanistan, Pakistan and Tajikistan will be a milestone in fighting terrorism.

He also appreciated the achievements of the government of Tajikistan in the field of hydro carbon and praised steps, wisdom and leadership of Tajik President for improving the economy of the country. He hoped that Tajikistan will progress by leaps and bounds under his leadership. The minister also offered the Tajik government to use the Gwadar port in future.

Electricity import talks held with Iran team -- Daily Dawn

ISLAMABAD: Iran has sought about 90 per cent increase in tariff for the 39MW of electricity it currently sells to Pakistan and the two countries agreed on Monday to expedite import of an additional 1000MW from the Islamic republic.

Informed sources told Dawn that Pakistan had been importing 39MW of electricity from Iran for Gwadar and border areas of Balochistan at about 5 cents per unit since 2003.

The import contract has expired and Iran wants to increase the tariff to 9.5 cents per unit. Pakistan considers it high and has offered 8 cents per unit. The two sides are yet to formalise a revised contract, according to the sources.

An Iranian delegation led by deputy economic minister for foreign affairs Seyed Amir Mansoor Baroghei held a meeting here with Pakistani team headed by Minister for Water and Power Raja Pervez Ashraf and discussed ways of speeding up work on import of 1000MW electricity.

According to an official statement, the two sides agreed to expedite the import of 1000MW power project and decided to hold experts level meetings every two months.

The meeting was briefed on the current status of the project. It was informed that the Pakistani side had completed its feasibility study while the Iranian company, Mushanir, was yet to complete its report. After completion of feasibility studies work will start on the project and a transmission line about 700 kilometres long will be constructed at an estimated cost of \$600 million in five years. The tariff for the mega project would be negotiated after completion of the studies. The Iranian side has, however, dispelled a perception that electricity would be provided at cheaper rates. The imported electricity will be for the national grid.

The meeting was informed that work on a 100MW import project for Gawdar would be completed in June, 2012. It observed that negotiations for the revision of tariff for the 39MW electricity for Gawadar were in progress.

Raja Pervez Ashraf said Pakistan was taking all possible measures to overcome its energy crisis, adding that the country was eager to complete the import of 1000MW power project well before time.

Mr Ashraf accepted Mr Baroghei's invitation to visit Iran for further talks. He asked members of the Iranian delegation to use their good offices for early completion of feasibility report by the Iranian company.

The Iranian minister noted with satisfaction Pakistan's willingness to buy electricity from his country and said his country would be happy to help Pakistan tide over the energy crisis. He said although the import of 1000MW project would take at least five years because of the long distance high voltage transmission line there was need to jointly explore ways of completing the important project sooner. He said the Iranian company would be asked to complete the feasibility report at the earliest.

Beijing is reviving the idea of 'empire' with the launch of the world's most ambitious high-speed rail line --

<http://www.newsweek.com/id/237306>

The New Silk Road

Beijing is reviving the idea of 'empire' with the launch of the world's most ambitious high-speed rail line

Thousands of years ago, trade caravans packed with spices and silk crisscrossed the Eurasian land mass along routes collectively known as the Silk Road. These caravans connected Constantinople to China's then-capital, Changan, and even today the city (now Xian) has an ancient Muslim quarter and a self-assuredness evoking that bygone era. In those days, all roads led to China, which lived up to its name as the Middle Kingdom. (In Chinese the country is called Zhongguo, literally Middle Country.) Now with an audacious scheme to link 17 countries with more than 8,000 kilometers of high-speed railway—ultimately capable of transporting cargo as well as passengers all the way to London—China hopes to revive its role at the center of the universe.

Even by larger-than-life Chinese standards, the plans seem mind-boggling. The first long-distance line inside China, linking inland Wuhan to coastal Guangzhou, opened in December, hitting top speeds of 350kph, faster than the speediest trains of Europe or Japan. Beijing hopes to have 800 bullet trains running across China by 2013 and, soon after that, across the border. Two networks will connect China to Europe—with terminuses in London and Berlin—and a third will link to Vietnam, Thailand, Burma, Malaysia, and Singapore. Chinese engineers have begun work in Burma, and Beijing says Central and Eastern European countries are keen for the building to start. The planned rail deals will vastly improve China's ability to transport crucial energy resources from suppliers in developing countries. "If the system is completed, it'll be more convenient for us to tap into natural resources, especially oil and gas, in Myanmar, Iran, and Russia," says Wang Mengshu, a Jiaotong University professor and consultant to China's high-speed-rail projects.

China's vision is at odds with the hopes that opened this century for a world of free markets and open borders, and it animates many of China's latest mega-projects. A new gas pipeline from Turkmenistan to China's remote Xinjiang province has already siphoned off 50 billion of the country's 80 billion cubic meters of gas. China is helping secure its access to strategic ports in Pakistan, Burma, Bangladesh, and Sri Lanka. The Chinese leadership is intensely focused on securing and expanding its shipping routes. These new Silk Roads are a sign of how China sees the world of the future—less predictable and more dangerous. Threats, including a potential trade war with the West, and conflicts over energy security abound. Witness China's unease over U.S. threats of sanctions against one of its main oil suppliers, Iran. In this world, Beijing believes it will be better to have constructed strategic facilities—railways, ports, pipelines—especially in less developed countries that lack experience or financing for such projects. In return, China is eyeing important long-term transport or supply contracts for natural resources. In one such technology-for-resources deal, Beijing is building a rail system for Burma in exchange for Burmese lithium.

Still, Beijing can't control everything that comes and goes on a network this big. If the ancient Silk Road was one of the first grand avenues of globalization, fueling trade from the Celestial Kingdom to medieval Europe, the new railroad will be the latest. All of its lines will carry both passengers and cargo, and are designed to keep China's economic miracle on track, as trade with Europe and the emerging markets grows. Thanks to China's energy hunger, its involvement with Mideast nations is also growing fast, as the Chinese exploit Iranian natural gas, Iraqi oilfields, and Afghanistan's Aynak copper mine. Ben Simpfendorfer, chief China economist for the Royal Bank of Scotland and author of *The New Silk Road: How a Rising Arab World Is Turning Away From the West and Rediscovering China*, says mainland merchants are fine-tuning products to appeal to these new consumers. Chinese-porcelain sellers are hawking less blue porcelain, popular among European buyers, and more red porcelain, popular among Arab buyers. China's new Silk Road strategy is meant to fill the vacuum of "strategic emptiness" that

emerged in Central Asia after the fall of the Soviet Union, and could lead to bilateral tensions. Over the last decade Chinese economic influence has been slowly but surely eroding Russian power in what Moscow regards as its Central Asian backyard. Although Beijing has been careful to avoid public confrontation, its inroads in the region have riled Russians. "By building their new Silk Road [railway], China is interfering in Russia's sphere of influence in Central Asia," says pro-Kremlin Russian lawmaker Konstantin Zatulin, the head of the Commonwealth of Independent States committee in the Duma, Russia's parliament.

The key to the new Chinese empire is not occupying turf but seeking reliable transport networks that aren't easily disrupted by powerful potential rivals, such as the U.S., Russia, or even India. Beijing's heavy involvement in developing infrastructure at Pakistan's port of Gwadar, for example, is linked to the fact that Gwadar is the downstream hub for pipelines linking Central Asia to China. In short, the new Silk Road is aimed at building a whole new world of infrastructure links that diminish Chinese reliance on traditional trade routes through the Strait of Hormuz (turf of the U.S. Fifth Fleet) and the Strait of Malacca (stamping ground of the U.S. Seventh Fleet). "If [those waterways] were to become blockaded, it would be a big problem for Chinese sea transport," says foreign-policy analyst Gao Heng of the Chinese Academy of Social Sciences, who believes authorities are very concerned about bottlenecks to energy imports. High-speed rail is part one of a backup plan to ensure energy security.

All high-speed trains run on the European gauge, meaning that Central Asian nations will have to change over if Beijing lures them away from the old Russian models. The geopolitical fallout could be intense. "Chinese projects in Central Asia sound threatening to Russia's economy, especially if China actually does build the railroad through Kyrgyzstan and Uzbekistan," says Azhdar Kurtov, a senior researcher at the Russian Institute of Strategic Research. "Russia has lost Central Asia," says Yuri Krupnov of Moscow's Institute of Demography and Regional Development. While Russia was "asleep" or distracted by conflicts with Ukraine and Georgia, China moved in—under the cover of the global economic crisis—to seal energy deals in Turkmenistan and Kazakhstan, and now the same will happen with rail projects in Central Asia, he predicts.

Beijing is already building high-speed rail routes in Turkey, Venezuela, and Saudi Arabia. It's also signed preliminary agreements with the state of California and General Electric, reflecting China's hopes to provide technology, hardware, engineers, and some financing to build high-speed rail lines on the West Coast of the U.S., which now lags behind China in the field. Officially at least, Beijing authorities tout the mutual good that its global rail schemes will bring—as well as the advertisements such deals will represent for the "Made in China" brand.

Chinese companies in recent years have invested billions of dollars in Baluchistan -- By Tom Wright, The Wall Street Journal;

By Tom Wright

Of THE WALL STREET JOURNAL

ISLAMABAD -(Dow Jones)- Barrick Gold Corp. (ABX, ABX.T) and Antofagasta PLC (ANFGY, ANTO.LN) are considering making a new revenue-sharing offer for development of a Pakistani gold mine after the local government threatened to cancel the deal and a Chinese state-owned company tried to muscle in.

In February, Baluchistan's chief minister said the province was canceling Tethyan's contract and was considering setting up its own public company to develop the Reko Diq site, one of the world's largest gold deposits located near Pakistan's border with Iran and Afghanistan.

Any overturning of the deal by the local government could hurt Pakistan's investment climate, which is already reeling due to Taliban terrorist attacks and a balance-of-payments crisis that led to International Monetary Fund intervention in 2008, analysts say.

The Reko Diq project, in which Tethyan has invested \$500 million since acquiring the project from BHP Billiton Ltd. (BHP, BHP.AU) in 2006, is one of the few big investment projects by Western companies in Pakistan, although Chinese state-owned firms have been more active. Foreign direct investment fell 49% to \$1.6 billion in the nine months ended March 31, according to figures from Pakistan's central bank.

The federal government has been keen to see the project go ahead. A spokesman for the Pakistan Ministry of Petroleum and Natural Resources said Tethyan's contract remains valid. But under Pakistan laws, local governments have the greater share of say in mining projects.

The Baluchistan government hasn't followed through on its threat to cancel Tethyan's exploration contract, said Mushtaq Ahmed Raisani, secretary for mines and mineral development in the Baluchistan provincial government.

Pressure on Tethyan to sweeten its deal increased after a unit of China Metallurgical Group, a state-owned Chinese company, made a counteroffer to take over the project, which is believed to contain 12.3 million tons of copper and 20.9 million ounces of gold.

Raisani said Baluchistan province had received a letter from China Metallurgical offering to develop the project but replied that it had an existing contract with Tethyan. Attempts to reach the Chinese company Thursday were unsuccessful.

Chinese companies in recent years have invested billions of dollars in Baluchistan, which is rich in natural resources, Pakistan officials say. Another unit of China Metallurgical is developing the Saindak copper and gold mine in Baluchistan, not far from the Reko Diq site.

The Chinese government has given financial and technical assistance to the development of Gwadar port in Baluchistan, which the government hopes will become a major global shipping hub and conduit for its natural resources. And Chinese companies are looking at bidding for infrastructure, power and coal projects in Baluchistan and other areas of Pakistan, local officials say.

Karzai's Balancing Act: Bringing 'China' In? -- By Shanthie Mariet D'Souza for ISAS

By Shanthie Mariet D'Souza for ISAS

China's interests in Afghanistan are perceived to be mainly economic. It is unlikely that the March 2010 Sino-Afghan joint declaration, following President Hamid Karzai's visit to China, will bring about a dramatic change in the present Chinese policy of abstaining from military engagement in the conflict-ridden country.

However, as the scenario of United States (US) withdrawal from Afghanistan looms large, China will have to prepare itself for a much larger and crucial role for long-term stabilisation and reconstruction of the war-ravaged country given that its interests would be at stake. Its friendly ties with Pakistan would continue to be a great leverage when it decides to pursue such a policy.

President Karzai's three-day state visit to China, beginning 23 March 2010, culminated with the establishment of the China-Afghanistan comprehensive cooperative partnership. This first visit after the Afghan President's re-election evoked immense international attention as an attempt by a beleaguered leader to indulge other big powers in the region at a time when he faces increasing criticism on corruption, cronyism and electoral reforms at home and abroad. Considering the fact that China's role in Afghanistan thus far has remained limited, this visit has sparked speculations regarding increased Chinese engagement in that country. In a joint declaration, Chinese President Hu Jintao emphasised on five aspects of the cooperative partnership - (1) political and diplomatic; (2) economic and trade; (3) humanitarian; (4) security and police affairs; and (5) multilateral efforts to build the comprehensive cooperative partnership of good-neighbourliness, mutual trust and friendship for generations.

The huge prohibitive costs notwithstanding, the Chinese Metallurgical group is willing to invest in the insurgency afflicted Logar province. This is in conjunction with China's larger regional economic strategy of development of its underdeveloped western regions and linking them with regional trade routes through Central Asia, South Asia, Iran and Middle East. In recent years, the region has witnessed highly visible and substantial Chinese investments into the Gwadar port (Baluchistan province) and Karakorum Highway in Pakistan and a multi-billion dollar pipeline from Kazakhstan to Xinjiang Uyghur Autonomous Region (XUAR). Afghanistan and Pakistan are seen as key transportation and trade links to actualise this strategy extending from Iran to China. The Gwadar port facilitates China to import 60 per cent of its energy needs from the Middle East.¹²

Naval chief for debate on Gwadar Port's potential -- SAMAA TV

Naval chief for debate on Gwadar Port's potential

Updated on: 02 Jun 10 01:00 AM

Staff Report

KARACHI: Chief of the Naval Staff Admiral Noman Bashir has said that Indian Ocean is an important trade region as 33 percent of the world's total fuel passes through this sea route.

Speaking at the Karachi Institute of International Affairs (KIIA) here on Tuesday, he said the ships, which have so far arrived at Gwadar Port, are result of the subsidy provided by the Government of Pakistan.

He urged the need for holding a debate at the KIIA to explore the true potential of Gwadar Port.

Pakistan, China sign five agreements; Gilani says Chinese support source of strength -- APP

Pakistan, China sign five agreements; Gilani says Chinese support source of strength

ISLAMABAD, Jun 9 (APP): Prime Minister Syed Yusuf Raza Gilani Wednesday said China's support for Pakistan's security, stability and economic development is a source of strength. He thanked China for its steadfast support and solidarity to Pakistan through thick and thin and termed Pakistan-China relations a central pillar of Pakistan's foreign policy. The Prime Minister expressed these views at the start of bilateral talks held between Pakistan and China here at the PM House on Wednesday evening. The Chinese delegation was headed by Vice Premier Mr. Zhang Dejiang. Pakistan and China on at the conclusion of the bilateral talks also signed five agreements.

The agreements included Concessional Loan for PAKSAT I-R Project, Cooperation in Port Construction and Port-Management-Training, Cooperation in Information Technology, China-Pakistan Cable System Construction and Maintenance Agreement and contract agreement for engineering, procurement and construction works of the Darawat Dam Project.

Earlier, in the bilateral talks, the Prime Minister said that President Asif Ali Zardari would be visiting China next month and is also expected to meet President Hu Jintao in Tashkent on the margins of SCO Summit.

He expressed the hope that exchange of high level visits this year would provide further impetus to our expanding partnership.

Talking about regional situation, Prime Minister Gilani said that establishment of durable peace and respect for sovereignty, unity and territorial integrity of Afghanistan is a prerequisite for peace and stability of Pakistan.

Applying Chinese support, the Prime Minister said that Pakistan highly appreciates the US \$ 1 billion Balance of Payment support extended by Beijing in 2008-09.

He said that Pakistan-China friendship is a factor of peace and stability for the region and "we look forward to jointly celebrate the 60th Anniversary of the establishment of Diplomatic Relations next year".

The Prime Minister said that Pakistan strictly adheres to "One-China Policy" and fully supports China's principled position on the return of Taiwan to the motherland. Islamabad regards Tibet as an inalienable integral part of China and is firmly opposed to any attempts to undermine China's sovereignty and territorial integrity, he added.

The Prime Minister said that both countries are committed to fight the three evils of terrorism, separatism and extremism and mentioned in the same context that "we unequivocally condemn ETIM and assure China of our complete cooperation in countering and defeating it".

Appreciating the Chinese assistance/extension of credit in setting up Chashma Nuclear Power Plants, the Prime Minister said that Mega projects like Gwadar, KKH, HMC and Neelum-Jhelum Hydro-electric Plant are shining symbols of our friendship.

Prime Minister Gilani emphasized that Pakistan and China should take full advantage of the FTA and both Governments should encourage and facilitate the bilateral cooperation between their private sectors by starting projects mutually facilitated by both Governments and run by the private sectors.

"We should strive to meet the bilateral trade target of US \$ 15 billion", he maintained.

He urged the Chinese Government to encourage its private sector and arrange for a Chinese Buyers delegation's visit to help bridge the ever widening trade gap between the two countries.

He stressed the need for Joint Economic Commission and Economic Cooperation Group to meet at an early date to review the entire range of economic cooperation.

The Prime Minister said that Karakoram Highway is the most vital trade and strategic link between Pakistan and China and its upgradation would greatly help boost economic ties.

Unfortunately, some sections of Karakoram Highway, he added, have come under deep water of Attabad lake, caused by recent landslides. Pakistan would like a Chinese technical team to evaluate the situation of Karakoram Highway, in the

wake of creation of Attabad lake, with a view of its urgent restoration, he added. He called on the Government of China to consider immediate assistance for Pakistan for construction of a bypass on KKH to re-open it for traffic and to facilitate issuance of visa permits and licenses to the personnel of the transport companies and business houses involved in arranging much needed surplus from China to the people of Hunza and other affected areas near Attabad lake. Pakistan, he maintained, is keen to pursue rail link between Havelian and Khunjerab, which would provide a direct link between Pakistan and China. The Gwadar port, he said, will provide an optimal trade route for China, Pakistan and the Central Asian States after completion of Havelian Khunjerab rail link. While appreciating the significance of IT sector, the Prime Minister said that both countries need to explore the possibility of development of an Integrated high-tech Manufacturing and ICT Services Technology Park in Pakistan and a Telecom University at a mutually agreed location with Chinese help. The major Chinese Electronics Companies, he said, should be encouraged to establish telecommunications equipment production facilities in Pakistan for the project. The Government of Pakistan, he maintained, could provide land and incentives package including corporate and personal tax holidays. Pakistani Companies excel at outsourced software development and this expertise combined with the skills of Chinese IT companies can be channelized for setting up of joint ventures between Chinese and Pakistani IT companies, he said. The Chinese Vice Premier while reciprocating the feelings expressed by the Prime Minister said that the growth of relations between Pakistan and China are very clear and visible. He lauded the Prime Minister and his family's role in promotion of ever closer Pakistan-China friendship and hoped that this remarkable sense of amity will be passed onward to his next generation. The Vice Premier noted with satisfaction that contacts at the highest level as well as people to people have gained strength over the years and resultant expanding relations had given boost to trade and economic ties and opened up new avenues of cooperation in the multifaceted ties. He assured that China would take every possible measure to rectify the trade imbalance between the two countries. He stated that relevant Chinese Ministries and departments will be directed to give top priority and favourable consideration to the specific projects proposed by the Prime Minister for assistance and cooperation in the fields of infrastructure connectivity, telecommunications, agriculture, energy, water conservation, and railways. The Chinese Vice Premier greatly appreciated Pakistan's role as a frontline state against terrorism. In the wake of economic losses to Pakistan in fighting war against terror, he assured, China would extend unilateral concessions to Pakistan in trade and commerce.

Rs. 12984.001 million GB budget for FY 2010-11 presented -- APP

Rs. 12984.001 million GB budget for FY 2010-11 presented

GILGIT, June 23 (APP): The Rs.12,984.001 million Gilgit-Baltistan (GB) budget for the fiscal year 2010-11 was presented on Wednesday. GB Finance Minister Muhammad Ali Akhtar presented the budget in the Gilgit-Baltistan Legislative Assembly session, which was chaired by Speaker Wazir Baig. The new budget provides allocation of Rs. 6,404.889 million for non-development expenditures, while the remaining amount has been earmarked for the development projects. Delivering the budget speech in the GBLA, Muhammad Ali Akhtar announced 50 per cent raise in the salaries of government employees with 100 per cent increase in medical allowance of employees from BPS 1 to 15, and 15 percent rise for employees from BPS 16 and above.

He told the House that the government requires Rs. 1227.740 million to meet this expenditure.

He also announced 50 percent raise in salaries of Police personnel and said the pay structure was being reviewed to bring it at par with other areas of the country. The Finance Minister said that 1500 new vacancies are being created during the next financial year.

He informed the House that though subsidies have been withdrawn throughout the country but subsidy on wheat amounting to Rs. 1878.600 million will remain intact in Gilgit-Baltistan.

He said a significant amount has been allocated for education sector besides increasing number of scholarships from existing 300 students to 600 students.

He said that all the secretaries and heads of the departments have been declared Principal Accounting Officers of their respective departments after promulgation of GB order 2009, enabling them to ensure speedy disposal of their financial matters under system of the financial control and Budgeting System 2009.

Operating expenses have been reduced by 26.5 percent as compared to financial year 2009-10 to make provision for recruitment against 1500 posts and 250 posts in Police department to improve Law and Order situation.

The finance minister told the House that for socio-economic improvement of poor segments, Benazir Income Support Program was being initiated for which a survey is underway.

He said that for the year 2010-11, Rs. 638.486 million has been increased for non-development budget, while Rs. 700 million have already been released for implementation of the empowerment order 2009.

He said that the government has established 6 new departments and for this purpose, six posts of secretaries have been created to run the affairs of the departments.

He said that keeping in view the growing population, new divisions, districts, sub divisions and tehsils are to be created. To improve the system of jail, a full-fledged separate department of jail is being set up, he added.

He said that services department has been directed to ensure 10 per cent quota for women and a department of Disaster Management Authority is being established to deal with calamities.

He further said that during the upcoming fiscal year, the revenue of the GB government has been targeted at Rs. 355.124 million.

He said that the development budget has been divided into two parts, with Rs. 3127.8 million allocated for 9 ongoing and one new projects under the PSDP, while Rs. 1234.6 allocated for Special Development Package.

The Finance Minister said that for the year 2010-11, Rs. 349.17 million have been earmarked as block allocation to complete 258 projects out of 611.

He told that block allocation is divided into two parts as 20 percent was allocated to initiate new projects whereas 80 percent to be spent on completion of ongoing projects.

He said that for power sector, the government has allocated Rs. 1140 million to complete 14 projects.

Similarly, he said the government has allocated Rs. 952.2 million for Transport and Communication sector. Besides, 50 Kilometer roads will be carpeted and 200 KM

new roads would be constructed.

He told the house that a total of 75 projects would be completed during the year 2010-11.

He said that for the Physical Planning & Housing Sector, the government has allocated Rs. 387.7 million to raise infrastructure in Education, Health, Tourism, Fisheries, Agriculture and Forest sectors.

He told the House, that some 52 new buildings would be constructed and 15 KM pipelines to be laid down.

He said Women Development and Social Welfare sector would enjoy special attention of the government. He also enumerated other achievements and said during the next fiscal year, Rs. 698.350 million would be spent to initiate new projects after consultation with members.

Later, Speaker Wazir Baig adjourned the House to meet again on Friday for debate on the budget.

Zardari to discuss open access policy for Railways in China visit -- THE NEWS

Zardari to discuss open access policy for Railways in China visit

Sunday, June 27, 2010

By Aftab Maken

ISLAMABAD: President Asif Ali Zardari in his scheduled week-long visit to China will deliberate upon an open access policy for railways, roads network to China and other viable options for oil and gas pipeline, The News learnt on Saturday.

Besides these two key sectors, the president with his Chinese counterparts will not only streamline, but also develop phased implementation plan of all these key projects connecting the two brotherly countries through rail and road networks for oil and gas transportation and transshipments to China, an official told The News.

Besides, the official said that the two countries would also appoint a reputable international consultant to refine the concept and to carry out investment definition study and based on projects viability a detailed feasibility study.

They will also establish a joint working group for formulating a comprehensive master plan, while large oil and gas companies, consultants, engineering firms and investment banks will also be taken on board on all these agreed issues, the official said.

Under the open access policy of Pakistan Railways, Chinese firm either private or public can invest in rolling stock and operate a freight trade company in Pakistan.

The private train operators will also be allowed to operate their private trains on Pakistan Railways infrastructure by paying a track access charge, he said.

The oil and gas pipelines, either in North-South oil corridor, connecting Central Asian Republics to Pakistan through Gwadar or South-North oil corridor, connecting China with the Middle East through Gwadar and West-East gas corridor, connecting Iran to China through Pakistan would also come under discussion, the official said.

The proposed oil and gas pipeline route of Havelian-Khunjerab section, the official said that it has a total distance of 662km between Havelian-Khunjerab and the pre-feasibility study has been completed by Dong Fang Electric Corporation and ILF, Austria-Germany for the project.

Two aide memoirs signed on October 28, 2009 and March 6 between the Railways Ministry of Pakistan and China Railway Group Limited to facilitate financing and complete feasibility study would also be reviewed during the meetings, he added.

Enhanced Chinese interest in Pakistan -- (Chennai, Sri Lanka Guardian)
Enhanced Chinese interest in Pakistan
by B.Raman

(July 01, Chennai, Sri Lanka Guardian) The Chinese Foreign Ministry has announced that at the invitation of the Chinese Government President Asif Ali Zardari of Pakistan will be visiting China from July 6 to 11, 2010, for talks with President Hu Jintao, Prime Minister Wen Jiabao and other Chinese leaders. This will be his second official visit to China at the invitation of the Chinese Government. His first visit was in October, 2008, shortly after he took over as the President. In fact, after assuming office as the President, he chose China for his first official bilateral visit to emphasise the importance attached by him to his country's relations with China.

2. He had announced during his first visit that he would be visiting various Chinese provinces once a quarter to learn from the Chinese experience in economic development. In pursuance of this, he had visited China thrice last year. These visits were not undertaken at the invitation of the Chinese Government. He visited a number of Chinese provinces and discussed with the local officials and businessmen about their experience in developing their provinces. He also discussed with them prospects for co-operation between their provinces and Pakistan. During these visits, he did not go to Beijing. The Chinese Foreign Minister flew to one of the provinces being visited by Mr. Zardari and called on him. Before leaving for Pakistan, he spoke with Mr. Hu and Mr. Wen over telephone.

3. The most productive of his visits so far has been his visit to Hang Zhou in the Zhejiang province and Guangzhou in the Guangdong province from August 21 to 24, 2009. During this visit, he sought Chinese participation in the development of hydel, thermal and solar energy projects, irrigation and fisheries and mobile telephone networks and in creating facilities for higher technical education, including the setting-up of a telecommunications university and research complex. Among the concrete results from this visit were:

- * The signing of a Memorandum of Understanding (MOU) to promote cooperation in river fisheries and related technologies by representatives of the Indus River Fresh Water Fisheries Research Institute and the Pearl River Fishery Research Institute of Guangzhou.

- * The signing of an MOU for the construction of a dam at Bunji in the Astore district of Gilgit-Baltistan by officials of Pakistan's Ministry of Water and Power and China's Three Gorges Project Corporation. The Chairman Board of Investment Saleem Mandviwala and Li Yang'an of the Chinese corporation signed the MoU. The dam, one of the eight hydel projects short-listed for construction by the Water and Power Development Authority (WAPDA), will have a capacity of generating 7,000 megawatts of electricity.

- * The signing of an MOU on cooperation in drug regulation and production of hepatitis B and C vaccines.

- * The signing of another MOU between the Sindh Agricultural University in Tandojam and the South China Agricultural University in the Guangzhou province for cooperation in agricultural research, plant protection and animal husbandry.

- * The signing of two separate MsOU by the Board of Investment of Pakistan with the China Council for Promotion of International Trade (CCPIT), Guangdong province and the Guangdong Sub Council of CCPIT.

4. Mr. Zardari attended a presentation on small and medium sized dams, water conservation and irrigation by the Zhejiang Design Institute of Water Conservancy and Hydroelectric Power. Li Yueming, the President of the institute, said they had carried out feasibility studies of a couple of medium-sized dams in the Pakistan-Occupied Kashmir (POK). Shakeel Durrani, Chairman of the WAPDA, who was

present on the occasion, said that Chinese companies were already working on a number of hydel projects in Pakistan, including Neelum-Jhelum and Gomal Zam and the raising of the height of the Mangla dam in the POK. He said the institute would be invited to bid for the construction of 12 small dams. Five of these dams were to be built in Balochistan, four in Sindh, two in Punjab and one in Khyber-Pakthoonwa.

5. In a report carried by the "News" of August 18, 2009, before Mr. Zardari's visit, Mr. Kamran Khan, its journalist, alleged that without inviting open bidding from interested companies and investors, the Pakistan Steel had signed a non-transparent secret MoU with the Metallurgical Corporation of China (MCC) for a \$2.2 billion expansion programme to raise its current production capacity of 1.1 million tons to five million tons. According to him, contrary to relevant government rules and regulations as well as basic norms of transparency, the Pakistan Steel didn't place any advertisement in the local and international press to seek the best international offers before entering into secret negotiations with the Chinese company, which was long seeking to clinch this deal. He said: "The most shocking element of this MoU, available with this correspondent, which will bind Pakistan with an additional foreign loan of \$2.2 billion, is a clause that requires complete secrecy of this understanding. Clause 6.1 of this MoU states: "This MoU and any discussions related to it shall remain strictly confidential between the parties and no public announcement shall be made without written consent of both parties." Kamran Khan quoted a Pakistani official as saying: "This was not our requirement but the Chinese company asked for this secrecy clause and we agreed."

6. During his interactions with local officials and businessmen in the course of this visit, Mr. Zardari kept pointing out that the Western regions of China now being developed were closer to Pakistani ports than to Chinese ports and invited ideas and proposals for developing rail and road communications between Pakistan and Xinjiang. Since taking over as the President, he has reportedly been pressing the Chinese for early implementation of the ideas mooted by Pakistan when Gen. Pervez Musharraf was in office for the construction of gas and oil pipelines between the Chinese-constructed port of Gwadar and Xinjiang and for the construction of a railwayline between Pakistan and Xinjiang. Pakistan had also mooted with Beijing the idea of China purchasing part of the gas which will be coming into Pakistan from Iran when the proposed Iran-Pakistan gas pipeline is completed.

7. The Chinese have agreed to conduct a feasibility study on the proposed railway line between Pakistan and Xinjiang. Two MoUs were signed on October 28, 2009, and March 6, 2010, between the Railways Ministry of Pakistan and China Railway Group Limited on the feasibility study. The progress made in this regard is expected to be discussed during Mr. Zardari's forthcoming visit to Beijing.

Ambassador invites Pak businessmen to visit Tajikistan -- APP

Ambassador invites Pak businessmen to visit Tajikistan

LAHORE, July 2 (): Ambassador of Tajikistan Zubaydullo Zubaydov has invited Pakistani businessmen to take part in the Business Forum being arranged by the Tajik government from July 18 to 22 in Dushanbe, the capital of Tajikistan, to promote trade between both countries. Addressing a meeting held at the Lahore Chamber of Commerce and Industry on Friday, he said marvellous opportunities in fields including pharmaceutical, textiles, fresh fruits, juices, milling products, sugar, beverages, oil, inorganic chemicals, perfumes, cosmetics, soaps were available to Pakistani businessmen.

He said that traders should visit Tajikistan for getting first-hand knowledge. The Ambassador said that presently huge business between Pakistan and Tajikistan was being done through third party, depriving Pakistani businessmen of real dividend, therefore, the business community in Pakistan should initiate a direct contact with their Tajik counterparts to expedite the volume of two-way trade. He said Tajikistan had eased its visa policy for Pakistanis with the sole purpose of promoting trade and investment in both countries.

The Ambassador said during the visit of the President of Republic of Tajikistan to Pakistan eight agreements were signed between the two governments and the agreements contributed a lot to enhance and develop economic relations between Pakistan and Tajikistan.

Speaking on the occasion, LCCI Vice President Faisal Iqbal Sheikh said that it was very encouraging that both Tajikistan and Pakistan were trying to revive and strengthen their historical relationships, which he added remained dormant during the period of Soviet occupation of Tajikistan.

He said a greater interaction among chambers of the two countries, exchange of trade delegations and holding of single country exhibitions could increase the volume of our trade.

He said Pakistan would also be able to serve as a trade corridor for Tajikistan through the Gwadar port connected to the Central Asian States and China with a network of roads.

PM calls for taking Pak-Sino bilateral ties to new heights -- Daily Times
PM calls for taking Pak-Sino bilateral ties to new heights

* Gilani says Pakistan has always adhered to 'One China Policy' considering Taiwan part of the mainland

ISLAMABAD: Prime Minister (PM) Syed Yousaf Raza Gilani on Friday expressing his satisfaction over Pakistan's longstanding comprehensive strategic partnership with China called for re-doubling of the efforts by both sides to take the bilateral relations to new heights.

The PM was talking to Liu Jian, the newly-appointed Chinese ambassador to Pakistan who called on him at the Prime Minister's Secretariat. Gilani expressed confidence that the new Chinese ambassador would continue the tradition of the previous ambassadors in further strengthening the friendship between the two countries. He assured the ambassador of his government's complete cooperation in pursuing his mission and in supplementing his efforts in this regard.

The PM stated that Pakistan deeply valued the contributions of the Chinese government and its cooperation for the economic development of Pakistan. He said that Pakistan has always adhered to the 'One China Policy' and considers Taiwan a province of China and regards Tibet as an inalienable part of the Chinese mainland.

The PM noted that both the countries were committed to fighting the three evils of terrorism, sectarianism and extremism and Pakistan had unequivocally condemned the nefarious activities of the East Turkestan Islamic Movement (ETIM). He reaffirmed that Pakistan would continue to extend its fullest cooperation to China in countering and fighting the ETIM threat in the future as well. Gilani termed the regular contacts between the two countries particularly the people to people contacts and youth exchanges as vital for passing on the excellent Pakistan-China ties to the future generations.

He was of the view that President Asif Ali Zardari's visit to China next week would open up new vistas of bilateral cooperation as a number of memorandum of understandings (MoU) and agreements were to be signed by the two sides during that visit.

The PM also reiterated his invitation to the Chinese premier to visit Pakistan and asked the Chinese ambassador to convey it to the Chinese Premier Wen Jiabao that the government and people of Pakistan were keenly looking forward to welcome him, later this year.

Gilani thanked the Chinese government for its prompt action to send its technical team for assessing the damages caused to Karakoram Highway by the artificial lake at Ataabad. He hoped that on submission of the Chinese team's report, both the sides would jointly take the required measures to immediately address the problem. Welcoming the satisfactory progress in the ongoing Karakoram Highway upgrade project, the PM stated that Pakistan would also welcome the investment by the Chinese corporations to develop infrastructure and connectivity projects linking Gwadar to upper parts of the country and establishment of transportation, communication and oil and gas pipeline corridors.

He also hoped that the Chinese government would continue assisting Pakistan in the defence sector and in the ongoing joint defence production projects would be resolutely pursued. Ambassador Liu Jian conveyed to the PM, the best wishes of the Chinese prime minister.

He termed his appointment as ambassador of his country to Pakistan as a singular honour and assured the PM of his determination to work for further strengthening and promotion of the bilateral relations between Pakistan and China during his tenure.

He expressed the hope that Pakistan would also accord him the same level of

cooperation, which his predecessors had enjoyed. Ambassador Liu thanked the PM for the measures to provide security to the Chinese nationals in Pakistan and for the continued support to his country against ETIM's threats. app

Daily Jahng -- بلوچستان- تعمیر اور تخریب کے دوراے پرجرگہ... سلیم صافی

سلیم صافی... بلوچستان- تعمیر اور تخریب کے دوراے پرجرگہ

ڈی جی آئی ایس پی آر میجر جنرل اطہر عباس اور قومی و بین الاقوامی میڈیا کے اہم کرداروں کی معیت میں بلوچستان کے بلوچ اور پختون علاقوں کے اس دو روزہ دورے میں امید اور افسوس کے ملے جلے خیالات نے ذہن کو گھیرے رکھا۔ محسوس کیا کہ یہ خطہ تعمیر اور تخریب یا پھر خوشحالی اور تباہی کے دوراے پر کھڑا رہنماؤں اور ملکی قیادت نے دونوں میں سے ایک کا انتخاب کرنا ہے۔ 'بے اور اب بلوچستان کے عوام افسوس کہ میڈیا کی بے تحاشہ کے اس دور میں بھی اس قوم کو کنفیوژن اور بے خبری نے اپنی لپیٹ میں لے رکھا ہے۔ قبائلی علاقوں کے زمینی حقائق سے لاہور اور کراچی والے بے خبر ہیں۔ کراچی کی اصل خبر باقی پاکستان تک نہیں پہنچ رہی اور بعینہ بلوچستان کے تلخ اور بعض شیریں حقائق اسلام آباد اور لاہور کے مکینوں ہر جگہ سے متعلق ہمیں جو کچھ بتایا 'کراچی ہو یا پختونخوا' کی نظروں سے پوشیدہ ہیں۔ فٹا ہو یا بلوچستان سے معاملہ یکسر الٹ نظر آتا ہے جب ہم متعلقہ علاقوں میں جاتے اور براہ راست 'پڑھوایا اور دکھایا جاتا ہے' متعلقہ لوگوں سے ملتے ہیں۔

سندھی 'مسئلہ یہ ہے کہ یہاں سیاست اور صحافت میں بھی فیشن کا دور دورہ ہے۔ ایک زمانے میں صرف بلوچ اور پختون قوم پرستوں کو گالی دینے کا فیشن تھا تو ہر طرف سے صرف انہی کو مطعون کیا جا رہا تھا اور مرکز یا پھر اسٹیبلشمنٹ کی تائید و حمایت کو پاکستانیت اور ایمان کا تقاضا قرار دیا جا رہا تھا۔ کچھ عرصہ سے صرف مرکز اور اسٹیبلشمنٹ کو مطعون کرنے اور بلوچ سرداروں کو مظلوم بنانے کا فیشن عام ہو گیا ہے چنانچہ اب گاڑی یکسر دوسرے رخ پر چل پڑی ہے۔ حالانکہ بلوچستان کے متعدد دوروں اور بلوچ عوام سے تبادلہ میں اس نتیجے تک پہنچا ہوں کہ بلوچستان کو پسماندہ رکھنے میں بلوچ سرداروں کا 'خیالات کے نتیجے میں حصہ بھی کسی سے کم نہیں۔ تعمیر ترقی کے حوالے سے جتنا فرق بلوچستان اور اسلام آباد کے درمیان موجود اس سے زیادہ فرق ایک سردار اور عام بلوچ کے معیار زندگی کے درمیان موجود ہے۔ عام بلوچ کا بیٹا 'بے اسکول اور کتاب کی شکل دیکھنے کو ترس گیا ہے لیکن کم و بیش ہر بلوچ سردار کا بیٹا بیرون ملک پڑھتا ہے۔ ایم پی اے جیسی اصطلاحات سے بھی واقف نہیں لیکن سردار کا 'عام بلوچ ووٹ ڈالنے اور ایم این اے اسٹیبلشمنٹ 'وزیر اعلیٰ یا پھر وزیر سے کم کسی منصب پر گذارنا نہیں ہوتا۔ مرکز بھی ذمہ دار ہے 'وزیر اعظم ہم جیسے صحافی بھی مجرمانہ 'اور بڑے صوبے کے مختاروں کی حماقتوں اور مظالم کا بھی کوئی شمار نہیں کردار کے مرتکب ہوئے ہیں لیکن بلوچستان کی پسماندگی اور تباہی میں خود بلوچ سرداروں کا کردار بھی کسی سے کم نہیں۔ جس نے ذاتی مفادات اور تعصبات کی خاطر پہلے بلوچ عوام کو غلام رکھنے کے لئے پسماندہ رکھا نیویارک یا پھر 'اور اب انہی مقاصد کے لئے اس کے ہاتھ میں بندوق اور بم تھمانا چاہتا ہے۔ جو خود تو لندن لاہور اور کراچی کی کوٹھیوں میں بسیرا کر رہا ہے لیکن عام بلوچ کے لئے اسے اس کی جھونپڑی 'اسلام آباد میں رہنا بھی گوارا نہیں اور انہیں وہاں سے نکال کر غاروں اور پہاڑوں کی طرف دھکیل رہا ہے۔ ہمیں یا تاثر دیا جا رہا ہے کہ جیسے بلوچستان میں اب بھی فوج آپریشن میں زوروں پر ہے لیکن وہاں جاکر پتہ وہ بھی ایف سی کے ذمہ ہوتی 'چلا کہ فوج کہیں آپریشن نہیں کر رہی۔ جہاں کارروائی کی ضرورت پڑتی ہے فوج امیج بلڈنگ کے لئے وہاں پہلی مرتبہ بعض منفرد اور قابل ستائش تعمیراتی کاموں میں بھی مصروف ہے۔ لیکن اس کے برعکس ہمیں جو یہ تاثر دیا جاتا ہے کہ بلوچستان میں پیپلز پارٹی اور اس کے اتحادیوں کی وہ بھی یکسر غلط ہے۔ بلوچستان کی سیاسی حکومت کے تمام اہم کرداروں نے اپنے آپ کو صرف 'حکومت کے عہدوں کی بندر بانٹ اور لوٹ مار تک محدود کر رکھا ہے جبکہ سیکورٹی اور بلوچستان کے مستقبل 'پروٹوکول بلوچوں 'کے تعین کا تمام تر کام فوج کے سپرد ہے۔ زلزلہ زدگان کی بحالی ہو تو فوج کے تعاون سے ہو رہا ہے چمکانگ کول مائنز اور اس سے وابستہ فلاحی 'کا مین سٹریٹ میں لانے کے منصوبے ہیں تو فوج چلا رہی ہے منصوبے ہوں تو فوج نگرانی کر رہی ہے۔ سیاسی حکومت صرف اقتدار کے ایوانوں یا پھر میڈیا میں نظر آرہی ہے۔ فوجی حکام سے کوئٹہ میں ٹارگٹ کلنگ کے بارے میں حکومتی اداروں کی بے بسی یا لاتعلقی کے بارے میں استفسار کیا تو کہنے لگے کہ کوئٹہ میں تو فوجی آپریشن ہو رہا ہے اور نہ یہاں کی سیکورٹی سے فوج کا کوئی تعلق ہے۔ جبکہ حکومت کی دلچسپی کا یہ عالم ہے کہ کئی ماہ سے اس صوبے میں انسپکٹر جنرل پولیس کی پوسٹ خالی پڑی ہوئی ہے۔

اس میں سرفہرست فوج میں بلوچ نوجوانوں کی شمولیت کا عمل 'دورہ بلوچستان میں امید کا جو مواد نظر آیا ہے۔ ہمیں بتایا گیا کہ اس وقت فوج سے نو (۹) ہزار سے زائد بلوچ نوجوان جن میں بعض آفیسرز رینک کے وابستہ ہیں۔ آرمی چیف جنرل اشفاق پرویز کیانی کے حکم پر رولز میں تبدیلی لاکر فوج میں بھرتی کے 'بھی ہیں عمر اور چھاتی 'تعلیم 'لئے بلوچ نوجوانوں کو خصوصی ترغیبات اور مراعات دی گئی ہیں۔ مثلاً ان کے لئے قد کی شرائط نرم کردی گئی ہیں جبکہ ٹریننگ اور تعیناتی میں بھی خصوصی سہولتیں دی گئی ہیں۔ بلوچ اپنے اس لئے ہر بلوچ کو ٹریننگ کے لئے ایبٹ آباد (بلوچ رجمنٹ کا 'علاقے سے باہر نکلنے سے انکڑاتے ہیں مرکز) جانے کی سوتی اور کوئٹہ میں ٹریننگ کی سہولت دی گئی ہے۔ بیشتر انسٹرکٹر بھی بلوچ رکھے گئے ہیں۔ ٹریننگ کی تکمیل کے بعد ہر فوجی کو ملک کے اس حصے میں جانا پڑتا ہے جہاں کمانڈر حکم دیتا ہے لیکن بلوچ نوجوانوں کو یہ آپشن دیا جاتا ہے کہ وہ بلوچستان میں رہنا چاہتا ہے یا پھر کسی اور صوبے میں جانا چاہتا ہے۔ ان ترغیبات کی وجہ سے بلوچ نوجوانوں کا فوج میں شمولیت کا رجحان بڑھ رہا ہے اور امسال ساڑھے تین ہزار سے زائد (3570) نوجوان بھرتی ہو کر کوئٹہ اور سوتی میں ٹریننگ حاصل کر رہے ہیں حقیقت یہ ہے کہ ان بلوچوں کو ٹریننگ حاصل کرتے اور پاکستان زندہ باد کے نعرے لگاتے دیکھ کر دل کو جو سکون ملا اس نے سی وں تھرٹی اور ہیلی کاپٹروں میں تکلیف دہ سفر کے سارے تھکن کو دور کر دیا۔ فوج کا دوسرا قابل ستائش منصوبہ لورالائی اور گوہلو کے سنگم پر واقع چمکانگ میں کونلے کے وسیع ذخائر پر کام کا آغاز ہے۔ یہ ذخائر انیسویں صدی کے اواخر میں دریافت ہوئے تھے لیکن پختون (لونی) اور بلوچ (مری)

قبائل کے تنازعے کی وجہ سے کوئی بھی کونلے کے اس ذخیرے سے استفادہ نہیں کر سکتا تھا۔ فوج کی ثالثی سے صوبائی اور دونوں قبائل کے مابین آمدنی کی تقسیم کا معاہدہ 2006ء میں طے 'دونوں قبائل کے مابین وفاقی پایا معاہدے کے تحت سیکورٹی کی ذمہ داری فوج نے سنبھالی۔ چنانچہ آج خشک پہاڑوں پر مشتمل اس علاقے ہوٹل اور ہسپتال تعمیر ہو گئے ہیں۔ بجلی اور پانی 'تعلیمی ادارے' کی شکل یکسر بدل گئی ہے۔ درجنوں کالونیاں جن 'کی سہولتیں میسر آگئی ہیں۔ آج اس پروجیکٹ میں 70 ہزار سے زائد لوگوں کی روزگار لگی ہوئی ہے میں ایک بڑی تعداد ملاکنڈ ڈویژن سے تعلق رکھنے والے پختونوں کی بھی ہے۔ دو ہزار سے زائد بلوچ نوجوان چمالنگ لیوی کا حصہ بن کر سیکورٹی کا فریضہ سرانجام اور معقول تنخواہیں حاصل کر رہے ہیں۔ مئی 2010ء تک یہاں سے چھ ارب روپے کا کونلہ نکالا جاچکا تھا اور نتیجتاً مری اور لونی قبائلی کی زندگی بدل جانے کے ساتھ ساتھ وفاقی حکومت کو بھی 208 جبکہ بلوچستان حکومت کو 134 ملین روپے کی آمدنی حاصل ہو گئی تھی۔ (CBEP) تاہم اس پراجیکٹ کا سب سے تابناک پہلو فوج کے زیر نگرانی چمالنگ بلوچستان ایجوکیشن پروگرام ہے۔ اس پروجیکٹ سے ملنے والی آمدنی کا ایک نہایت محدود حصے سے ایک فنڈ قائم کیا گیا ہے۔ اس فنڈ کو صرف اور صرف بلوچستان کے نوجوانوں کی تعلیم و تربیت کیلئے وقف کر دیا گیا ہے۔ مری اور لونی قبیلوں کے طلبہ کیلئے کوئٹہ چھاونی میں ایک ہاسٹل کے قیام کے علاوہ اس پروگرام کے تحت سینکڑوں بلوچ طلبہ اس وقت بہاولپور اور گواڈر اعلیٰ ترین اسکولوں میں تعلیم حاصل کر رہے ہیں جن 'گوجرانوالہ' 'پشاور' 'کراچی' 'لاہور' کے نہ صرف تمام اخراجات اس فنڈ سے ادا کئے جارہے ہیں بلکہ ان کو ماہانہ وظائف بھی دئے جاتے ہیں۔ اس فنڈ کے زیر اہتمام قائم کئے گئے چمالنگ بنیفشریز ایجوکیشن پروگرام کے زیر اہتمام قائم کئے گئے ووکیشنل آٹو 'کارپنٹر' 'ویلڈر' 'مکینکس' سنٹر میں بلوچستان کے نوجوانوں کو فوج کے انسٹرکٹر کمپیوٹر آپریٹر ڈرس ڈیزائننگ اور بیوٹیشن کی تربیت دے رہے ہیں جہاں سے ہزاروں لڑکے اور لڑکیاں 'ٹرائیور' 'الیکٹریشن' ہزاروں زیر تربیت جبکہ ہزاروں اپنی باری کے منتظر ہیں۔ امید اور خوشی کے 'تربیت حاصل کر چکے ہیں مظاہر کے ان مناظر کے علاوہ بعض افسوسناک اور اندوہناک پہلو بھی سامنے آئے۔ مثلاً یہ کہ بلوچ نوجوانوں کی اکثریت کا غم و غصہ اب بھی کم نہیں ہوا ہے۔

گزشتہ آٹھ سال کی فوجی کارروائیوں اور ایجنسیوں کے ہاتھوں سینکڑوں بلوچوں کے غائب ہونے کے واقعات نے ان کو اس قدر بددل کر دیا ہے کہ موجودہ عسکری قیادت کی طرف سے فوج کے امیج بلڈنگ کی بھرپور کوششوں کے باوجود ان کا غصہ کم نہیں ہو رہا۔ موجودہ سیاسی قیادت پر بھی بلوچستان کے عوام کو کوئی اعتماد نہیں۔ یوں وہ بلوچستان پیکج پر عمل درآمد کے سلسلے میں بھی پرامید نہیں۔ بلوچستان کی حکمران سیاسی قیادت نااہلی اور کرپشن کی داستانیں بھی دل دہلانے والی ہیں۔ کوئٹہ اور بعض دیگر شہروں میں جس 'کی لاتعلقی طرح پنجابیوں (جو کہ بلوچستان کی معیشت اور ترقی میں اہم کردار ادا کر رہے تھے) کو جس ٹارگٹ کلنگ کا اس سے نہ صرف نفرتیں جنم لے رہی ہیں بلکہ صوبے کی معیشت بھی مزید تباہ ہوتی 'نشانہ بنایا جا رہا ہے جارہی ہے جبکہ تعلیم و تربیت اور صحت کے شعبے بھی بری طرح متاثر ہو رہے ہیں۔ دوسرا تشویشناک اور خطرناک پہلو یہ سامنے آیا کہ بلوچوں کی احساس محرومی کو تو ختم نہیں کیا گیا لیکن اس کے خاتمے کے نام پر حکومت جو کچھ کر رہی ہے اس سے بلوچستان کے پختونوں میں احساس محرومی شدت سے بڑھنے لگی ہے۔ ایک طرف پختون قوم پرس

China to invest \$10b in hydro-power projects in Pakistan -- By Agencies

China to invest \$10b in hydro-power projects in Pakistan

By Agencies

July 07, 2010

President Zardari being welcomed by Chinese Vice Foreign Minister Zhang Zhi Jun.
PHOTO: APP

BEIJING: President Asif Ali Zardari, during his visit to China, met with the Chairman of a Chinese firm that is willing to invest \$10 billion in hydro-power projects in Pakistan.

On his sixth visit as President to China, Zardari also met with the President of Exim Bank as well as the President of The Three Gorges Corporation.

Briefing reporters after the meetings, Zardari said the company will build dams in Bunji and Kohala areas. The dams are to generate 7,000 and 12,000 megawatts respectively.

China has said it has the right to pursue nuclear power projects with Pakistan — which China treats as a counter-weight to Indian influence. Chinese nuclear companies have built one reactor unit at the Chashma atomic complex in Pakistan's Punjab province, and they are building another one likely to be finished in 2011 or 2012. Chinese companies have also unveiled plans to build another two bigger reactors at Chashma in coming years.

President Zardari also held talks with his Chinese counterpart Hu Jintao and Prime Minister Wen Jiabao.

A nearly \$7 billion trade deal between the two countries is also expected to be discussed.

A Chinese Foreign Ministry spokesman Qin Gang told the media that China and Pakistan will sign cooperation agreements in agriculture, healthcare, economy and technology sectors during President Zardari's visit.

Commenting on some media reports which claimed that China is striving to balance relations with India and Pakistan, Qin said China expects good neighbourly, friendly and cooperative relations with its two South Asian neighbours.

"We are willing to make joint efforts with both India and Pakistan to promote our bilateral ties, which will benefit the people in the three countries and common development and prosperity of the region," Qin said, noting that China is also glad to witness improvements in Indo-Pak ties.

Many Chinese companies operate in Pakistan and China is involved in the construction of a deep-sea port at Gwadar on the Arabian Sea. --

BEIJING

BEIJING — China and Pakistan pledged to step up joint efforts against terrorism Wednesday as the presidents of the two neighboring nations vowed to expand trade and economic cooperation, state media said.

Chinese President Hu Jintao welcomed Pakistani President Asif Ali Zardari to the Great Hall of the People where the two leaders expressed their commitment to deepening ties in energy, communications and infrastructure construction.

"China and Pakistan are both victims of terrorism," China Central Television quoted Hu as telling Zardari.

"To strengthen Sino-Pakistani anti-terrorism cooperation and strike at terrorism, separatism and religious extremism is in the fundamental interests of the people's of both nations."

Hu urged Pakistan to continue to look out for the safety and security of Chinese nationals and companies in Pakistan following a spate of kidnappings in recent years, it said.

Zardari is in China until Sunday and will meet with Prime Minister Wen Jiabao and other leaders on Thursday, Chinese diplomats said.

Earlier Zardari met with top Chinese bankers and business executives pledging

greater protection for Chinese investment in his nation, his office said in a statement.

Besides talks with executives from NORINCO, China's top arms manufacturer, Zardari also met with leaders of Sinohydro Corporation, the nation's main dam builder and China Petrochemical Corporation, also known as SINOPEC, the statement said.

China is Pakistan's strongest ally and Islamabad relies heavily on Beijing for its defence and infrastructure needs.

Many Chinese companies operate in Pakistan and China is involved in the construction of a deep-sea port at Gwadar on the Arabian Sea.

China has also agreed to build two new civilian nuclear reactors in Pakistan, the government said in March, amid persistent concerns about the safety of nuclear materials in the restive south Asian state.

News of the reactors elicited concerns from Washington over the security of nuclear materials in troubled Pakistan, where the Taliban movement is waging a bloody offensive.

In recent days a Pakistan army contingent has been taking part in joint anti-terror exercises with the Chinese military in China in the latest sign of closer relations between the two countries, state press reported.

Pakistan president woos Chinese energy investment -- Associated Press Writer

Pakistan president woos Chinese energy investment

By ANITA CHANG

Associated Press Writer

Alexander F. Yuan, Pool

Pakistani President Asif Ali Zardari, second right, and Chinese President Hu Jintao, right, shake hands while Zardari's daughters stand beside at the Great Hall of the People in Beijing, China, Wednesday, July 7, 2010. Pakistan President Asif Ali Zardari appealed Wednesday to Chinese business leaders for help in developing his country's ailing energy sector, pointing to nuclear power as one area of growth but making no public mention of a deal with China that has alarmed the U.S. and others.

Pakistan's president appealed Wednesday for Chinese help in developing his country's stagnant energy sector, pointing to nuclear power as one growth area but making no public mention of a deal with China that has alarmed the U.S. and others.

The weeklong visit to China is Asif Ali Zardari's fifth since he came to office in September 2008, underscoring the robust diplomatic, military and commercial ties between the neighbors. He met President Hu Jintao on Wednesday and signed six agreements, including one on economic and technology cooperation. Details were not made public.

The visit highlights China's support for Pakistan as they face scrutiny over a 2008 deal that would give energy-starved Pakistan two new nuclear power plants. Critics said transferring the reactors would violate international nonproliferation agreements.

"This deal comes at a time to assure the people of Pakistan that despite their repeated requests to the West to give them such a deal ... it is China once more which they rely on as an all-weather friend," said Adnan Bukhari, an associate research fellow at the S. Rajaratnam School of International Studies of Singapore's Nanyang Technological University.

The deal also came shortly after a wide-ranging deal that allowed the U.S. to sell nuclear fuel, technology and reactors to India, a regional rival of both China and Pakistan.

Bukhari said the China-Pakistan deal is sending a message in particular to India,

whose relationship with Pakistan has been of varying tensions for decades. Both countries have nuclear weapons.

Zardari met with Chinese business leaders Wednesday in industries ranging from banking to defense in a bid to attract investment, according to a statement from his spokesman, Farhatullah Babar. He singled out energy as a growth industry in Pakistan.

Electricity shortages are chronic in Pakistan, where expansion of supply has lagged fast-growing demand. Some regions experience electricity outages of up to 18 hours a day and it is not uncommon for prolonged blackouts to provoke riots. Authorities planned to feed the grid through "hydro, coal, gas, nuclear and renewable energy sources," the Pakistan statement said, without elaborating on the growth of nuclear energy.

Pakistan, whose former top nuclear scientist has been accused of trafficking sensitive nuclear technology to Iran, Libya and North Korea, has not signed the Nuclear Nonproliferation Treaty, the main international agreement meant to stem the spread of nuclear weapons technology. China signed the treaty in the 1990s. India also has not signed the treaty.

Mark Hibbs of the Carnegie Endowment for International Peace said in an April report that the U.S.-India deal was given the go-ahead by member states of the Nuclear Suppliers Group - which seeks to limit the spread of nuclear-related equipment - only after "considerable arm-twisting ... by the United States, France and Russia."

Yet Washington has expressed concern that China's nuclear deal with Pakistan doesn't have the necessary approval from the NSG, and has called for China to provide more information about it.

"In the past half-year or so, making peaceful use of nuclear energy has been a sensitive issue," said Wang Lian, an associate professor in the School of International Studies at Peking University. "The U.S. government has been urging the Chinese government to make the process more transparent."

So far, planning for the construction of the two reactors at the Chashma site in Pakistan's Punjab province has apparently gone forward.

"The United States and other NSG states may object to the pending transaction but they cannot prevent China from exporting the reactors," Hibbs said in his report. Other countries are also concerned about the risk of an attack on nuclear facilities by insurgents battling the Pakistani military in the country's northwest tribal areas adjacent to Afghanistan, Bukhari said.

"The more you expand your nuclear programs or installations, there is more threat of attacks on them or maybe stealing of your equipment or your weapons," he said. Pakistan maintains that it has stringent security at its existing nuclear facilities and screening of staff to prevent infiltration of their ranks.

China has said the deal would be carried out in line with "international obligations" and subject to international safeguards and supervision.

A Chinese Foreign Ministry spokesman did not answer a question about a nuclear deal with Pakistan in a news conference Tuesday.

All Day

Zardari met with top Chinese bankers and business executives pledging greater protection for Chinese investment in his nation, his office said in a statement. -- SAMA TV

Many Chinese companies operate in Pakistan and China is involved in the construction of a deep-sea port at Gwadar on the Arabian Sea.

Chinese President Hu Jintao welcomed Pakistani President Asif Ali Zardari to the Great Hall of the People where the two leaders expressed their commitment to deepening ties in energy, communications and infrastructure construction.

"China and Pakistan are both victims of terrorism," China Central Television quoted Hu as telling Zardari.

"To strengthen Sino-Pakistani anti-terrorism cooperation and strike at terrorism, separatism and religious extremism is in the fundamental interests of the people's of both nations."

Hu urged Pakistan to continue to look out for the safety and security of Chinese nationals and companies in Pakistan following a spate of kidnappings in recent years, it said.

Zardari is in China until Sunday and will meet with Prime Minister Wen Jiabao and other leaders on Thursday, Chinese diplomats said.

Earlier Zardari met with top Chinese bankers and business executives pledging greater protection for Chinese investment in his nation, his office said in a statement.

Besides talks with executives from NORINCO, China's top arms manufacturer, Zardari also met with leaders of Sinohydro Corporation, the nation's main dam builder and China Petrochemical Corporation, also known as SINOPEC, the statement said.

China is Pakistan's strongest ally and Islamabad relies heavily on Beijing for its defence and infrastructure needs.

Many Chinese companies operate in Pakistan and China is involved in the construction of a deep-sea port at Gwadar on the Arabian Sea.

China has also agreed to build two new civilian nuclear reactors in Pakistan, the government said in March, amid persistent concerns about the safety of nuclear materials in the restive south Asian state.

News of the reactors elicited concerns from Washington over the security of nuclear materials in troubled Pakistan, where the Taliban movement is waging a bloody offensive.

In recent days a Pakistan army contingent has been taking part in joint anti-terror exercises with the Chinese military in China in the latest sign of closer relations between the two countries, state press reported.

CHINA TO INVEST IN TWO HYDRO POWER PROJECTS IN PAKISTAN

Chinese Company Three Gorges has announced to invest in two hydro power projects in Pakistan, SAMAA reported Wednesday.

Pakistan President Asif Ali Zardari has met with Chairman of Three Gorges Corporation Cao Guangjing. After the meeting, Cao Guangjing while giving a briefing to media he said that his company Three Gorges has agreed to invest more than \$ 100 billion in two hydro power projects in Pakistan. For this purpose at the point of Bunji in Gilgit Baltistan, a dam of 7,000 MW, whereas 12, 00 MW dam at Kohalla will be constructed.

Zardari's visit aims at strengthening strategic partnership will also promote economic and trade cooperation and enhance cultural ties between the two countries.

During the past two years over five dozen new initiatives and nearly forty MoUs were signed between the two countries. These include hydro dams, transfer of hybrid technology, expanding banking operations, roads and communication networks, agriculture sector with optimum use of water, development of new high yielding varieties of wheat and cotton, proposed Thar Coal project and dredging of Tarbela reservoir.

Today, Zardari will hold a separate meeting with Chinese President Hu Jintao.

Zardari will leave Beijing for Shanghai later this week, and visit the Pakistani National Pavilion at the Shanghai World Expo.

This is Zardari's fifth visit to China since he became president of Pakistan.

EPA -- پاکستان بحیثیت چنی گئی دہن والے معترض

پاکستان بحیثیت چنی گئی دہن والے معترض
ٹیکرز: تبصرے، سیاست

ہونے والی دہن ہمارے ہاں اس لڑکی کو کہتے ہیں جب وہ کسی نوجوان مرد کی جانب سے دست و قلب پیش کیے جانے پر ہاں کہہ دے، لیکن اگر کسی لڑکی کے دوخوستانگار ہوں اور دونوں ہی دست و قلب دہی پر مائل ہوں تو کیا ہو؟ اس نوع کی صورتحال آج پاکستان کے احوال پر صادق آتی ہے جواج بیک وقت واشنگٹن اور بیجنگ پر فریفتہ ہے۔ اپنی جغرافیائی حیثیت کے تئیں پاکستان کا کردار ہمیشہ تزویری نوعیت کا رہا ہے۔ چین، ہندوستان، ایران اور افغانستان جیسے ممالک پاکستان کے ہمسایہ ملک ہیں۔ سابق سوویت یونین کے ٹوٹنے سے جنم لینے والے کئی وسطی ایشیائی ممالک کی سرحدیں بھی اس ملک سے بہت دور نہیں ہیں، شاید یہی وجہ ہے کہ پاکستان کو امریکی اور ایشیائی ممالک کی سیاست میں ہمیشہ ہی اہم مقام حاصل رہا ہے۔ امریکہ اور نیٹو میں اس کے اتحادی ملکوں کی جانب سے افغانستان میں "تحریک طالبان" کے خلاف جنگ چھیڑے جانے کے بعد یہ اہمیت کہیں فزوں تر ہو چکی ہے۔ اصل میں پاکستان، افغانستان میں تعینات امریکی فوجیوں کو عقب سے کمک فراہم کرنے کے مرکز میں ڈھل چکا ہے۔

چین پاکستان کے ساتھ روایتی طور پر اچھے ہمسائے کا سا تعلق رکھتے ہوئے بلکہ ہندوستان کے ساتھ غیر عمومی تعلق کی وجہ سے وہ پاکستان کا اتحادی بھی ہے۔ چین نے پاکستان کے زیریں ڈھانچے، معیشت اور فوج کی ترقی کی خاطر، خاطر خواہ امداد فراہم کی ہے۔ چینی ماہرین اس وقت بھی پاکستان میں شاہراہوں اور گہرے پانی والی بندرگاہ گواہر کی تعمیر، الیکٹرونکس، جوہری توانائی اور میزائلوں کی صنعت میں مدد دے رہے ہیں۔ سب ٹھیک ٹھاک ہی ہوتا اگر پاکستان کا باثروت اور طاقتور سرپرست اپنی روش نہ بدل لیتا۔ اپنا رخ بدل کر واشنگٹن کی ہندوستان کے ساتھ تزویری شراکت کاری کے سلسلے میں رضامندی، دہلی کے ساتھ 2006 میں پرامن جوہری توانائی کے معاہدے پر دستخط کیے جانے اور ہندوستان کو جدید ترین اسلحہ دینے میں بڑھتی ہوئی دلچسپی پر اسلام آباد شدید تشویش میں مبتلا ہے۔ اگرچہ امریکہ پاکستان کو پہلے کی ہی طرح اپنا شریک کار گردانتا ہے لیکن لگتا یوں ہے کہ پاکستان اب ایسا نہیں سمجھتا۔ اس کا اندازہ پاکستان میں بڑھتے ہوئے امریکہ مخالف رویے سے ہوتا ہے، بالخصوص پاکستان کے افغانستان سے ملحقہ سرحدی علاقوں پر ڈرون طیاروں سے کیے جانے والی بمباری کے تسلسل کے باعث۔ واشنگٹن نے اسلام آباد کو درکار گیس کی خاطر ایران، پاکستان، ہندوستان پائپ لائن کی تعمیر کے لیے ایران سے معاہدہ کرنے سے روکنے میں بھی کردار ادا کیا، امریکہ نے پاکستان کے ساتھ پرامن جوہری توانائی کے ضمن میں ویسا معاہدہ کرنے سے انکار کر دیا جیسا وہ پہلے ہی ہندوستان کے ساتھ کر چکا تھا، اس عمل کو پاکستان والوں نے اپنی توہین کیے جانے پر محمول کیا۔ پاکستان کی نظریں چین پر زیادہ لگنے لگی ہیں، اندازہ ہے کہ صدر پاکستان آصف علی زرداری کا حالیہ دورہ چین اس ملک کو اپنے اور قریب لانے میں مدد ہوگا۔ پاکستان کو امید ہے کہ وہ چین سے وہ حاصل کر لے گا جس سے امریکہ ڈھٹائی سے انکار کر چکا ہے۔ بالخصوص فریقین کے مابین پاکستان میں چشمہ کے مقام پر ان دو جوہری ری ایکٹروں کے علاوہ جن میں سے ایک پہلے ہی لگایا جا چکا ہے اور ایک کی تنصیب 2012 میں مکمل ہوگی، دو اضافی ری ایکٹر لگائے جانے کے معاہدے پر دستخط کیے جانے کی توقع ہے۔ اگرچہ امریکہ اس منصوبے کا مخالف ہوگا پھر بھی چین اسے مکمل کرے گا۔

Pakistan-China for enhancing strategic partnership (Important)

--

APP

Pakistan-China for enhancing strategic partnership

BEIJING July 8, (APP): In separate meetings with Prime Minister Wen Jiabao and Chairman of the Chinese Peoples Political Consultative Conference (CPPCC) Chairman Jia Qinglin President Asif Ali Zardari held wide ranging discussions on bilateral, regional and international issues on Thursday. They stressed unanimity of views on a host of regional and international issues and called for further stepping up economic cooperation and enhancing people to people contacts between the two countries.

1. Briefing journalists Presidential Spokesperson Farhatullah Babar said that the talks focused on joint economic projects, promoting regional connectivity, militancy and terrorism and modalities for enhancing people to people contacts as an essential component of the strategic relationship between the two countries.
2. President Zardari said that language was the most potent instrument for promoting people to people contacts and called for elaborate institutional arrangements for teaching Chinese and Urdu languages to the students, workers and people of Pakistan and China.
3. In the long term this was a most effective way for giving boost to the existing relations, he said.
4. About connectivity the President said that the disruption in the Karakoram Highway recently due to landslide had demonstrated the need for establishing a railway line and also a pipeline from Gwadar to China to connect the two countries.
5. Farhatullah Babar said that the two sides agreed that a meeting of the Pak-China Joint Economic Forum would soon be held in Islamabad to adopt measures to take to new heights the economic cooperation between the two countries.
6. The Joint Forum will take up issues including that of currency swap, opening of branches of Chinese banks in Pakistan and relocating industries in the special proposed industrial zones in Pakistan. The Chinese Commerce Minister will lead his country's delegation at the talks.
7. It was also agreed that the China National Energy Administration will hold discussions with Pakistani authorities on how best to tackle Pakistan's energy needs.
8. A day before President Zardari had impressed upon President Hu Jintao that Pakistan needed assistance in developing energy mix that included components of hydro, coal, thermal, wind and solar and nuclear power reactors to overcome the yawning gap between power supply and demand.
9. The two sides also decided to celebrate in a befitting manner the 60th anniversary of Pak-China diplomatic relations next year and agreed to set up special committees in both the countries to develop plans for this purpose.
10. Premier Wen Jiabao said that China deeply appreciated Pakistan's policy of One China and assured President Zardari of his country's continued support to Pakistan at the UN and at multilateral forums including SAARC and ECO. China has supported Pakistan's full membership of the SCO.
11. President Zardari said that Pakistan wanted international help to help itself and that was why it was stressing on trade and not aid.
12. He said that access to international markets would help promote industrial activity in the country that would generate employment and help in turning away the unemployed youth from militancy.
13. President Zardari reiterated that trade relations between the two countries fell

short of the potential and needed to be stepped up. He also said that strengthening strategic and economic cooperation was a key element guiding Pakistan's foreign policy towards China.

14.The President also briefed the Chinese leaders on Pakistan's fight against militancy and the political support for it in the country. Premier Wen said that China deeply appreciated Pakistan's fight against extremism and pledged his country's unflinching support in it.

15.The Spokesperson said that connectivity projects including the 500 million dollars KKH up gradation project and the National Trade Corridor (NTC) also came under discussion. The over 800 km long KKH provides a trade and strategic link between Pak and China and to Central Asia.

16.China is assisting Pakistan for the improvement of 335 km long Khunjrab-Raikot section of the KKH that is expected to be completed in 2012. Pakistan is also implementing a NTC Program to modernize the trade, transportation and logistics system in the country and to provide improved regional connectivity, he said.

17.The meeting with the Chairman CPPCC Jia Qinglin took place in the Great Hall of the People while that with Premier Wen Jiabao was held in his office in Zhongnanhai. The meeting with Wen Jiabao was followed by separate meetings with Chen Lei Minister for water Resources and Han Changfu Minister for Agriculture in the state guest house.

18.Earlier in the day the President inaugurated photo exhibition at the Tsinghua University in Beijing which he described as "an important element of soft power".

19.Addressing the students and faculty on the occasion the President said that Moenjodaro was the cradle of human civilization that was known as the "Manhattan of the Bronze Age". He said that the Moenjodaro ruins revealed man's wisdom and fortitude and also the power of that civilization. The need for wisdom and struggle was never so great as it was today, he further said.

The Pakistani segment of the gas pipeline from Iran will cost \$1.2 billion and work will be completed in four years, an official said. -- The Express Tribune

KARACHI: The Pakistani segment of the gas pipeline from Iran will cost \$1.2 billion and work will be completed in four years, an official said.

Managing Director Interstate Gas Systems, Naim Sharafat, said the project is planned to be funded through a debt-equity ratio of 70:30, requiring debt financing of \$872 million and equity investment of \$373 million. The Interstate Gas Systems is a joint venture of Sui Southern Gas Company and Sui Northern Gas Pipelines. He was giving a presentation to the Senate standing committee for Petroleum and Natural Resources on the status of Iran-Pakistan gas pipeline project at the Sui Southern Gas Company (SSGC).

This was the first Senate committee meeting at the SSGC since Iran and Pakistan inked the historic agreement in Tehran in June for the supply of natural gas from 2015.

Chairman Standing Committee Sabir Ali Baloch chaired the meeting, which discussed salient features of the 1,150-kilometre pipeline that will connect Iran's South Pars gas field with Balochistan and Sindh provinces.

Sharafat said the project's debt portion is expected to be secured from domestic and international financiers including Sindh and Balochistan governments, Sui Southern Gas Company, Sui Northern Gas Pipelines, Oil and Gas Development Company, Pak Petroleum, Pak-Arab Refinery Company and National Bank. The NBP will contribute \$190 million or 51 per cent of equity structure.

Besides, potential private investors include Petronas of Malaysia and Gazprom of Russia which will contribute \$183 million or 49 per cent of the equity structure. Further elaborating, Sharafat said Pakistan will construct about a 780-kilometre 42-inch diameter pipeline from the border, traversing along the Makran Coastal Highway to connect with existing gas transmission network at Nawabshah. Almost 665 km of the pipeline will pass through Balochistan while about 115 km of the

pipeline will be laid in Sindh.

He said under the Gas Sale and Purchase Agreement (GSPA), Pakistan will import 750 million cubic feet per day (mmcf) of gas with a provision to increase it to one billion cubic feet a day (bcfd).

The senators suggested that the stakeholders in the pipeline routes must be taken into confidence, majority of which are remote and less-developed areas, with clear-cut assurances about providing new schools, hospitals and vocational training centres.

In response to queries, the MD Interstate Gas Systems said being one of the largest infrastructure projects, the Iran-Pak pipeline will create new job opportunities in the provinces of Balochistan and Sindh, thus improving income level and standard of living of citizens.

Sharafat stated the Gas Sale and Purchase Agreement was broad enough to allow force majeure in the event the project is hampered due to United Nations sanctions on Iran. He said in case the project does not materialise, a liquefied natural gas terminal will be set up at Gwadar to allow re-gasified LNG to the system.

Giving the current status of the project, Sharafat said a detailed route survey was in progress to pave the way for engineering and design of pipeline facilities.

Later talking to media, the chairman Senate committee said it was important that the project start as soon as possible to bridge the rising natural gas demand-supply gap.

گیس پائپ لائن پروجیکٹ کو جلد شروع کیا جائے: سٹینڈنگ کمیٹی -- مانیٹرنگ ڈیسک

گیس پائپ لائن پروجیکٹ کو جلد شروع کیا جائے: سٹینڈنگ کمیٹی

جولائی 2010 : 45 : 08 09

اسلام آباد (مانیٹرنگ ڈیسک) پاکستان میں سینیٹ کی اسٹینڈنگ کمیٹی برائے پیٹرولیم و قدرتی وسائل کے چیئرمین سینیٹر صابر علی بلوچ نے زور دیا ہے کہ ایران پاکستان گیس پائپ لائن پروجیکٹ کو جلد از جلد شروع کیا جائے تاکہ ملک میں گیس کی طلب اور رسد کے تیزی سے بڑھتے ہوئے فرق پر قابو پایا جاسکے۔ انہوں نے ان خیالات کا اظہار پائپ لائن پروجیکٹ کے حوالے سے انٹر اسٹیٹ گیس سسٹم (پرائیویٹ) کے حکام سے اپنے پہلے اجلاس کے بعد میڈیا سے گفتگو میں کیا۔ انہوں نے کہا کہ گذشتہ ماہ تہران میں پاکستان اور ایران کے مابین تاریخی معاہدے کے بعد 2015 سے پاکستان کو قدرتی گیس ملنا شروع ہوجائے گی۔ انہوں نے کہا کہ ایران پاکستان گیس پائپ لائن پروجیکٹ کی تکمیل سے نہ صرف دونوں ممالک کے تعلقات مزید مستحکم ہوں گے بلکہ پاکستان کو اپنی گیس کی ضروریات مکمل کرنے میں بھی بھرپور مدد ملے گی۔ قبل ازیں اجلاس میں انٹر اسٹیٹ گیس سسٹم کے ایم ڈی نسیم شرافت نے اسٹینڈنگ کمیٹی کے ارکان کو پروجیکٹ کے حوالے سے تفصیلی بریفنگ دی۔ انہوں نے بتایا کہ 1150 کلو میٹر کی پائپ لائن ایران کی جنوبی سرحد سے سندھ اور بلوچستان کے علاقوں سے منسلک ہوگی۔ انہوں نے کہا کہ پاکستان سرحد سے 42 انچ کی 780 کلو میٹر پائپ لائن کی تعمیر کا ذمہ دار ہوگا جس میں سے 665 کلو میٹر پائپ لائن بلوچستان اور 115 کلو میٹر سندھ سے گزرے گی۔ 4 سالہ منصوبہ میں پاکستان 1.2 بلین ڈالر خرچ کرے گا جس میں ملکی اور غیر ملکی سرمایہ کاری بھی شامل ہوگی۔ ملکی سرمایہ کاری میں سندھ اور بلوچستان کی صوبائی حکومتوں، سوئی سدرن گیس کمپنی، ایس این جی پی ایل، او جی ڈی سی ایل، پی پی ایل، پارکو اور نیشنل بینک آف پاکستان کا مجموعی طور حصہ 190 ملین ڈالر ہوگا۔ علاوہ ازیں پروجیکٹ کی تکمیل کے بعد پاکستان 750 ملین مکعب کیوبک فٹ گیس برآمد بھی کرے گا۔ اجلاس میں بتایا گیا کہ اقوام متحدہ کی جانب سے پابندیوں کے سبب پروجیکٹ شروع نہ ہونے کی صورت میں ری گیسفائیڈ کیلئے گوادر کے مقام پر ایل این جی ٹرمینل قائم کیا جائے گا۔

The development of Sino-Pakistani ties has been shaped by regional geopolitical dynamics. -- THE NEWS

Saturday, July 10, 2010

By Nauman Asghar

The development of Sino-Pakistani ties has been shaped by regional geopolitical dynamics. Pakistan solicited China's support in its search for security with the aim to balance the asymmetry of power in the region.

China too has not extended support to Pakistan out of altruism. China's assistance to Pakistan has been motivated by two major factors. Firstly, China believes that the separatist elements in Xinjiang province, posing a direct threat to China's territorial integrity, have links with extremists in the tribal areas of Pakistan. Pakistan has taken effective steps to mollify China's concerns by coming down hard on Uighur elements and their training places. The two countries have established a joint anti-terror mechanism at the level of interior ministers and have held joint military exercises to combat the threat of terrorism.

Secondly, China appreciates the fact that an unstable and economically weak Pakistan can jeopardise the prospects of a peaceful and stable South Asia. China has an observer status in SAARC and the volume of its trade with South Asian countries has increased manifold. China also views Pakistan as a counterweight to India in its strategy to establish a sphere of influence in the Indian Ocean.

The growing economic and military ties between Pakistan and China have prepared the ground for a vibrant, multidimensional and comprehensive strategic partnership. Since the signing of a Free Trade Agreement in 2006 between the two countries, significant improvement has been witnessed in bilateral trade, which has crossed \$ 7 billion and is expected to rise to \$15 billion in the foreseeable future. Chinese investment in Pakistan has reached \$1.5 billion and presently 60 big Chinese companies are involved in 122 projects in Pakistan in the fields of oil, gas, power generation, engineering and information technology.

China has also played a remarkable role in infrastructure development projects, like the construction of Karakoram Highway, Gwadar Port and development of Thar coal reserves. The first phase of Gwadar project has been completed with a total cost of \$248 million, of which \$198 million was provided by China. China has also invested \$200 million for the construction of the coastal highway linking Gwadar to Karachi. Chinese entrepreneurs, technicians and engineers are also engaged in developing top-priority hydel power projects, including the Neelum Jhelum Hydroelectric Project and Basha-Diamer Dam.

The Pakistan-China civilian nuclear deal signed in March will serve to firm up bilateral strategic cooperation. This nuclear cooperation dates back to 1986, when a comprehensive agreement was concluded under which China also assisted Pakistan in the enrichment of weapons-grade fuel. Later, in 1995, despite US protests, China also transferred 5,000 specially designed ring magnets to Pakistan. Under the deal, China will build two nuclear reactors at Chashma with a power production capacity of 690 MW.

Voicing their objections to the Pakistan-China nuclear deal, Washington and New Delhi say it will breach the norms of the international nuclear non-proliferation regime and the guidelines of the Nuclear Suppliers Group. But these objections have no legal validity because in 1986 China was not a member of the 46-nation NSG. China insists that it is in accordance with IAEA safeguards.

President Zardari's six-day visit to Beijing is of vital significance. He and Chinese president Hu Jintao have vowed to deepen strategic relations. The two countries have resolved to formulate a joint strategy to fight effectively the three forces of "separatism, extremism and terrorism." Currently a joint ant-terrorism exercise, "Friendship-2010," has also been arranged in China to bolster cooperation between the two armed forces against the scourge of terrorism.

In April this year, on the sidelines of 16th SAARC Summit, Pakistan and China agreed on trilateral cooperation between Pakistan, China and Afghanistan. The two countries are moving closer to expand the parameters of their cooperation to address their common security concerns.

Kashgar-Gwadar railway line would give Beijing a window on the Persian Gulf -- ASIA NEWS

Kashgar-Gwadar railway line would give Beijing a window on the Persian Gulf. Such a railway line would allay China's greatest fear, a naval blockade that could stop oil shipments from Africa and the Middle East. However, major political, technical and financial problems remain, including India's opposition.

Beijing (AsiaNews/Agencies) – Pakistani President Asif Ali Zardari and Chinese President Hu Jintao met last Wednesday during an official visit of the Pakistani leader to the mainland. They discussed plans to build a railway line from Kashgar in China's Xinjiang province to the Pakistani port of Gwadar. This could give China direct access to the Persian Gulf and make Pakistan an alternative route for Chinese goods and Middle East and African oil, which currently have to go around India.

The ambitious plan has been on the drawing boards for many years. It has advantages for both parties. Beijing would have direct access to the Arabian Sea; currently, 80 per cent of China's oil travels through the Indian Ocean and the Strait of Malacca, an area plagued by piracy. More importantly, in case of war, China's enemies could easily block its oil supplies. Pakistan would especially benefit from increased traffic in the Gwadar port, which was built with Chinese capital and assistance and opened in 2008.

Now the railway, which until recently appeared to be technically impossible because of the difficult terrain, at 5,000 metres above sea level, could be built thanks to the experience and knowledge China has accumulated during the construction of the Qinghai-Tibet railway.

However, Professor Wang Mengshu, a rail expert at Beijing Jiaotong University, said that the Kashgar-Gwadar project would be "more difficult than the one in Tibet" because Chinese surveyors and mappers will not have as good an understanding of the local terrain as they did in Tibet.

This would also create uncertainties about the cost, which Wang estimates would be around 200 million yuan (US\$ 30 million) per kilometre, a bill too great even for Beijing.

In addition, India is not going to look favourably at closer Sino-Pakistani relations. New Delhi has always regarded Islamabad as its main adversary and Beijing as its main rival.

In fact, the proposed railway would have to pass through Pakistan-administered Kashmir, a territory claimed by India, and would thus undermine the latter's claim. Indeed, important Indian newspapers have described the project as a serious threat to India's security.

However, the idea still has many supporters in China and many see its completion as only a matter of time.

People's Liberation Army Navy Rear Admiral Yin Zhuo said China relied too heavily on sea transportation for its oil imports. Hence, "We must either build a much more powerful navy or find alternative transportation channels."

LNG terminal at Gwadar Port likely alternative -- Pakistan Observer

LNG terminal at Gwadar Port likely alternative
Amanullah Khan

Karachi—The much needed Iran Gas Pipeline project seems to be in hot waters international pressures and the UN sanctions against Iran it is learnt.

If the project fails to materialize the government is considering to set up an LNG Terminal at Gwadar port as an alternative to Iran gas pipeline project which is being considered as the savior in the persisting energy crisis in the country.

Meanwhile Naim Sharafat, MD SSGC in a briefing to the members of the Senate Committee on Wednesday has said an LNG terminal will be set up in Gwadar to allow re-gasified LNG to the system if Iran-Pakistan gas pipeline project is hampered due to sanction on Tehran.

It may be mentioned that the Senate Standing Committee for Petroleum and Natural Resources was given a comprehensive presentation on the status of the Iran-Pakistan Pipeline project by the officials of Interstate Gas Systems. This was the first Senate Committee meeting held at SSGC since Iran and Pakistan inked the historic agreement.

Pakistan plans to mobilise domestic -- The News

Pakistan plans to mobilise domestic

Thursday, July 08, 2010

By Saad Hasan

KARACHI: Pakistan plans to mobilise domestic funding for a multi-billion dollar gas pipeline from Iran in the wake of U.N. sanctions on Tehran, which bar global lenders from supporting the project, a top government official said on Wednesday.

The government remains undeterred by the UN sanctions against Iran because of the burgeoning energy needs of the country, which spends \$10 billion annually to import furnace oil just to run power plants, said petroleum secretary Kamran Lashari.

"There is no doubt about financing being a big challenge," he said after a meeting of the Senate's Standing Committee on Petroleum. "We need to arrange \$1.2 billion and we need to work hard for that."

The committee was told that funding will be under a 70/30 debt to equity ratio, he said. "SSGC, SNGPL, Pakistan Petroleum Limited, OGDC and National Bank can easily put together funds for the equity."

The Managing Director of Interstate Gas Company Naim Sharafat said that some local pipeline manufacturers assured the government of suppliers' credit.

The Interstate Gas Company is spearheading the construction of Pakistan's 780 kilometers section of the pipeline.

"Getting financiers is not as hard as it seems," he said. "The government has already asked public sector entities to pump in the equity. The National Bank of Pakistan and other commercial banks can also be approached to raise the money. The National Bank will also contribute \$190 million, or 51 percent, to the equity structure."

"In case the project does not materialise, an LNG terminal will be set up in Gwadar to allow re-gasified LNG to the system."

The total length of the pipeline from Iran to Pakistan is 1,900 kilometers. Iran has already started the construction despite sanctions. There are different routes being considered for the project, but the likely route would be through the restive Balochistan's Gwadar district.

Pakistan depends heavily on the natural gas to run factories and households. Gas makes up nearly 50 percent of its total energy consumption. But demand has surpassed supply in recent years as existing wells deplete.

Production stands at 4 billion cubic-feet per day, while demand stands at around 4,800mmcf, according to some estimates. Pakistan seeks to import 750mmcf from Iran.

Lashari said that by the time Pakistan starts importing gas from Iran in 2015, the demand would have doubled to 8 BCF. "There would be a need to import much more."

Security of the Iran-Pakistan gas pipeline remains a big issue. Baloch militants, who demand greater provincial autonomy, attack gas pipeline infrastructure regularly.

Chairman of the committee Senator Sabir Ali Baloch said that the project would remain on track despite the security problems. "We will have to address the grievances of the locals."

PM orders all help to develop Thar Coal projects -- APP

PM orders all help to develop Thar Coal projects

July 13, 2010

KARACHI: Thar's coal deposits are of national importance and are a primary source for power generation in the country, said Prime Minister Yousuf Raza Gilani at a meeting with members of the Sindh cabinet at Chief Minister House on Monday.

Gilani directed the federal and provincial agencies to offer "all required support" for the Thar coal projects and ensure the timely availability of infrastructure. He also directed the Sindh government to plan the allocation of funds under the Public Sector Development Programme (PSDP) with the federal minister of finance.

The Thar Coal and Energy Board (TCEB) plans to generate at least 1,000 megawatts from Thar coal by the year 2020, coal and energy development secretary Ajaz Khan informed the prime minister. The project will save \$79 billion (net present value) on fuel replacement costs and will benefit the national economy by Rs8 trillion on account of reduced power generation costs, Khan added.

Sources said that during the briefing, advisor to the CM on development, Kaisar Bengali, said that due to financial constraints the government will face problems developing the Thar coal site. He said that funds are not released by the federal government on time. Sources said that the prime minister assured him that the funds would be released without any delay.

According to a handout issued by Chief Minister House, the CM said that work on roads and an airstrip is in full swing and by 2020 the government would start generating power from the coal.

A pre-feasibility study on Sindh-Engro JV, a flagship project of the Sindh government, will be completed in August 2010, PPI report..

The PM also directed the Sindh government to improve law and order in collaboration with other coalition partners as it was a provincial subject. He directed the provincial government to take strict action against the land mafia. Interior Minister Rehman Malik gave the PM a briefing on the overall law and order situation.

Provincial minister for culture affairs Sassui Palijo said that she was not allowed to speak about the Chashma Jhelum Link Canal issue during the Sindh Cabinet meeting, Online reports. She has been vocal about the water shortage in Sindh as her district, Thatta, has been one of the worst affected.

Chitral to be linked with China -- APP

Chitral to be linked with China

The government will link Chitral with time-tested friend China by constructing Chitral-Gilgit road that would make the northern districts of Pakistan a hub of economic investment, said Federal Minister for Communication Arbab Alamgir Khan here on Monday.

He said Chitral-Gilgit road and Lawari Tunnel will open up Khyber Pakhtunkhwa for investment and would give further impetus to development process in Chitral, Dir, Swat and Malakand Agency, Dr Alamgir Khan remarked.

Addressing a big public gathering at Chitral and Garam Chashma here after starting of his three days visit, he said the completion of these two mega projects will revolutionise the communications sector, enhance trade activities with Central Asian Republics and bring an industrial revolution in Khyber Pakhtunkhwa.

The construction of tunnel will help establish strong road links with Central Asian States and hopefully it would be completed in 2011 at a cost of Rs17.50 billion. He said that Quid-e-Awam Zulfiqar Ali Bhutto Shaheed loved Chitral from the core of his hearts and his vision of construction of Lawari Tunnel would be fulfilled.

Bhutto had launched scores of developmental projects in Chitral and had great desire to make it a hub of investment, he added. He said that 450 employment vacancies would be created for talented youth of Chitral after construction of Lawari Tunnel.

The construction of Booni, Shandur-Gilgit Road and Chitral-Garam Chashma-Ashkasho Road would help strengthen trade ties with China also, he remarked. He said that Chitral-Gilgit road would be linked with China to give further impetus to development process in Pakistan.

Work on Chitral-Garam Chashma Road is in full swing and NHA are constructing it in line with roads international standard, he added. Arbab Alamgir Khan said PPP had rendered great sacrifices for return of democracy in Pakistan and her charismatic leader Shaheed Benazir Bhutto sacrifices her life for the noble of cause to guard the rights of poor and marginalised community. A modern Muslim welfare state was the vision of slain PPP leader Mohtarma Benazir Bhutto and we will ensure it for future generation, he remarked.

The Prime Minister will soon visit Chitral and discuss with him starting of Benazir Shaheed University for people of Chitral, he remarked. He said that he would take up the matter of giving Mastuj a district status to Khyber Pakhtunkhwa Government.

Other leaders of PPP including Chitral President Muhammad Hakeem Advocate, Secretary Information Shah Murad Khan has thanked the government and the communication minister for taking keen interest in the development of Chitral and assured full support to them on behalf of people of Chitral.

Pak China Railway Track to Cost \$30 Million Per Kilometer -- APP

Pakistani President Zardari and Chinese President Hu Jintao in their July 7, 2010 meeting during an official visit of the Pakistani leader to China discussed plans to build a railway line from Kashgar in China's Xinjiang province to the Pakistani port of Gwadar. This could give China direct access to the Persian Gulf and make Pakistan an alternative route for Chinese goods and Middle East and African oil, which currently have to go around India.

The ambitious plan has been on the drawing boards for many years. It has advantages for both parties. Beijing would have direct access to the Arabian Sea; currently, 80 percent of China's oil travels through the Indian Ocean and the Strait of Malacca, an area plagued by piracy. More importantly, in case of war, China's enemies could easily block its oil supplies.

Pakistan would especially benefit from increased traffic in the Gwadar port, which was built with Chinese capital and assistance and opened in 2008.

Now the railway, which until recently appeared to be technically impossible because of the difficult terrain, at 5,000 metres above sea level, could be built thanks to the experience and knowledge China has accumulated during the construction of the Qinghai-Tibet railway.

However, Professor Wang Mengshu, a rail expert at Beijing Jiaotong University, said that the Kashgar-Gwadar project would be “more difficult than the one in Tibet” because Chinese surveyors and mappers will not have as good an understanding of the local terrain as they did in Tibet.

This would also create uncertainties about the cost, which Wang estimates would be around 200 million yuan (US\$ 30 million) per kilometre, a bill too great even for Beijing.

In addition, India is not going to look favourably at closer Sino-Pakistani relations. New Delhi has always regarded Islamabad as its main adversary and Beijing as its main rival.

In fact, the proposed railway would have to pass through Pakistan-administered Kashmir, a territory claimed by India, and would thus undermine the latter's claim. Indeed, important Indian newspapers have described the project as a serious threat to India's security.

However, the idea still has many supporters in China and many see its completion as only a matter of time.

People's Liberation Army Navy Rear Admiral Yin Zhuo said China relied too heavily on sea transportation for its oil imports. Hence, “We must either build a much more powerful navy or find alternative transportation channels.”

Jang -- چین ایک قابل اعتماد دوست

چین ایک قابل اعتماد دوست

پاکستان کو اپنے قیام سے اب تک بے شمار اتار چڑھاؤ کا سامنا کرنا پڑا ہے۔ دوست اور دوستوں کے معیار بھی بدلتے رہے لیکن ایک دوست پاکستان کا ایسا بھی ہے جس کی دوستی پر بجا طور پر پاکستان فخر کر سکتا ہے اور بلاشبہ وہ چین ہے کہ اس دوست نے کبھی پاکستان کو تنہا نہ چھوڑا 1950 میں دونوں ملکوں کے تعلقات قائم ہوئے اور ہمیشہ مثالی رہے۔ چینی پاکستان کی دوستی پر فخر کرتے ہیں۔ چین نے ہمیشہ مشکل وقت میں پاکستان کا ساتھ دیا ہے اور آج بھی تیار ہے۔ چین اور دوسرے ممالک کی مدد ہمیشہ ایک دوسرے سے مختلف رہی ایک تو یہ وقت اور حالات کی محتاج نہ رہی اور دوسرا یہ کہ اسے جمہوریت اور انسانی حقوق جیسے بہانوں سے منسلک نہیں کیا گیا اور معاشی مدد کے ساتھ ساتھ ٹیکنالوجی بھی منتقلی کی گئی جس سے کسی مخصوص میدان میں ہمیشہ کی محتاجی کا خاتمہ ہو جاتا ہے۔ چین کی مدد سے بننے والے چھوٹے ہتھیاروں کو پاکستان نہ صرف خود استعمال کر رہا ہے بلکہ برآمد بھی کر رہا ہے۔ 1971 میں سانحہ سقوط ڈھاکہ کے بعد چین کی مدد سے ہی بیوی میکینیکل کمپلیکس ٹیکسلا، پاکستان آرٹیننس فیکٹریز واہ اور ایروناٹیکل کمپلیکس کامرہ نے پاکستان کی دفاعی صلاحیت کو کافی مضبوط کیا۔ اگرچہ 1990 میں پاکستان کے ساتھ چین کو بھی امریکی پابندیوں کا سامنا کرنا پڑا جب چین پر یہ الزام عائد کیا گیا کہ اُس نے پاکستان کو پانچ سو رینگ میگنیٹ دئے ہیں میزائل بنانے میں مدد دی ہے اگرچہ اس الزام کو دونوں ملکوں نے M-11 اور جوہری وار ہیڈلے جانے والے شدت سے رد کیا۔ صنعتی اور ترقیاتی کاموں میں بھی چین نے ہمیشہ پاکستان کی مدد کی سینڈک کا عظیم منصوبہ، گواہر کی بندرگاہ، تھرکول، کوسٹل ہائی وے اور ایسے ہی کئی منصوبے اور ان سے بڑھ کر شاہراہ ریشم چین کی دوستی کا ثبوت ہیں یوں چین پاکستان کی دفاعی اور صنعتی ترقی میں مکمل طور پر شامل ہے چین کے پاکستان سے یہ دوستانہ تعلقات امریکہ اور بھارت کے لئے کبھی بھی پسندیدہ نہ رہے۔ بھارت خود کو چین کے مقابلے پر لانے کے لئے بھرپور کوششوں میں مصروف ہے کیونکہ وہ جانتا ہے کہ علاقے میں اس کی بالادستی کی راہ میں پاکستان اور چین بڑی رکاوٹ ہیں۔ اگرچہ بظاہر وہ چین سے تعلقات بہتر بنا رہا ہے مگر وہ افغانستان میں انتہائی درجے تک خود کو ملوث کر رہا ہے۔ بھارت کی ان ساری کوششوں کا توڑ صرف یہی ہے کہ پاکستان چین کے ساتھ اپنے تعلقات کو مستحکم کرے بلکہ مزید وسعت دے تاکہ وہ عالمی سازشوں کا مقابلہ کامیابی سے کر سکیں اور دنیا میں طاقت کا توازن قائم رکھ سکیں۔ چین اس وقت معاشی میدان میں دنیا کا واحد مستحکم ملک ہے۔ امید کی جارہی ہے کہ دفاعی میدان میں بھی چین سپر پاور بننے کی صلاحیت رکھتا ہے اور مسلسل کامیابیوں سے ہمکنار بھی ہو رہا ہے، پاکستان کو چین کے ساتھ باہمی تعلقات کو مزید ترقی دینا وقت کی اہم ضرورت بھی ہے اور عظیم دوست کی دوستی کا تقاضا بھی۔ اس وقت ہم اندرونی اور بیرونی معاشی اور اقتصادی طور پر جن حالات کا شکار ہیں ہماری مغربی سرحدوں اور علاقوں میں جو کچھ پوربا ہے ان سب کے پیش نظر ہمیں دور دراز کی بجائے اپنے ہمسائے میں ایک قابل اعتماد دوست کی دوستی کا فائدہ اٹھانا چاہئے اور یہ امید کرنی چاہئے کہ یہ دوستی ہمارے لئے باقی تمام دوستوں سے زیادہ باعث اطمینان اور قابل اعتماد ہے۔ کیونکہ اس کو وقت اور حالات نے ہر طرح سے آزمایا ہے اور ہمیشہ مضبوط اور مستحکم پایا ہے۔ (نغمہ حبیب۔ کراچی)

APP -- صدر پاکستان کا دورہ چین...شہ رگ...ڈاکٹر مرزا اختیار بیگ

ڈاکٹر مرزا اختیار بیگ...صدر پاکستان کا دورہ چین...شہ رگ

صدر آصف علی زرداری 6روزہ دورہ چین ختم کر کے آئے ہیں۔ صدر بننے کے بعد یہ ان کا پانچواں دورہ ہے جس سے یہ اندازہ ہوتا ہے کہ پاکستان چین سے تعلقات کو کتنی اہمیت دیتا ہے۔ 21 جولائی کو پاکستان اور چین کے تعلقات کی 60 ویں سالگرہ ہے جن کو دونوں ممالک جوش و خروش سے منانے کا ارادہ رکھتے ہیں۔ پاکستان پہلا اسلامی ملک تھا جس نے 1951ء میں اپنے سفارتی تعلقات چین سے قائم کئے۔ پاکستان نے ہی امریکہ کے ساتھ چین کے تعلقات استوار کرائے اور اقوام متحدہ میں چین کی شمولیت کی پرزور حمایت کی اور آج ہم یہ بات وثوق سے کہہ سکتے ہیں کہ چین نے کشمیر اور تمام ایشوز پر پاکستان کی اور پاکستان نے تائیوان، تبت اور دوسرے ایشوز پر چین کی مکمل حمایت کی ہے حالانکہ اس عرصے میں بھارت نے چین کے مغربی صوبے سنگیان میں مسلمانوں کے بھیس میں اپنے ایجنٹ بھیج کر وہاں دہشت گردی کی کارروائی کرائی اور کہا کہ اس کے پیچھے پاکستان کا ہاتھ ہے لیکن بعد میں چین کو اصل حقائق کا علم ہو گیا۔ 2008ء میں ممبئی بم دھماکوں کے ردعمل کے طور پر بھارت نے پاکستان پر حملہ کرنے کا فیصلہ کیا تو چین نے بھارت کو واضح طور پر بتادیا کہ اگر جنگ ہوئی تو وہ پاکستان کا ساتھ دے گا۔ پاکستان کو آج جو دفاع کے شعبے میں مہارت حاصل ہوئی ہے اس کا سب سے زیادہ کریڈٹ چین کو جاتا ہے چین نے ٹیکنالوجی کے ساتھ ساتھ ہمیں انفراسٹرکچر بھی بنا کر دیا۔ بیوی میکینیکل کمپلیکس ٹیکسلا وغیرہ اس کی مثال ہیں جہاں آج ہم فوجی ساز و سامان تیار کر رہے ہیں۔ گواہر پورٹ جو خطے میں نہایت اہم حیثیت کی حامل ہے، چین ہی کی مدد سے عمل میں آئی۔ پاک چین دوستی معاشی زوایے سے دیکھنے سے پہلے میں اپنے قارئین سے ایک بات شیئر کرنا چاہوں گا کہ آنے والے دو یا تین سالوں میں جب امریکی اور نیٹو کی فوجیں بالآخر افغانستان سے واپس بلالی جائیں گی تو یقیناً امریکہ اور یورپ کا پاکستان کے ساتھ رویہ بھی تبدیل ہو جائے گا۔ میں یہ نہیں کہہ سکتا کہ اس وقت خطے میں حالات کتنے اچھے یا کتنے خراب ہوسکتے ہیں لیکن ہمیں اس مشکل وقت میں اگر کوئی ملک حقیقی معنوں میں مدد کر سکتا ہے تو وہ قابل اعتماد دوست ملک چین ہے۔

صدر پاکستان آصف علی زرداری سے ایوان صدر میں میری گزشتہ ملاقات کے دوران صدر پاکستان نے مجھے بتایا کہ وہ چین سے زراعت کے شعبے میں ان کی جدید ٹیکنالوجی جلد از جلد پاکستان منتقل کرنے کے خواہاں ہیں۔ پاکستان کی معاشی ترقی زراعت کی ترقی سے منسلک ہے۔ کائن، گیہوں، گنا وہ فصلیں ہیں جن کی خراب

کارکردگی سے ملکی صنعت اور کھانے پینے کی اشیاء میں مہنگائی سے ایک عام شخص بری طرح متاثر ہوتا ہے۔ زراعت کے شعبے میں چین نے ڈرپ ابری گیشن اور فی ایکڑ پیداواریت میں ریسرچ اینڈ ڈیولپمنٹ کے ذریعے بڑی مہارت حاصل کی ہے اور اس کو حاصل کر کے پاکستان بھی فصلوں کی فی ایکڑ پیداواریت جو اس وقت خطے میں سب سے کم ہے کو بڑھا سکتا ہے۔ اسی طرح چین نے چھوٹے ڈیموں کی تعمیر، ہائیڈرو، کوئلے، ونڈمل، نیوکلیئر اور متبادل انرجی کے ذرائع کے توسط سے اپنے آنے والے 20 سالوں کی انرجی کی ضروریات کو پورا کر لیا ہے۔ مجھے یہ بتاتے ہوئے نہایت افسوس ہو رہا ہے کہ چین کی ایک کمپنی نے جو کول ماننگ اور کوئلے سے بجلی پیدا کرنے کی مہارت رکھتی تھی نے گزشتہ حکومت میں تھرکول پروجیکٹ پر کئی سال کام کیا اور پروجیکٹ کی فزیبلٹی رپورٹ تیار کی لیکن صرف ایک سینٹ کی قیمت کے فرق کو افسر شاہی نے ماننے سے انکار کر دیا اور چینی کمپنی اپنے پروجیکٹ کو بند کر کے کئی سالوں کی محنت سے تیار کی ہوئی فزیبلٹی رپورٹ اپنے ساتھ واپس لے گئی۔ اگر اس کمپنی کو اس وقت پروجیکٹ پر کام کرنے کی اجازت دے دی جاتی تو آج پاکستان بھی جرمنی، پولینڈ اور دیگر ترقی یافتہ ممالک کی طرح کوئلے سے سستی بجلی 100 سالوں تک ملکی ضروریات کو پورا کرنے کے لئے حاصل کر سکتا تھا۔

صدر پاکستان نے اپنے موجودہ دورے میں چین میں دفاع، پیٹرولیم، بینکنگ، تعمیرات اور انرجی سیکٹر کی ایک درجن سے زیادہ کمپنیوں جس میں جاننا انٹسٹریز، جاننا ایگزم بینک، جاننا پیٹرو کیمیکل، سنڈیک سائنو ہائیڈرو کارپوریشنز بھی شامل تھیں کے سربراہان سے ملاقات میں انہیں پاکستان میں سرمایہ کاری کی دعوت دی ہے اور انہوں نے پاکستان میں بجلی کی پیداوار میں 10 ارب ڈالر کی سرمایہ کاری کا ارادہ ظاہر کیا ہے۔ اس دورے پر دستخط ہوئے ہیں۔ چین کے صدر MOU's میں دوطرفہ معاشی تعاون کو بڑھانے کے ایک معاہدے اور چار نے پاکستان میں نئے منصوبوں کے لئے 50 ملین یو این کی گرانٹ کا بھی اعلان کیا جس میں نیلم، جہلم پروجیکٹ بھی شامل ہے۔ چین نے پاکستان کے ساتھ سول نیوکلیئر انرجی کے مجموعی 600 میگاواٹ کے 2 ری ایکٹرز پاکستان کو سپلائی کرنے کا معاہدہ کیا ہے حالانکہ امریکہ اور بھارت کی جانب سے IV اور چشمہ III چشمہ اس پر اعتراضات اٹھانے جارہے ہیں لیکن چین نے انہیں مسترد کر دیا ہے۔ یاد رہے کہ بھارت نے خود سول نیوکلیئر ٹیکنالوجی کے حصول کے معاہدے امریکہ، کینیڈا، روس اور دوسرے ممالک سے کئے ہوئے ہیں۔ اس دورے میں سندھ کے ساحلی علاقے میں ہوا سے 500 میگاواٹ بجلی پیدا کرنے کی ایک یادداشت پر بھی دستخط کئے گئے ہیں جس کی مالیت تقریباً ایک ارب ڈالر ہوگی۔

بے جس کے تحت دونوں ممالک میں امپورٹ (FTA) پاکستان اور چین کے درمیان اس وقت فری ٹریڈ ایگریمنٹ اور ایکسپورٹ پر کوئی کسٹم ڈیوٹی اور ٹیکسز نہیں ہیں۔ پاکستان اور چین کی باہمی ٹریڈ اس وقت تقریباً 7 بلین ڈالر تک پہنچ گئی ہے اور اس سال اس میں 31% اضافہ ہوا ہے۔ اس طرح چین پاکستان کا دوسرا بڑا تجارتی کے صحیح فوائد اسی وقت حاصل ہوتے ہیں جب دونوں ممالک FTA پارٹنر بن چکا ہے لیکن میرے نزدیک آپس میں جوائنٹ وینچرز کر کے بنائی ہوئی اشیاء کو مقامی مارکیٹ کے علاوہ اپنے ملکوں کو بغیر ڈیوٹی ایکسپورٹ کریں۔ چین کی تعمیراتی کمپنیاں دنیا بھر میں سرفہرست ہیں۔ صدر پاکستان نے ان کمپنیوں کو پاکستان کی کمپنیوں کے ساتھ کنسورشیم بنا کر پاکستان میں سستے مکانات بنانے کی تجویز دی ہے جس میں حکومت پاکستان اپنی ایکویٹی کے طور پر زمین دے سکتی ہے۔ ایک اور یادداشت کے تحت چین گلگت بلتستان میں 2 ہائی ویز بنائے گا جس کی تعمیر پر تقریباً 45 ارب روپے لاگت آئے گی جس کا 85% چین ادا کرے گا۔

میں پاکستان امریکہ تجارت بڑھانے کے لئے اگلے ہفتے نیویارک جا رہا ہوں جہاں میری پاکستان کے سفیر حسین حقانی، پاکستان کے لئے امریکہ کے خصوصی نمائندے رچرڈ ہالبروک اور امریکہ میں پاکستان کی ٹیکسٹائل مصنوعات کی رسائی کے سلسلے میں اعلیٰ امریکی حکام سے میری ملاقاتیں ہیں۔ اس سے پہلے میرے علاوہ صدر اور وزیر اعظم پاکستان نے یورپی یونین میں مارکیٹ رسائی کے لئے کئی ملاقاتیں کی ہیں لیکن ابھی تک یورپی یونین نے دہشت گردی کے خلاف جنگ میں پاکستانی معیشت کو پہنچنے والے نقصانات کو مدنظر رکھتے ہوئے ہمیں مارکیٹ رسائی نہیں دی حالانکہ صدر اور وزیر اعظم پاکستان نے بار بار اپنا یہ موقف اپنے اتحادیوں پر واضح کیا ہے کہ موجودہ حالات میں ہمیں ایڈ کے بجائے ٹریڈ کی ضرورت ہے۔ ان حقائق کو مدنظر رکھتے ہوئے ہمیں اب مغرب کے ساتھ ساتھ مشرق کی جانب بھی اپنی توجہ مرکوز کرنی ہوگی۔ امریکہ اور یورپ کے بڑے بڑے معیشت دانوں نے یہ پیش گوئی کی ہے کہ آنے والی دہائی میں سب سے زیادہ معاشی ترقی ایشیاء میں ہوگی لہذا ہمیں علاقائی تجارت کے کامیاب ماڈل کو اپنانا ہوگا اور خطے کے ممالک سے باہمی تجارت کو فروغ دینا ہوگا جس میں چین سرفہرست آتا ہے۔

Karakoram to Gwadar via Chashma! -- DR.JAVID IQBAL COMMENTS ON SECURITY RELATED EXERCISE FROM HIGH MOUNTAINS TO SEACOAST

Karakoram to Gwadar via Chashma!

ACROSS THE LINES

DR.JAVID IQBAL COMMENTS ON SECURITY RELATED EXERCISE FROM HIGH MOUNTAINS TO SEACOAST

As Kashmir rises in fury and faces massive flexing of state power, a security exercise is unfolding in the neighbourhood from the high peaks in Himalayas closing on the vale down to the seacoast. Somewhere in the path is Chashma, which is linked to the trail. Living a curfew ridden life, recalling Basharat Peer's Curfewed Night, the hard realities of geopolitics project through news channels on TV, recalling too what way Allama Iqbal said back at the start of 20th century:

Gharan Khab Chini Sambalnay Lagey

Himaliya Kay Chashmay Ubalnay Lagey!

Chinese awake from a slumber deep

Himalayan streams on a date to keep!

Yes Chinese are up and coming, as Zardari gets to China for a bonus, he is met with a bonanza...multiplier on 10%! Father-in-law had worked it out long back.

Zulfikar Ali Bhutto in foreign office in sixties, ridden with imbalanced security scenario vis a vis India, worked to bring Chinese in the equation. Some say, Manzoor Qadir-Pakistan's foreign minister before Bhutto conceived it earlier. Manzoor or Zulfikar wouldn't matter, were the Chinese not equally interested. China like Russia is not exactly a huge land mass with a narrow sea coast and that too, with the cold sea coastline. South China Sea forms a considerable coastline.

However what is missing is ready access to warm waters-the energy sea lanes-a subcontinental security plus. Russian bear wearing its communist USSR garb came roaring via Afghanistan to gain access. Americans came in the path riding on the high tide of what is now derisively called-militant Islam! It served a purpose then; it is taken to be a deterrent now, as the civilizational hypothesis comes to fore.

Russian bear didn't burn its fingers only but lost its USSR garb too, as Afghanistan far from taking it to warm waters led it to 'Glasnost' and to oblivion as a superpower!

China on the contrary came creeping, not to lord over but provide help, albeit help needed to suit her designs. With diplomatic overtures to Pakistan, heat was turned on Hindi-Chini Bhai Bhai-brothers after all have scores to settle, more often than not seemed to be strategy. Apart from making strides in Aksai Chin, it picked a slice of erstwhile [pre 1947] J&K State, in a border settlement with Pakistan. It came with a proviso to review it, in a final settlement of Kashmir issue, in and when it takes place. It did not translate into making China a stakeholder, nor did it assert any claim. Nevertheless, role of a watcher, even if distant was unmistakable. That is on high mountains, coastline tale has a geopolitical link.

While as Russians wanted to gain access to warm waters by a bloodbath, Chinese got positioned right on the coast on Gwadar. A port used for clandestine subcontinental trade of yore with the Gulf was given a modern hue to accommodate bigger vessels. In the bargain Pakistan's maritime trade potential was sought to be widened, lessening the stress on overworked Karachi port. The huge works in Gwadar are still on. China in the process has lost many men-victims of insurgency in Balochistan. Pakhtuns in NWFP and Balochis continue to resent their assets passing into official hands. Many Balochis are citizens of gulf too-Oman and UAE, they thrive on clandestine trade. Chinese are bringing new perceptions in subcontinental power equations.

Bhutto's input in the geopolitical balancing exercise was carried forward by Yahya-perhaps his only positive input was easing Kissinger's Chinese path via Peshawar. Ever since USA has taken a light view of Pak/China axis to India's chagrin. Eventually the Karakoram link-up was converted to a viable road, widening Pak/China geopolitical prospects. Pakistan gradually was coming out of insecurities vis a vis India. India's 1974 Pokharan atomic workout had Bhutto swearing to eat grass but get the bomb. He looped oil rich Libya and others promising to share technology. By the time Pakistan had the technology, Bhutto was out. Zia inherited his China policy and while he took Bhutto to gallows, he ensured to continue where

Bhutto had left. Thus the policy became the cornerstone of Pakistan's foreign policy, even while Pakistan's officialdom swore by Pak/USA strategic relationship.

With Chinese push for a rail link on Karakoram, as Zardari visits China, Indian worry is understandable. As if Karakoram to Gwadar link-up were not enough, Chashma falls somewhere close to geopolitical bridge. To the one nuclear reactor already in place, China has been preparing to build two more. As per reports Andrew Small, an expert on Pak/China- a fellow at the German Marshall Fund of the United States, commented "For China, the counter-balancing element of the Pakistan relationship is more important than it was a few years ago," The deal as weighed by various experts has various aspects:

- (a) a "counter-weight" to the partnership between India and the United States, who signed a nuclear power pact in 2008,
- (b) rising India, and the India-US factor, China's traditional element of backing Pakistan is back more in play,
- (c) little room for Washington to oppose outright the Chashma deal after it sealed its own energy pact with New Delhi,
- (d) alienating Pakistan is not in the U.S. interest,
- (e) offers Chinese nuclear exporters an opportunity to hone their prowess in building reactors abroad, Chashma helps keep them in the game,
- (f) protecting ties with Beijing and Pakistan or risking a diplomatic brawl-a western dilemma

India is already being accused in some quarters of opening the 'Pandora's box' by going whole hog for Indo/USA nuclear deal. This is projected as opening up the provision of more such deals. However Indian plea of having fool proof nuclear safeguards in place, with Pakistan failing to explain the technology transfer, in violation of international safeguard norms has takers too. Pakistan's domestic instability is another concern. China, it is said may not go whole hog in winding up the deal during Zardari's visit, however as the reports suggest, China is confident it would get over whatever be the international concerns in its expansion plans at Chashma-prime project, which is taken as a national objective. Karakoram rail link, coming down from high Himalayan peaks right upto Arabian Sea in Gwadar, the intensity being shown in developing Chashma has an added geopolitical factor of concern to India- establishing the rail link to Tibet, a technological marvel.

While Indian strategists make out the contradiction, Pakistan sees only concurrence of interests. Indian concerns nevertheless remain. In fact 2010 started with ominous reports of Chinese push in Ladakh. There were musings of J&K Government officials conveying concerns to Gol. Chinese evasiveness in settling the Indo/Chinese border is a known factor in this geopolitical power play. In fact, it predates the communist regime in China. During the British Raj in India, the Chinese displayed a similar attitude, leaving room for a claim, whenever it fitted into Chinese game plan. Strange, it might seem, an un-settled border suits Chinese, much as it served the German interests in 19th and first half of 20th century Europe. The push in Sudetenland on the plea of un-settled German/Czech border turned into prodding the Second World War. Chinese followed the same pattern in 1962. Pundit Jawaharlal Nehru had been warned by Sardar Patel and even his own daughter; Indira Gandhi, who got suspicious of Chinese moves in fifties. Nehru however thought China could be contained, even if it had a few tricks up the sleeve, by his charm offensive. The result was the debacle of 1962.

India of 2010 is not the India of 1962. Post 1962 debacle, defence has assumed the form of genuine investment. And could those versed with that debacle fault the Indian national leadership, down from Indira Gandhi to Sonia Gandhi and her techno-savvy Prime Minister? In 1962, the forward posts did not have the needed logistic support, nor was the training of troops, as precise as it is today. India has learned the hard way t

US to provide \$7 billion non-military aid to Pak: Hillary -- Daily Jang

US to provide \$7 billion non-military aid to Pak: Hillary

July 19, 2010

US Secretary of State Hillary Rodham Clinton has said that Pakistan has to remove reservations of the international community over its Civil Nuclear Technology deal with China, saying under Kerry-Lugar Bill, US would give Pakistan \$7 billion in non-military aid over five years.

Foreign Minister Shah Mehmood Qureshi said that Pakistan signed the agreement with China aimed to tackle its on-going energy crisis and no country should has reservations over it.

Addressing a joint press conference along with her Pakistani counterpart Foreign Minister Shah Mehmood Qureshi at Foreign Office after Strategic Dialogues, the US Secretary of State said US is waiting Pakistan's response regarding reservations on Civil Nuclear Technology deal with China.

She said Washington has tripled the non military aid to Pakistan to \$7.5 billion under the Kerry Lugar Bill over the next five years. This reflects our deepening of relations with Pakistan.

The US Secretary of State said that during her visit she held important meetings

with President Asif Ali Zardari and Prime Minister, Syed Yusuf Raza Gilani and matters related to Pak-US Strategic Dialogues were discussed. Secretary Clinton conveyed the United States' support for Pakistan's socio-economic advancement. In this context, she said the United States would, in particular, support programmes and projects in the priority areas of energy and food security and social sector development. Secretary Clinton announced U.S. assistance for Signature Projects in energy, water and health. She said that US experts are working on different project with Pakistani experts to steer the country of its energy crisis.

Jang -- پاکستان امریکا اسٹریٹجک ڈائیلاگ کے دوسرے مرحلے کا آغاز

پاکستان امریکا اسٹریٹجک ڈائیلاگ کے دوسرے مرحلے کا آغاز

پاکستان اور امریکا کے درمیان اسٹریٹجک ڈائیلاگ کے دوسرے مرحلے کا آغاز ہو گیا ہے اس ... اسلام آباد موقع پر پاکستانی وزیر خارجہ شاہ محمود قریشی کا کہنا تھا کہ آج کا دن پاکستان اور امریکا کیلئے بہت اہم ہے۔ پاکستان امریکا تعلقات کا نیا دور شروع ہو رہا ہے، جبکہ امریکی وزیر خارجہ ہلیری کلنٹن کا کہنا تھا کہ وہ امریکی انتظامیہ، عوام اور صدر اوباما کی جانب سے خیر سگالی اور نیک خواہشات کا پیغام لائی ہیں۔ پاک امریکا اسٹریٹجک ڈائیلاگ کے افتتاح سے خطاب کرتے ہوئے شاہ محمود قریشی کا کہنا تھا کہ پاک امریکا پائیدار تعلقات دوطرفہ اہمیت کے ساتھ علاقائی و عالمی سطح پر بھی اہم ہیں۔ اسٹریٹجک پارٹنر شپ پاکستان ، امریکا سمیت پورے خطے کے مفاد میں ہے اور پاکستان ، امریکا سے تعلقات اور تعاون میں مخلص ہے۔ انہوں نے کہا کہ پاک امریکا ڈائیلاگ میں سکیورٹی، جوہری عدم پھیلاؤ، انسداد دہشت گردی سمیت تعلیم، کلچر، سائنس و ٹیکنالوجی کے شعبوں میں تعاون بھی شامل ہیں۔ انہوں نے کہا کہ امید ہے کہ پاکستان اقتصادی شعبے میں اہداف حاصل کریگا اور پاکستان اور امریکا اپنے طویل تعلقات کو پائیدار بنانے کیلئے کام کریں گے۔ امید ہے کہ دہشت گردی کیخلاف جنگ میں پاکستان کی مشکلات دور کرنے میں مدد دی جائیگی، اور پاکستانی برآمدات کو عالمی مارکیٹ میں زیادہ رسائی دی جائیگی۔ اس موقع پر امریکی وزیر خارجہ ہلیری کلنٹن کا کہنا تھا کہ پاک افغان معاہدہ علاقے کے لیے اہم ہے۔ ٹرانزٹ ٹریڈ پر کامیاب پاک افغان مذاکرات پر دونوں ممالک مبارک باد کے مستحق ہیں، ٹرانزٹ ٹریڈ معاہدے سے دونوں ممالک میں روزگار فراہمی اور اقتصادی ترقی میں مدد ملے

گی۔ انہوں نے کہا کہ یقیناً دونوں ممالک کے درمیان فرق ہے لیکن ہمارا دشمن ایک ہے۔ انہوں نے کہا کہ افغانستان سے اعتماد اور تعاون کے قیام میں پاکستان کی حکومت کا کردار قابل قدر ہے۔ انہوں نے کہا کہ ان مذاکرات کا مقصد معاملات کا بغور جائزہ لینا ہے اور پاکستان کے ساتھ مختلف شعبوں میں تعلقات مضبوط بنانا ہے۔ اس موقع پر بلیری کلنٹن نے مزید ترقیاتی پروگراموں کا اعلان کرتے ہوئے کہا کہ توانائی تعاون کے دوسرے مرحلے میں پاکستان کو مزید تعاون دیں گے۔ سد پارہ، گوم زام اور اسکردو میں ڈیمز کی تعمیر میں مدد دیں گے۔ پاکستانی عوام کو صاف پانی کی فراہمی اور نکاسی آب منصوبوں میں بھی تعاون دیں گے۔ امریکی وزیر خارجہ نے توانائی اور پانی کے اہم منصوبوں کیلئے امداد کا اعلان کیا۔ انہوں نے کہا کہ پاکستان کو صحت شعبے میں تعاون کے لئے تین بڑے اسپتالوں کی توسیع کی جائیگی اور چھوٹے اور درمیانے درجے کے کاروبار کے فروغ کیلئے 100 ملین ڈالر دیں گے اور پاکستان میں ڈیری ڈیولپمنٹ کا بڑا پروگرام شروع کیا جائیگا۔ انہوں نے کہا کہ امریکا پاکستان میں دو ہائیڈرو الیکٹرک ڈیم کے منصوبے مکمل کرے گا اور امریکا متبادل توانائی کے ذرائع کی ترقی کیلئے پاکستان کی مدد کریگا، جن میں توانائی ہوا اور شمسی توانائی کے ذرائع شامل ہیں۔

پاکستان کو افغانستان کے راستے وسط ایشیا تک تجارتی راہداری مل گئی، افغانستان کو بھی تجارتی سامان براستہ پاکستان بھارت بھیجنے کی اجازت

اسلام آباد (نمائندہ جنگ، ایجنسیاں) پاکستان اور افغانستان میں ٹرانزٹ ٹریڈ کے موضوع پر جاری مذاکرات کامیاب ہو گئے ہیں اور دونوں ملکوں میں تمام اہم ایشوز پر مفاہمت ہو گئی ہے۔ مذاکرات میں یہ اتفاق ہو گیا ہے کہ بھارت کو واپگہ کے راستے افغانستان کیلئے برآمدات کی اجازت نہیں دی جائے گی تاہم افغانستان کو اپنی اشیاء فضائی راستے واپگہ سے انڈیا برآمد کرنے کی اجازت ہوگی۔ اس طرح پاکستان کو افغانستان کے راستے وسط ایشیا کیلئے برآمدات کی اجازت ہوگی۔ اس اہم اور وسیع البنیاد ریکارڈ نوٹ پر اتوار کی شام وزیر اعظم ہاؤس اسلام آباد میں دستخط ہوئے۔ وزیر اعظم سید یوسف رضا گیلانی اور امریکی وزیر خارجہ بلیری کلنٹن اس موقع پر موجود تھے۔ پاکستان اور افغانستان نے توقع ظاہر کی کہ پاکستان اور افغانستان ٹرانزٹ ٹریڈ سے متعلق تمام حل طلب دیرینہ ایشوز کو حل کرنے سے معاہدہ جلد ہونے میں مدد ملے گی۔ دونوں جانب سے قانونی تقاضے پورے ہونے کے بعد معاہدہ پر دستخط ہوں گے۔ اس معاہدے پر دستخط پاکستان اور افغانستان کے درمیان تجارت کی ترقی اور دونوں ملکوں کے باہمی مفاد میں معاشی تعلقات کیلئے سنگ میل ثابت ہوگا۔ وسیع البنیاد ریکارڈ نوٹ پر پاکستان کے وزیر تجارت مخدوم امین فہیم اور افغانستان کے وزیر تجارت و صنعت ڈاکٹر انوار الحق امدی نے دستخط کئے۔ اس مفاہمتی تحریر میں کہا گیا ہے کہ افغانستان کا برآمدی سامان لے جانے والے ٹرکوں کو واپگہ اور پاکستانی بندر گاہوں تک جانے کی اجازت ہوگی تاہم یہ سامان طے شدہ روٹ کے ذریعے جائے گا۔ افغان ٹرانسپورٹ گاڑیوں کو واپسی میں پاکستانی مصنوعات اور اشیاء کو افغانستان لے جانے کی اجازت ہوگی۔ یہ بھی فیصلہ کیا گیا کہ افغان ٹرانزٹ کا سامان بین الاقوامی معیار کے کنٹینرز میں جائے گا۔ تین سال کیلئے یہ طے پایا کیا جاسکے (سربراہ) جو سامان Seal ہے کہ کارگو بین الاقوامی معیار کے ایسے ٹرکوں میں جائے گا جنہیں کنٹینرز میں درآمد نہیں ہوتا اسے بندرگاہ سے کھلے ٹرکوں میں لوڈ کیا جائے گا۔ اس طرح جو اشیاء خراب ہوسکتی ہیں انہیں کھلی گاڑیوں میں لے جایا جائے گا۔ ریکارڈ نوٹ کے تحت ڈرائیورز اور کلیئرز پر مٹ کے ذریعے دونوں ملکوں میں داخل ہوسکیں گے البتہ ہائیو میٹرک سسٹم سے گزریں گے جو داخلی مقامات پر نصب ہوگا۔ ایک ثالثی ٹریبونل قائم کر نیکا بھی فیصلہ کیا گیا ہے ثالث یہ اتفاق نہ ہونی کی صورت میں دونوں ملک تیسرے کسی ملک کے دو افراد نامزد کریں گے اور ان چار افراد میں سے ایک ثالث کا انتخاب کیا جائے گا۔ غیر مجاز تجارت کے مسئلہ سے نمٹنے کیلئے یہ طے کیا گیا ہے کہ ٹرانسپورٹ یونٹس پر ٹریکنگ ڈیوائس (آلات) نصب کی جائے گی اور دونوں ملکوں کے محکمہ کسٹمز کے درمیان اطلاعات کے تبادلے کا میکانزم وضع کیا جائے گا۔ اس تناظر میں یہ فیصلہ کیا گیا ہے پاکستان کی امپورٹ لیویز کے مساوی مالیاتی گارنٹی مجاز کسٹم کلیئرنگ ایجنٹ جمع کرائے گا اور جب سامان ملک سے چلا جائے گا تو یہ ضمانت ریلیز کردی جائے گی۔ اگر مقررہ وقت کے اندر سامان ملک سے باہر نہ گیا تو محکمہ کسٹم یہ گارنٹی کیش کراسکے گا۔ معاہدے کے مطابق پاکستان نے افغانستان کو اپنی سمندری حدود کے علاوہ فضائی حدود حتیٰ کہ زمینی راستے سے بھارتی برآمدات منگوانے کی اجازت دے دی ہے۔ افغانستان کا برآمدی سامان جسمیں خشک پھل تازہ پھل شامل ہیں پہلے ہی پاکستانی شاہراہوں سے گزر کر واپگہ کے راستے انڈیا جارہا ہے۔ ذرائع کے مطابق انڈیا عشروں سے افغانستان اور وسطی ایشیائی ممالک کی منڈیوں تک اپنا برآمدی سامان واپگہ کے راستے پہنچانے کی ناکام کوششیں کیں مگر اب انڈیا یہ سہولت پاکستان سے افغانستان اور امریکہ کے گٹھ جوڑ کی وجہ سے حاصل کرنے میں کامیاب ہو گیا ہے۔ پاکستان کی برآمدات پہلے ہی افغانستان کے راستے وسطی ایشیائی ریاستوں میں جارہی ہیں۔ اس معاہدے میں اسے اس شق کے طور پر شامل کر لیا گیا ہے کہ افغانستان پاکستان کی برآمدات کو افغانستان کے راستے وسطی ایشیائی ممالک تک بھجوا کرے گا۔ این این آئی کے مطابق بھارت کو افغانستان تک سامان کی نقل و حمل کیلئے پاکستان کے فضائی اور سمندری راستے استعمال کرنے کی اجازت ہوگی۔ اس حوالے سے وفاقی

وزیر برائے تجارت امین فہیم نے بتایا کہ اتوار کو اسلام آباد میں دونوں ملکوں کے عہدے داروں نے تفصیلی بات چیت میں افغان ٹرانزٹ ٹریڈ کے معاہدے کو حتمی شکل دے دی ہے جس میں افغانستان کو تجارتی رابداری دینے کی شق بھی شامل ہے۔ انہوں نے کہا کہ اس شق کے تحت افغان تجارتی سامان کو کراچی سے لے کر افغانستان کی سرحدوں تک ترسیل کے لیے رابداری دی جائے گی جبکہ لاہور کے قریب واپگہ بارڈر سے افغانستان کے لیے تجارتی سامان کو بھی افغان ٹرکوں پر لاد کر افغانستان بھیجا جا سکے گا۔ امین فہیم نے کہا کہ معاہدے کے تحت بھارت کے ٹرک واپگہ بارڈر پر سامان اتارنے کے پابند ہوں گے جسے پاکستانی یا افغان ٹرکوں پر لاد کر افغانستان روانہ کیا جائے گا۔ انہوں نے کہا کہ اس رعایت کے بدلے افغانستان وسط ایشیائی ریاستوں کے ساتھ تجارت کیلئے پاکستان کو رابداری کی سہولت دے گا۔

Pakistan and China's economic cooperation -- By Ismat Sabir

Pakistan and China's economic cooperation

By Ismat Sabir

China is a friend and a strategic partner promoting stability and economic progress in Pakistan, said Chinese President Hu Jintao. While responding to this statement, President Asif Ali Zardari said, "It is our belief that Pakistan can act as a force multiplier for China and we will continue to work towards this end."

These views were expressed at the time of the president's fifth five-day visit to China, since assuming presidential office in 2008. He said Pakistan is determined to strengthen relations with its neighboring country through people-to-people contacts. This visit would enhance bilateral trade and commercial ties between the two countries and reach new heights, as both the countries are partners in the economic growth of the region.

Chinese interest in Pakistan's economic growth is growing day by day. For instance, in Pakistan there are more than 120 companies and about 10,000 Chinese working in different sectors like mining, energy exploration and infrastructure building.

Energy: The Chinese government reconfirmed to carry out its project of installing two nuclear reactors in Pakistan. China said these projects are in total compliance with all international obligations.

Presently, China and Pakistan are cooperating in civilian nuclear energy. The cooperation is exclusively for peaceful purposes and to accept International Atomic Energy Agency safeguards. The agreement was signed during the president's visit last year. The Chinese president and president of Pakistan were present at the signing ceremony of the Sino-Pakistani economic and technological cooperation agreement. The other agreements were in the field of agriculture, health, justice and information.

Zardari met representatives of different sectors, in particular, wind, solar, and renewable energies to seek solutions to overcome energy crisis in Pakistan.

A Chinese firm would invest \$10 billion in hydro power projects in Pakistan. The company would build dams in Bunji and Kohala areas. The dams would generate 7,000 megawatts (MW) and 12,000MW, respectively.

In his last visit to China, Zardari emphasised on implementation of all agreements signed between the two countries. It is pertinent to mention that during the last two years of the Pakistan People's Party government, more than five-dozen new projects have been undertaken and nearly 40 MoUs signed.

Under the Five-Year Programme for trade and economic cooperation 62 projects have been identified, out of which 27 have been launched, 26 are being examined and 12 are being reviewed. Pakistan also offered China access to emirates through Pakistani ports. Pakistan always encourages China to reap maximum benefits from Gwadar Port.

A Chinese firm has finalised a deal with the Pakistan Stone Development Company. China is the largest importer of chromites. The black coloured stone contains around 55 percent steel properties and is used in steel making and steel material for tank making. Chinese investors are showing great interest in Pakistani marble due to its quality and demand in the international market.

Chinese firms have signed agreements to buy 2,000 tonnes of Cotan beige and two grades of Mastung beige quality marble, found in Balochistan. It is expected that China will become the largest buyer of stone in the coming years.

Another Chinese firm will invest \$50 billion in Punjab during the next 10 years. The investment will be done to build a state-of-art industrial city, along with an industrial

estate on 100,000 acres.

Trade: In 2009 the total foreign trade of China declined by 13.9 percent but trade value between Pakistan and China declined only 2.9 percent, reaching \$6.8 billion. The total export of China declined by 16 percent but reduced by 7.7 percent only with Pakistan, at \$5.5 billion. China imported \$1.3 billion from Pakistan, showing an increase of 25.3 percent, which was the result of the Free Trade Agreement (FTA).

China-Pakistan trade in the first five months of this year reached \$3.3 billion, up 31 percent. Chinese commerce minister said that bilateral trade could hit \$15 billion in 2015.

Hu Jintao said that China had become Pakistan's second largest trading partner and gave assurance to make steady progress in cooperation with Pakistan in energy, telecom sectors, Neelum-Jhelum project and Pakistan's telecommunication satellite project.

Pak-China bilateral trade touched \$7 billion from \$2 billion in 2002. China has granted four types of trade concessions to Pakistan, one-sided, which would help increase Pakistan's exports to China by \$1 to \$1.5 billion annually. China would provide duty concessions on tariff lines not covered under Pakistan-China FTA.

The two states signed an agreement to establish a joint venture company in the private sector to promote sale of certified hybrid seeds and other varieties of seeds, which are to be developed according to the soil conditions and environment of Pakistan.

Pakistan and China would cooperate in the fields of water conservation, water resource management, hybrid seed technologies, drip and sprinkling irrigation systems.

During the visit, Zardari also stressed the need to set up railway line and a pipeline from Gwadar to China to connect the two countries. Importance of connectivity through railway link was felt in the recent disruption in the Karakoram Highway due to a landslide that blocked the road transportation.

China said that cooperation for the construction of railway link between the two countries is because China and Pakistan are strategic partners; have a deep traditional friendship cooperating in various fields. The cooperation would not only benefit the two countries but also help regional stability, common development and prosperity and not against any third country.

Zardari said that a road connection with China is one of his ideas to be realised. The travelling time, by sea, from China to Pakistan or Southeast Asia takes months, but by road transportation to Pakistani port, is only 1,100 miles from the Chinese border. The construction of road link with China would surely boost bilateral trade.

Zardari met executives of NORINCO, China's top arms manufacturer and leaders of Sino Hydro Corporation, the China's main dam builder and China Petrochemical Corporation, SINOPEC. The president also told Chinese business tycoons that authorities had planned to feed Pakistani grid through hydro, coal, gas, nuclear and renewable energy sources.

MoUs were also signed in the fields of health and Geological Survey of Pakistan and China. An MoU was also signed for cooperation between Pakistan Broadcasting Corporation and China Radio International for Urdu service broadcasts in selected Pakistani cities on FM channel with the China Radio International (CRI). China has promised a 50 million yuan grant for new projects to be set up in Pakistan.

Zardari termed Pakistan and China as the joint cornerstone of stability in South Asia. The Chinese prime minister said Pakistan is an important country of the

region and fighting war against terrorism made it even more important. The international community should come forward to help Pakistan and make the war on terror a success. He further said we can jointly think about going upward in Asia exploring new markets through Pakistan.

In the next meeting issues will be taken up including currency swap, opening of branches of Chinese banks in Pakistan and relocating industries in the special proposed industrial zones in Pakistan. It was also agreed that the China National Energy Administration would hold discussions with Pakistani authorities to solve Pakistan's energy problem.

The Chinese PM said his country appreciated Pakistan's policy of "One China" and assured Zardari that China would continue supporting Pakistan at the UN and multilateral forums, including SAARC and ECO.

Chinese president said that he had instructed his foreign minister to make arrangements for the exchange of youth delegations, cultural and writers' delegations between the two countries and also incr

Pakistan, U.S. to enhance cooperation in energy and developmental sectors -- Xinhua

Pakistan, U.S. to enhance cooperation in energy and developmental sectors
08:19, July 20, 2010

The Pakistan-U.S. Strategic Dialogue concluded here on Monday with a positive note sugarcoating the security concerns as both countries have finalized a comprehensive strategy to enhance the bilateral cooperation in the energy and developmental sectors.

"In order to deepen our relationship we have gone far beyond security," the U.S. Secretary of State Hillary Rodham Clinton told a joint news conference flanked by her Pakistani counterpart Shah Mehmood Qureshi.

Enveloping the security concerns under the five-year 7.5- billion-dollar economic and development package that was offered under the Kerry-Lugar Berman Act, Clinton responded a question saying "of course, there's legacy of suspicions which won't be able to be eliminated overnight."

"I heard about the trust deficit," she commented recalling her last year's visit while tactically deflecting through the sensitive security-related issues and highlighting the more appealing core economic and development matters.

Since the first round of bilateral dialogue in March 2010, 13 working groups were formulated that would help Pakistan in key areas of energy, water, education, health, employment, infra- structure building and others.

"Our partnership would go far beyond," said Clinton who arrived on a two-day official visit on Sunday with a heavy purse of 500 million dollars. Her participation in a forthcoming international donor's conference in Kabul right after successfully holding the second round of strategic dialogue to be held in Washington in October.

Pakistani Foreign Minister Qureshi said that Pakistan and U.S. have shifted to a productive mode as the U.S. will assist Pakistan in building water projects in Satpar, Skardu and Gomal-Zam dams.

"We are tapping an energy mix resources," Qureshi said while elaborating the various means the energy-hungry country has been employing to meet its needs. The electric power shortfall in Pakistan has reached 4,500 Mega Watts.

Brushing aside a question on Pakistan's nuclear energy resources, particularly nuclear power plant with the help of China, Qureshi said that Pakistan holds 35 years of experience in generating nuclear energy and "no untoward incident has ever happened."

پاکستان کیلئے 69 کروڑ ڈالر کے 73 امریکی منصوبوں کا اعلان -- جنگ

پاکستان کیلئے 69 کروڑ ڈالر کے 73 امریکی منصوبوں کا اعلان

اسلام آباد (نمائندہ جنگ) امریکا نے پاکستان کیلئے 69 کروڑ ڈالر کے 73 امریکی منصوبوں کا اعلان کیا ہے۔ جس میں توانائی، پانی، صحت و تعلیم سمیت متعدد ترقیاتی منصوبے شامل ہیں جبکہ دونوں ممالک نے دوطرفہ تعاون کو مزید تقویت دینے کے عزم کا اظہار کیا ہے اور اسٹریٹجک ڈائیلگ کا اگلا دور اکتوبر میں واشنگٹن میں ہوگا۔ پیر کو پاک امریکا اسٹریٹجک ڈائیلگ کے دوسرے وزارتی دور کے اختتام پر جاری کئے گئے مشترکہ اعلامیہ میں کہا گیا ہے کہ پاک امریکا اسٹریٹجک ڈائیلگ کے دوسرے وزارتی دور کے اجلاس میں وزیر خارجہ شاہ محمود قریشی اور امریکی وزیر خارجہ ہیلری کلنٹن نے اپنے وفد کے ہمراہ شرکت کی۔ وزیر خارجہ محمود قریشی اور ان کی امریکی ہم منصب ہیلری کلنٹن نے اب تک ہونے والے مذاکرات اور دونوں حکومتوں کے درمیان بڑھتے ہوئے تعاون پر بھرپور اطمینان کا اظہار کیا۔ اعلامیہ کے مطابق امریکا تجارت کے فروغ کیلئے منڈیوں تک وسیع تر رسائی کی پاکستانی کوششوں اور تعمیر نو مواقع زونز کے قیام کیلئے تعاون جاری رکھے گا۔ بعد ازاں امریکی وزیر خارجہ ہیلری کلنٹن نے پیر کو اسٹریٹجک ڈائیلگ کے دوسرے دور کے بعد وزیر خارجہ شاہ محمود قریشی کے ہمراہ مشترکہ پریس کانفرنس سے خطاب کرتے ہوئے کہا کہ امریکا نے پاکستان کیلئے اپنی مالی معاونت ساڑھے سات ارب ڈالر تک تین گنا کی ہے جو کیری لوگر برمن ہل کے تحت پانچ برسوں میں دی جائیگی۔ وزیر خارجہ شاہ محمود قریشی نے کہا کہ پاکستان اور امریکا نے طویل المدتی پر اتفاق کیا ہے اور پاکستان اور "دستاویز بصیرت" رابطوں اور دونوں عوام کے مابین شراکت داری کیلئے ایک امریکا کے درمیان اسٹریٹجک ڈائیلگ کا اگلا دور اکتوبر میں واشنگٹن میں ہوگا۔ پاکستان اور چین کے درمیان جوہری توانائی کے پر امن استعمال کیلئے اشتراک کار سے متعلق سوال پر ہیلری کلنٹن نے کہا کہ امریکہ پاکستان کی توانائی ضروریات پوری کرنے کیلئے بات چیت کر رہا ہے، نیوکلینر سپلائرز گروپ اور بین الاقوامی برادری نے بعض سوالات اٹھائے ہیں جن کے جواب کی ضرورت ہے، ہم اسلام آباد سے ان سوالات کے جواب کے منتظر ہیں۔ وزیر خارجہ شاہ محمود قریشی نے کہا کہ پاکستان کو توانائی کی شدید قلت کا سامنا ہے، شہری علاقوں میں چھ سے آٹھ گھنٹے اور دیہی علاقوں میں دس سے بارہ گھنٹے لوڈ شیڈنگ ہو رہی ہے جس کا صنعتی اور زرعی شعبوں پر اثر پڑ رہا ہے۔ انہوں نے کہا کہ سول جوہری منصوبے عالمی جوہری توانائی ادارے کے معائنے کیلئے کھلے ہوں گے۔ انہوں نے یقین دلایا کہ بین الاقوامی کو اس معاملے میں کوئی پریشانی نہیں ہونی چاہیے۔ علاوہ ازیں دفتر خارجہ میں دونوں ممالک کے وزارتی اسٹریٹجک ڈائیلگ کے بعد امریکی سفارتخانہ سے جاری تفصیلات میں کہا گیا ہے کہ ہیلری کلنٹن نے پاکستان میں خواتین کو باختیار بنانے اور ان کے حقوق کے تحفظ کیلئے چار کروڑ کے 5 سالہ منصوبے کا اعلان کیا۔ اس پروگرام کیلئے امریکا پہلے ہی ایک کروڑ پچیس لاکھ ڈالر کا وعدہ کر چکا ہے اور توقع ہے کہ امداد آئندہ ماہ سے ملنا شروع ہو جائیگی۔ ہیلری کلنٹن نے لڑائی سے متاثرہ خاندانوں کی مدد کیلئے 120 ملین ڈالر کی امداد کا اعلان کیا، اس میں سے 6 کروڑ 50 لاکھ ڈالر مالاکنڈ ہاؤسنگ کیلئے، 2 کروڑ 50 لاکھ ڈالر ملٹی ڈونر ٹرسٹ فنڈ، 2 کروڑ ڈالر ورلڈ فوڈ پروگرام اور ایک کروڑ ڈالر یو این ایچ سی آر کو فراہم کئے جائیں گے۔ عالمی ادارہ خوراک اگست سے دسمبر 2010ء تک حال ہی میں 75 ہزار بے گھر ہونے والے خاندانوں کو خوراک فراہم کرے گا جبکہ یو این ایچ سی آر 14 لاکھ بے گھر خاندانوں کی مدد کرے گا۔ امریکی وزیر خارجہ نے زراعت کے شعبہ کی معاونت اور نئی منڈیاں تلاش کرنے کیلئے دو کروڑ ایک لاکھ ڈالر امداد کا اعلان کیا۔ یہ امداد رورل ڈویلپمنٹ ڈیری پراجیکٹ اور امون کی برآمد کے منصوبے کیلئے استعمال ہو گی۔ انہوں نے نجی شعبہ کی قیادت میں اقتصادی ترقی اور پاکستانی عوام کیلئے روزگار کے مواقع پیدا کرنے کے بارے میں کئی پروگراموں کا بھی اعلان کیا۔ اس سلسلہ میں امریکہ کی اوور سیز پرائیویٹ انویسٹمنٹ کارپوریشن جے ایس پرائیویٹ ایکویٹی فنڈ کیلئے پانچ کروڑ ڈالر فراہم کریگی جبکہ یو ایس ایڈ آئندہ پانچ برسوں کے دوران چھوٹے اور درمیانے کاروبار کیلئے 10 کروڑ ڈالر فراہم کریگا۔

اسلام آباد (نمائندہ جنگ/ایجنسیاں) امریکی وزیر خارجہ ہیلری کلنٹن نے کہا ہے کہ عالمی خدشات ختم کیے... # بغیر پاک امریکا ایٹمی معاہدہ نہیں ہوسکتا، چین سے جوہری سمجھوتے پر تحفظات دور کیے جائیں، پاکستان کی توانائی کی ضروریات کو تسلیم کرتے ہیں، جنہیں پورا کرنے کیلئے جامع اپروچ کی ضرورت ہے۔ انہوں نے کہا کہ جوہری تعاون کیلئے پاکستان کو ایک طویل عمل کو پورا کرنا ہوگا اور نیوکلینر سپلائر گروپ سے بھی

منظوری حاصل کرنا ہوگی۔ انہوں نے کہا کہ پاکستان کے ذمے واجب الادا 1.6 ارب ڈالر ہیں ہم انہیں معاف یا کم کرنے پر غور کریں گے۔ انہوں نے کہا کہ پاکستان میں اپوزیشن متحرک ہے جو اپنا کردار ادا کر رہی ہے، عدلیہ اور میڈیا آزاد ہیں، 18 ویں ترمیم کی منظوری سے مثبت تبدیلی نظر آ رہی ہے تاہم جمہوریت کے تمام پہلوؤں کو ادارہ جاتی بنانا ہو گا، صدر اوہاما پاکستان میں جمہوریت چاہتے ہیں۔ ان خیالات کا اظہار انہوں نے پیر کو یہاں وفاقی دارالحکومت میں ٹی وی اینکرز سے گفتگو اور نیشنل کونسل آف آرٹس میں ٹاؤن ہال میٹنگ سے خطاب کرتے ہوئے کیا۔ ٹی وی اینکرز کے ساتھ نیشنل آرٹ گیلری میں منعقدہ پروگرام میں اظہار خیال کرتے ہوئے امریکی وزیر خارجہ ہیلری کلنٹن نے کہا کہ پاکستان کو امداد اس کی قربانیوں کی وجہ سے نہیں دے رہے بلکہ پاکستان ایک روشن مستقبل کا مستحق ہے اور چیلنجوں کے باوجود پیشرفت کے آثار نظر آ رہے ہیں، حکمران بدلتے رہتے ہیں مگر ہم پاکستان کے ساتھ دیرپا شراکت داری قائم رکھنا چاہتے ہیں۔

China Mobile To Invest Additional \$300M In Pakistan -- APP

China Mobile To Invest Additional \$300M In Pakistan

Friday 2010-07-23 16:56

July 23 -- China Mobile (0941.HK) will further invest \$300 million in Pakistan this year, an investment which will be the largest in the country's telecommunications industry in 2010, reports Yicai.com, citing Pakistani media reports.

China Mobile has to date invested a total of 1.66 billion yuan into Pakistan.

Telecom services provided by China Mobile cover more than 10,000 towns and villages. The company has approximately six million users in Pakistan.

Since entering the Pakistani market in 2007, China Mobile has grown to become the fifth largest mobile telecom operator.

Pakistan to expand maritime ties with China -- Indo-Asian News Service

Pakistan to expand maritime ties with China

Indo-Asian News Service

Beijing, July 23, 2010

First Published: 11:19 IST(23/7/2010)

Last Updated: 11:21 IST(23/7/2010)

Pakistan is "very satisfied" with the performance of the frigates it bought from China and hopes to further strategic maritime cooperation with the nation, a top Pakistani official said. "We are very happy with the performance, and some technology is as good as in Western countries," Admiral Noman Bashir, Pakistan's chief of naval staff, was quoted as saying by China Daily.

Two of the four F-22P frigates Pakistan ordered from China are already in service its navy, with the third one scheduled to be commissioned in September this year.

Pakistan also hopes to buy bigger ships with more firepower from China, he said.

It also proposed to develop strategic maritime cooperation with China in both military and commercial sectors, such as fishery and cargo, he said.

"The friendship between China and Pakistan is greater than the Himalayas and deeper than the ocean. We already made progress in air force and other areas, now we should expand cooperation in navy," he said.

"We can provide facilities, ports, logistics, maintenance among other things (to the Chinese navy)," another Pakistan navy official said.

Daily -- دوستی اب جامع سٹریٹجک پارٹنرشپ میں بدل چکی ، صدر آصف علی زرداری Jang

دوستی اب جامع سٹریٹجک پارٹنرشپ میں بدل چکی ہے، دونوں ملکوں کے درمیان دوطرفہ تجارتی، دفاعی اور معاشی روابط کو نئی بلندیوں تک پہنچانا ہو گا، صدر آصف علی زرداری، بھارتی انٹیلی جنس ایجنسیاں پاکستان میں دہشت گردی کی پشت پناہی کر رہی ہیں، وزیراعظم سید یوسف رضا گیلانی صدر آصف زرداری اور وزیراعظم یوسف رضا گیلانی سے چینی وزیردفاع جنرل لیانگ گوانگ آئیے کی ملاقاتیں، پاک چین دوستی اب جامع سٹریٹجک پارٹنرشپ میں بدل چکی ہے، دونوں ملکوں کے درمیان دوطرفہ تجارتی، دفاعی اور معاشی روابط کو نئی بلندیوں تک پہنچانا ہو گا جبکہ وزیراعظم سید یوسف رضا گیلانی نے دو چینی کمپنیوں کی جانب سے پاکستانی مسلح افواج کو دفاعی آلات کی خریداری کیلئے قرضے کی سہولت فراہم کرنے کا خیر مقدم کرتے ہوئے کہا ہے کہ بھارتی انٹیلی جنس ایجنسیاں پاکستان میں افغانستان کے راستے دہشت گردی اور عسکریت پسندی کی پشت پناہی کر رہی ہیں، مشرقی اور جنوبی افغانستان میں امریکی و نیٹو افواج کی تعداد میں اضافے سے بلوچستان میں مسائل پیدا ہو رہے ہیں۔ ان خیالات کا اظہار انہوں نے پاکستان کے دورے پر آنے ہوئے چینی وزیر دفاع جنرل لیانگ گوانگ آئیے سے الگ الگ ملاقاتوں میں کیا۔ چینی سفیر لاؤ زاؤ ہوئی اور 11 رکنی چینی دفاعی وفد بھی جنرل لیانگ گوانگ آئیے کے ہمراہ تھا۔ اس موقع پر وزیر دفاع چوہدری احمد مختار، وزیر دفاعی پیداوار عبدالقیوم جتوئی، وزیر مملکت برائے امور خارجہ نوابزادہ ملک عماد خان، ایوان صدر کے سیکرٹری جنرل سلمان فاروقی، دفاع، دفاعی پیداوار اور خارجہ امور کے سیکرٹریز بھی موجود تھے۔ ان ملاقاتوں میں پاک چین تعلقات، دفاعی تعاون، علاقائی معاملات اور انتہاپسندی و عسکریت پسندی کیخلاف پاکستان کی جنگ سے متعلق امور پر تبادلہ خیال کیا گیا۔ صدر آصف علی زرداری نے کہا کہ چین کے ساتھ تمام شعبوں میں تعاون بڑھانا اور اسے مضبوط کرنا پاکستان کی خارجہ پالیسی کا ایک کلیدی اصول ہے، پاکستان چین کی ترقی کے معجزے سے سیکھنا چاہتا ہے اور دفاع، توانائی، صنعت، زراعت، مواصلات، تجارت و معیشت کے شعبوں میں اس کی مہارت سے فائدہ اٹھانا چاہتا ہے، پاکستان اور چین کے درمیان اس وقت دوطرفہ تجارت کا حجم کم ہے جس کو 2011ء تک 15 ارب ڈالر کی سطح پر لایا جانا چاہیے۔ انہوں نے کہا کہ پاک چین دوستی آزمائشوں پر پوری اتری ہے اور مشترکہ سٹریٹجک مفادات، اعلیٰ درجے کے باہمی اعتماد، ایک دوسرے کی خوشحالی و ترقی اور خطے میں امن و سلامتی کے فروغ پر مبنی ہے۔ پاکستان اپنی سماجی و معاشی ترقی اور سٹریٹجک استحکام میں متحرک کردار ادا کرنے پر چینی حکومت اور قیادت کا شکر گزار ہے، پاکستان کی معاشی ترقی میں چین کے شہریوں، انجینئروں اور کارکنوں کا کردار قابل تحسین ہے اور پاکستانی حکومت اپنے ہاں موجود چینی شہریوں کی سلامتی کو اعلیٰ ترین ترجیح دیتی ہے۔ انہوں نے کہا کہ ہمارے خطے کو انتہاپسندی، عسکریت پسندی اور دہشت گردی کا مشترکہ چیلنج درپیش ہے، موجودہ جمہوری حکومت اس لعنت کے ہر قیمت پر خاتمے کیلئے پرعزم ہے۔ انہوں نے کہا کہ چین خطے میں استحکام کے ایک عنصر کی حیثیت رکھتا ہے اور پاکستان اس کے ساتھ مل کر عالمی امن اور سلامتی کے فروغ کیلئے کوششیں جاری رکھے گا۔ صدر نے چینی صوبے کنگھائی میں حالیہ زلزلے کے نتیجے میں قیمتی انسانی جانوں اور املاک کے نقصان پر تعزیت کا اظہار کیا۔ اس موقع پر جنرل لیانگ گوانگ آئیے نے دہشت گردی اور پرتشدد انتہاپسندی کیخلاف پاکستانی عوام، حکومت اور سیکورٹی فورسز کی جدوجہد کو خراج تحسین پیش کرتے ہوئے یقین دہانی کرائی کہ چین دفاعی تعاون سمیت تمام شعبوں میں پاکستان کی حمایت جاری رکھے گا۔ دریں اثناء وزیراعظم سید یوسف رضا گیلانی نے جنرل لیانگ گوانگ آئیے سے گفتگو کرتے ہوئے کہا کہ پاکستان اور چین کے درمیان ہر آزمائش پر پورے اترنے والے خصوصی روابط تعلقات قائم ہیں، وقت گزرنے کیساتھ ساتھ دونوں ملکوں کی دوستی اور جامع پارٹنرشپ تعاون پر مبنی کثیر الجہتی سٹریٹجک پارٹنرشپ میں تبدیل ہو چکی ہے جو خطے کے امن اور سلامتی کیلئے انتہائی اہمیت کی حامل ہے۔

انہوں نے پاک فضائیہ کیلئے چین کے تعاون سے تیار کئے جانے والے جے ایف 17 تھنڈر طیاروں اور پاک بحریہ کیلئے چین سے حاصل کی جانے والی ایف 22 پی فریگٹس کے منصوبوں پر پیش رفت کو اطمینان بخش قرار دیتے ہوئے کہا کہ پاک بحریہ میں پی این ایس ذوالفقار کی صورت میں پہلی ایف 22 پی فریگٹ اور پی این ایس شمشیر کی شمولیت سے اس کی پیشہ وارانہ صلاحیتوں میں اضافہ ہوا ہے۔ انہوں نے پاک فوج اور چین کی پیپلز لبریشن آرمی کے درمیان رابطوں کو سراہتے ہوئے چین کی دو کمپنیوں چائینہ نارٹھ انڈسٹریز کارپوریشن اور چائینہ نیشنل الیکٹرانک امپورٹ اینڈ ایکسپورٹ کارپوریشن کی جانب سے پاکستانی مسلح افواج کو دفاعی آلات کی خریداری کیلئے قرضے کی سہولت دینے کا بھی خیر مقدم کیا۔ انہوں نے کہا کہ پاکستانی افواج کو عسکریت پسندوں کیخلاف موثر کارروائیوں کیلئے بلی کاپٹروں اور رات کو دیکھنے والے آلات کی فوری ضرورت ہے ہمیں انسداد دہشت گردی کیخلاف اپنی استعداد کار بڑھانے کیلئے چین کی حمایت درکار ہے۔ انہوں نے جنوری میں پنزہ کے مقام پر لینڈ سلائڈنگ کے بعد خنجراب پاس کھولنے کی اجازت دینے پر بھی چینی حکومت کا شکریہ ادا کیا۔ وزیراعظم نے چینی وزیر دفاع کو یقین دہانی کرائی کہ حکومت پاکستان اپنے ہاں موجود چینی شہریوں کی سلامتی کو اعلیٰ ترین ترجیح دیتی ہے اور وہ اس سلسلے میں چینی سفیر کے ساتھ مسلسل رابطے میں ہیں۔

Chinese electronics firm plans Rs1bn assembling plant -- Daily Jang

Chinese electronics firm plans Rs1bn assembling plant

Tuesday, July 27, 2010

By Salman Siddiqui

KARACHI: The second largest state-owned electronics manufacturer of China, Zhongshan Changhong Electric Co., Ltd is in talks with the government of Sindh to set up an assembling plant in the province with an investment of one billion rupees, sources said on Monday.

“Provincial Minister for Industries Rauf Siddiqui has assured the Company’s delegation, which called on him recently, to provide land for the plant in Export Promotion Zone in Bin Qasim, Karachi,” said spokesman of the ministry.

Humayun Aslam, Director of HNC Corporation, said that the Chinese company would make investment here in collaboration with his company, which itself deals in electronic appliances. “Earlier, the same Chinese company was considering investing in the country in collaboration with Haier - a well known Chinese company in Pakistan.”

Established in 1958, Changhong Changhong has established overseas branches and representative offices in U.S.A, Europe, Australia, Russia, Southeast Asia and Middle East and is continuing setting up branches and offices in other markets. It has more than 20,000 Sales and Service outlets available worldwide with over 30,000 employees, he said.

“The Memorandum of Understanding (MoU) for the investment may be signed sometime next month,” he said. As per talks, the Company would manufacture 10,000-15,000 units of split air conditioners, 3,000-4,000 units of refrigerators and 2-2.5 million units of televisions in first year of its commissioning, he said.

The project will be on a very large scale and was expected to provide employment to approximately 2,000 people in the country. Chinese engineers will also train the local labor in the operations process and provide technical support, he added.

The members of the Chinese firm’s delegations, who called on minister, were included Senior Vice President Frank Teng; Manager Overseas market Ms Susie; and Company Engineer Li Shenglin.

Rs 9 billion being spent on road projects linking Gwadar: NHA Chairman -- Daily Jang

Rs 9 billion being spent on road projects linking Gwadar: NHA Chairman

ISLAMABAD: The Chairman of the National Highway Authority (NHA) Altaf

Chaudhry told the National Assembly’s Standing Committee on Ports and Shipping that Rs 9 billion have been allocated for 18 road building projects.

The committee meeting held under the chairmanship of MNA Rana Mehmoodul Hassan at the NHA Headquarters. He told the meeting that Rs 3 billion would be spent on construction of Gwadar-Rattoder road alone. Some members of the committee belonging to Balochistan expressed their concerns over delay in operationalization of the port. They said that this port can become a source of economic progress of the country, if we can prove required road links.

Members of the committee in their recommendations said that the Gwadar port can prove a backbone in development of the Balochistan. They demanded that immediate steps should be taken early start of infrastructure projects. The meeting was attended by Syed Nasir Ali, Sher Muhammad Baloch, Nazir Boghio, Sardar Yusuf Khosa, Sardar Mansab Ali Dogar, Nausheen Saeed, Khawaja Sohail Mansoor, Shaukatullah Khan, Maulvi Agha Muhammad, Haji Roz Din, Sardar Israr Tarin, Maulvi Asmatullah, Mir Changaz Jamali, Usman Advocate, Abdul Qadir

Baloch, Dr Zil-e-Huma and Asia Nasir.

US announces special projects for Balochistan -- Daily Jang

US announces special projects for Balochistan

QUETTA: US Consul General to Karachi William J Martin on Monday announced the launch of special projects in Balochistan besides the opening of a US consulate in the provincial metropolis. He was addressing a ceremony held in connection with the 234th Independence Day of America at a local hotel in Quetta. The ceremony was attended by Balochistan Assembly Speaker Muhammad Aslam Bhootani, provincial ministers, MPAs and several journalists. Martin said the US was committed to working alongside Pakistan to help improve the country's health, education and energy sectors. "The US is mulling opening a consulate in Quetta," he added. He announced several new assistance programmes worth millions of dollars for Balochistan. Many of these projects will directly benefit the people of Balochistan, he added. He said, "During the meetings, the government and people have told us the most important need in the province is water. In addition to a national high-efficiency irrigation project that will include Balochistan, we are working with the provincial government to provide the people with potable water." He said, "The programme will enhance irrigation and distribution capacity, energy is also a concern in Balochistan. We already have a programme with the Quetta Electricity Supply Company to help them improve services to the public and reduce losses and increase efficiency." "The US geological survey will provide assistance in identifying natural gas resources in Balochistan and to further their development. We will also provide assistance to help the country improve its regulatory and fiscal regimes in order to attract more investment," he said. app

پاکستان دہشتگردوں کیخلاف جارحانہ کارروائیاں کر رہا ہے، سوات اور جنوبی وزیرستان**Urdu Point -- واضح ثبوت ہیں، امریکہ**

پاکستان دہشتگردوں کیخلاف جارحانہ کارروائیاں کر رہا ہے، سوات اور جنوبی وزیرستان واضح ثبوت ہیں، امریکہ:

واشنگٹن (اُردو پوائنٹ اخبار تازہ ترین۔ 27 جولائی۔ 2010ء) امریکی محکمہ خارجہ کے ترجمان فلپ جے کراؤلی نے کہا ہے کہ پاکستان اپنی سرحدوں کے اندر سرگرم دہشت گردوں کیخلاف جارحانہ اقدامات اٹھا رہا ہے اور سوات اور جنوبی وزیرستان میں فوجی آپریشنز اس بات کے واضح ثبوت ہیں، مشترکہ چیلنج سے نمٹنے کیلئے پاکستان کے ساتھ مل کر کام جاری رکھیں گے، افغان جنگ سے متعلق ویب سائٹ پر جاری خفیہ معلومات سالوں پرانی ہیں اور ان کے منظر عام پر آنے سے ملکی سلامتی کو دہشت گردی کے بارے میں ہمارے خدشات تبدیل نہیں ہونے، پاکستان بھارت کو دہشت گردی کیخلاف اپنے عزم پر قائل کر نے کیلئے مبینی حملوں کے ذمہ داروں کو انصاف کے کٹہرے میں لانے۔ گزشتہ روز یہاں معمول کی پریس بریفنگ کے دوران فلپ جے کراؤلی پر افغان جنگ سے متعلق جاری ہونے والی اہم خفیہ معلومات مبنی "ویکی لیکس" نے کہا کہ ہم ویب سائٹ رپورٹ کی مذمت کرتے ہیں حقیقت یہ ہے کہ بہت سے معاملات سے متعلق یہ معلومات سالوں پرانی ہیں تاہم ان معلومات کے اجراء کی تحقیقات کرنے کے ساتھ ساتھ اور ہماری سلامتی پر ان کے اثرات کاجائزہ بھی لیاجارہا ہے خفیہ معلومات کے اجراء کے کیا اثرات مرتب ہوں گے؟ فوری طور پر اس حوالے سے کچھ کہنا قبل از وقت ہوگا۔ انہوں نے کہا کہ القاعدہ اور دیگر دہشت گرد گروہوں کو شکست دینے کیلئے ہم پاکستان اور افغانستان کے ساتھ مل کر کام جاری رکھیں گے اور ان دونوں ممالک کو سولین اور فوجی دونوں شعبوں میں وسائل فراہم کرنے کیلئے پر عزم ہیں سولین امداد کے طور پر دہشت گردی کے خلاف صلاحیت بڑھانے میں ان کی مدد کرنے کے ساتھ ساتھ دونوں ممالک کے عوام کا اعتماد بھی حاصل کر رہے ہیں۔ انہوں نے کہا کہ ہم نے پاکستان اور افغانستان کے ساتھ اپنے تعلقات میں بنیادی تبدیلی کیلئے سخت جدوجہد کی ہے اور گزشتہ ہفتے وزیر خارجہ ہیلری کلنٹن کی پاکستانی اور افغان رہنماؤں کے ساتھ براہ راست اور تعمیری بات چیت کی ان تعلقات میں مثبت پیشرفت کی عکاسی ہے تاہم ان ملاقاتوں کے دوران ہیلری کلنٹن نے عوامی اور نجی طور پر دونوں ممالک کے ساتھ اپنے تحفظات اٹھاتے ہیں مثال کے طور پر انہوں نے پاکستان پر دہشت گرد گروہوں کے خلاف اسٹریٹجک تبدیلی جاری رکھنے اور انتہاء پسندوں گروہوں کی حمایت روکنے کو یقینی بنانے کی ضرورت پر زور دیا جبکہ افغانستان میں انہوں نے کریپشن کے خاتمے کی بات کی۔ ترجمان نے کہا کہ دہشت گردی مشترکہ چیلنج ہے اور ہم اس چیلنج سے نمٹنے کیلئے پاکستان اور افغانستان کے ساتھ مل کر کام کرتے رہیں گے۔ انہوں نے کہا کہ پاکستان افغانستان کے ساتھ نئے سرے سے تعلقات اور اس کے ساتھ مختلف قسم کے رابطے قائم کر رہا ہے اس حوالے سے دونوں ممالک کے درمیان ٹرانزٹ ٹریڈ معاہدہ بہت اہمیت رکھتا ہے یہ تاریخی معاہدہ نہ صرف پاکستان اور افغانستان بلکہ

خطے کے دوسرے ممالک کیلئے بھی نیک شگون ہے۔ انہوں نے کہا کہ پاکستان اور افغانستان کو اپنی سرحد کے دونوں اطراف دہشت گردی سے نمٹنے کیلئے مزید کام کرنے کی ضرورت ہے۔ فلپ جے کراولی نے کہا کہ پاکستان نے دہشت گردی کے خلاف اہم اقدامات اٹھائے ہیں سوات اور جنوبی وزیرستان میں فوجی کارروائیاں اس بات کی واضح دلیل ہیں کہ پاکستان یہ سمجھنے لگا ہے کہ اس کی سرحدوں کے اندر سرگرم دہشت گرد گروپس نہ صرف امریکہ اور افغانستان بلکہ خود اس کیلئے بھی خطرہ ہے چنانچہ دہشت گردی کے خلاف پاکستان کی پالیسی میں بنیادی تبدیلی آئی ہے جبکہ عسکریت پسندوں نے پاکستان کے اندر توجہ مرکوز رکھی ہوئی ہے وہ مارکیٹوں اور عام شہریوں کو نشانہ بنارہے ہیں اور دہشت گردی کے خلاف ■ سرکاری عمارات ■ مساجد پاکستان کی پالیسی میں بنیادی تبدیلی کا ثبوت عسکریت پسندوں کی ایسی کارروائیاں ہیں جو ایک چیلنج بھی ہیں اور پاکستانی حکومت اور فوج اس چیلنج سے نمٹ رہی ہے دہشت گردی کا معاملہ ہمارے لئے بھی تشویش کا باعث ہے اور اس سلسلے میں ہم پاکستان اور افغانستان کی مدد جاری رکھیں گے۔ انہوں نے کہا کہ پاکستانی قیادت دہشت گردوں اور ان کی محفوظ پناہ گاہوں کو جڑ سے اکھاڑ پھینکنے کیلئے پر عزم ہے اور وہ ایسا کر بھی رہی ہے۔ محکمہ خارجہ کے ترجمان نے کہا کہ اگرچہ امریکہ نے پاکستان کو دہشت گردی کے خلاف بڑے پیمانے پر فوجی امداد دی ہے لیکن حقیقت یہ ہے کہ پاکستان اپنے تحفظ کیلئے نہ صرف اپنا لہو بلکہ خزانہ بھی لگا رہا ہے۔ انہوں نے کہا کہ پاکستان، بھارت اور افغانستان کے ساتھ ہمارے تعلقات میں اہم عنصر دہشت گردی سے ہے بھارت بھی واضح طور پر چاہتا ہے کہ پاکستان ان عناصر کو انصاف کے کٹہرے میں لائے جو پڑوسی ممالک کیلئے خطرہ ہیں ہم نے کئی مرتبہ کہا ہے کہ اگر پاکستان دہشت گردی کیخلاف اپنے عزم پر بھارت قائل کرنا چاہتا ہے تو وہ ممبئی حملوں کے ذمہ داروں کو انصاف کے کٹہرے میں لائے جو اس حوالے سے تعمیری اور اہم قدم ہوگا۔

Pakistan, China can jointly tap huge ship market in Gulf -- Pakistan News

Pakistan, China can jointly tap huge ship market in Gulf
Wed, Jul 28, 2010

World

Pakistan's Karachi Shipyard hopes to deepen cooperation with the Chinese shipbuilding industry to facilitate China's international trade and further explore the huge market in the Gulf, said Managing Director Vice Admiral Iftikhar Rao. "We hope to establish a long-term and permanent relationship with China and close partnership at various levels," the China Daily quoted Admiral Rao.

He pointed out that the cheap labor force in Pakistan, the long time friendship between the two countries, and the shipyard's favorable geographical location mean that cooperation with China can make full use of the market potential in the Gulf, an important oil route.

The shipyard, which includes commercial and military sectors, can provide a wide range of services, such as logistics supply, maintenance and repair. It will be a win-win situation for Pakistan and China, the director said.

The shipyard has recently signed a contract with China Shipbuilding & Offshore Company (CSOC) for construction of 500 T Fast Attack Craft for the Pakistan Navy.

There are 55 Chinese ship engineers now working and residing at the shipyard, and they receive the best security protection, according to Rao.

"We are currently building a new accommodation building for Chinese workers, and we are very satisfied with their performance." The new building is expected to be completed by April next year.

Build Pakistan, Don't Buy Pakistan -- America

Build Pakistan, Don't Buy Pakistan

On her recent trip to Pakistan, Secretary of State Hillary Clinton unveiled over \$500 million in civilian projects as part of the \$7.5 billion aid package the U.S. has promised Pakistan over the next five years. The purpose, according to Secretary Clinton, is to leave behind an era of mistrust and launch a new period of cooperation. Is there evidence that this will work?

Let's look at the figures. From 2001 to 2009, Pakistan received over \$11 billion in aid. The result? A whopping 68% of Pakistanis have an "unfavorable" view of the United States. This is not to say that aid to Pakistan has no benefits, indeed aid projects should continue to play a part in a comprehensive solution. However, if the past 9 years has taught the U.S. anything, it is that throwing money alone at the problem won't solve it.

What else can the U.S. do? Push for closer trade ties with Pakistan. The U.S. is already Pakistan's single largest trading partner and effective trade legislation will therefore help build Pakistan's domestic industry, create employment opportunities, and provide sustainable development. It will also demonstrate to Pakistanis that the U.S. is serious about its long-term engagement with Pakistan and the region.

Unfortunately, not only has the administration done very little on this front, but its only initiative is simply off the mark. The current legislation pending before Congress seeks to create trade preference zones in Pakistan's conflict ridden and destitute Federally Administrated Tribal Areas (FATA). Ideally, it would create legitimate jobs and long-term prosperity in a region widely regarded as an al-Qa`ida safehaven. It is a noble idea, but is flawed for three critical reasons.

First, this bill aims to spur textile and apparel production in FATA. Strangely, however, it excludes critical products from this duty-free eligibility, namely cotton knit tops and cotton trousers, which make up 25% of the total value of U.S. imports from Pakistan. As the Association of Textile Importers points out, excluding these products is an obvious disincentive for new investment in apparel in Pakistan's border regions.

Second, Pakistan is able to compete against China in the textile-processing arena due to its quick turnaround time on orders and not because of lower costs. Not only is the FATA region geographically isolated from ports and the cotton producing regions of Pakistan, but it also lacks secure rail or road links to the rest of the country. Simply put, apparel produced in the ROZ would cost more and take longer to arrive at the intended destination--eliminating Pakistan's comparative advantage. And third, prior experience with special economic zones has demonstrated that governments consistently need to provide higher levels of infrastructure and security than the domestic norm in order attract foreign investors. Given that the FATA region remains embroiled in conflict and any further expenditure in the region would strain an already fragile government budget, the prospects for a successful ROZ are limited.

Congress must rethink this legislation to ensure that it has real benefits for the Pakistani population.

First, trade benefits should build on existing capacities and not create new industries. FATA boasts vast, untapped mineral resources including marble and semi-precious stones whose extraction is limited due to a lack of equipment, infrastructure and investment. However, despite these challenges and constant violence, there is a committed group of entrepreneurs who have continued their business operations in this arena. Focusing trade preferences on products indigenous to FATA would bring more sustainable employment opportunities as well as direct economic benefits to the region.

Second, the U.S. government should make a concerted effort to pair aid programs with trade preference programs. For example, the State Department recently announced a \$2 million grant to provide modern machinery for marble mining in some parts of FATA. Aid which is targeted at entrepreneurs and developing the private sector would help complement the trade benefits and would enable FATA to develop a business sector that is competitive on national and international levels. Finally, the U.S. should cut tariffs on top Pakistani textile exports. As of now, the average tariff rate on the top ten Pakistani exports to the US is 11%--an obscenely high figure for a country which continues to spend its money and shed its blood in the war on terror. Cutting tariffs will increase Pakistan's competitiveness, create jobs, reduce instability, and have a positive effect on perceptions of the U.S. in

Pakistan.

If Secretary Clinton is serious about resetting America's relationship with Pakistan, it is imperative that the administration uses all the tools at its disposal. Simply throwing more money at the problem will not solve the critical issues facing Pakistan. As a Pakistani trade advisor said recently to an American audience: "We are not interested in aid; we are interested in trade."

China carries Benazir Bhutto's dream – by Antoaneta Becker -- Asia Times

China carries Benazir Bhutto's dream – by Antoaneta Becker

Source: Asia Times

BEIJING – When President Asif Ali Zardari appeared at a Pakistan-China renewable energy forum in Shanghai on July 10, he rekindled a vision of his assassinated wife and former prime minister, Benazir Bhutto, who had envisaged gas pipelines, railway tracks and highways connecting China and Pakistan. Zardari said that he, as the first businessman president of Pakistan, was going to work to make that dream a reality.

Zardari's five-day trip to China, his fifth since coming to power in 2008, was deemed so successful by Chinese and wary Indian observers that Beijing felt the need to defend its growing investment and trade links with Pakistan.

"New Delhi does not need to fidget each time it sees signs of intimacy between Beijing and Islamabad," said a commentary in the China Daily, the state-run English-language newspaper. "Instead, it should look to the larger picture of the India-China relationship and deepen its political trust with Beijing."

Chinese analysts have noted that New Delhi dispatched National Security Adviser Shiv Shankar Menon, a man from a family of diplomats with Chinese links, just a day before the president of Pakistan arrived in Beijing.

"Sending Menon, whom we regard as an 'old China friend', means that New Delhi was hoping to achieve as much as possible," Han Hua, a South Asia expert at Beijing University, told the 21st Century Business Herald newspaper. "India has all along been very uneasy about Pakistan and China exchanges in the nuclear energy field."

Yet the prospect of expanded nuclear cooperation between China and India's arch-rival is only one of the factors to have caused disquiet in New Delhi this time.

Zardari and Chinese leaders reportedly discussed investment opportunities in numerous sectors, including port development, hydropower, roads, railways, mining and others.

Zardari said in Beijing that Pakistan could be a "force multiplier" for China's development. "We want to learn and recreate your success," he stated.

As the United States and European Union hesitate over allowing trade concessions to Pakistan, China has moved aggressively, promising liberalization of trade and offering soft loans along with investment. Beijing is quickly becoming Pakistan's main trading partner and has ambitions of doubling bilateral trade from the current annual US\$7 billion to \$15 billion in the next couple of years.

"The US sees India as a counterweight to contain Chinese influence, while China wants Pakistan to emerge as a power to counter India's ambitions for regional hegemony," says Syed Fazl-e-Haider, a development analyst in Pakistan. "Whether it is the issue of transferring nuclear technology or Iran gas pipeline project, China has always supported Pakistan against US and India."

To Indian observers, the prospect of snowballing Chinese investment and an increased Chinese presence in Pakistan reinforces a suspicion that China is using soft power and cash to embed itself on India's borders.

China is already the biggest investor and the largest aid donor in terms of commitment in Sri Lanka. There, as in Pakistan, China has challenged traditional trade partners like the EU and the United States, choosing not to ask questions or impose conditions over human rights and labor concerns.

In Chinese eyes, both countries provide ready markets for Chinese consumer goods, services and labor. As Beijing tries to rebalance the country's economy moving away from being dependent on exports to recession-hit markets like the United States and the EU, developing countries in the region are becoming more important by the day.

These countries are also seen as launchpads for China's ambitions in strategic

industries like the nuclear sector and railway infrastructure. China's aspirations of becoming a global player in the nuclear energy sector have underpinned Beijing's decision to deploy nuclear know-how and investment to energy-starved Pakistan. Indian concerns are not likely to stand in the way of agreements between Islamabad and Beijing to proceed with plans to add another two nuclear reactors to Pakistan's modest fleet of modern reactors, Chashma 1 and Chashma 2, also designed and built with China's help in the province of Punjab.

Although China is a member of the Nuclear Suppliers' Group (NSG) and thus subject to rules that forbid the sale and export of nuclear technology to Pakistan, Beijing has insisted that the new deal is an "extension" of the old cooperation over Chashma 1 and Chashma 2, which has been under safeguards of the International Atomic Energy Agency.

Chinese leaders can argue they have their own domestic reasons for pursuing accelerated economic development in the region. Beijing has just announced a new multi-billion US dollar investment package to boost the development of its laggard western regions. The decision comes in the wake of violent unrest in the restive minority areas.

The \$100 billion package includes railways, roads, airports and hydropower projects and shows Beijing is intent on pursuing stability by infrastructure investment in both Buddhist Tibet and Muslim Xinjiang.

Kashgar – the southern hub of Xinjiang – long eclipsed by the more developed and resource-rich cities in the region's north, is being given a new lease of life as an important center to spread China's influence in Central and South Asia.

Among the projects discussed between Beijing and Islamabad is a proposed railway to link Kashgar to the southern Pakistan port of Gwadar. If realized, it would give China direct access to the Arabian Sea and provide an alternative route should a naval blockade cut oil supplies from the Middle East. The problem for Beijing is that the proposed line is to pass through Gilgit-Baltistan – an area seen by both India and Pakistan as part of the larger Jammu and Kashmir issue, which has not yet been resolved.

"All Chinese plans for gaining access to resource-rich Central Asia and building energy pipelines pass through Gilgit-Baltistan," said Syed. "Gilgit, the northern areas capital, has acquired the status of gateway to Central Asia after Pakistan-China barter trade agreement and accords with Central Asian States."

It is easy to read China's actions as intent on infuriating India, but Gao Heng, researcher with the Institute of World Economics and Politics of the Chinese Academy of Social Sciences (CASS), said this is misleading.

"One should not view everything China does in the region through ideology or geopolitics," he says. "A lot is driven by the market. The country's national interests are those that dictate the direction of China's relations with countries in South Asia." Military aid to Pakistan not a threat to India: US -- PTI

Military aid to Pakistan not a threat to India: US

Published: Wednesday, Jul 28, 2010, 15:26 IST

Place: Washington, DC | Agency: PTI

Washington, DC: Days after India voiced concern over the misuse of the massive US military aid by Pakistan, the Obama administration has said that the security assistance to Islamabad, including the supply of sophisticated F-16 jets, should not be seen as a threat to New Delhi.

"In giving military assistance to Pakistan, we have systems of accountability to be sure that it is being employed in accordance with the agreements that we have with Pakistan," state department spokesman PJ Crowley said at his daily news briefing last evening.

"Where we have questions about the nature of Pakistani employment of US assistance, we raise those questions directly with the Pakistani government. We have in the past and we will continue to do that," he said.

So, building up the capability of Pakistan to deal with the threat within its own

borders "should not be seen as a threat to India," Crowley said.

He argued that a stable Pakistan is not a threat to India and a stable India does not need to be a threat to Pakistan.

His remarks came five days after India expressed concern over the misuse of US military aid by Pakistan and asked America to set up a monitoring mechanism as a remedial measure.

During the visit of US joint chiefs of staff committee chairman Admiral Mike Mullen to New Delhi on July 23, defence minister AK Antony told him about India's worries that Pakistan was diverting the American military assistance to building capacities against India.

Antony said that the arms aid to Pakistan, worth billions of dollars annually, was "disproportionate to the war on terror" for which it was intended and the US should ensure it was used only for the purpose meant for.

Pakistan has also recently acquired sophisticated air-to-air missiles from the US for its newly inducted F-16 fighter jets.

Crowley also strongly recommended Indo-Pak peace talks, while underlining that Islamabad should address New Delhi's concern with regard to 26/11.

"It is important for Pakistan and India to have a stable relationship. They, likewise, will have to have a relationship going forward, and if it is stable, then the world, including the US, benefits,"

Responding to a question, Crowley said that there are concerns about making sure that Pakistan bring to justice those responsible for the Mumbai attacks.

"We've had that conversation with Pakistan and India many, many times. Our concerns about elements within Pakistan and connections that those elements have with the Pakistani government, we've had that conversation with Pakistan many times," he said.

Pakistan Could Bid for BP Assets -- Singapore

Pakistan Could Bid for BP Assets

SINGAPORE—Pakistan's government could make a bid for BP PLC's assets in the country if the oil major decides to sell them as part of its global campaign to raise money to clean up the Gulf of Mexico oil spill and pay for damages, the head of the country's upstream regulator said Friday.

The U.K. oil company, which has spent about \$4 billion on the spill and has agreed to pay \$20 billion for a cleanup and compensation fund, has informally told the government of Pakistan of a possible sale of its assets in the country, but has yet to seek a formal approval from the government, Naeem Malik, head of the Directorate-General of Petroleum Concessions, told Dow Jones Newswires.

BP, which has a substantial presence in Pakistan's oil and gas sector including budding offshore exploration, has yet to decide whether it wants to sell its stakes in individual assets or the entire business as a whole, Mr. Malik said.

"Instead of these assets going to others, we think, 'why not the government or our public sector companies buy them?' Of course, we have to see the financial costs first."

It isn't clear what BP's business in the country is worth. The company produces about 250 million cubic feet of gas a day and 14,000 barrels a day of crude oil. The government could buy BP's assets via its state-run oil companies, Mr. Malik said.

BP earlier agreed to sell its oil and gas assets in North America and Egypt for \$7 billion to Apache Corp., and had decided to sell its stake in the Argentine unit Pan American Energy, which could be worth \$9 billion, and is also in talks with Bridas Corp., Dow Jones Newswires said Friday.

Mr. Malik said the oil ministry would take up the proposal to acquire the company's assets if and when BP decides to seek formal approval. The completion of negotiations and final sale could take as long as a year.

"The government of Pakistan can exercise its pre-emptive right to buy out BP's interests, but we have to see how much are they asking. They told us about the possible asset sale only a few days ago, so it will still take us some time to start due diligence."

Mr. Malik said the government would prefer for a prominent oil major like BP to stay invested in the country but understands that the company is going through a difficult phase and has expressed its intentions to evaluate its option to sell the assets.

UK 'not to turn its back on Pakistan' -- The News
UK 'not to turn its back on Pakistan'

Friday, July 30, 2010
By Our correspondent
Islamabad

British High Commissioner to Pakistan, Adam Thomson, who joined Youth Parliament here on the first regular session after the tragedy of the death of 6 Members of Youth Parliament, offered his condolences and observed a minute of silence on the sad and tragic death of Members Youth Parliament (MYPs).

"UK will never turn its back on Pakistan," said Thomson while addressing the Youth Parliament on the topic of UK's Foreign Policy towards Pakistan. "Pakistan has lost more soldiers in the fight against militancy than Britain has lost in many wars and the sacrifices Pakistani citizens are huge," he said.

British High Commissioner, who discussed in detail the support UK has committed to provide to Pakistan, despite cuts in every government department back home, said that education, population and democracy are three key areas that youth of Pakistan may like to focus on. He said that the societal discourse on these three key areas needs to be accelerated.

"UK's policy towards Pakistan has to focus on Youth, as Pakistan is a very young country in terms of demographics. This is both a unique opportunity and a challenge for Pakistan as well," he said adding that democracy in Pakistan will succeed only when one democratically elected government precedes another. Thomson said that UK's policy towards Pakistan focuses on trade, youth, education, and skills building.

Answering a question about what is the role UK is playing in resolving Kashmir and the water disputes, he said that Britain wishes to see friendly relations between Pakistan and India, but the issues between the two nations need to be resolved between the two. He believed that while Pakistanis look for ways to resolve water issues, water conservation should also be one of the major strategies adopted.

Govt gears up for market access to EU, US: commerce secretary -- APP
Govt gears up for market access to EU, US: commerce secretary
Staff Report

KARACHI: Ministry of Commerce (MoC) has actively taken up the issue of market access to EU and US markets by negotiating the bilateral trade agreements with them.

"There is a ready market of our products in these two regions especially for the textile goods, whose market access is of prime importance," said the Secretary Ministry of commerce, Zafar Mahmood, during a visit to All Pakistan Textile Mills Association (APTMA), Karachi on Friday.

Secretary Commerce informed the meeting that a delegation of textile importers from United States is expected to visit Pakistan in September-October, 2010, and said that China is considering facilitating Pakistan by providing concession in exports as well as concessionary arrangements for participating in a number of exhibitions taking place over there.

In reply to a query, he said that he strongly believes in free market mechanism and advocated against any ban or restriction on a sub sector of a value chain as it is against the rules of WTO Agreement.

Earlier, Chairman APTMA, Shahzad Ahmed, commended Secretary Commerce for his efforts in helping APTMA to achieve the restoration of the free market mechanism in the textile trade and has allowed the regulatory duty on yarn exports to lapse. He informed Secretary Commerce that the industry has to import about 3.5 million bales i.e. 25 percent of our consumption but have never demanded any ban

or restriction on export of cotton.

Shahzad Ahmed informed Secretary Commerce that APTMA, on various occasions, has pointed out that the spinning industry has a serious shortage of both its primary raw materials - cotton and polyester, and as a result a number of trade restrictions have been imposed on PSF, usage of synthetic fibre is only 18 percent of Pakistan's raw material mix as compared to 60 percent prevalent in the world.

He said that currently, there is a serious tariff anomaly whereby PSF blended yarn has 0 percent import duty but the import of PSF as raw material is subjected to a punitive regime of 6.0 percent import duty. Due to closure of Dewan Salman Fiber's, difference between local Pakistani PSF and international PSF prices has ballooned to a staggering figure of almost 30 percent, making our exports uncompetitive.

He appealed to the Government that if Pakistan has to reach an export target of \$25 billion by 2014 all restrictions and tariffs on import of raw materials of limited availability in Pakistan have to be removed and also to allow import of PSF from India to meet its shortage through all entry points including Wagha and Khokhrapar etc.

The meeting was also attend by Chairman APTMA Sindh Balochistan Region, M Yasin Siddik, Former Chairman APTMA, Nadeem Maqbool, and others, including, Nadeem Abdullah, Imran Maqbool, Zahid Mazhar Puri.

ICBC to open branches in Pakistan -- The News

ICBC to open branches in Pakistan

ISLAMABAD: Industrial and Commercial Bank of China (ICBC), the largest Bank in the world, would soon open its branches in Pakistan and acquire equities in Pakistani banks to pave the way for increased trade and investment ties between the two countries.

Prime Minister, Yousaf Raza Gilani, has called for joint concerted efforts to make the economic relations between Pakistan and China commensurating with the level of political ties between the two sides. The Prime Minister expressed hope that Industrial and Commercial Bank of China (ICBC) would soon open its branches in Pakistan. The Prime Minister was talking to Madam Lili Wang, Senior Executive Vice President of the ICBC who called on him at the Prime Minister's Secretariat, this morning.

The Prime Minister underlined that while bilateral ties had flourished in multi-faceted fields, cooperation in finance and banking sectors needs to be focused upon in larger interest of long-term strong economic relations between Pakistan and China.

The Prime Minister expressed the hope that meetings of Senior Executive Vice President of ICBC, during her visit to Pakistan, with the Governor, State Bank and other concerned senior officials would be constructive and fruitful in making progress on both these counts.

Madam Lili Wang commended the Government of Pakistan for making progress in the economic sector despite enormous challenges that it is faced with and noted that Pakistan had registered GDP growth of more than four percent in the first six months of 2010. She also expressed satisfaction over the volume of bilateral trade between the two sides, which had crossed \$4 billion mark in the same period and was likely to touch \$10 billion by the end of this year. She assured the Prime Minister of her bank's proactive efforts to expedite the process for opening its branches in Pakistan and for considering equity participation in Pakistan's Finance and Banking Sectors. staff report

ICCI welcomes 10-year 'energy plan' -- APP

ICCI welcomes 10-year 'energy plan'

ISLAMABAD: Business community on Friday welcomed the government's ten-year energy roadmap - unveiled by the Prime Minister Yousaf Raza Gilani while

inaugurating 225 megawatts (MW) orient power plant at Balloki recently. In a meeting at Islamabad Chamber of Commerce and Industry (ICCI), business community termed it as a positive initiative that has given a ray of hope for a better energy future.

They said it envisages doubling the country's power generation capacity with a minimum addition of 20,000 MW by 2020.

The rising energy crisis has badly affected almost all sectors of the economy. Therefore, top most priority should be given to improving this area and to save the economy from further damage.

Chairing the meeting, President ICCI, Zahid Maqbool said that the unveiled energy roadmap is certainly an ambitious plan. He urged the government to ensure high-level of implementation capacity and the required funding to turn it into a reality.

He said on assuming power, the present government has shown great resolve to take urgent measures to overcome energy crisis. app

Warehouse facility in SA for Pakistan's products: HC -- APP

Warehouse facility in SA for Pakistan's products: HC

Lahore—High Commission of Pakistan in South Africa has decided to set up warehouse facility in South Africa to show-case Pakistan's products. Zaighamuddin Azam, High Commissioner of Pakistan, stated this while addressing a ceremony held for visiting Pakistani delegation of 39 businessmen representing 22 companies.

The delegation participated in SAITEX exhibition held at Gallagher Estate, Midrand, South Africa. The exhibition was organized by Trade Development Authority of Pakistan (TDAP) in collaboration with the High Commission of Pakistan. According to a hand out, the reception was attended by South African business community, Pakistani exhibitors, officers of the High Commission Pakistan and the city elite.

Zaighamuddin emphasized that South Africa is an emerging global economic hub with a lot of potential for Pakistani goods. "Pakistani exporters, with their quality products, can act as powerful diplomats of Pakistan", he added. Dr. Moinuddin Wani, Commercial Secretary, Trade Commission of Pakistan informed about the areas in which the two countries can enhance bilateral trade and investment.

He apprised the South African businessmen about the vast potential and range of opportunities that South African entrepreneurs can benefit from Pakistani terms of trade, and the areas where Pakistan can utilize the expertise of South African businessmen through FDI. He also highlighted the keen interest of Pakistani businessmen to develop trade relationship with their South African counterparts. Which is depicted by the fifth visit of Pakistani businessmen to South Africa in 2010 despite difficult times in the world economy. The Pakistani exhibitors included businessmen from different sectors including textiles, garments, sports & leather goods, handicrafts, stationery, kitchen-ware, carpets, jewellery and confectioneries. It may be added here that SAITEX exhibition has traditionally been the only multi-sectoral trade fair of its size and kind in the African Continent which annually hosts hundreds of exhibitors who showcase products, technologies and opportunities from all over the world. Thousands of visitors and prospective buyers visited Pakistani stalls and showed keen interest in Pakistan products. First two days of the exhibition were restricted to buyers from different trading sectors whereas on the last day, the exhibition was opened to general public, stated the hand out.—APP

امریکہ نے کرزئی کا مطالبہ مسترد کر دیا“ اپنی فوجیں پاکستان میں داخل نہیں کریں گے“ واشنگٹن (اے این این) امریکی محکمہ خارجہ کے ترجمان فلپ جے کراوولی نے پاکستان میں دہشت گردوں کی پناہ گاہوں پر حملے کے متعلق افغان صدر کرزئی کا مطالبہ مسترد کرتے ہوئے کہا ہے کہ پاک فوج دہشت گردی کیخلاف موثر کارروائی کر رہی ہے۔ انہوں نے کہا کہ پاکستان کے ساتھ تعلقات میں اعتماد کا فقدان دور کرنے کے لئے کوششیں جاری ہیں تاہم یہ کام راتوں رات ممکن نہیں۔ وزیر خارجہ ہلیری کلنٹن نے اپنے حالیہ دورے کے دوران پاکستان کے لئے توانائی، صحت اور تعلیم سمیت متعدد منصوبوں کا اعلان کیا اور توقع ہے کہ اس کے مفید نتائج برآمد ہوں گے۔ گزشتہ روز واشنگٹن میں معمول کی پریس بریفنگ کے دوران امریکی تحقیقاتی ادارے پیوریسرچ کے حالیہ سروے کے مطابق پاکستانی عوام کی اکثریت امریکہ کو اپنا دشمن سمجھتی ہے کے حوالے سے ترجمان نے کہا کہ انہوں نے اس سروے کو نہیں دیکھا۔ انہوں نے کہا کہ وزیر خارجہ ہلیری کلنٹن کے حالیہ اور گزشتہ اکتوبر کے دورہ پاکستان کے دوران محسوس کیا گیا تھا کہ ہمارے باہمی تعلقات میں اعتماد کا فقدان پایا جاتا ہے اور پاکستان میں یہ سمجھا جا رہا ہے کہ امریکہ اور عالمی برادری انہیں بیس سال پہلے کی طرح پھر چھوڑ جائے گی۔ حالیہ مہینوں میں ہم نے اس اعتماد کے فقدان کو دور کرنے کے لئے سخت جدوجہد کی ہے۔ انہوں نے کہا کہ ہم نہ صرف پاکستانی حکومت بلکہ عوام کے ساتھ براہ راست رابطے کرنے کی کوششیں کر رہے ہیں تاکہ انہیں بتایا جاسکے کہ امریکہ پاکستان کے مستقبل کے حوالے سے پرعزم ہے۔ انہوں نے کہا کہ پاکستانی عوام امریکہ اور پاکستان کی شراکت داری کا ٹھکانہ دیکھنا چاہتے ہیں جس پر حیرانگی نہیں ہونی چاہیے۔ ہم سمجھتے ہیں کہ پاکستان امریکہ طویل المدتی شراکت داری ناگزیر ہے۔ انہوں نے کہا کہ امریکہ پاکستان میں اپنے فوجی دستے نہیں بھیجے گا۔ کراوولی نے کہا کہ ہم دہشت گردوں کی محفوظ پناہ گاہوں کے خاتمے کے لئے پاکستان کے ساتھ مل کر کام کر رہے ہیں انہوں نے کہا کہ پاک فوج نے دہشت گردوں کے خلاف موثر کارروائی کر رہی ہے جس کا اندازہ سوات اور جنوبی وزیرستان کے فوجی آپریشنز سے لگایا جاسکتا ہے۔ انہوں نے کہا کہ پاکستان اور بھارت کے درمیان امن بات چیت امریکہ کے بھی مفاد میں ہے اس لئے ہم دونوں ممالک کو مذاکرات کی ترغیب دیتے رہیں گے۔ ترجمان نے کہا کہ پاکستانی خفیہ ایجنسی کے طالبان کے ساتھ روابط پرانے اور سویت دور سے ہیں اس سلسلے میں بھارت کی تشویش نئی بات نہیں ہے۔ انہوں نے امید ظاہر کی کہ سعودی فرمان رواں شاہ عبداللہ اور شام کے صدر بشار الاسد کی ملاقات میں مشرق وسطیٰ میں قیام امن کے لیے فلسطین اسرائیل مذاکرات کی حمایت کی جائے گی۔

Pakistan coal deposit richer than ME oil reserves -- APP

Pakistan coal deposit richer than ME oil reserves

Published: July 31, 2010

ISLAMABAD (APP) - Member Science and Technology of Planning Commission of Pakistan Dr Samar Mubarakmand said Friday that the magnitude of Pakistan's coal deposit is several times more than total oil reserves of Saudi Arabia, UAE, Iran and Iraq. "We can generate 100 million barrels of diesel and 30,000 MW of electricity from our coal deposits for 500 years," he said addressing the participants of 21st Convocation of National University of Computer and Emerging Sciences, (FAST-NU) here.

"The country endowed with the second largest deposit of coal in the world at Tharparkar, confirmed deposit of copper and Gold at Reko-Diq valued at 1.2 trillion dollars and third biggest asset of the country is extremely intelligent and well trained human resource" he said. He said power to be generated from coal will cost 4 cents per unit, make industry produce cheap output for exports, cheap fertilizer and power for agriculture to make country's oil bill zero.

Power stations based on underground coal gas in Uzbekistan (Angren), Italy (Sardinia), Australia (Chinchilla) are generating electricity costing 3.5 to 5 cents.

"We have been mining copper and gold in Saindak since 2001. The deposits at Reko Diq are 40 times larger.", he added.

Mubarakmand said the youthful human resource of the country needs to appreciate its role in the development of these extremely valuable resources of the country.

President Zardari to discuss economy in Paris -- APP

President Zardari to discuss economy in Paris

PARIS, Aug 1 (APP): President Asif Ali Zardari is arriving here on Sunday on a three-day visit to discuss a deeper and broader bilateral political, economic and defence relationship with French leaders, besides ways to jointly fighting terrorism. "The visit will provide an opportunity to address the issues relating to security and the fight against terrorism, the regional situation, as well as our economic cooperation," French Ministry of Foreign Affairs said in a statement.

President Zardari, who last visited France in May 2009 will review the progress made so far and will discuss ways to have a long term strategic relationship with France that occupies an important place in the 27-member European Union, when he meets French President Nicholas Sarkozy and Foreign Minister Bernard Kouchner.

The statement by the French Foreign Office said France would like to strengthen its bilateral relationship with Pakistan "which is of key importance given the challenges associated with it, and wants to develop cooperation in many areas," as has been reflected by the number of high-level meetings between the French and Pakistani authorities.

France which is lending its support to Pakistan in the water and energy sectors and has pledged to implement projects worth 300 million Euros over three years will be implementing new projects in 2010 and 2011.

The French Ministry also announced that the visit of President Asif Ali Zardari will be followed by the official visit to Paris by Prime Minister Yusuf Raza Gilani in October.

Pakistan will be urging France, that is an important member of P-5, G-8, to support its bid for greater access to the EU markets.

, to compensate it for the heavy losses that the country has to bear owing to its front-state role in the war against terror and to lure away those on the fringes of extremism, by providing them better health, education and economic opportunities.

President Zardari will also apprise his counterpart about the ongoing operations against the militants in its tribal belt along the border with Afghanistan.

President Zardari will also discuss ways to raise the level of bilateral trade that hovers around US \$ 1.1 billion during 2009 and will be urging increased interaction between the private sectors for the mutual benefit of the two peoples.

Cooperation in the energy sector will also be high on agenda as Pakistan continues to face a shortfall of around 2000 MW to 4000 MW, that is negatively impacting its industrial and agriculture sectors.

The two countries also have a history in defence cooperation, including exchange and transfer of expertise related to the counter-insurgency.

France that has been supportive of the democratic dispensation in Pakistan, has also extended full cooperation to Pakistan in helping it fight the scourge of terrorism.

Pakistan eyes \$10b Chinese investment -- APP

Pakistan eyes \$10b Chinese investment

Staff Reporter

Islamabad—Government is expecting \$10 billion Chinese investment to ease its ongoing energy crunch. According to plans unveiled by a dozen Chinese power-related companies, the proposed investment in energy generation, ranging from hydro to nuclear and wind power, can surpass this amount. In addition, other Chinese companies have indicated investing in projects varying from highways to housing. Boosting Pakistan-China trade is yet another area, agreed between the Chinese leadership and President Asif Ali Zardari during his recent visit to China.

Two highways are to be built in Pakistan's Gilgit-Baltistan area, including 165 kilometre long Skardu-Jaglot, and 135-kilometre long Thakot-Sazin. Out of the total cost of Rs45 billion, or \$530 million of two highways, China will provide 85 and Pakistan 15 per cent.

The Presidents and CEOs of a dozen leading corporations specialising in defence production, petroleum, banking, industrial units, construction, civilian nuclear cooperation, agriculture, health, energy, mining, petroleum, and telecommunications discussed their investment plans with Mr Zardari.

The business leaders showed interest in investing in these other sectors. Pakistan plans to launch a mega housing project to build high-rise apartments in all cities for government employees. These will be joint project between consortia of Chinese and Pakistani private companies. The government will provide land and some essential inputs. The Corporations which participated in the discussions

included:

EXIM Bank of China,
The Three Gorges Dam Project Corporation,
China Northern Railways Corporation,
China Northern Industries Corporation,
China Petrochemical Corporation,
Sinotruk,
Tebian Electric & Apparatus Stock Co.,
Sinohydro Corporation,
and Industrial & Commercial Bank of China.

A Chinese company plans to generate 500 megawatts of wind power. It will set wind turbines along the coastal areas of the southern Sindh province, alongside the Arabian Sea. It will cost \$1 billion.

Chinese Prime Minister Wen Jiabao said China attaches a great importance to its trade with Pakistan which not only benefits the people of the two countries but also had a strategic significance.

The Chinese Minister for Trade estimates, the present two-way volume of trade with Pakistan can be doubled to \$15 billion by 2015, under FTA and other plans. President Hu Jintao said China has become Pakistan's second largest trading partner.

Pakistan is keen on a "serious and substantive engagement" with France in civil nuclear cooperation, President Asif Ali Zardari said on Tuesday. Zardari, currently on an official visit to France, made the remarks during a meeting with his French counterpart Nicolas Sarkozy, an official statement said.

Zardari also called for the early establishment of a framework for a strategic dialogue between the two sides.

Pakistan has stepped up efforts to gain access to civil nuclear technology since its rival India concluded a landmark deal with the US a few years ago.

It has urged the world community to adopt a "non-discriminatory" approach in civil nuclear cooperation.

Zardari is on his second visit to France in 14 months and had raised the issue of civil nuclear cooperation during his last visit too.

During his talks with Sarkozy, Zardari sought the establishment of a ministerial-level Joint Economic Commission, aggressive support for preferential access to EU markets and parliamentary exchanges to deepen political understanding between the two countries.

The President also called for "massive international assistance" to help Pakistan cope with the situation arising out of floods that had washed away hundreds of villages and killed hundreds of people in Khyber-Pakhtunkhwa province.

Presidential spokesman Farhatullah Babar quoted Zardari as saying that Pakistan attached great importance to ongoing defence cooperation with France, including the upgrade of Agosta submarines.

Zardari also stressed the need to further strengthen defence cooperation between the two countries.

Referring to Pakistan's campaign against militancy, Zardari said his government "had built political consensus and given ownership to the war against terror" even as the country paid a "huge cost in terms of human and material losses".

It was "unfortunate if some people continued to express doubts and misgivings about our will and determination to fight the militants to the finish", he said.

"Such misgivings will only undermine the international effort against militants and extremists," he said.

Pakistan's efforts and contributions have not been matched by international support, he added.

The meeting was also attended by Zardari's son and Pakistan People's Party chairman Bilawal Bhutto Zardari, Defence Minister Chaudhry Ahmad Mukhtar and Foreign Secretary Salman Bashir.

Zardari will meet Foreign Minister Bernard Kouchner tomorrow before leaving France on Tuesday evening for a four-day visit to Britain, during which he will meet Prime Minister David Cameron.

Pakistan has bigger nuke arsenal than India: Report -- IND

Pakistan has bigger nuke arsenal than India: Report

2010-08-02 20:00:00

Racing to beat India in the nuclear race, Pakistan has already stockpiled more nuclear warheads than India and has produced enough fissile material to double its nuclear arsenal, according to a new report.

While India is estimated to have assembled 60-80 warheads and produced enough fissile material for 60-105 nuclear warheads, Pakistan is estimated to have assembled 70-90 warheads and produced fissile material for as many as 90

warheads, it says.

The disclosures posing a new headache for New Delhi are made in a report on 'Global Nuclear Weapons Inventories, 1945-2010' by top US nuclear experts and researchers Robert S. Norris and Hans M. Kristensen for the prestigious Bulletin of Atomic Scientists.

India and Pakistan are both increasing their nuclear forces and building new plutonium production reactors, which could add to their fissile material stocks, Norris of the Natural Resources Defence Council and Kristensen of the Federation of American Scientists said.

However, the stockpiles of the four nations not recognized as nuclear weapon states under the Nuclear Non-Proliferation Treaty - Israel, India, Pakistan, and North Korea -are minuscule in comparison with those of Russia and the United States.

For instance, 'India and Pakistan have a combined total of approximately 150 nuclear warheads, just a few more than what is carried on a single US Trident submarine,' the report noted.

As Russia and the United States continue to reduce their Cold War arsenals, global inventories of nuclear weapons will continue to decline, the report said.

'Yet eight of the nine nuclear weapon states continue to produce new or modernised nuclear weapons, and all nine insist that nuclear weapons are essential for their national security.'

Russia and the United States have recommitted to maintaining a triad of nuclear strategic forces and China is seeking to build a triad, and France and Britain have pledged to keep their nuclear weapons, the report said.

'Whether Israel's nuclear arsenal remains opaque probably will depend on Iran, which appears to be as few as four and as many as 10 years away from joining the nuclear club, depending upon different estimates,' it said.

The total world nuclear stockpile dropped to about 23,300 last year as a result of reduction agreements by the US and Russia. Nonetheless, those two countries still have 95 percent of all nuclear weapons in the world.

Russia topped the list with 12,000 warheads, followed by the US (9,400), France (300), China (240), and the UK (225).

France, Pak to set up Joint Commission -- Paris

France, Pak to set up Joint Commission

Paris—France and Pakistan Tuesday agreed to set up Joint Commission to undertake cooperative projects in areas of food and agriculture, economic development, security and training of nurses on a large scale for export to European and Middle Eastern countries.

The meeting of the Joint Commission comprising of four representatives from each country from different areas will be held alternately in Islamabad and Paris with the first meeting to be held in Islamabad by October this year. France also agreed to expedite release of assistance committed under the Friends of Democratic Pakistan (FoDP) initiative to help Pakistan in the relief and rehabilitation works in the wake of massive devastating floods in Pakistan.

The decisions were taken when the French Foreign Minister Bernard Kouchner called on President Asif Ali Zardari in his hotel suite in Paris. Those who attended the meeting included France ambassador in Islamabad and other senior French officials. From the Pakistan side those who attended the meeting included Defence Minister Chaudhry Ahmad Mukhtar, Foreign Secretary Salman Bashir, Ambassador Shafkat Saeed, Secretary to the President and other senior officials.

Spokesperson Farhatullah Babar said that the President opened the conversation by reminding the French Foreign Minister of the promise France had made at the FoDP meeting and said that now that Pakistan had been hit hard by floods there was an urgent need to release the promised assistance. We need to rebuild the damaged infrastructure that has been destroyed first by the war against militancy and now further by the torrential rains, the President said.

More than 1400 people have been killed in the Khyber Puktoonkhwah province alone and hundreds of villages swept aside in rains and the subsequent floods. The President informed the French Foreign Minister that billions had been lost and infrastructure massively destroyed that needed to be rebuilt on an urgent basis.

The President said that there was need for regular bilateral coordination between the foreign ministries of the two countries on important multilateral issues and called for assistance in flood relief and rehabilitation, setting up income generating projects, improving health and education in the tribal areas of Pakistan as well as opening of branches of French banks in Pakistan.

The President said that tribal areas of Pakistan were under-developed and parts of it were known to have sheltered the militants. There was an urgent need to embark upon a massive economic development program in these areas to create job opportunities for the jobless and frustrated youth and thereby wean them away from falling prey to the lures offered by militants, Farhatullah Babar quoted the President as saying.

The President said that one of the most practical ways of doing it was to create economic opportunity zones in the tribal areas and allow its manufactures exported freely to the markets of EU countries. This will create self-generating employment opportunities for the youth, he said.

President said that being a signatory to important international human rights covenants and having lately also ratified the Convention Against Torture (CAT) on the one hand and having suffered huge material and human losses during the war against terror Pakistan on the other Pakistan more than qualified to be allowed market access by the EU countries. He urged France to take the lead in pleading with the EU greater market access to it.

President Zardari also reiterated Pakistan's interest in a serious and substantive engagement in civil nuclear cooperation under the IAEA safeguards with France. Pakistan was faced with a serious energy crisis and it needed to explore and exploit all sources of energy including hydro, thermal, solar, wind and nuclear, the President said.

The President also called for setting up a research fund to facilitate scientific cooperation between the science institutions of the two countries and proposed enhancement of cultural exchanges between the two countries. In this context the President appreciated the holding of Gandhara Exhibition at the Guimet museum in Paris and a month of “Pakistan in Paris” covering a vast number of cultural activities and thanked the French government for its support.

Proposing deeper engagement in economic and trade fields the President asked the French Foreign Minister to explore possibility of a debt swap arrangement. Bilateral debt to France totaling 2.3 billion dollars includes 845 million dollars ODA and 1.49 billion dollars of non-ODA assistance, the spokesperson said.

The President also raised the issue of travel advisories to French business representatives and said that the advisories and visa restriction impacted on Pakistani businesses and called for their review and relaxation.

Issues relating to the regional situation and Afghanistan also came under discussion during the meeting. The President underlined the need for greater cooperation in intelligence sharing between the two countries in the fight against militancy.

The President called for setting up of French bank branches in Pakistan to further boost trade and commerce.

The French Foreign Minister said that France deeply appreciated Pakistan’s role in the fight against militancy and that France will continue to support it in security and economic development areas. He said that France was keen to hold the first meeting of the Joint Commission before October this year and work out a practicable plan for assistance in various areas of economic development issues and security.—Online

Gwadar Port rail link with other cities soon: Bilour -- APP

Gwadar Port rail link with other cities soon: Bilour

Thursday, August 05, 2010

Staff Report

ISLAMABAD: Minister for Railways Haji Ghulam Ahmed Bilour on Wednesday informed the Senate that the government was working on a project to link Gwadar Port with other parts of the country through rail.

Replying to supplementary questions in the House, he said PC-1 of the project was being finalised and the feasibility of the Chaman-Kandahar Railway Project was also being prepared.

Bilour informed the House that a project worth Rs 3.434 billion was in progress at Railways Carriage Factory, Islamabad for 400 passenger coaches.

To a question, he said 241 coaches had been rehabilitated and put in service. He said a contract agreement had been signed with a Chinese firm for the procurement of 202 passenger coaches at a cost of over \$134 million.

Of these, 52 will be received completely built and the remaining 150 as completely knocked down for assembly at the carriage factory in Islamabad. Bilour said there was an estimated shortage of 220 coaches.

Innovative China eyes seas -- IND

Innovative China eyes seas

Ninety per cent of India's commerce is by sea. At present, 60 per cent of our seaborne trade moves (and comes from) Westwards to Africa, Europe and the US, while 40 per cent moves Eastwards (and comes from) across the Asia-Pacific region. Hence, maritime developments impacting seaborne trade (e.g. Gulf of Aden piracy or the rising maritime tensions in the Asia-Pacific region) need to be monitored closely, and counter measures taken to safeguard our national interests, keeping in mind that sea power takes generations to build up and is directly linked to our national prosperity and security.

The recent spate of events in the seas bordering China and its neighbours (US-South Korea Navy exercises in the Sea of Japan, and the Chinese Navy weapon firing exercises in the South China Sea) have once again highlighted the importance of sea power in the Asia-Pacific region. A few weeks earlier, the US Navy conducted large-scale exercises with other Asia-Pacific regions, and US secretary of state Hillary Clinton sought to internationalise the South China Sea territorial disputes because global commerce flows through it.

Conventional wisdom lists seven "essentials" for a nation to become a great sea power. These are, large size of country, large population, geographic location to dominate sea trade routes, at least two coasts, science-technology-industry, seafaring tradition, and political will of the government to exploit sea power in the national interest.

China does not meet three of the seven "essentials" for sea power, but is striving to overcome these handicaps. Firstly, China has historically not been a seafaring nation, but is learning fast and today its sailors are sailing the world's oceans on merchantmen, fishing trawlers and warships.

Secondly, though sea commerce flows through the China and Yellow seas, China cannot completely dominate the sea trade routes due to the presence of other modern littoral states.

Thirdly, China has just one coast facing Eastwards, and its exit to the Pacific Ocean "can be blocked" by South Korea, Japan, Taiwan and the Philippines. Its exit southwards towards the Indian Ocean requires it to pass close to Vietnam, and then through the choke points of the straits of Singapore-Malacca, Sunda and Lombok. Almost 90 per cent of China's oil requirements are imported from West Asia and Angola, and these move by ship through the Indian Ocean choke points which can be blocked in the event of war.

But China has taken the following measures in an attempt to become a global sea power:

w A combination of technology and innovation is being used by China in an ongoing experiment to detect and target "enemy" warships at sea, at long ranges using the 1,800-km range land-based DF-21 ballistic missile, with terminal homing. If the DF-21 experiment succeeds, the concept of sea power will change globally since a similar experiment can later be attempted with the 8,000-km range DF-31 and the 14,000-km range DF-41. The target data for the missiles could be provided by a combination of long range "over the horizon radars" using high frequency "sky waves" along with indigenous satellites for surveillance, communications and navigation data.

w Ongoing attempts to make the South and East China seas its territorial waters, and thus attempt to control international shipping movement, while exploiting the mineral, oil and fishing wealth. On May 16, 2009, China imposed a "summer fishing ban" in the South China Sea and sent ships to enforce this ban, overriding Vietnamese protests about traditional fishing rights. On January 5, 2010, China announced tourism packages to some disputed and uninhabited islands in the South China Sea. On February 9, 2010, China announced new oil and gas fields in the South China Sea, while its similar "finds" in the East China Sea led to Japan appealing to an international maritime court. On April 13, 2010, a flotilla of 10 Chinese warships and submarines passed between the international waters of Japanese islands of Miyako and Okinawa to exercise in the South East Pacific (On July 4, 2010, two Chinese warships repeated this deployment). On June 30, 2010, China announced a six-day live ammunition firing exercise by its Navy in the East China Sea.

w China has financially, militarily and technologically supported two nuclear armed

nations (Pakistan and North Korea) to act as its proxies which will, respectively, “distract and engage” India, Japan and South Korea.

w After the failure of half-a-century of coercive diplomacy, China has set out to woo Taiwan. The recent June 29, 2010, ECFA (Economic Co-operation Framework Agreement) to reduce or eliminate tariffs on 539 Chinese items and 267 Taiwanese items, is financially advantageous to Taiwan, but if China eventually achieves reunification with Taiwan, then it removes one strategic geographical obstacle for its Eastwards move to the Pacific Ocean.

w Flush with over \$2.5 trillion foreign exchange reserves, China has invested in South Asian and African littoral states so as to secure its sea lanes of commerce and to avoid sending its oil ships through the straits of Malacca, Sunda and Lombok. In pursuance of its “strings of pearls policy”, China not only gifted and built the Gwadar Port for Pakistan (which will unload West Asia oil, to be moved by Chinese-gifted roads and pipelines to China through the proposed Karakoram highway), but is now building ports in three countries which are India’s neighbours. In Sri Lanka the Chinese are funding and building the \$9 billion Hambantota seaport (three times larger than Colombo) and the nearby Mattala International Airport, both to be ready by 2015. In Bangladesh the Chinese are funding and building two deep water terminals at Chittagong and a brand new seaport nearby. Both these terminals and the new port will be linked by road and oil pipelines to Kunming in China, and will pass through Burma. Similarly Sittwe deep water port in Burma is being funded and built by China, and will also be connected to Kunming by road and oil pipelines. China has also invested in similar facilities in Tanzania and Angola.

w In 2009, Chinese think tanks suggested that once China gets its own aircraft carrier by about 2015, the US Navy should “look after” the sea area east of Hawaii, while the Chinese Navy would “look after” the rest of the Pacific and Indian Ocean regions. Chinese investment in nuclear submarines too, will aid a “two ocean deployment capability” in the future.

Strategically-located peninsular India, with 1,197 islands, meets six of the seven requirements of sea power. It only needs to augment its sea power and display palpable political will power to use that sea power in its national interest.

Vice-Admiral Arun Kumar Singh retired as Flag Officer Commanding-in-Chief of the Eastern Naval Command, Visakhapatnam

**Govt to succeed in pulling country out of challenges: President --
BIRMINGHAM**

Govt to succeed in pulling country out of challenges: President

BIRMINGHAM, Aug 7 (APP): President Asif Ali Zardari said on Saturday that with determination and resolve of the people of Pakistan, the present democratic government will succeed in pulling the country out of its present problems and challenges. Addressing a big community meeting here at International Convention Centre, he said it was a dream of both Shaheed Zulfikar Ali Bhutto and Mohtarma Benazir Bhutto Shaheed to see Pakistan as a progressive and democratic country and the government was working hard to achieve those objectives.

The President said that democracy in Pakistan has been faced with various challenges throughout its history and the government is taking steps to put democracy on sound footings.

He said that party was pursuing the policy of reconciliation and mentioned the passage of 18th constitutional amendment, NFC award, autonomy to Gilgit Baltistan, Balochistan package and women empowerment bill as some of the steps taken by the government to strengthen democracy.

The President appealed to the international community and political parties at home to come together to help thousands of people who have become homeless in floods and are in distress.

He cautioned against playing politics over calamity of floods and urged the nation to stand united as it did during the earthquake of 2005.

Pakistan faced its worst floods in the past as well but nations come cross such difficult times and face adversity with courage, he added.

The President said without looking at what the polls say, the government took tough decisions.

Agreement with IMF, price hike, rising energy prices were difficult for people but the government did not go for popular politics, he said adding the future generation would not have forgiven them for not waging fight against the terrorist mindset and for not ensuring food security.

He said Shaheed Zulfikar Ali Bhutto made Pakistan a nuclear power and Mohtarma Benazir Bhutto Shaheed gave it missile technology and made the country secure so that it could talk with its enemies on basis of equality.

He said he was meeting the world leaders to put across the country's viewpoint and tell them that Pakistan wanted to become self-reliant with opportunities of trade instead of aid.

President Zardari said Pakistan could not make enough progress in the past as it put more focus on its security but now they would create a new Pakistan as dreamed by the martyred leaders of PPP.

He vowed to take forward the philosophy of Shaheed Zulfikar Bhutto and Shaheed Benazir Bhutto and said his job as the leader of PPP was to take the nation to its destination.

He said democracy was moving forward with the support of all political forces.

PPP could have formed governments on its own but it took along Awami National Party in Khyber Pukhtunkhwa, formed government in Punjab with PML-N and made every party part of government in Sindh, the President recalled.

He said the nation has to move forward as it has no chance to repeat the mistakes which were made in the past.

President Zardari said he was planning for the next 30 years as Pakistan's population would rise to 250 million in the next 15 years.

President said history of PPP was replete with sacrifices for the cause of democracy and for the rights of people.

He said after the martyrdom of Benazir Bhutto, the ruler of that time postponed the polls to take advantage of the political vacuum but he took the right decision to contest elections and persuaded Nawaz Sharif to do the same.

He was thankful that Nawaz Sharif agreed with him and now his party was in corridors of power. He said the PPP and PML-N were political opponents but holding different viewpoints was essence of democracy.

He said despite what was being said on television and reported in newspapers about popularity of PPP, its candidates had won some recent elections.

PPP had been contesting elections with its leaders and workers in jails and getting martyred and offering sacrifices which was not reflective of its true mandate, he added.

President Zardari said the PPP is not a mere political party, but it is a philosophy pursued by all its leaders and workers right from Shaheed Zulfikar Ali Bhutto, who did not bow before the forces of tyranny and sacrificed his life for the country and nation.

He recalled the saying of Shaheed Zulfikar Ali Bhutto that he would like to die at the hands of a dictator rather to die in history and said "we are taking forward this thinking".

The President said after the martyrdom of Mohtarma Benazir Bhutto Shaheed, angry youth in Sindh raised the slogans of "Pakistan Na Khappay", adding, but he rejected that view and came up with the slogan of "Pakistan Khappay".

He said Pakistan was facing various challenges at this point in time which required positive approach and unity.

President Zardari said the PPP's policy of reconciliation was aimed at strengthening democracy in the country. He said after the assassination of Mohtarma Benazir Bhutto, dictator (Gen. Musharraf) offered the party the government of Pakistan and then the federal government, adding, but he at that time, only followed the vision of party's Shaheed leaders.

The President said Defence Minister Ahmad Mukhtar, despite his hesitation and reservations, accompanied ex-president Musharraf in his visit to China, and the decision reflected that PPP was following the philosophy of Mohtarma Benazir Bhutto Shaheed.

He hailed the PPP followers, workers and democracy-loving people across the world including those in UK, whose struggle, support and conviction ultimately led to the removal of a dictator (Gen. Musharraf) in Pakistan.

President Zardari said, "you people supported Shaheed Zulfikar Ali Bhutto and Mohtarma Benazir Bhutto Shaheed and now supporting Bilawal Bhutto Zardari, who today launched a fund-raising campaign in London for the flood affected people in Pakistan and within half an hour 70,000 pounds were collected."

Similarly, the President said Bakhtawar Bhutto Zardari has launched a fund-raising campaign in Pakistan and "I announce Rs 5 million donation including Rs. 2 million for Bilawal campaign, Rs. 2 million for Bakhtawar campaign and Rs 1 million for the Prime Minister's Flood Relief Fund".

President Zardari said the government, the PPP and country were fighting against a mind-set, that martyred our leaders and workers including Shaheed Zulfikar Ali Bhutto, Mohtarma Benazir Bhutto Shaheed, Shah Nawaz Bhutto, Murtaza Bhutto and workers like Munawar, Khalid Shehenshah and Tauqeer Kaira.

"We are fighting that mind-set and following the vision and philosophy of our Shaheed leaders, who sacrificed their lives for the country and nation and for the right of people", he stressed.

President Zardari said when he visits various countries and talks to the world leaders, he does not care of what would be published in newspapers and what the political actors would say, he only has in his mind the country's interests.

"If anyone thinks that Pakistanis or the PPP were weak, then they are mistaken. We are brave nation. We know how to live and our leaders have also taught us even to give the life," he remarked.

The President also congratulated the new Pakistani-origin Members of Parliament in UK and hailed their efforts in promoting and strengthening the bilateral ties between Pakistan and UK.

He said Pakistan, which was a front-line state in the war against terrorism, was facing various challenges which need to be tackled effectively, otherwise the coming generations would complain us what we did for the welfare of country.

President Zardari said despite the fact that PPP leaders were martyred he chose to make his only son Bilawal Bhutto Zardari the chairman of party to serve the country and nation.

"I see the graves of Shaheed Zulfikar Ali Bhutto, Mohtarma Benazir Bhutto Shaheed, Shah Nawaz Bhutto, Murtaza Bhutto and others in Garhi Khuda Bakhsh. But despite this I say that I also have to get buried here", he remarked.

President Zardari said the PPP leaders had great vision. He recalled a speech of Shaheed Zulfikar Ali Bhutto wh

All Day**Pakistan in Chinese fighter jet deal -- Farhan Bokhari, Islamabad**

Pakistan in Chinese fighter jet deal

Farhan Bokhari, Islamabad

China has agreed to sell Pakistan at least 36 advanced fighter jets in a deal worth as much as \$1.4bn, according to Pakistani and western officials. Beijing will supply two squadrons of the J-10 fighter jet in a preliminary agreement that could lead to more sales, said a Pakistani official. The official said Pakistan might buy "larger numbers" of the multi-role aircraft in the future, but dismissed reports that Islamabad had signed a deal to purchase as many as 150 of the fighter jets.

Defence experts described the agreement with China as a landmark event in Pakistan's defence relationship with the military power. China's transition from a manufacturer of low-fighters to more advanced jets comparable to some western models is seen as evidence of Beijing's increasing strategic clout in Asia.

"China is developing a real capacity to produce and export its arms. At one point, the Chinese were dependent on imported Russian technology, but obviously China has advanced significantly beyond those days," said Marika Vicziany, Professor of Asian studies at Monash University in Melbourne.

"This agreement should not simply be seen in the narrow context of Pakistan's relations with China," said Abdul Qayyum, a retired Pakistani general.

"There is a wider dimension. By sharing its advanced technology with Pakistan, China is ... also saying to the world that its defence capability is growing rapidly."

China has supplied Pakistan with fighter jets for more than three decades. But Beijing has seldom supplied Pakistan's air force with advanced fighter aircraft. Islamabad turned to France for Mirage fighter jets in the 1970s and to the US for F-16s in the 1980s.

Pakistan has a fleet of 45 F-16s built by Lockheed Martin. The Pakistani air force is using the fighter jet in its campaign against militants in South Waziristan.

The US has agreed to sell Islamabad another 18 new F-16s and Pakistani officials also expected the US to supply about a dozen older versions of the aircraft.

Over the past decade, China and Pakistan have collaborated on building their first jointly produced advanced fighter jet, known as the JF-17, or "Thunder". Pakistan is expected to roll out the first domestically built version of the Thunder within weeks. Pakistan's air force plans to purchase at least 250 of the Thunder fighters over the next four to five years.

Experts see the new Pakistani focus on China as evidence that Beijing is trying to expand its military power.

"Countries like Iran and possibly some of the Middle Eastern countries would be keen to deal with China if they can find technology which is comparable to the west," said one western official in Islamabad.

"Pakistan will work as the laboratory to try out Chinese aircraft. If they work well with the Pakistani air force, others will follow."

US offers 'unarmed' UAV's to Pak to help in fight against terror

2010-08-07 17:20:00

The United States has said that it is ready to provide a couple of intelligence gathering equipments to Pakistan to help in its anti-terror efforts, however, it would not be available for free.

Talking to media persons at the US Embassy here, visiting US Under Secretary of Defence for Policy, Michele Fluornoy said that the Obama administration has offered Islamabad two intelligence systems- unmanned and unarmed aerial vehicle (UAV) and Scan Eagles, and that a final decision to make a choice rests with the country's military.

The visiting official said the US has given details of both the equipments and the

cost to the Pakistan military.

"We have offered them two. One is called Shadow and the other is called Scan Eagles. One is typical UAV system which will provide intelligence to Pakistan security operations in their operations," The News quoted Fluornoy, as saying. The Scan Eagle system is designed for autonomous field operation. It carries a payload of 6 kilograms, and can be operated from a height of 5,000 metres. It can be launched and retrieved over any terrain, and can also be used for naval operations.

The Shadow drones, which fly at a low altitude and are basically used for reconnaissance and intelligence gathering, are used by the US forces for training operations of bigger and armed drones such as Reaper and Predator.

Responding to a question, Fluornoy strongly refuted observations that the US forces were losing the war against the Taliban and Al-Qaeda in Afghanistan.

"No sir, you are badly mistaken. Neither are we losing nor is July 2011 set for the forces to pack their bags. We are not going anywhere. Rather, this is just the beginning of a process to evaluate our strategy in Afghanistan. We remain committed to this region and will stick to Pakistan and Afghanistan," she said. (ANI)

India seeks Pak help to trace 33 soldiers -- INP

India seeks Pak help to trace 33 soldiers

Srinagar—Thirty three Indian soldiers including three JCOs, deployed along the Line of Control near Siachen glacier, are feared to have been washed away to Azad Kashmir in flash floods in Ladakh and help of Pakistan has been sought to trace them.

A senior Indian army officer said on Monday that the jawans, who were manning a post near Turtok along the Line of Control (LoC), still remained untraced after they faced the fury of a swollen Shyok river on the same day when Leh was hit by flash floods following a devastating cloudburst on Friday last.

The Army has now sought the help of Pakistani authorities to help rescue the 33 personnel of 15 Bihar infantry regiment as it fears that they may have been swept away towards Pakistan Kashmir in the deluge, the officer said. —INP

Pakistan, Russia to establish HBF -- APP

Pakistan, Russia to establish HBF

Karachi —Pakistan and Russia will establish Pak-Russia Horticulture Business Forum (HBF) to cooperate horticulture trade and technical assistance between two countries which will provide stalls in exhibition free of cost, agriculture technology, warehouses, cold storages, exchange of delegation and establishment of offices in major cities of Russia.

After the arriving from representing the high level delegation to Russia, Abdul Wahid Patron in Chief of Pakistan Fruit and vegetables Exporters and Importers and merchant Association has said that the Russia is ready to help in stabilising Pakistan economy, he stated that during the visit they met with the ministry of commerce, ministry of finance, Russian chamber of commerce, high officials of different provinces and business associations.

During the visit Russian Trade and Business personnel showed their interest in horticulture products along with Pakistani rice, which opens an opportunity to become the biggest market compared to Europe. Russia will become high pay market for Pakistan horticulture products. Witness selling mangoes @ US \$22/Per 2 Kg Box.

It is encouraging that exporters will not face cosmetic problems which they faced in European market he added, Abdul Wahid said that as compared to China, Russia is fulfilling their agriculture needs by import.

He said that the decision of establishment of Pak-Russia Horticulture Business Forum has been taken and will be established soon, witnessing interest of Russia in Pakistani agriculture products and to see the market potential and will sign the MoU soon with the concerned authorities which will help to expand bilateral trade.

Abdul Wahid said that next year an exhibition will be conducted under the banner of said forum with association, displaying the Pakistani horticulture products and also make efforts to open a Horticulture Products Section in Pakistan Embassy Russia.—Agencies

TAPI Pipeline back on the agenda -- Turkmenistan

TAPI Pipeline back on the agenda

Tue, 10 August 2010

Turkmen President Gurbanguly Berdimuhamedov has said that an increase in Turkmenistan's gas export potential has bolstered the prospects of the Turkmenistan – Afghanistan – Pakistan – India (TAPI) Pipeline.

His comments came after the 5th meeting of the technical working group of the TAPI Pipeline closed in Ashgabat last week.

During the meeting, experts and specialists from Turkmenistan, Afghanistan, Pakistan, India and the Asian Development Bank discussed the critical technical issues related to acceleration of construction of the gas pipeline that would ensure long-term supplies of natural gas from Turkmenistan to the largest countries of the Southern Asian region.

Unocal proposed a similar pipeline route in the 1990s, but pulled out in 1998 after deciding the political situation in Afghanistan was too unstable.

The Turkmen President acknowledged that the project was complex but said that there was concrete evidence of the pipeline's relevance and viability.

Article continues below...

The \$US3.2 billion project includes the construction of a 1,460 km pipeline running from Turkmenistan's Dauletabad-Donmez gas fields, through Afghanistan, to Multan in Pakistan.

The pipeline will be extended to the port city of Gwadar, in Pakistan, where a gas-liquefaction plant would allow gas to be supplied to international destinations.

In April 2008, Turkmenistan, Pakistan, Afghanistan and India signed the framework agreement on construction of the TAPI gas pipeline.

The project received a new impetus to develop in May 2010 during the state visit of Turkmen President Gurbanguly Berdimuhamedov to India, where the Turkmen leader held the successful talks with President of India Pratibha Devisingh Patil and Prime Minister Manmohan Singh.

US, Pak defence teams agree to boost cooperation -- APP

US, Pak defence teams agree to boost cooperation

Staff Report

ISLAMABAD: Defence strategists from the US and Pakistan agreed to strengthen the existing cooperation between the two countries to achieve the mutually agreed goals of peace, development and stability in the region at a two-day meeting, which concluded at the General Headquarters on Friday.

The 19th Defence Consultative Group (DCG) meeting was held in Rawalpindi from August 5 to 6. The Pakistani delegation was led by Secretary of Defence, Lt Gen (r) Syed Athar Ali, while the US delegation was headed by the Under Secretary of Defence for Policy, Michele A Flournoy. The DCG plenary session reviewed the Exchanges on Defence Planning (EDP), which took place in June and July 2010 and identified Pakistan's immediate and long-term defence needs. Both sides emphasised the importance of such exchanges in defining the mutual opportunities and challenges associated with multi-year cooperation between Pakistan and the US, and the value of prioritising and integrating Pakistan's security and defence capability requirements. The meeting decided to continue the EDP process.

The Pakistani side also gave a briefing on counterinsurgency and counterterrorism. The US side acknowledged the extraordinary sacrifices given by the people and military of Pakistan in its efforts to defeat violent extremists. The Pakistani side also discussed the significant burden that increased military operations have placed on its forces and economy. The two sides also discussed prospects for peace and security in the region. The delegations also acknowledged the improvement in coordination of activities along the border with Afghanistan.

It also discussed ways to assist Pakistan in transitioning across the counterinsurgency phases of clear, hold, and build.

China flood aid may help test China-Pak border roads, fight ultras

Read more: China flood aid may help test China-Pak border roads, fight ultras -
China - World - The Times of India

<http://timesofindia.indiatimes.com/world/china/China-flood-aid-may-help-test-China-Pak-border-roads-fight-ultras/articleshow/6443610.cms#ixzz0y88A3sKS>

BEIJING: Nearly half of the members of a medical team sent by China to assist flood hit victims in Pakistan are women doctors. They were "specially to offer medical aid for female Muslim Pakistani patients," Zhang Liyan, head of the medical group, said.

An interesting aspect of relief operations is the use of land route to the Sust dry port near the Pakistan-China border for supplies from Kashgar in northwest China's Xinjiang Uygur Autonomous Region.

"The use of border roads for relief supplies has a strategic dimension. It will help test the roads from the point of logistics as well as improve China's ability to conduct anti-terrorism operations in the area," Srikant Kondapalli, professor of Chinese affairs at the Jawaharlal Nehru University, told TNN. China is keen to enhance its influence in the border areas of Pakistan to protect its investments and also to ensure that Islamic fundamentalism do not spill over to its territory.

China's People's Liberation Army has also dispatched urgently-needed materials including tents, power generators and sludge-cleaning equipment to the Pakistani armed forces will arrive in Pakistan's Islamabad, according to the foreign ministry in Beijing.

Beijing's swift and enthusiastic response to the need for support in relief and rescue has resulted in several statements from Pakistani officials and politicians expressing deep appreciation. But it has a significant strategic dimension.

Several Chinese operating in China including one involved in establishing nuclear energy facilities have joined the Chinese government in the relief efforts. The latest move involves sending a 55-member rescue delegation comprising 36 medical workers including 14 female doctors.

Supplies from Xinjing might also help win over Pakistanis, who have been unhappy over the condition of Muslims in this border province during recent riots.

Pakistani Ambassador to China Masood Khan made a statement to the official media suggesting that questions are being raised about the purpose of Beijing's aid.

"It is not fair for any country or person to make oblique references to China's relief assistance to Pakistan or to urge it to do more," Khan said. "China was one of the first countries to respond to our relief needs when the worst floods in 81 years came. China moved with speed," he said.

Kashmir: the China connection -- The Economist

Kashmir: the China connection

Aug 29th 2010, 11:58 by Banyan

AN ODD row has broken out over the failed attempt of an Indian general, B. S. Jaswal, who heads the army's Northern Command, to visit China. General Jaswal was refused a visa, apparently because of his work in Kashmir.

This is not entirely surprising. China has been irritating India for about a year now with its unwillingness to issue normal visas to residents of the Indian state of Jammu & Kashmir (J&K).

One interpretation of its rejection of General Jaswal is that it is engaged in simple tit-for-tat diplomacy, following India's refusal to allow a Chinese diplomat to visit its troubled north-eastern state of Manipur to give a talk.

There is probably more to it than that, however. For B. Raman, a former head of the Research and Analysis Wing (RAW), India's main spy agency, China's policy is consistent with a change in its stance on Indian-held Kashmir: "it has diluted its past acceptance of J&K as a de facto part of India."

As Mr Raman notes, this must delight Pakistan, which will see it as tacit support for its claim to all of Kashmir. He points out it might also be seen as a way of bolstering China's position in possible future negotiations over Indian-claimed territory it now occupies.

In the context of the long-running and largely suppressed strategic tension between the two giant neighbours, China's hints of sympathy for Pakistan over Kashmir, and for secessionists in the territory itself, are extremely unwelcome for India.

It will also have noticed and been concerned by China's increased activity in Pakistan's "Northern Areas" (which were recently renamed as Gilgit-Baltistan), the north-western part of the old J&K kingdom. Chinese soldiers there are working on road, railway and other infrastructure projects. This will provide a fast route into western China from the port it is building at Gwadar, on Pakistan's shore of the Arabian Sea.

According to Selig Harrison, an American analyst, writing in the New York Times, the Chinese influence is greater than had been known and Pakistan "is handing over de facto control" of Gilgit-Baltistan, which is suffering a simmering revolt against Pakistani rule. He says between 7,000 and 11,000 Chinese troops are there.

Curiously, Mr Harrison equates this "collusion" by Pakistan with China with the support of parts of its establishment for the Taliban, as evidence it is not an American ally. Surely, to be "with" America, a country doesn't yet have to be "against" China?

PBC and China Radio International sign statement of collaboration -- Daily Times

PBC and China Radio International sign statement of collaboration

Staff Report

ISLAMABAD: To implement an MOU signed during the visit of President Asif Ali Zardari to China in July this year, Pakistan Broadcasting Corporation (PBC) and China Radio International (CRI) has signed a statement of collaboration here on Saturday for cooperation between the two organizations.

Federal Minister for Information and Broadcasting Qamar Zaman Kaira, member National Assembly Farahnaz Ispahani and Chinese ambassador to Pakistan Luo Zhaohui graced the occasion.

Under the statement of collaboration, the two organizations agreed on exchange of staff boost their relationship and enhance their professional capabilities.

Speaking on the occasion, Federal Minister For Information and Broadcasting, Qamar Zaman Kaira said Pakistan-China relationship had long history and his Pakistan Peoples Party, being the architect of these ties, considers this relationship as a great asset. He said relationship between the two countries is not confined to few fields only but Pakistan and China assisted each other in every hour of need.

The Information Minister expressed joy over the signing of the statement saying it will benefit the professionals of the two organizations. He said PBC has rich history while CRI is fast emerging organization. The collaboration between the two will strengthen people to people contact and relationship between Islamabad and Beijing.

He said time would soon be given on FM channels of Radio Pakistan to Radio China.

The Information Minister congratulated the management of Radio Pakistan and team of National Broadcasting Service for completing two years service of round the clock programmes aimed at sensitizing the masses to critical issues faced by the country.

He said he himself participated in Naiy Ufaq programme of the NBS every week while the prime minister addresses the nation by the radio on first Friday of every month.

In his remarks, the Chinese ambassador to Pakistan Luo Zhaohui said signing of statement of collaboration between PBC and CRI is reflective of growing relationship between Pakistan and China.

He termed the visit of President Zardari to China in July this year as highly successful and said the signing of statement of collaboration between PBC and CRI is follow-up of that visit. He was of the view that it would enhance cooperation between two organizations.

In his welcome address, Director General, PBC, Murtaza Solangi said close cooperation between PBC and CRI would go a long way in bringing the people of the two countries together and the two organizations have a long history of collaboration.

The CRI Deputy Chief Editor hoped that the agreement would bring the professionals of the two countries together and their mutual interaction would provide them opportunity to enhance their professional capabilities. He urged the media of two countries to play a role in further consolidating and strengthening close relationship between Pakistan and China.

He told China has keen desire for enhancing collaboration between the media of the two countries.

Director General PBC, Murtaza Solangi and Deputy Chief Editor of Radio China International signed the statement of collaboration.

TCC to invest \$3.3bn in gold and copper mining -- APP

TCC to invest \$3.3bn in gold and copper mining

By Mohammad Zafar

QUETTA: Tethyan Copper Company Pakistan (Pvt) Limited (TCC) has submitted its feasibility study report to the Provincial Government with a view of getting a mining license to exploit copper and gold resources.

The project cost is estimated at \$3.3 billion. It will be the biggest foreign financed project in the history of Pakistan. Such a huge foreign investment is unparalleled in the economic history.

Estimated payable metal production over about 56 years of mine life is 22 billion pounds of copper (10,000,000 tones) and 13 million ounces of gold.

The Feasibility study report had been submitted to the Department of Mines and Mineral Development, which is representing the interests of the Government of Balochistan. Earlier, it was with the Balochistan Development Authority and later on Department of Mines and Mineral Development was given the assignment and Dr Saeed Baloch had been appointed as the focal person.

"We are very happy that the Project has reached this important milestone. Based on extensive world class engineering, technical and financial studies by TCC, the viability of Reko Diq project has been established and we are looking forward to work with our partner, the Government of Balochistan on taking this project towards the construction stage," said TCC CEO, Gerhard Von Borries.

"A feasibility study of a mining project determines whether the proven mineral resource is technically and financially viable and is considered an important landmark in mining project development phase," he said

According to the feasibility report, the initial mine development investment for Reko Diq project is estimated at \$3.3 billion (approximately PKR 272 billion) which includes development of basic infrastructure like power, water and concentrate pipelines, roads, and port development.

The project will create 10,000 construction jobs and 2500 permanent jobs when the commercial operations start. Significant opportunities will also be created for local suppliers and contractors for providing services and goods to support mine operations. The project offers state of the art transfer of mining and beneficiation technology to Balochistan in addition to generating significant revenues in form of taxes, royalties and profit sharing.

Gerhard Von Borries also confirmed that the Environment and Social Impact Assessment (ESIA) of the Reko Diq project is being finalised and will be soon presented to the competent authority. "We are committed to this project and the way it has been designed, it will be a catalyst of social and economic development for Balochistan," he added.

TCC's vision is to operate a world-class copper-gold mine at Reko Diq, Balochistan in a safe and socially responsible way. TCC reports its resources and reserves on two international Minerals Reporting Standards, JORC (Australia) and CIM (Canada). Total mineral resource at Reko Diq is 5.9 billion tones. Mineral reserve i.e. economically mineable ore at Reko Diq is 2.22 billion tones at an average grade of 0.5 percent copper and 0.3 grams gold per tones.

Estimated payable metal production over about 56 years of mine life is 22 billion pounds of copper (10,000,000 tones) and 13 million ounces of gold.

It may be recalled that the Government of Balochistan intended to operate the Reko Diq in the public sector denying mining rights to the TCC. The Chief Minister, more than once, had stated his stand. The Government plans to merge with the Siandak

Project and Reko Dik into a single metal mining company and operating it under the Government control.

However, the TCC claimed that it had conducted the exploration and it is the right of the company to exploit the mineral wealth. The Government job is only to collect taxes and royalties, implement the laws protecting environment and enforce law and order. Since the Government had not undertaken the exploration for years, it had no right to mine the wealth under the international law, it is opined.

Deepening investments in Pakistan - China -- Beijing

Deepening investments in Pakistan

But while the forces behind the mega infrastructure projects in the region remain unclear, few dispute the fact that China has in recent years moved to shore up investments in neighboring Pakistan and boost traditionally warm ties.

As part of its strategy to develop alternative trade routes to the Indian Ocean and the Persian Gulf, China has helped Pakistan develop a deep-sea port at the naval base at Gwadar in the province of Baluchistan on the Arabian Sea.

Beijing is also working to extend the strategic Karakoram Highway, built to link China's Sinkiang province with Pakistan and other projects such as dams and rail networks.

Harrison estimates that once high-speed rail and road links through Gilgit and Baltistan are completed, China will manage to transport its oil tankers and cargo to the Persian Gulf within 48 hours - a maneuver, he says, currently takes 16 to 25 days.

'Iranian nation will support Pakistan' -- Daily Times

'Iranian nation will support Pakistan'

KARACHI: A 15-member Iranian delegation, led by Iranian Interior Minister Mostafa Najjar, called on Pakistani President Asif Ali Zardari at the Bilawal House on Saturday, a statement said.

They discussed bilateral relations between the two countries, and the situation Pakistan is faced with because of the recent floods.

The delegation informed the president that the Iranian nation would support the Pakistanis in their hour of need.

Iran has pledged to provide \$10 million, around \$1.3 million of which has already been delivered, the delegation said. The delegation, which arrived in the city from Islamabad, was also given an aerial view of the flood-affected areas of Thatta district.

Representatives of the Iranian supreme leader - Hujatul Islam Rahimian and Ansarian - Iranian Deputy Foreign Minister Dr Fatollahi, Iranian Red Crescent Society Head Dr Faghi, Iranian Disaster Management Organisation Head Bagheri and Iranian Ambassador to Pakistan Mashallah Shakri were the part of the delegation.

Interior Minister Rehman Malik later told reporters that the delegation was in the city on behalf of the Iranian president and the Iranian supreme leader to evaluate the magnitude of the disaster and determine how the Pakistanis could be helped.

The current requirements include tents and clean drinking water, the provision of which is being managed, he added.

Najjar said the people and the government of Iran were mobilised from day one of the floods in Pakistan. The Iranian president is keen to visit Pakistan, he added. app

Indonesia-Pakistan Business Forum to be launched this month -- Regional Times

Indonesia-Pakistan Business Forum to be launched this month

KARACHI: The Embassy of Republic of Indonesia has decided to formally launch the proposed Indonesia-Pakistan Business Forum during the current month. Mr. Ishak Latuconsina, Ambassador of Indonesia has nominate Abdul Majid Haji Muhammad, President, Karachi Chamber of Commerce & Industry (KCCI) as the Chairman of Indonesia-Pakistan Business Forum keeping in view his immense experience of trading with Indonesia and regional countries, particularly in palm oil trade with Indonesia. Mr. Ishak Latuconsina anticipated that Abdul Majid as the Chairman of Indonesia-Pakistan Business Forum will play a vital role in further enhancing and strengthening of the mutually beneficial trade ties between the business community of two brother countries. Abdul Majid stated on Thursday that appointing as the founding Chairman of Indonesia-Pakistan Business Forum is indeed an honour for him. He said that Pakistan and Indonesia are enjoying brotherly and friendly relations since last many decades. The diplomatic relations between two countries were established in 1949. Together Indonesia and Pakistan form over 400 million of Muslim population which is over 1/3 of the entire Muslim population of the world, he said. Abdul Majid said that Pakistan and Indonesia bilateral trade could escalate upto US Dollar 2 Billion incoming year from the current figure of around 800 Million US Dollars following the conclusion of the undergoing PTA (Preferential Trade Agreement).

Abdul Majid said that he believes that the signing of Preferential Trade Agreement PTA will bring closure the business communities of both countries and will give a strong boost to the bilateral trade ties and he will make his best efforts to inspire governments of both countries for signing PTA. The signing of PTA, Majid said, would allow both countries to boost their own exports which will InshaAllah lead to FTA. Indonesia would be able to increase its export of crude palm oil to Pakistan whereas Pakistan can export to Indonesia its value added textiles, carpets, fabrics, leather and export goods, chemicals, surgical etc., he concluded.—Agency

EU set to agree trade breaks for Pakistan -- BRUSSELS (Reuters)

EU set to agree trade breaks for Pakistan

Fri Sep 10, 2010 4:45pm GMT

Print | Single Page[-] Text [+]

1 of 1Full SizeBy David Brunnstrom

BRUSSELS (Reuters) - The European Union appears likely to grant trade concessions worth hundreds of millions of euros to flood-hit Pakistan as part of an effort to maintain stability in the country, diplomats said on Friday.

EU foreign ministers meeting in Brussels asked EU Trade Commissioner Karel De Gucht to draw up a plan for approval by EU leaders at a summit on Thursday that would seek a World Trade Organisation waiver worth at least 230 million euros (190 million pounds) for Pakistan, the EU diplomats said.

Pakistan would also benefit from a review under way of the EU's Generalised System of Preferences-Plus (GSP+) -- a trade support mechanism -- due to be completed in January, which would also cover economies of similar size to Pakistan, they said.

"It's a strategic situation, potentially the most dangerous situation in the world -- there was a feeling we needed to do something," one diplomat said.

The waiver -- a unilateral suspension of tariffs on certain goods -- would be granted under the so-called "9/11" clause used to grant Pakistan trade breaks after the September 11 attacks. Those breaks were in recognition of Pakistan's position as a frontline ally in the battle against Islamist militancy.

Any waiver is likely to trigger a dispute at the WTO from Pakistan's trade competitors, but diplomats said bringing a case in the world trade body can take up to a year, which would be enough time for the EU measures to have an impact and

then be shut down before the complex litigation begins.

By that time Pakistan should also feel the benefits of GSP+ status, they said.

Some diplomats also think it is unlikely that India and Sri Lanka, two countries that could challenge the waiver, would do so at such a politically sensitive time for Pakistan.

EU needs a 'comprehensive approach' to help Pakistan -- BRUSSELS:

EU needs a 'comprehensive approach' to help Pakistan

* European Union foreign policy chief says alliance considering ways to support Pakistan

BRUSSELS: Ahead of a key European Union meeting over Pakistan, EU Foreign Policy Chief Catherine Ashton has said that the bloc needed a "comprehensive approach" that includes not only humanitarian aid, but also helping Pakistan fight terrorism and boost trade.

Ashton met Foreign Minister Shah Mehmood Qureshi on Thursday ahead of the informal two-day foreign ministers' meeting in Brussels that would discuss the flood crisis in Pakistan.

The EU already has committed \$89 million to help Pakistan recover from the devastation, and now is looking for a long-term aid strategy to help the country get back on its feet.

"What we're trying to do now is link together all the different ways we support Pakistan... it's very, very important," she said, as ministers headed into the talks in Brussels. "They need help to develop civilian police forces, the potential to tackle terrorism before it turns into actions by terrorists and, of course, the capacity to develop their economic platform," she said.

The EU now is attempting to help Pakistan feed flood victims and fight terrorism. German Foreign Minister Guido Westerwelle said he is pushing to open European markets to Pakistan exports.

"Whoever wants to stabilise Pakistan and prevent it from drifting toward extremism and fundamentalism must ensure that the economic consequences of this natural disaster will be absorbed," he said.

Pakistan has been urging the EU to grant it enhanced access to its markets in order to boost its struggling economy, as well as provide more aid to Pakistan to help it fight terrorists.

Pakistani Ambassador to the US Hussain Haqqani recently warned that flooding had stretched thin the Pakistani military and would hamper its fight against terrorists.

"The military's resources, particularly its limited supply of helicopters, are busy with flood relief," Haqqani had said, adding that going after terrorists in North Waziristan or other terrorist havens would depend on the military's continuing capabilities. ap

Trade-linked aid to Pakistan tops Europe talks -- (AFP)

Trade-linked aid to Pakistan tops Europe talks

(AFP) – Sep 11, 2010

BRUSSELS — Europe is likely to offer trade-linked aid to help Pakistan battle flood devastation and fears of rising Islamist extremism at an EU summit next week, diplomatic sources said Saturday.

Hosting a two-day informal parley of foreign ministers from the 27-nation bloc, EU diplomatic supremo Catherine Ashton said Pakistan needed wide support -- ranging through aid, institution-building, anti-terror assistance, reconstruction and trade.

"Everyone agrees we have to think comprehensively," Ashton said.

"If we want to stabilise Pakistan, so that it doesn't degenerate into extremism and

fundamentalism, we have to address the economic consequences of this natural catastrophe," said German Foreign Minister Guido Westerwelle.

After the floods turned some 21 million lives upside down and left 1,760 dead, Ashton suggested special exemptions from trade tariffs.

"It is in the vital strategic interest of the European Union to help Pakistan in the longterm with trade," said British Foreign Secretary William Hague as the talks wound down.

"I hope there will be agreement on it" at the September 16 summit, he added. "There has been really strong support from the foreign ministers for some decisive action to be taken."

EU leaders will have three options to ease Pakistani goods into Europe -- offering duty-free access on some goods, deciding a unilateral waiver with WTO agreement, or lowering Most Favoured Nation tariff on some products.

Most EU nations favoured a waiver for a limited list of products, diplomatic sources said.

The European Commission, which polices EU trade matters, asked ministers to consider ditching tariff barriers on 13 types of textile product, in an effort to kick-start an economic fightback.

"We cannot stand on the sidelines," said Belgian Foreign Minister Steven Vanackere, after the issue of "how we'll do it" was passed up from trade to foreign ministers.

The idea of preferential treatment caused consternation within the industry.

A European association of textile producers (Euratex) articulated fierce resistance.

Euratex told EU trade commissioner Karel De Gucht last week that the "Pakistani government is (repeatedly) using all sorts of excuses to demand free access to the EU market," citing the "fight against terrorism, economic crisis and now the floods".

It said Pakistan is "already a major world player" on a par with India or China, and warned that unilateral EU moves "will certainly be attacked" in the WTO and could "seriously jeopardise" negotiations on a free-trade deal with New Delhi.

According to an EU source, though, the list of product areas qualifying for exemptions was drawn up with likely objections in mind, and aimed at providing some 25 million euros of annual benefits to Pakistan.

Europe has also been criticised by humanitarian organisations for struggling to produce a coherent, collective position on Pakistan.

Europe preparing to grant Pakistan extraordinary trade concessions -- Daily Times

Europe preparing to grant Pakistan extraordinary trade concessions

BRUSSELS: Following a two-day meeting of European Union foreign ministers in Brussels Friday and Saturday, Europe is preparing to grant extraordinary trade concessions to Pakistan. The move is intended to bolster the flood-devastated nation and help Islamabad tackle extremism.

The foreign ministers have reportedly opted for an option that would entail a World Trade Organisation (WTO) waiver for key Pakistani exports, primarily textiles. This would allow Brussels to temporarily grant Pakistan a tariff reduction.

Earlier, trade officials had spoken against this move anticipating resistance from India and lengthy litigation at the WTO. A previous tariff exemption granted to Pakistan after 9/11 attacks on World Trade Centre ostensibly in recognition of the country's drug enforcement measures, but widely seen as a reward for its role as an ally in war in Afghanistan had in fact led to a WTO case initiated by India. The EU had lost and been forced to withdraw the concessions.

However, thinking in Brussels at present seems to be that since bringing a case at WTO can take up to a year, there would be enough time for EU measures to have an impact and then be shut down before litigation begins. The waiver being contemplated would bring benefits of at least Euro 230 million for Pakistan. Another proposal that sought to eliminate tariffs on 13 specific textile and clothing products on a most favoured nation (MFN) basis was shot down since such a move would benefit India, China and other countries in addition to Pakistan.

Pakistan may also improve its chances of gaining GSP+ status - a European trade incentive mechanism, from which Islamabad has until now been excluded, for amongst other reasons, having an economy that is too large to be eligible. However, a review is now under way of the criteria for GSP+ qualification, which may allow economies of similar size to Pakistan to also qualify. The review is due to be completed in January.

Following foreign minister's meeting, EU Trade Commissioner Karel De Gucht has been asked to carry out a feasibility study, including estimates on the economic cost of the concession. The findings will be presented at an EU leader's summit on September 16, during which the green light for the move may be given. ppi

German economic delegation to visit Pakistan -- Daily Times

German economic delegation to visit Pakistan

ISLAMABAD: A 21-member German economic delegation is visiting Pakistan from September 14-17.

Claus Baron von Fersen, an expert representing German Oil and Gas Industry and Renewable Energy sector is leading the delegation that includes representatives of German business community as well as officials from Federal Ministry of Economics and Technology and Near and Middle East Association (NUMOV).

During the visit, German delegation would have meetings with the Karachi Chambers of Commerce and Industry and Pakistan German Business Forum in Karachi.

In Islamabad, the delegation would meet representatives of Islamabad Chambers of Commerce and Industry, officials of Board of Investment and Alternative Energy Development Board. The delegation would also visit the Ministry of Commerce.

Delegation members would also meet representatives of German companies that are doing business in Pakistan.

The visit would provide the German business community an opportunity to explore possibility of enhancing trade and investment ties with companies in Pakistan. app

David Cameron to push EU to ease Pakistan trade terms PM wants to give Pakistan 'enhanced access' to EU markets, -- Guardian News and Media Limited

David Cameron to push EU to ease Pakistan trade terms PM wants to give Pakistan 'enhanced access' to EU markets, but is likely to find opposition from more protectionist countries

(6) Tweet this (20) Ian Traynor in Brussels and Nicholas Watt guardian.co.uk, Wednesday 15 September 2010 20.49 BST Article history

David Cameron wants to ease EU trade terms with Pakistan to help alleviate the damage done by flooding in the country. Photograph: Carl Court/AFP/Getty Images

David Cameron is pressing the European Union to agree a new regime of trade concessions to Pakistan to alleviate the country's plight in the medium term, but has run into formidable opposition among more protectionist EU countries.

David Cameron comes to Brussels for an EU summit determined to push the Pakistan emergency to the top of the agenda. The summit was to be dominated by foreign policy priorities on the US, Russia, China and India.

Britain is keen to give Pakistan what is described as "enhanced access" to EU markets to help stabilise the country in the wake of the war in neighbouring Afghanistan. Over the summer Cameron reached out to Asif Ali Zardari, the Pakistan president, by saying he would fight hard to give Islamabad preferential access to the EU.

A failure in the EU negotiations may harm Cameron's attempts to soothe relations with Islamabad after he caused great offence by saying that Pakistan was exporting terrorism.

The prime minister has written to Herman Van Rompuy, the president of the European Council chairing tomorrow's summit, to call for "a concrete political commitment from the EU to Pakistan to enhance significantly its access to the EU market in the short term".

In the letter, also sent to other European leaders and obtained by the Guardian, Cameron said: "I am absolutely convinced that we need to agree a significant measure on trade which delivers greater market access in the short term."

Senior British diplomats argued that the scale of the Pakistani crisis meant that it was the most pressing issue for the summit, although Van Rompuy barely mentioned Pakistan in outlining his plans for the meeting.

The British push for trade privileges for Islamabad will be resisted by EU countries with big textile industries that fear having their markets flooded with cheap goods from the region. At least four countries, including Portugal, Italy and France, are reluctant to give trade privileges.

"There are problems getting them on board. Each option is complicated," admitted a senior British diplomat. "There is a risk of raising this as an objective and failing to deliver."

EU foreign ministers discussed British demands last week but failed to conclude an agreement. The concessions to Pakistan could entail reducing tariffs on its exports or the EU suspending the tariffs unilaterally, but, apart from opposition within the EU, this could also run into problems with the World Trade Organisation. The EU has already committed more than €230m (£191m) in emergency aid and flood relief to Pakistan, with the UK the biggest single EU national contributor at around €60m.

According to British government figures, the flooding has affected 20 million Pakistanis or one in eight of the population. "This is a disaster of biblical proportions," said the senior diplomat. "There's a need to deal with the longer-term impact."

Brussels is planning a five-year "engagement plan" with Pakistan, but Cameron insisted that the EU must do more. "We should go beyond [that] to set out an ambitious new partnership on serious economic reform and trade, the benefits of which will be worth more to Pakistan than even a sizeable aid package."

Pak-US sign US\$ 482,000 agreement in LPG transport fuel conversion -- APP

Pak-US sign US\$ 482,000 agreement in LPG transport fuel conversion
ISLAMABAD, Sep 15 (APP): Pakistan and United States Wednesday signed an agreement worth US\$ 482,000 for feasibility study in seven districts for Liquid Petroleum Gas (LPG) Transport Fuel Conversion Project. The agreement was signed by Managing Director National Energy Conservation Centre (ENERCON) Faridullah Khan and Stephen C Engelken, Deputy Chief of Mission US Embassy at the Environment Ministry in presence of the Minister for Environment Hamid Ullah Jan Afridi, Secretary Environment Javed Malik and other officials from the US mission and the Ministry. Speaking on the occasion, the Minister appreciated the US cooperation in the environment sector and informed that the country has already launched a project of running 8000 Green Buses in different cities of the country.

The project shall be executed by the US Trade and Development Agency (USTDA) and National Energy Conservation Centre (ENERCON).

Afridi highlighted that under the LPG-TFC project, the operational requirements to convert Karachi, Hyderabad, Multan, Lahore, Faisalabad, Peshawar and Islamabad and Rawalpindi bus fleets to LPG will also be assessed in detail.

"A comprehensive analysis will be carried out demonstrating the viability of LPG as an alternative fuel to CNG and diesel and operational requirements needed to adopt LPG fuelled bus operations in these cities," he said.

The minister explained that based on detailed economic and financial analysis, the role of private capital and investment for implementation of the project will be determined to supply a bus fleet with LPG equipment on a commercial versus financial lease basis.

The options shall be discussed with representatives of the World Bank, Asian Development Bank, and at least one other international financial institution that has made significant investments in Pakistan, before formulating final recommendations, he added.

Stephen C. Engelken, Deputy Chief of Mission expressed commitment of the US Government for cooperation and collaboration with Pakistan in all fields of economy especially in trade and development.

He explained that ENERCON will utilize the grant funds, on behalf of the Pakistan Government to implement a project on LPG Transport Fuel Conversion in the country, which is expected to be completed by December 2011.

It was further elaborated that a detailed and comprehensive feasibility study under this project will produce useful information and data with necessary analysis required to consider adopting liquefied petroleum gas (LPG) as a fuel source for land transportation operations in Pakistan.

Supply and demand forecast and assessments, including supply from Persian Gulf, among other sources, shall also be carried out, Stephen said.

The technical and operational specifications required to adopting LPG as a transportation fuel, including any infrastructure requirements, as well as the

economic, financial and legal considerations will be worked out for the implementation of the project, he added.

Secretary Environment, Muhammad Javed Malik pointed out that a preliminary review of the project's anticipated impact on the environment shall be conducted, with reference to all pertinent national, provincial and/or local requirements.

The review shall identify potential negative and positive impacts, discuss the extent to which they can be mitigated, and develop plans for an environmental impact assessment as may be required under the rules and regulations in force in Pakistan, as and when the project moves forward to the implementation stage, he said.

China hands over 3rd F-22P Frigate to Pakistan -- Voice of Karachi

Pakistan and China have made yet another landmark achievement in expansion of their long and unwavering bilateral defence cooperation.

Chief of Naval Staff Admiral Noman Bashir while performing the commissioning of the third F-22P frigate, PNS SAIF here on Wednesday said that it is indeed a proud moment for both Pakistan and China, where like first and second, the third F-22P frigate is also being delivered ahead of schedule. "It is an extra ordinary achievement when looked at the technical complexities of this mega project", said CNS Admiral Noman Bashir while addressing an impressive ceremony that was largely attended including President CSSC, Senior Officers from Pakistan and PLA Navies, Senior Management of SASTIND, CSSC, Hudong Shipyard and CSTC. Congratulating Pakistan and PLA Navies, CSTC and Hudong Shipyard and CNO (China) teams for their successful joint efforts Admiral Bashir also congratulated the Commanding Officer Captain Zubair Shafique and his crew for their contribution. "May Allah bless PNS SAIF and all those who sail in it" he said.

Admiral Noman Bashi said that no doubt, this feat has been achieved through focused approach at all levels of management and total cooperation between PLA (Navy), SASTIND, CSSC, Hudong Shipyard and CSTC. He pointed out that it would not be out of place here to reaffirm that Pak-China relationship is unique and does not draw any parallel in the world.

This relationship, the CNS said over the years has matured in all fields, particularly in defence. "Present geo-political situation demands further strengthening of our relations and I assure you, that Pakistan is deeply committed to achieve our shared objectives", the CNS observed.

Admiral Noman Bashir said that the environment around us warrants Pakistan Navy to be prepared to counter the forces, challenging our sovereignty as well as regional peace and security. "I am confident that induction of these ships will not only supplement our combat potential but will also afford Pakistan Navy the opportunity to distinctly uphold its forward presence in area of interest, contributing to balance the power equation in the region" said Admiral Noman Bashir.

"Let me say that today I feel contented to see the project progressing smoothly" said Admiral Noman Bashir adding that the commissioning of PNS SAIF concludes the construction phase of F-22P ships in China. He expressed the confidence that the construction of 4th F-22P Ship in Pakistan will also be accomplished successfully with full cooperation of Chinese friends.

Meets Political Commissar

Another report says; Chief of Naval Staff, Admiral Noman Bashir met Political Commissar of Shanghai Garrison Command, Maj. General Zhu Zhenping at the State Guest House here Wednesday.

At the meeting both sides discussed matters pertaining to military cooperation between Pakistan and China, with particular reference to Navy.

Admiral Noman Bashir told Maj. General Zhenping that the people of Pakistan are grateful to China for its timely relief assistance for the flood affected people and apprised him of the current flood situation in his country. Maj General Zhu Zhenping reiterated the commitment of the Chinese government towards providing full support to the country during the floods as well as in meeting the requirements of Pakistan Navy.

EU Cuts Tariffs to Aid Pakistan .Article Comments (1) more in World ».[Email](#)[Print](#)[Save This](#) ↓ [More.](#) -- By JOHN W. MILLER

EU Cuts Tariffs to Aid Pakistan .By JOHN W. MILLER

BRUSSELS—European Union governments agreed to suspend some tariffs on imports from Pakistan in an effort to help it recover from this summer's brutal flooding.

The cuts, however, will be less than hoped for by many activists, EU officials said, a sign that the recession is limiting what rich countries are willing to do to help those in need. Donor countries are meeting Sunday in New York to discuss ways of raising more money for reconstruction in Pakistan.

U.S. special envoy to Pakistan and Afghanistan Richard Holbrooke said Thursday that the world will be able to fund only a quarter of the tens of billions of dollars needed to rebuild Pakistan, according to the Associated Press.

Pakistan sustained economic damage of around \$15 billion, roughly 10% of its gross domestic product. Flood-relief aid committed to Pakistan so far amounts to \$1.1 billion. Pakistan will have to pay for much of the reconstruction, especially by improving its meager tax-collection record, Mr. Holbrooke said. "I don't want to withhold money they need, but I think we have to be clear that the Congress is going to be reluctant to give money if the money is filling in a gap because people are not paying taxes," he said.

With aid budgets limited, diplomats have turned to trade, where Pakistan has ample room to grow. With 170 million people, Pakistan is the sixth most populous nation. Yet its exports totaled only \$13.1 billion last year, roughly the same as Ecuador, population 13.4 million. The EU imported only \$4.6 billion in goods from Pakistan last year, ranking Pakistan 46th among all of the EU's trading partners. Pakistani exports to the U.S. amounted to \$3.2 billion.

Pakistani textile firms, under pressure from Chinese competition, have taken the lead in lobbying for better market access in the U.S. and EU. They are finding some allies. The U.S. Chamber of Commerce wrote to Secretary of State Hillary Clinton and U.S. Trade Representative Ron Kirk last month to advise tariff cuts.

The U.S., which has donated more to the Pakistan relief efforts than any other country, has so far declined to offer tariff cuts due to pressure from American textile producers.

"The United States already provides considerable long term assistance and preferential market access for exports from Pakistan," said a USTR spokeswoman. "We currently are considering how best to structure continuing U.S. assistance in view of the changed circumstances presented by the flood," she said.

On Thursday, EU leaders offered "the immediate and time-limited reduction of duties on key imports." Pakistan will also be allowed to join a low-tariff scheme known as GSP-plus by 2014. EU Trade Commissioner Karel De Gucht will administer the specific cuts.

In the end, the cuts will be about \$400 million a year, EU officials said. The officials expect the commissioner to limit the cuts to around that amount to protect manufacturers in textile-producing nations such as Italy, Spain and France, which say they fear being drowned out by Pakistani imports. There are also some reservations in the EU's trade office that Pakistan might take away too much market share from other "vulnerable" countries, such as Tunisia, Turkey and Mexico, an EU

official said.

Aid agencies praised the move. "Europe today stood out from the crowd and showed the political resolve that is needed when major humanitarian emergencies emerge, like the one currently affecting over 20 million people in Pakistan," said Elise Ford, head of Oxfam's Brussels office.

Pakistani officials also lauded the plan. A similar plan had been enacted for a few years after the Sept. 11, 2001 attacks in the U.S.

"Preferential access for Pakistani textiles in the EU market would strengthen Pakistan's hands in fighting terrorists by creating jobs and prosperity," said Farahnaz Ispahani, a spokesman for President Asif Ali Zardari. "President Zardari has consistently argued that enabling Pakistan to realize its full economic potential will lead to our expanding trade and eliminating need for aid."

Italian MPs team to visit Pakistan in near future -- The Nation

Italian MPs team to visit Pakistan in near future

ISLAMABAD – To support the flood victims and economy of Pakistan members of Italian Parliament will visit Pakistan in near future.

This was stated by Federal Minister for Minorities Shahbaz Bhatti while talking to TheNation on telephone from Rome on Wednesday. He said his meeting with the parliamentarians remained very successful. He added that all the members have shown solidarity with the flood affectees in Pakistan.

The president of Italy-Pakistan Friendship Association has assured that Italy would support its level best to the people of Pakistan in such a testing moments, he said. Bhatti said that parliamentarians have assured him that they will mobilise business community of Italy to support Pakistan's economic revival. He said that his visit to Italy remained very successful and it was in the best interest of the people of Pakistan. The pledged aid by Italy would help to overcome the problems of the victims, he added.

To a question, he said that all the Christian charity organisations would especially play their role in the relief and rehabilitation of the flood victim citizens across the Pakistan.

To another question, he said that he would attend the peace prize ceremony held at ancient university of the Naples city. The ceremony is about minority human rights, he added.

Pak-US grant agreement - US to provide \$0.482m for LPG TFC project -- Daily Times

Pak-US grant agreement

US to provide \$0.482m for LPG TFC project

ISLAMABAD: United States has decided to provide Pakistan grant assistance worth \$0.482 million for Liquefied Petroleum Gas Transport Fuel Conversion (LPG TFC) project.

A detailed and comprehensive feasibility study under this project will produce useful information and data with necessary analysis required to consider adopting liquefied petroleum gas (LPG) as a fuel source for land transportation operations in Pakistan.

In this regard, a grant agreement signing ceremony was held in the Ministry of Environment between Government of the United States of America, acting through the US Trade and Development Agency (USTDA) and National Energy Conservation Centre, Ministry of Environment for "Liquefied Petroleum Gas Transport Fuel Conversion (LPG TFC) Project" in Islamabad Wednesday.

The ceremony was held in the presence of Hameed Ullah Jan Afridi, Federal Minister for Environment, Muhammad Javed Malik, Secretary Environment. Whereas the grant agreement was executed and signed by Stephen C. Engelken, Deputy Chief of Mission and Mr Faridullah Khan, Managing Director (ENERCON) on behalf of the governments of USA and Pakistan, respectively.

At the time of serious energy crisis prevailing in Pakistan, government of the United States of America has agreed to provide a grant of \$0.482 million to ENERCON, the National Energy Conservation Centre under the Ministry of Environment for the Liquefied Petroleum Gas Transport Fuel Conversion (LPG TFC) project. Stephen C. Engelken, Deputy Chief of Mission in the ceremony expressed commitment of the government of USA for cooperation and collaboration with the government of Pakistan in all fields of economy especially in trade and development. He explained that ENERCON would utilise the grant funds on behalf of the government of Pakistan to implement a project on LPG TFC in the country, which is expected to complete by December 2011.

It was further elaborated that a detailed and comprehensive feasibility study under this project will produce useful information and data with necessary analysis required to consider adopting LPG as a fuel source for land transportation operations in Pakistan. Supply and demand forecast and assessments, including supply from Persian Gulf, among other sources will also be carried out.

Technical and operational specifications required to adopt LPG as a transportation fuel, including any infrastructure requirements, as well as the economic, financial and legal considerations will be worked out for the implementation of the project. staff report

The strategically situated port at Gwadar in Balochistan is all set to be handed over to China

The strategically situated port at Gwadar in Balochistan is all set to be handed over to China.

Having been constructed by Pakistan's "all-weather ally", the port's control may just have slipped from Singapore's clutches due to financial issues.

The News reported on September 16: "It will mean much more than the transfer of power at the Gwadar port. The Chinese will build Gwadar as a tax-free industrial hub... and a network of roads and railways... to China through the ancient Silk Route. An ambitious deal to build railways along the Khunjab Pass has already been signed between Pakistan and China. The Chinese are more suited to develop the port and the network of rail and roads in Balochistan as they have experience and the muscle to work in the troublesome part of Pakistan."

An editorial in the newspaper the next day welcomed the development: "There are a number of points which would suggest that the Chinese may be more profitable partners for us at Gwadar. Not the least of these is the vast tonnage of shipping that they could bring in, the oil and gas termini they could develop and the potential for infrastructure development that would follow along. We have already inked an agreement with the Chinese for a feasibility study of a rail link roughly parallel to the Karakoram Highway. It is no stretch of the imagination to see that link running from Kashgar to Gwadar in the next 10 to 15 years. They are already working with us in Gilgit-Baltistan on the upgrading of the Karakoram Highway to an all-weather highway, they are resilient people and able to work in the sometimes difficult environment we present."

Pakistan receives first shipment of power plant donated by UAE -- Daily Times

Pakistan receives first shipment of power plant donated by UAE

Sep 17, 2010 - 03:31 -

WAM Islamabad, Sep 17th, 2010 (WAM)--Pakistan yesterday received the first parts of the electric power station, which was earlier donated by the late Sheikh Zayed bin Sultan Al Nahyan to help the Pakistani government to address shortage in the electric power.

It is scheduled that all parts of the power plant with a capacity of 320MW, would reach Pakistan in three stages, of which the last will be in the end of October.

The Pakistani Geo TV channel said the kind gesture came from His Highness Sheikh Khalifa bin Zayed Al Nahyan, during the visit of President Asif Ali Zardari, President of the Islamic Republic of Pakistan to Abu Dhabi, referring to the memorandum of understanding signed by His Highness Sheikh Diab bin Zayed Al Nahyan, Chairman of Abu Dhabi Water and Electricity Authority with Raja Pervez Ashraf, Pakistani Minister of Water and Energy in February of 2009 to deliver the power station, which operates on natural gas, to Pakistan.

The newspaper "Daily Times", said the delivery of the power station by the United Arab Emirates reflects the depth of the friendly relations between the two countries. Meanwhile, the Pakistani President said that the station is dedicated to the people of Pakistan and will greatly assist in meeting the immediate needs of power, stressing that people will never forget this noble gesture, which he described as a symbol of love and fidelity.

The newspaper quoted a spokesman for the Pakistan Electric Power Company "Bebeko" as saying that the station consists of five units each with a capacity of 16 MW and eight other units each generates 30 megawatts.

Chinese takeaway -- The Dawn

Chinese takeaway

The strategically situated port at Gwadar in Balochistan is all set to be handed over to China. Having been constructed by Pakistan's "all-weather ally", the port's control may just have slipped from Singapore's clutches due to financial issues.

The News reported on September 16: "It will mean much more than the transfer of power at the Gwadar port. The Chinese will build Gwadar as a tax-free industrial hub... and a network of roads and railways... to China through the ancient Silk Route. An ambitious deal to build railways along the Khunjrab Pass has already been signed between Pakistan and China. The Chinese are more suited to develop the port and the network of rail and roads in Balochistan as they have experience and the muscle to work in the troublesome part of Pakistan."

An editorial in the newspaper the next day welcomed the development: "There are a number of points which would suggest that the Chinese may be more profitable partners for us at Gwadar. Not the least of these is the vast tonnage of shipping that they could bring in, the oil and gas termini they could develop and the potential for infrastructure development that would follow along. We have already inked an agreement with the Chinese for a feasibility study of a rail link roughly parallel to the Karakoram Highway. It is no stretch of the imagination to see that link running from Kashgar to Gwadar in the next 10 to 15 years. They are already working with us in Gilgit-Baltistan on the upgrading of the Karakoram Highway to an all-weather highway, they are resilient people and able to work in the sometimes difficult environment we present."

Japan grants \$407,318 for supporting flood victims -- Daily Times

Japan grants \$407,318 for supporting flood victims

ISLAMABAD: The government of Japan decided to extend financial support of \$ 407,318 to the Al-Khidmat Foundation, a non-government organisation, for the Project for Supporting the Flood Affected People in Charsadda, Khyber Pakhtunkhwa.

The agreement for the project was signed on Friday at the Japanese Ambassador's residence in Islamabad between Ambassador of Japan to Pakistan Chihiro Atsumi and the president of Al-Khidmat Foundation Naimatullah Khan. The grant would be utilised for flood relief activities in Charsadda. This project would benefit more than 150,000 people that have lost their property, livestock, crop and shelter.

Ambassador Atsumi expressed hope that Japan's emergency relief would further strengthen the existing friendly relations between the people of Japan and Pakistan. The Japanese Disaster Relief Team started its airlift activities by helicopters in Multan and also started its medical support activities in southern Punjab. staff report

The United Nations and its partners on Friday launched an appeal for over \$2.6 billion -- UNITED NATIONS

UN launches \$2.6 billion appeal for flood-hit Pakistan

* Money will help fund 483 projects

* New appeal includes \$459.7 million requested earlier

UNITED NATIONS: The United Nations and its partners on Friday launched an appeal for over \$2.6 billion – the largest ever – to help up to 14 million flood victims for one year.

The money would help fund 483 projects, which are to be carried out by 15 UN bodies, the International Organisation for Migration and 156 national and international non-government organisations (NGOs). The new appeal includes \$459.7 million requested earlier on August 11. A UN press statement said Pakistan's development prospects might be disrupted for many years.

“The damage to economic infrastructure and livelihoods is immense. Irrigation, drainage and storage facilities are badly affected. Farmers who lost their crops and who are not able to plant their fields by November are likely to remain dependent on aid until well into 2012. Hundreds of thousands more lost their shops or other small businesses.”

“We are seeing the equivalent of a new disaster every few days,” said Valerie Amos, the UN under secretary general for humanitarian affairs and emergency relief coordinator. “Yesterday, new breaches of the embankments of Manchhar Lake flooded more villages. Millions of people have lost everything. Our task is to give people the help they need,” she added. The appeal seeks funding for various sectors, including agriculture; camp coordination and management, community restoration; coordination; education, food, health, logistics, nutrition, protection, shelter, water, sanitation and hygiene. From the initial request of \$459 million, 80 percent has been received, leaving a gap of \$1.6 billion.

“The size of the revised appeal reflects the enormous human and geographic scale of the catastrophe, and the necessity of putting into place the right kind of early recovery, including projects in agriculture, community restoration, education, health and shelter,” the statement read. app

Pak China cooperation in building submarines, bigger ships war identified:Admiral Noman -- APP

Pak China cooperation in building submarines, bigger ships war identified:Admiral Noman

BEIJING, Sept 19 (APP): After successful completion of construction of three F-22 P Frigates in China, Chief of Naval Staff Admiral Noman Bashir said that Pakistan has identified to China the cooperation in the field of construction of submarine, bigger war ships, acquiring modern weapons and equipments. "We have the history of cooperation in the Navy with China like we have cooperation in all other fields", said Noman Bashir while talking to media here at a reception on Saturday evening in which Ambassador of Pakistan to China Masood Khan was also present.

The CNS said that Pakistan Navy has already taken over three Frigates and the fourth one is being constructed with Chinese cooperation in Karachi Shipyard and Engineering Works and hoped that like the three frigates, the construction of fourth ship in Karachi will be completed ahead of schedule.

"We will not stop here and this cooperation will continue", said Admiral Noman Bashir while replying to a question.

He said that during his meetings with Chinese side, he had identified areas including building of submarines, as so far we had not entered into joint construction of submarines.

This is one of areas Pakistan would now like to explore, he noted.

He said that Pakistan also like to go for construction of bigger ships with cooperation of China.

These ships would be bigger than the current F-22 P Frigates, he added.

There is lot of discussion that are taking place, he said adding "obviously we will have the ships and submarines which will be according to our requirements and specifications".

Also, the CNS said that in the areas of weapons and sensors we are going beyond what we had.

On floods in Pakistan and Chinese relief assistance, Admiral Noman Bashir said that we are grateful to the government and the people of China for their timely assistance for the flood affected people.

He said that the Chinese Medical team is doing an excellent job and Pakistan Navy has taken the responsibility to look after them.

He said that before coming here he went to the Chinese Mobile Hospital which was established in Thatta and they were doing remarkable job.

In addition to medical team and hospital, there was lot of flood relief supplies we received from China.

Flood had caused great deal of damage in Pakistan, said Admiral Noman Bashir adding that these unprecedented floods we did not experience in our history.

The floods are not confined to one part of the country, but caused widespread damage from north to south, he added.

Pakistan confirmed that co-production with China submarines and large warships -- LONDON

Pakistan confirmed that co-production with China submarines and large warships

China, Pakistan built F-22P missile frigate

LONDON September 20 News: Associated Press of Pakistan (APP) 19 日 reported that Pakistan Navy Chief of Staff 诺曼巴希尔 (NomanBashir) General said that following the successful completion of three in the Chinese F-22P frigates production after Pakistan and China have been determined to be larger in the production of submarines and warships, as well as procurement of modern weapons and equipment to cooperate.

18 evening, Bashir said in the media conference: "As we and China in all other areas of cooperation, both countries also cooperate with the history of the Navy." Pakistani Ambassador Masood Khan also attended the meeting.

According to al-Bashir said that Pakistan Navy has already received three frigates, the first four are within a shipyard in Karachi Pakistan joint construction. Palestinians hope that the first four frigates to the same as the other three, completed ahead of schedule. Referring to the performance of F-22P frigates, the al-Bashir will be said: "We are very satisfied with its performance, some of the technology is not inferior to the West."

Bashir will visit to China four times last year, said Pakistan wants to buy from China have more firepower and greater ships, such as the 4,000-ton frigate. It also plans to buy more British and French warships. Pakistan and China had proposed in the military and commercial fields (such as fisheries, economic development zones and goods, etc.) to develop strategic cooperation at sea.

When answering questions, he said: "We will not end, this cooperation will continue." Bashir pointed out that staff met with the Chinese side, he has identified areas of cooperation including the construction of submarines. He said that so far has not co-production between China and Pakistan submarine, and this is Pakistan now want to develop one of the areas.

In addition, al-Bashir said that Pakistan also hopes to build warships, submarines and more large-scale cooperation with the Chinese. He added that these ships may be higher than the current F-22P frigates more. Bashir said the two sides are currently carrying out a lot of discussion on this, "We are obviously in accordance with their requirements and specifications for the construction of warships and submarines Lai." Moreover, al-Bashir said the two countries will deepen the cooperation in the field of weapons and sensors.

Earlier there were reports that Pakistan's strategic organizations and the Beijing government also plans to discuss the training and leasing nuclear submarines. Chinese navy's "summer class" ballistic missile submarine could be a suitable start, Pakistani government has selected a group of Pakistani naval officer, to learn how control of ballistic missile submarines: Xian Li Lun in An Shang study or academic knowledge, then Haishang for operational training, and finally to the strategic deployment.

Referring to Pakistan's flood and disaster relief assistance to China, al-Bashir said that they are very grateful to the Chinese government and people for the people of Pakistan and timely relief in the affected areas. He said members of the Chinese medical team did a great job, Pakistani naval duty to protect them properly.

Bashir said to the venue before he went to the Chinese medical staff in the tower (Thatta), China set up mobile hospitals, he said that the Chinese medical staff done a good job. Bashir also said that, in addition to medical teams and hospitals, Pakistan also received a large number of relief supplies from China.

Govt to ink GPFA of TAPI on September 20 -- Daily Times

Govt to ink GPFA of TAPI on September 20

Staff Report

ISLAMABAD: The federal government will reportedly ink the Gas Pipeline Framework Agreement (GPFA) of Turkmenistan-Afghanistan-Pakistan-India (TAPI) gas pipeline on September 20.

Sources informed Daily Times that Federal Minister for Petroleum & Natural Resources Syed Naveed Qamar would ink the GPFA agreement along with the counterpart ministers from Turkmenistan, Afghanistan and India on September 20.

TAPI gas pipeline project is being planned to bring natural gas from Turkmenistan through Afghanistan to Pakistan and India. The Heads of State of Turkmenistan, Afghanistan and Pakistan signed Inter Governmental Agreement (IGA) for joint oil and gas pipeline projects between the three countries in 2002.

India joined the project in 2008 and a revised GPFA was initialled for the induction of India, thus changing the project from TAP to TAPI. The Asian Development Bank (ADB) sponsored pre-feasibility study – conducted in 2004, which indicated that the 1680 km pipeline project was economically and financially viable while the estimated cost was \$3.3 billion (revised to \$ 7.6 billion in 2008).

“Pipeline would be designed to carry 3.2 BCFD gas from Turkmenistan, delivering 0.5 BCFD to Afghanistan and 1.35 BCFD each to Pakistan and India. Pakistan would be able to produce 6000 MW electricity using 1.35 BCFD gas,” he added.

Sources maintained that President Asif Ali Zardari has directed Syed Naveed Qamar to expedite concluding various agreements with the target of finalising Gas Sales Purchase Agreement by the end of this year or early next year.

He further added that after the signing of GPFA in Ashgabat next week, rigorous rounds of negotiations would be convened in order to finalise the Gas Sales Purchase Agreement during a proposed TAPI summit in Ashgabat. The renewed attention to this project from the present government would lead to significantly improving energy availability for Pakistan and help resolve the energy crisis.

Turkmenistan and Afghanistan had signed an agreement on construction of the Trans-Afghanistan (TAPI) gas pipeline for the transfer of Turkmen gas to Pakistan and India, on August 31 (Tuesday), however TAPI project, first put forward in 1995, was promoted by the country's late leader, Saparmurat Niyazov, in the early 2000s.

It secured strong support from Washington after a US-led offensive ended the Taliban's five-year rule over Afghanistan in 2001. Turkmen President Kurbanguly Berdymukhamedov and his Afghan counterpart Hamid Karzai have agreed to discuss the project at the 65th United Nations General Assembly in New York in September.

India signs deal for Turkmen gas through Afghanistan, Pakistan -- (IANS) India

India signs deal for Turkmen gas through Afghanistan, Pakistan 2010-09-20 22:10:00

New Delhi, Sep 20 (IANS) India, along with Pakistan, Afghanistan and Turkmenistan, Monday signed the gas sales purchase agreement (GSPA) for the trans-national pipeline project, which will transport gas from Turkmenistan to all these countries.

Minister of State for Petroleum and Natural Gas Jitin Prasada represented India at the meeting of the steering committee for the Turkmenistan-Afghanistan-Pakistan-India (TAPI) gas pipeline held at Turkmenistan's capital Ashgabat, a release issued by the petroleum and natural gas ministry here said.

Two documents were signed Monday by the four countries at the meeting. These included the heads of agreements for the proposed Gas Sales Purchase Agreement (GSPA) and initialization of the Gas Pipeline Framework Agreement (GPFA).

'The cabinet has already given in-principle approval to the GPFA. However the final signing would be done only after the Cabinet approves this document,' the press release said.

The meeting was also attended by Turkmenistan Deputy Prime Minister Baymyrat Hojammedov, Turkmenistan Oil and Gas Minister B. Nedirow, Afghan Mining Industry Minister Wahidullah Shahrani and Pakistan's Petroleum and Natural Resources Minister Naveed Qamar.

Under the TAPI project, a 1,680-km pipeline will be laid down with a capacity of 90 million metric standard cubic metre per day (mmscmd). India would get a share of 38 mmscmd.

As per the release, Prasada said the project could be successful only if the transit fees for the gas through various countries is kept 'at minimum'. He added that the pricing and the GSPA issues had to be resolved to the full satisfaction of all partner countries.

Further, the security issues had to be 'properly addressed', so that there was complete clarity on institutional mechanisms to address this subject, added Prasada.

All Day**Turkmen and Texan oilmen -- Nicholas Watson in Prague**

Turkmen and Texan oilmen

September 20, 2010

Taking a leaf out of the geopolitical strategy book of neighbouring Kazakhstan, Turkmenistan appears from its latest moves to be following a similar oil and gas development policy that's geared toward balancing the competing claims of Asia, Russia and the West.

The latest move concerns diversifying export routes for the country's natural gas. On September 20, the energy ministers of Turkmenistan, Afghanistan, Pakistan and India are scheduled to sign an agreement in Ashgabat to build the Turkmenistan-Afghanistan-Pakistan-India (TAPI) gas pipeline. This southern route for Turkmenistan's gas exports – which currently consists of two pipelines to Iran that sent just 6bn cm of gas in 2009 – offers a third way to the traditional northern route to Russia and the new eastern route to China. The TAPI pipeline would run some 1,700 kilometres south and have a throughput capacity of 30bn cubic metres per year (cm/y). At the same time, Berdymukhamedov is pushing his government to conclude gas supply agreements with Pakistan and India, which have expressed interest in buying up to 70bn cm/y of Turkmen gas.

However, pipelines are a bit like houses in that if one has been on the market for a long time, it usually means there's something wrong with it. The problem for TAPI, which has been on the drawing board since the 1990s, is the chronic instability in Afghanistan, which shows no sign of improving any time soon. "I would say the Turkmen are fairly serious about the pipeline, but the project itself seems to stand little chance of proceeding; pushing for TAPI progress in itself could be beneficial for Turkmenistan, however, in perhaps balancing out China's rising influence in Turkmenistan with a potential counterweight in India," says Andrew Neff of the consultancy IHS Global Insight.

China has been the main beneficiary so far of Turkmenistan's attempts to diversify its export routes, with the building of the Central Asia-China gas pipeline that runs through Uzbekistan and Kazakhstan and a long-term supply agreement struck with China National Petroleum Corporation (CNPC) that should see Turkmen gas exports eventually reach 30bn cm/y over the next few decades.

On 13 August, Turkmenistan state television reported that during a meeting with his top energy officials, Berdymukhammedov pushed for the finalisation of a \$4.1bn loan from China's state development bank, which would go toward building a "state-of-the-art complex for cleaning gas so its quality meets the highest international standards", as well as development of the South Yolotan gas deposit, which UK-based international advisory firm Gaffney Cline & Associates in 2008 estimated has between at least 4 trillion cm and 14 trillion cm, with its "best" estimate at 6 trillion cm, which would rank it among the world's top five gasfields.

"The Turkmen government has yet to say who, if anyone, it would involve in developing the [South Yolotan] field, but China is light years ahead in the race – not even a real competition at this point," says Neff. "China has the advantage in terms of finances, infrastructure – the Central Asia-China pipeline is now a reality, whereas Nabucco is still more of an idea than anything else and a trans-Caspian pipeline would still be needed after that – and geographic proximity. Plus, CNPC has already clinched a long-term gas purchase and supply deal with Turkmenistan, and South Yolotan gas is likely going to be needed to help fulfil this deal."

Any mention of the European Union-backed Nabucco gas pipeline was notably absent from the state television report, which will be a worry for Brussels. But

perhaps the most surprising omission was reference to the country's traditional energy partner, Russia.

ADB expands Pakistan trade finance by \$500m -- ISLAMABAD

ADB expands Pakistan trade finance by \$500m

Staff Report

ISLAMABAD: The Asian Development Bank (ADB) is expanding its Trade Finance Programme (TFP) in Pakistan by an additional \$500 million, an ADB statement issued stated on Monday.

It said that this could provide around \$1.5 to \$2 billion of trade finance to help the country cope with the immediate needs arising from the recent devastating floods as well as long-term reconstruction requirements.

ADB President Haruhiko Kuroda announced this at a high-level ministerial meeting on the flood emergency in Pakistan, held at the UN building in New York.

The TFP provides loans and guarantees through, and in conjunction with, international and ADB's developing member country banks to support trade transactions in developing countries. By attracting private sector financing, and because the typically short-term trade finance can roll over, the impact of the additional funding had multiplied. In 2009, TFP exposure of \$249 million to Pakistan banks supported \$983 million in trade.

"The widespread flooding has exacted a heavy toll on the people of Pakistan. They will need medicines and food straight away and, later on, capital equipment to get the economy humming again," Kuroda said

China to build 1GW nuclear power plant in Pakistan -- BEIJING

((China))

China to build 1GW nuclear power plant in Pakistan

BEIJING: China's main nuclear energy corporation is in talks to build a 1GW atomic power plant in Pakistan, a China National Nuclear Corporation (CNNC) executive said on Monday.

China has already helped Pakistan build its main nuclear power facility at Chashma in Punjab, where one reactor is running and another nearly finished, and it has contracts to build two more there, despite the qualms of other governments. Qiu Jiangang, vice president of the CNNC, told a meeting in Beijing that the company was already looking beyond those deals to an even bigger plant.

"Both sides are in discussions over CNNC exporting a 1GW nuclear plant to Pakistan," he said. Qiu confirmed the two countries had signed contracts to build the No 3 and No 4 reactors of about 300MW each at Chashma. He did not give details about who was involved in discussions for the bigger plant and how far the talks had progressed.

A senior Pakistani government official familiar with discussions between Pakistan and China on nuclear cooperation said, "We are facing acute energy shortages and these nuclear power plants are important for us to overcome these shortages." "We as well as China have said time and again that all this cooperation is under the safeguards of the International Atomic Energy Agency and there should not be any worries or concerns about it," said the official, who demanded anonymity. reuters

ECO agrees on China -Pakistan -Iran-Turkey railway line project -- Online

ECO agrees on China -Pakistan -Iran-Turkey railway line project

ISLAMABAD: The recently convened meeting of ECO (Economic Cooperation Organization) has agreed on the CPIT (China-Pakistan-Iran-Turkey) railway line project.

The 4-day meeting of the organization held recently in Islamabad, has reportedly

agreed on starting the Pakistan -Turkey railway services through Iran.

Briefing media after the conclusion of the 4-day meeting, about further issues and agreements as finalized by the council, secretary planning commission, Ghiasuddin Ahmad and secretary general ECO, Khurshid Ahmad Anwar informed that all member countries participated in the meeting which deliberated in such important economic issues like planning infrastructure development, trade and investment, Agriculture and livestock, tourism, industry, and minerals, while member countries also deliberated about establishment of a geological databank.

The meeting also discussed mutual means to promote technical expertise among manpower of member countries in order to fill the required needs.

Close coordination with global organizations like World Bank and Islamic Development Bank was also stressed by members in order to fulfill the financial obligations of such projects like basic health, primary and higher education and development, energy supply and infrastructure.

An increase of 15% in mutual trade, from the current 7% between members in the coming 3- 5 years was also agreed upon, while all the participants, which included Pakistan, Turkey, Afghanistan, Tajikistan, and Iran expressed their satisfaction over the proceedings which also suggested and agreed to enhance the current trade volume of Rs 38 billion.

A meeting in Turkey has been chalked out for this purpose, which would also focus on issues of problems being faced regarding reduction of tariff, and stressed on speeding work on ongoing feasibility study being prepared by NESPAK and Kyrgyz Technical University regarding ECO power system.

PR signs MoU with Chinese company -- Islamabad

PR signs MoU with Chinese company

Islamabad—Pakistan Railways on Wednesday signed a Memorandum of Understanding (MOU) with China Railway Material Import and Export Company. Under the agreement the Chinese company will provide 25,000 metric ton rails to Pakistan Railway.

Minister for Railways Haji Ghulam Ahmed Bilour and Vice President of the Chinese company Liang Jian Zhong has signed the MOU, GM Chinese company Chneng Xianzhou and PR high officials were also present on the occasion.

The 16000 ton rail material would be utilized on Khanewal and Raiwind track while 9000 ton rail material will be used along Lohdhan and Shahdhan track for improvement of signals up-gradation.

The project would cost US\$ 20.625 million, while Pakistan government will provide Rs. 600 million while for remaining expenses talks in progress with China Exim Bank for loan. The project will be completed within 6 months. Minister for Railways Haji Ghulam Ahmed Bilour talking to media said that Pak-China friendship is time-tested and China is a trustworthy friend of Pakistan.

He said that the government of Pakistan had given a lot of incentives to Chinese investors to invest in Pakistan so that the economic ties between the two countries would be further strengthened.

Vice President of the Chinese company Liang Jian Zhong said that government and the people of China always regard Pakistan as their true friend and hoped that existing relations between the two countries would further strengthen in time to come. He said that China also values its relations with Pakistan and these relations would be further improved.

He further said China and Pakistan are the time tested and hoped that this relation would grow in future.—APP

The framework agreement on TransAfghan gas pipeline is signed in Ashgabat -- Ferghana.Ru

The framework agreement on TransAfghan gas pipeline is signed in Ashgabat 21.09.2010 12:46 msk

During 11th session of the steering committee for Turkmenistan-Afghanistan-Pakistan-India (TAPI) the heads of member-state branch ministers signed the framework agreement in Ashgabat on the construction of the gas pipeline, Turkmenistan.Ru reports. The meeting was also attended by the representatives of Asian Development Bank (ADB).

The heads of the branch companies signed the Protocol of amendment to the agreement chapters on purchase and sale of natural gas. The session participants discussed and approved the draft Agreement between the governments of Turkmenistan, Afghanistan, Pakistan and India on TAPI gas pipeline project implementation.

Besides, the participants also approved the meeting schedule of technical working groups and TAPI steering committee in October-November that will prepare final version of the agreements. These documents are going to be presented at the summit of member-states leaders, preliminary scheduled to December in Ashgabat.

Turkmen side also presented the report of independent auditor – Gaffney Cline Company – on certification of Yuzhnyi Eloten (Iolotan) field reserves. In the opinion of guests, the reserves of this gigantic field "evidently prove the capacity of Turkmenistan to ensure long term supply of natural gas to the world markets".

The negotiations on TAPI project have been in progress for over 15 years, says ITAR-TASS. The cost of the pipeline is estimated at \$7.6 billion. The length of the pipeline will reach 1680 kilometers, beginning with Dovletabad field in Turkmenistan and ending with Fazilka settlement at the border of India and Pakistan.

Three-day seminar on Pak-China FTA -- LAHORE

Three-day seminar on Pak-China FTA

LAHORE: A three-day seminar on "Pakistan's Free Trade Agreement with China" has started here on Monday.

Speaking on the occasion, economists said exporters and traders got practical working tips for exports from China in social, historical and economic perspective. Pakistan needed a comprehensive trade plan to enhance its trade volume and to sustain its trade footing in the international trading markets.

Trade Development Authority of Pakistan (TDAP) Director Lahore Shahzad Hussain Rana highlighted the salient features regarding duty concessions of Pakistan-China FTA. He also highlighted the efforts of TDAP in organising this seminar, which he opined, would help exporters in introducing their export products in the countries who have signed FTA's with Pakistan.

GCU Lahore Economics Department Chairperson Asif Saeed said Pakistan needed to chalk out a comprehensive trade plan to overcome its trade deficits and for gaining economic exposure in order to improve its trade growth with China. He highlighted the basic trends and dynamics of South Asian trade flows.

Brigadier Mohammad Saeed Sharif highlighted the practical working tips for exporters in context of social, historical and economic perspective of China. Other speakers including Siddiq-ur-Rehman Rana, Shahid Mehmood made their deliberations on various issues pertaining to Pak China FTA. staff report

British Foreign Secretary welcome EU's Pakistan measures -- Daily Times

British Foreign Secretary welcome EU's Pakistan measures

LONDON, Sept 22 (APP): British Foreign Secretary William Hague has welcomed package of measures announced by the European Union to help Pakistan's recovery from the devastating floods. In a statement released by the Foreign and Commonwealth Office, he said: "Pakistan needs real help urgently after the appalling damage wreaked by the floods. So the British Government is very pleased that EU leaders were able to agree on measures that will significantly aid Pakistan's recovery. Getting that agreement at the EU summit was a major priority for us".

"It took some serious effort from the Prime Minister, myself and other partners to get the deal done at the talks but in the end we achieved a genuinely good result. Our task now is to make sure that these agreed measures are actually delivered and delivered soon."

The EU Summit at Brussels while pledging additional humanitarian and development aid also agreed as trade measure to boost growth including commitment to make Pakistan eligible for the EU's preferential GSP plus scheme from 2014 subject to certain conditions.

The European Commission will now explore options with WTO partners, with a view to presenting a finalised proposal next month.

Column: Pakistan is a part of China's westward challenge to the U.S. -- BY XIAOXIONG

Column: Pakistan is a part of China's westward challenge to the U.S.

Buzz up! Twitter Fark! Type Size A A A Beijing is embarking on a new strategy with regard to Islamabad. Pakistan is becoming a key player in China's ambitious westward expansion vis-à-vis the United States in West Asia and the Indian Ocean.

"A quiet geopolitical crisis," writes Selig Harrison, former South Asia Bureau Chief of the Washington Post, "is unfolding in the Himalayan borderlands of northern Pakistan, where Islamabad is handing over de facto control of the strategic Gilgit-Baltistan region in the northern part of disputed Kashmir to China ... and 11,000 Chinese troops have poured into the Pakistani-administered Kashmir."

Indian military sources confirmed a Chinese infantry battalion now is deployed in Gilgit-Baltistan at the Khunjerab Pass to provide security for Chinese workers and railroad soldiers to work on widening the Karakoram highway and building a high-speed railroad.

The control of Pakistani-administered Kashmir will give China a strategic land access to the Gulf through Pakistan. As Harrison points out, "It takes 16 to 25 days for Chinese tankers to reach the Gulf. When high-speed rail and road links through Gilgit-Baltistan are completed, China will be able to transport cargo from Eastern China to the new Chinese-built Pakistani naval bases at Gwadar, Pasni and Ormara, just east of the Gulf, within 48 hours."

Chinese People's Liberation Army soldiers also are constructing 22 tunnels in secret locations in Pakistan. One obvious use of these tunnels is for the projected gas pipeline from Iran to China, but they also can be used for missile storage sites in Pakistan.

Analysts in Southeast and South Asia now see Pakistan as "China's other North Korea." As K. Subrahmanyam, senior defense analyst of Indian Express, summarizes, "major projects in Pakistan-occupied Kashmir (PoK), large-scale military presence in PoK, plans for a railway line and oil and gas pipelines connecting Xinjiang and the Pakistani port of Gwadar, and the agreement to supply Pakistan with two nuclear reactors, all these taken together indicate that Pakistan is

likely to play the major role in China's West Asia strategy that North Korea does in its East Asia strategy."

China is not only the biggest arms supplier for Pakistan, but Islamabad also depends on Beijing for transfer of technology and military know-how. China has not only modernized Pakistani armed forces, but also established many advanced joint military projects in Pakistan. China has provided Pakistan's military with more than 400 combat aircrafts, 1,600 large tanks, and 40 navy ships.

Pakistan's nuclear and missile projects are backed by China as well. China has consistently provided Pakistan with wide-ranging assistance in helping Pakistan to develop nuclear weapons and a variety of missiles, ranging from short range M-11s to medium range M-9s and intermediate range M-18s, capable of carrying nuclear warheads with an estimated reach of 500-1800 kilometers. "If you subtract China's help from the Pakistani nuclear program," says Gary Milhollin of the Wisconsin Project on Nuclear Arms Control, "there is no Pakistani nuclear program."

China's "generous" assistance to Pakistan is not limited to military and nuclear fronts, but includes the economic front as well. More than 60 Chinese state corporations and more than 10,000 Chinese technicians are working on more than 120 projects in Pakistan. Chinese investment in Pakistan's defense, banking, oil exploration and mining sectors was valued at \$10 billion in 2009, a figure estimated to grow to \$15 billion in 2010.

Pakistan is a critical link in the chain of China's new "westward strategy." Beijing's Pakistan policy, together with its support for Tehran's nuclear weapons program and its sale of long-range missiles to Saudi Arabia, all are connected in China's move to take advantage of what Beijing perceives as declining U.S. power in the region.

China is marching westward through Pakistan. Beijing also is making Islamabad increasingly dependent on China. When asked if Islamabad is worried about Chinese state-owned enterprises taking control of some of Pakistan's most important companies, Pakistan President Asif Ali Zardari stated, "We don't have any concern, and we don't feel China is a threat." "Pakistan's future lies in East with China," Azam Khan Swati, Pakistan's Federal Minister for Science and Technology, remarked recently.

Although the United States has confirmed the information about the growing Sino-Pakistan nexus, and despite President Barack Obama's repeated declarations that Pakistan is central to American security, Pakistan is a country that remains largely ignored by the United States. Washington has made no effort to counter the rising Beijing-Islamabad military alliance and adopted no tangible policy against the nuclear aid by China. It is time for the U.S. to look seriously at the Sino-Pakistan nexus.

TDAP organises seminar on 'FTA with China' -- Business Recorder

TDAP organises seminar on 'FTA with China'

HASSAN ABBAS

LAHORE (September 22, 2010) : Pakistan needs a comprehensive trade plan to enhance its trade volume and to sustain its trade footing in the international trading markets. Experts on international trade stated this while addressing the participants of three days seminar on Pakistan's Free Trade Agreement with China. The three day seminar was organised by Trade Development Authority Of Pakistan (TDAP).

Commercial Attaché of the Embassy of the Peoples Republic of China in Pakistan, Li Sen was also present on the occasion. He also briefed the participants about the possibilities of bilateral trade between the two countries in different sectors.

Participants of the seminar said that the Free Trade Agreement should be beneficial for both the countries and government should help the business men who wants to do business with China. They also said that there is a lot of potential in the trade of livestock sector with China and there is a need to explore the market in China.

The seminar was addressed by Director TDAP Lahore Shehzad Hussain Rana, Chairman Economics Department Government College University Lahore Asif Saeed, Ex-Commercial Counsellor of Beijing Shahid Mahmood Khan, Chairman Pak-China and ASEAN Economic Relations Siddiq-ur-Rehman Rana and Ex-Defence Attaché Beijing Brigadier Muhammad Saeed.

Speaking on the occasion Director Privatisation Commission of Pakistan Kausar Ali Zaidi while explaining the rules of Origin of Pak-China Free Trade Agreement said that claim products be accepted for preferential concession is to be supported by a Certificate of Origin issued by a government authority designated by the exporting Party and notified to the other Party to the Agreement in accordance with the operational certification procedures.

He also said that preservation of exportable products should be ensured. It should be make sure that products should be in good condition during transportation and storage process such as drying, freezing, keeping in brine, ventilation, spreading out, chilling, placing in salt, sulphur dioxide or other aqueous solutions, removal of damaged parts.

Head Research & Analysis Directorate WTO Cell, TDAP Mujeb Khan speaking on the exploring Pakistan's Export Potential to China in the context of Pak-China Free Trade Agreement said that Pakistan's import from China are quite diversified. It imports every thing except petroleum from China.

He said that Except "frozen fish" all items exported to China are not final goods; they are secondary goods or raw material, which is used for further production. He further said that cellular phone sets and network installation equipments are the biggest imports from China and in category - 1 of the FTA. During 2009 Pakistan's import of all kind of telephony appliances including cell phones and its network installation equipment was 66.4 percent of total import of Pakistan.

Pakistan imports almost its entire requirement of; Artificial/Synthetic & Man-made filament yarn, Dredgers, Nitrile-function compounds, from China. However, items like Pesticides/insecticides/herbicides, Electric transformers, Pneumatic tires of rubber, Antibiotics, Oxygen-function amino compounds, Boilers, Plastic made machine parts account for nearly of 50 percent of Pakistan's world imports.

Khan said that for the fiscal year 2009-10 TDAP issued 8058 Certificate of Origin for Pak China FTA, which export value was \$561.178 million. This is over 50 percent higher than last year performance. However, total final figure for this year is yet to be released by FBS, after which detailed analysis can be done.

"Pakistan total export to China during last financial year 2008-09 was US \$684.793 million, however under FTA this export value was 372.153 million, which is 54.34 percent of total export to China. This fact implies that importers of Pakistani

products in China were able to get only half of benefit available under Pak-China FTA," he said.

He further said that 53 non-textiles and non-leather items in which Pakistan's world exports was above \$3 million and Chinese import was more than \$10 million in the year 2009. These items account for only \$ half a million worth of exports to China, whereas; Pakistan's export to the world of these products was \$1,539 million. China's world import of these items were \$14,931 million.

There are 9 items, which are given zero rate market access. Pakistan total export of these items to the world was \$205.5 million. Pakistan could export only 3 items which made \$56 thousand export and remaining 6 items were not exported. It implies that there was a large number of items, which have great potential in Chinese markets, which if utilise properly can generate over \$1 billion export earnings.

About the potential items for the bilateral trade between the two countries he said that Cotton yarn is the only product on export of which Pakistani exporters are availing concession almost 85 percent of total export consignments. There are few items, on export of which Pakistani exporters have availed concessions on a very few consignments, these are Cotton fabrics, Chemicals, Handicraft (Marble), Goat hair, Salt, Copper wire, Plaster of Paris and Razor Blades etc-etc.

German investors show keen interest in Pakistan

German investors show keen interest in Pakistan
Ashraf Ansari

Islamabad—German investors are keen to invest in Pakistan to take advantage of investment friendly policy of the government here.

Stephen Roken, Charge d'Affairs of German embassy said this while giving details about recently concluded visit of 21-member German business delegation to Pakistan.

Talking to journalists along with Dr. Gregor Schotten, Counsellor Political and Economic Affairs and head of Economic Section, Stephen Roken said, the 21-member delegation went home with positive impression of Pakistan. Stehpen said, "It was one if the most important visits of German investors to Pakistan.

The members of the delegation were German businessmen from various sectors such as energy, construction, engineering, environmental technologies, business consulting and other fields.

He said there is possibility for investment in solar and wind energy development.

Replying to a question, he said, although terrorism is part of the reality, but the 21-member German delegation who visited recently was satisfied with the security arrangements made in Pakistan and convinced that perception of security situation being presented in media was wrong. He said 36 German companies are successfully engaged in business in Pakistan and more would come in near future especially in the sector of renewable energy sector.

Replying to a question on the possibility of German investment in other energy sector, German Charge Affairs said, circular debt of billions of rupees, bad management in energy sector and lack of proper energy policy were the major hurdles in the way of foreign investment in this sector.

He said security of payment for the energy produced in the country, was not certain. There is need to have a comprehensive energy policy to encourage foreign investment in this sector.

The world, he said, is not in favour of increasing power rates for the poor, but the subsidy to the influential who can pay, should not be given concessions. Answering a question he said, German will representatives from agriculture sector would visit Pakistan soon as there is great potential for joint ventures and start new projects in Pakistan with German assistance.

Business

ExchangeTwitterDeliciousDiggFacebookLinkedInNewsvinePropellerYahoo!

BuzzPrint Pakistan's central bank, seeking to double Islamic banking assets in three years, is urging lenders from the Persian Gulf to open branches in rural areas.

Albaraka Banking Group, the largest publicly traded Islamic bank in Bahrain, is increasing branches to 80 from 30, Kaleem Iqbal, a senior executive vice president at the local unit, said in a Sept. 21 interview in Islamabad. Meezan Bank, controlled by Kuwait's Noor Financial Investment Co., is opening 25 outlets this year, said Amir Ali, head of investment banking in Karachi.

Gulf banks are looking outside of the region for expansion after lending that complies with Shariah law slumped 46 percent to \$3.3 billion in Europe, the Middle East and Africa this year, compared with \$6 billion in the same period of 2009,

according to data compiled by Bloomberg. Pakistan has six Islamic banks with 668 branches and plans to approve two more as it seeks to boost lending to rural communities, Saleem Ullah, director of Islamic banking at the Karachi-based central bank, said in an e-mail on Sept. 16.

"The State Bank of Pakistan's policy encouraging banks to open branches in rural areas makes it easier to get new licenses," Ali said yesterday in an interview. "We may end up opening 225 more branches in the next four years and the majority of those will be in smaller towns."

Sukuk Issuance

Albaraka plans to spend \$200 million on acquisitions and is looking at buying assets in Indonesia and Malaysia, Chief Executive Officer Adnan Ahmed Yousif said yesterday. The Manama-based bank also plans to sell \$200 million of Islamic bonds, or sukuk, by the end of 2010 and appointed Standard Chartered Plc as a manager for the sale, Yousif said at a conference in Dubai.

"We prefer to either start an Islamic bank or acquire an Islamic bank," he said.

Qatar Islamic Bank plans to sell its first dollar sukuk and will start meeting investors in the Middle East, Asia and Europe from tomorrow, according to a statement from the Gulf state's biggest Shariah-compliant lender.

Global sales of sukuk have dropped this year as debt restructuring in the Persian Gulf, falling property prices and doubts about the strength of the global recovery damped demand for issuance. Planned fourth-quarter sales of \$5.5 billion will help relieve the shortage of supply, data compiled by Bloomberg show.

Islamic bond sales declined 24 percent to \$10.7 billion so far this year, compared with \$14 billion in the same period a year ago, according to data compiled by Bloomberg.

Access to Credit

The spread between the average yield for emerging-market sukuk and the London interbank offered rate widened one basis point to 376 yesterday, according to the HSBC/NASDAQ Dubai US Dollar Sukuk Index. The yield difference has narrowed 91 basis points from 467 at the end of last year.

Shariah-compliant bonds returned 10.8 percent this year, according to the HSBC/NASDAQ Dubai US Dollar Sukuk Index, while debt in developing markets gained 13 percent, JPMorgan Chase & Co.'s EMBI Global Diversified Index shows.

The yield on Malaysia's 3.928 percent Islamic note due June 2015 fell two basis points to 2.63 percent today, according to prices from Royal Bank of Scotland Group Plc. The yield on the Dubai Department of Finance's 6.396 percent sukuk maturing in November 2014 was unchanged at 6.37 percent, RBS prices show.

Pakistan's central bank estimated in a December 2008 report that of the country's 6.6 million farmers, only 2 million had access to credit. Policy makers plan to increase Islamic financing to 12 percent of the total by the end of 2012, from 6 percent, to cater to Muslims, who account for 97 percent of the nation's 170 million population, Ullah said.

'Urban Clients'

"Islamic banks are providing 80 percent of their services to urban clients," said Iqbal at Al Baraka Islamic Bank. "Islamic banks can provide best products to the farmers, who will be more attracted to Islamic services because people in villages are generally more inclined toward the religion."

Pakistan plans to sell sukuk maturing in a year or less in the domestic market by the end of this month, Syed Wasimuddin, a spokesman for the State Bank of Pakistan,

said in an e-mailed statement on Sept. 8.

Islamic banking assets in Pakistan reached 411 billion rupees (\$4.8 billion) as of June, or 6 percent of the total, Wasimuddin said. That compares with 303.3 billion ringgit (\$98 billion) in Malaysia, accounting for 19.6 percent of the total, the central bank said in March. The Southeast Asian nation is the world's biggest market for sukuk.

'Comparative Advantage'

A shortage of investment options and services offered to limited clients is hampering growth in Islamic banking in Pakistan, according to Dawood Islamic Bank Ltd., which is 35 percent owned by Bahrain's Unicorn Investment Bank.

"Islamic banks have no short-term products to deploy their liquidity," Pervez Said, chief executive officer of Dawood Islamic, said in a Sept. 14 interview from Karachi. "It is natural for us to go to non-traditional sectors like microfinance and agriculture."

Agriculture in Pakistan accounted for a quarter of the nation's \$150 billion economy in the fiscal year that ended on June 30, 2010, government data in May showed. The nation was hit by the worst floods since independence in 1947 last month, destroying crops worth \$1 billion.

"The central bank is encouraging Islamic banking institutions to tap non-traditional sectors like agriculture, where they have a comparative advantage over their conventional counterparts," said Ullah.

Ecneec likely to approve 27 projects on September 28 -- RECORDER REPORT

Ecneec likely to approve 27 projects on September 28

RECORDER REPORT

ISLAMABAD (September 24, 2010) : The Executive Committee of National Economic Council (Ecneec), scheduled to meet on September 28 with Finance Minister Abdul Hafeez Sheikh in the chair, is expected to approve 27 projects worth billions of rupees including Rekodiq gold/copper project which will attract over \$6 billion investment, Business Recorder has learnt.

The government and Tethyan Copper Company (TCC) - a joint venture between Canada's Barrick Gold and Chile's Antofagasta are re-negotiating a deal, which had been halted by the Balochistan government earlier. TCC has submitted feasibility report to Balochistan government for review.

The Planning Commission has also tabled "Mangla Dam Raising Project (Revised PC-I) costing over Rs 102 billion" before Ecneec for approval. According to Ecneec agenda available with Business Recorder, the council will consider Gwadar Deep Water Port Project - phase-I (2nd Revised) costing Rs 16.6 billion.

Pakistan and China are jointly working on phase-1 of this project and its second phase will be carried out under a public private partnership. Ecneec may also approve Rekodiq gold/copper project in Balochistan at a cost of Rs 6698.700 million. Agriculture and food sector projects include Agriculture and Food Punjab Economic Opportunities Programme (PEOP) and Pak China National Project for CA and Advanced Ventilated Cold Storage costing Rs 2229.200 million.

Energy sector projects include: National Compact Fluorescent Lamps (CFLs) Project; Rehabilitation of Jabban Hydroelectric Power Station (Revised), District Malakand; Power Distribution Enhancement Programme, Phase-II [(i) Iesco (ii) Gepco (iii) Fesco (iv) Mepco (v) Pesco (vi) Hesco (vii) Lesco (viii) Qesco; Addition of 500 and 220 kV substations and transmission lines for strengthening of existing NTDC system worth Rs 24317 million.

Health sector includes one project "Prime Minister's Programme for Prevention and Control of Hepatitis (Prime Minister's Emergency Action Plan of Hepatitis). The Health Ministry has modified 'Prime Minister Programme for Prevention and Control of Hepatitis (Prime Minister's Emergency Action on Hepatitis)' worth Rs 13.9 billion to attract support of donor agencies.

In Higher Education, apex body may approve projects, which include Establishment of Shaheed Benazir Bhutto University, Benazirabad Sindh costing Rs 1666.781 million and Fulbright Scholarships Support Programme (Revised). Planning Commission was scheduled to table "Establishment of Nust Teaching Hospital and School of Health Sciences at Sector H-12, Islamabad" before Ecneec for approval but this has been dropped from agenda now.

Transport and Communication sector projects are: Construction of flyover at Sariab Phatak, Quetta; Rehabilitation/ Upgradation and Dualisation of Multan-Shujaabad-Jalalpur Pirwala-Uch Sharif - Trinda Muhammad Pannah Road (142 km); Rehabilitation of Larkana - Rasheed Wagan - Nasirabad Road (34 km); Extension of Motorway (M-4) from Khanewal to Multan 57 km (Revised); Construction of Bridge across River Ravi near Sandhilian Wall; Construction of Northern Bypass from Bosan Road to Qasim Bela Multan including approach Road from Northern Bypass to Multan Airport via Jameelabad Chowk Multan (Length 16.05 km Phase-II); Construction of Northern Bypass from Qasim Bela to Shershah Road Multan Bypass including Grade Separated Elevated Bridge over Railway Line & N-70 (Length 12.229 km-Phase-III); Reconstruction of Berth 15-17-A including SRB-1 and SRB-2 on East Wharves at Karachi Port. Physical planning and housing projects for approval are Urban Water Supply Scheme Benazirabad (Nawabshah) Phase-V Filtration (Revised) and Improvement of Water Supply System in Faisalabad (Revised). In population and Social Planning Ecneec will consider Population Welfare Programmes [Islamabad Federal Activity, Punjab, Sindh,

Khyber Pukhtoonkhwa, Balochistan and AJK (2009-14)].

Water sector projects include: Construction of 100 Delay Action Dams in Balochistan: Package-II (26 Dams); Punjab Barrages Improvement Phase-II (PBIP-II) (Rehabilitation and Modernisation of Jinnah Barrage, Improvement and Modernisation of the Irrigation and Water Management System - Monitoring and Evaluation of the project Impacts and Technical Assistance and Trainings); and Six (6) Dispersal Structures on Nari River, Construction of Ghazi Tuk, Khokhar, Erri, Haji Shaher and Remodelling/Rehabilitation of Mithri Weir and Canal System.

Naval chief wants Gwadar deal cancelled By Iftikhar A Khan -- Dawn News

Naval chief wants Gwadar deal cancelled By Iftikhar A Khan

Friday, 24 Sep, 2010 "The agreement is one-sided and a lot of incentives have been given to the Port of Singapore Authority," Chief of the Naval Staff Admiral Noman Basheer said while talking to reporters after presiding over a book launching ceremony at the Bahria University. - File Photo. Business Record 107 ships dismantled at Gaddani ISLAMABAD: Chief of the Naval Staff Admiral Noman Basheer said here on Thursday that the Gwadar Port was not serving the purpose for which it had been build and, therefore, an agreement with the Port of Singapore Authority (PSA) for management of facilities and development of infrastructure should be cancelled.

"The agreement is one-sided and a lot of incentives have been given to the PSA," he said while talking to reporters after presiding over a book launching ceremony at the Bahria University.

He said the government should review the concessionary deal because the PSA had not been able to develop the port up to its potential.

Admiral Basheer said the PSA was to be given 2,500 acres of land under the deal, while the navy was being accused of illegally possessing 500-600 acres of it.

"The (ministry of) ports and shipping should stop finding excuses and levelling allegations and focus its attention on the national asset the potential of which is yet to be exploited."

CHINESE SUBMARINES:

The naval chief said talks were under way with China for six to eight submarines and the quality and cost were the basic factors behind the move.

He said the talks were launched after a deal with Germany for four submarines could not be finalised because of exorbitant cost.

However, he said, both countries were still negotiating to resolve the issue.

Admiral Basheer said Pakistan badly needed submarines because four of the six submarines in the fleet had passed their life and the other two needed to be refurbished.

He said China was a time-tested friend of Pakistan and the only country in Asia which had developed expertise in building submarines.

The delivery schedule and cost also suited Pakistan's needs.

"We can seek soft loan from China to fund the submarine project," he said, adding that the time factor in acquisition of the submarines was of paramount importance.

The naval chief said eight used frigates would be acquired from the United States and they would have to be refurbished before their induction into the fleet. He said

Pakistan Navy had to build its capacity to tackle multiple challenges ranging from piracy and terrorism to drugs and human smuggling.

The admiral said he was unaware of reports that he was being appointed chairman of the Joint Chiefs of Staff Committee.

Pakistan set to award \$25m consultancy to German firm -- The PakTribune

Pakistan set to award \$25m consultancy to German firm
Thursday September 16, 2010 (1207 PST)

KARACHI: Pakistan is set to appoint ILF Consulting Engineers as the consultant for the Iran gas pipeline within six days, making first step toward the much-delayed project to meet energy shortage, a senior petroleum ministry official said on Wednesday.

"The cost of the consultancy project will be \$25 million and they will have to complete the technical feasibility within 12 months," Secretary Petroleum, Ejaz Chaudhry, told our sources. The Germany-based consultants would be working on the pipeline along with National Engineering Services Pakistan Ltd. (Nespak), he said.

According to the Iran's state-run television, Tehran has already built most of the 1,000 km pipeline on its territory. However, the work on the remaining 900 kilometres at the Pakistani side has been pending for years.

Chaudhry said that the project was very much in hand and the ministry understood its importance in securing energy supplies for the country. "We have taken every scenario into consideration, including the sanctions against Iran."

The petroleum ministry official said that despite threats of losing ties with US companies, investors from Dubai, China and Germany had shown interest in financing the deal, Chaudhry said. "We have targeted January 2012 to start construction of the pipeline and trust me, financiers are out there," he added.

Iran and Pakistan signed the historic pipeline deal in March this year under which 750 million cubic feet of gas will be pumped daily by mid-2015. The 7.5-billion-dollar project, dubbed as "peace pipeline", will snake out of Iran's South Fars field into Balochistan and Sindh provinces.

Chaudhry said that there was a proposal to involve state-run companies in arranging funds for the project. "There is EOBI, OGDCL and State Life for making the initial investment."

Pakistan has been looking at internal sources to fund the gas pipeline as financing from international lenders becomes shaky in the wake of UN sanctions on Iran.

According to the secretary, the Petroleum Ministry had sought legal opinion of international experts to 'go around' the sanctions. "We are studying every option," he added.

Under a force majeure clause of the gas sale purchase agreement, the project can be stopped if sanctions are imposed on Iran. According to a government official, the government would setup a Liquefied Natural Gas (LNG) terminal in Gwadar if the project failed to materialise.

End.

PCC-USA organizes coal forum to attract investment in coal sector -- Online

PCC-USA organizes coal forum to attract investment in coal sector

ISLAMABAD: Pakistan has 185 billion tonnes of estimated Coal reserves and single

Thar coal Reserve of Sindh, Pakistan is more than the oil reserves of Saudi Arabia and Iran.

These reserves estimated at 850 trillion cubic feet (TCF) of gas, about 30 times higher than Pakistan's proven gas reserves of 28 TCF, said Abdul Quayyum Khan Kundi, President Pakistan Chamber of Commerce & Industry-USA while meeting with Zahid Maqbool, President of Islamabad Chamber of Commerce & Industry.

He informed that a forum on "Coal: Lucrative Business Opportunities in Pakistan" will be held in Houston, Texas on November 18-19 to give awareness to the international community about the huge potential of coal and opportunities of investment in Pakistan.

Mr. Waseem Rahiem, Chairman Standing Committee Coal PCC-USA said that these Coal reserves, worth USD 25 trillion, can cater to not only the electricity requirements of the country for next 100 years but also save more than four billion dollars per year in oil import bill.

Despite having these vast reserves of Coal, Pakistan today meets less than 1% of its electricity needs from Coal power generation. Instead it meets almost 35% of its needs from the more expensive oil based thermal power plants. Compare this to other developing countries in the region China and India, which meet 70% and 57% respectively of their energy needs from Coal, said Kundi.

He said that the purpose of the two-day forum was to convince the foreign investors to take advantage of investment in this sector and also to meet the energy demands of Pakistan. President of PCC-USA said that teams of technical experts from other countries will also be invited and forum will provide an opportunity to American businesses to interact and network with the decision makers from Pakistan attending this Forum.

Zahid Maqbool, welcoming the delegation, appreciated for organizing that important event and said that international investors must be motivated to invest in coal sector to produce electricity. He said that government should also support this event and look for other alternate energy resources to meet the rising energy demands of the country.

President said that PCC-USA should also do efforts for increased access of Pakistani products in the USA markets especially in the wake of current flood that has damaged a large portion of the country. He said that USA should give more market access for textile products and should also consider reducing duties on Pakistani products to boost its exports and help sustain Pakistan's economy.

He said that Islamabad Chamber of Commerce & Industry will also bring a delegation in the forum inviting businessmen from other parts of the country.

Chinese help -- The Nation

Chinese help

Published: September 25, 2010

China has been in the forefront of helping Pakistan after its worst-ever monsoon floods, even though it had itself been the victim of natural disasters very recently. This shows that the natural disasters striking the entire region are due to an overall change in climate, not just random events. The dimensions of Chinese flood aid were made clear in a briefing by the Chinese Embassy in Islamabad on Thursday, as well as by the meeting of Ambassador Liu Jian with PML(N) Quaid Mian Nawaz Sharif and Punjab Chief Minister Mian Shahbaz Sharif at their Raiwind residence the same day. China's own flooding and landslides not only affected 110 million people, and 7002 hectares of crops, but caused about \$21.3 billion in losses; yet not only had it announced aid of \$50 million, now, since the flooding destruction has been greater than originally feared, Chinese PM Wen Jiabao has announced a further \$200 million. This is in addition to the largest medical mission in Chinese history, consisting of 200 doctors and paramedics, including a PLA team of 68, now in Sehwan, where they arrived as recently as September 20. At the same time, China will help fully in the rehabilitation phase, and will continue to provide humanitarian aid based on Pakistan's needs. All this has been done not because China has any interest in Pakistan, but out of a humanitarian spirit, without any desire to obtain benefits for itself. Meanwhile, Ambassador Liu accepted Mian Shahbaz's invitation to the donors conference convened by the Punjab government for September 30.

Once again it has been shown that China's friendship for Pakistan is not based on China's need, but on principles. It is only the historic friendship of the two which is coming now to Pakistan's help.

After the decision to build a nuclear power plant to help meet Pakistan's power needs, Pakistan should be aware of its true friends. Chinese help is not predicated, as American, on doing their bidding, whatever the consequences for Pakistan's own interests, but on common interests. Therefore we see the USA so niggardly in helping Pakistan in its hour of need, yet still attempting to impose its agenda, while Chinese help is without any strings.

Germany considers Pakistan an important designation for investment in South Asia: Von Fersen -- Online

Germany considers Pakistan an important designation for investment in South Asia: Von Fersen

Islamabad: A high-powered 17-member German trade delegation visited Islamabad Chamber of Commerce & Industry for B2B meeting. This was the first ever visit of a German delegation to Pakistan after revisiting the Bilateral Investment Treaty by both government almost after 50-years.

According to press release issued here on Thursday, the leader of the German economic delegation Mr. Claus Baron Von Fersen thanked Islamabad Chamber of Commerce for organizing the meeting of the German delegation with the Pakistani businessmen and thanked President for giving a clear picture of investment and trading opportunities in Pakistan.

He said that foreign investors have different perception about Pakistan, whereas in reality things are quite encouraging to do business with Pakistan. German businessmen have little bit small or wrong picture but in reality picture is much bigger and on return a conference will be organized to give true picture to German companies to take advantage of a big market of Pakistan.

He said that opportunity are much better as compared to the past and now Germany considers Pakistan one of the booming markets in South Asia and for that reason the delegation is visiting Pakistan to explore the possibilities of trade and investment in the areas of mutual interest.

The leader of the delegation said that German business community and government is contributing a great deal to provide relief to victims of flood. He

informed that business community has so far contributed 8 million dollars for the flood victims.

Zahid Maqbool, President of Islamabad Chamber of Commerce & Industry in his welcome address said that Pakistan is a very promising economy and attractive investment destination and urged German delegation to invest in engineering, power, horticulture, dairy, construction, infrastructure development and manufacturing.

He said that Pakistan is in the process of establishing many new industrial zones in different parts of the country. Already about 650 foreign companies have made investments in various sectors and said that new zones will offer excellent opportunities to both local and foreign investors to reap the advantage of 100 percent repatriation of profit earned.

President said that recent flood in Pakistan has caused infrastructure damage at a massive scale and asked contribution of German investors in developing infrastructure including road network, railway, bridges and houses.

Germany should facilitate Pakistan in realizing a Free Trade Agreement with EU for improving its trade and economic ties with Europe and for enhancing exports and EU should provide non-conditional and easy access to Pakistani exporters to provide relief because of massive flood that hit Pakistan, said President.

He said that Germany is Pakistan's one the largest trading partner and is actively involved in Pakistan's socio-economic development and expressed the hope that new Investment Protection Treaty definitely will promote multi-dimensional co-operation between Pakistan and Germany including economy, defence, education, vocational education and other sectors.

Improving USA investment to Pakistan discussed -- 'Pakistan Times' Business & Commerce Desk

Improving USA investment to Pakistan discussed
'Pakistan Times' Business & Commerce Desk

ISLAMABAD: John Simmons Commercial Counselor, Embassy of USA Called on Saleem H. Mandviwalla, Minister of State / Chairman BOI, here on Friday and discussed the assistance and support of Commercial Counselor to BOI for improving the investment figures from USA.

The Chairman BOI informed him about the current projects working in energy, oil and gas sector, mining, copper and gold etc with the investment of US companies in Pakistan, says a statement issued by the Board here today.

He also shared about a conference on Thar Coal in Boston in November and asked for John Simmons suggestions to hold a successful forum to attract immediate investment to utilize our valuable resources of coal in Pakistan.

John Simmons also suggested that to attract immediate investment in this sector Pakistan should seek investment in individual processes from exploration to the power generation.

He also suggested the Chairman to attend the conference in Toronto during March and Chairman added that the volume of investment from Australian companies is not very striking.

On the request of John Simmons to support BOI, Chairman called for the capacity building of the employees of BOI and continuous interaction with him.

The Chairman BOI said that he is seeking effective and better relations with the United States and the officials working in Pakistan.

MoC to sign pact with Australia -- Pakistan Observer

MoC to sign pact with Australia

Islamabad —Commerce Ministry is to ink a pact with Australia on strengthening bilateral trade and economic ties, which would serve as a confidence-building measure (CBM) between the business communities and investment enhancement, official sources told.

Pakistan-Australia bilateral trade is in favour of Australia with Pakistan's imports averaging \$350 million against exports of \$150 million during last three years. There is an immense potential for Pakistan to enhance exports to Australia and increase its share in Australia's global imports of US \$192 billion.

Pakistan and Australia signed a bilateral trade agreement in 1990. Under the provisions of the Agreement, a Joint Trade Committee (JTC) was created. The JTC plays an important role in promoting aims and objectives of the agreement. It also considers proposals for deepening and broadening trade and economic relations and is headed by senior officials from respective trade ministries of both countries. The second meeting of JTC was held on February 16, 2010 in Islamabad after a lapse of four years. In the meeting, various avenues to enhance bilateral trade and investments were discussed. Both countries recognised the need to update the existing trade agreement to reflect contemporary priorities. The Australian side indicated its difficulty in completing the required legal and constitutional formalities for updating the existing trade agreement.

It was agreed that instead of renegotiating the existing agreement, the two countries would enter into a Memorandum of Understanding (MoU) which would provide a mechanism to discuss, strengthen, and resolve trade and investment issues. The proposed MoU will be helpful in encouraging Australian investment in Pakistan and will further cement bilateral trade and investment relations.—Agencies

Pak - China Investment Company Limited launched -- Online

Pak - China Investment Company Limited launched

ISLAMABAD:A ceremony for the launching of Pak China Investment Company was held at Governor House in Lahore.

The ceremony was presided over by the Governor Punjab, H.E. Lt. Gen. Khalid Maqbool while Dr. Salman Shah, Federal Minister for Finance, Economic Affairs, Revenue & Statistics was the Chief Guest. The ceremony was also participated by Mr. Salman Taseer, Federal Minister for Industries, H.E. Ambassador of People Republic of China to Pakistan and senior government officials/dignitaries including, Secretary, Investment Division & BOI, Mr. Mushtaq Malik, Mr. Salman Siddque, Chief Secretary Punjab, Mr. Chen Jianbo Managing Director/CEO PCICL, Syed Iqbal Ashraf, Deputy Managing Director PCICL, , and Mr. Guo Yonghong CEO of China Mobile Pakistan. Private sector also participated in the ceremony.

Mr. Chen apprised the participants about delivery of superior products and services that would be available to Pakistani and Chinese businessmen with the launching of Pak - China Investment Company. He appreciated Pakistan's efforts and support and highlighted some of the existing Pak-China friendship symbols that exist in the form Karakorum Highway, Gwadar port, HMC, Heavy Electrical Complex, Saindak Copper Mining Complex and the two Chasma Nuclear Power plants.

Syed Iqbal Ashraf, Deputy Managing Director PCICL said that Pak China Investment Company Limited would provide investment banking services with an objective to provide complete financial solutions to specialized areas including Power, engineering, telecom, construction and infrastructure projects, mergers & acquisitions, debt syndications and private equity placements. The initial authorized capital of the PCICL is Rs. 12.14 billion equivalent to US \$ 200 million, making it the largest joint venture investment company in Pakistan. PCICL has become operational with an initial paid-up capital of US \$ 70 million, to be increased to US \$ 200 million by 2009.

Mr. Guo Yonghong CEO of China Mobile Pakistan said they have faced competition in Pakistan which they did not face in China; this is a clear indication of the fact that Pakistan has an extremely competitive economy to invest in and to make huge profits. He further elaborated that Pakistan's intriguing and improving economic

indicators has made it a lucrative destination for foreign investment. With the GDP growth rate over 7%, liberal investment policy in place and with a sound network of industrial zones and economic zones, Chinese entrepreneurs must take advantage of this glowing opportunity and optimize their resources and investment returns by investing in Pakistan.

Dr. Salman Shah, Federal Minister for Finance described the launching of Pak China Investment Company as ""one window" between the Pakistani and Chinese companies. He said that China could become resource base for Pakistani companies and PCICL would provide momentum to growing trust shared between the business communities of the two countries in trade and investment matters. He further pointed out that China is one of the world's most dynamic economies and is destined to become biggest economy of the world in near future. He added, that Pakistan is very lucky to have an extraordinary and strategic relationship with China in almost every area of business, trade, commerce, politics and economy. He highlighted strengths of Chinese economy in infrastructure development, agriculture and agrofood processing and also mentioned that China is a leading player in all sectors and Pakistan can benefit from China in areas of Textiles, Engineering, Ship building, real estate and automobiles. China has capital and technology and ultimately can become one window economy for Pakistan. He said that present level of bilateral trade between the two countries is over US \$ 5 billion and under the recently signed Free Trade Agreement which has come into effect from July 2007, both the countries have decided to increase this volume of trade to US \$ 15 Billion by 2012. While discussing economy of Pakistan he said that Pakistan is ranked as 6th largest economy in terms of population, having 52% of the total population under the age of 19 years. This fact also relates to Pakistan being a very dynamic and diversified economy with relatively large consumer market with growing middle class. Despite all security concerns and political developments, FDI in Pakistan from July - Nov 2007 has risen by 16 % to \$ 1712.5 million which was \$ 1480.2 million in the same period last year.

Governor Punjab while congratulating the management of PCICL said that company marks a great investment opportunity for Chinese and Pakistani business communities. He said that political relationship is also very important in strengthening long term ties and over the years, Pakistan and China share an extremely cordial relationship which is sweeter than honey in true sense. He also said that President Musharaf has introduced modern diplomacy in our relationships with China, thus enabling more human to human relationship. Therefore, for Chinese companies, their decision to come to Pakistan is strategically and economically very sound and viable. He also assured full support in providing security to Chinese companies working in the province of Punjab and referred to it as their prime responsibility. He also requested Pakistan business community to interact more frequently with Chinese companies and seek investment opportunities with China, as this is one country that Pakistan can always bank on. He asked Chinese companies to also look at Faisalabad and explore investment opportunities there.

All Day

Pak-Kuwait JMC to meet soon -- Pakistan Observer

Pak-Kuwait JMC to meet soon

Karachi —Pakistan is going to raise the Free Trade Agreement (FTA) and other trade related issues with Kuwait in a bilateral ministerial level meeting to be held soon in Kuwait. Both the countries are going to hold the third 'Pak-Kuwait Joint Ministerial Commission' (PK JMC) meeting by the end of next month in Kuwait.

The third meeting of the JMC is going to be held after a long break of over seven years, as the second meeting was held in 2003 in Islamabad. According to sources, Trade Development Authority of Pakistan (TDAP) has proposed to the Ministry of Commerce (MoC) a number of proposals for improving trade with the oil rich country, where Pakistani products have a good demand.

Islamabad is said to be interested in holding the JMC meeting as early as possible so that more trade concessions could be sought after the catastrophic floods that have shaken the country's economy. TDAP, through a letter, has proposed to MoC

that there should be joint a business forum of the two countries, which should facilitate chambers of commerce to in exchange of trade delegations.

According to sources the authority was also planning to hold single country exhibition in Kuwait and Pakistan's commercial consular in Kuwait was busy in arrangements for organising the event shortly. It was also proposed that both the sides while re-energising the PK-JMC should take concrete steps in the light of the bilateral trade agreements/understandings, to enhance the level of bilateral trade.

Pakistan, which has a share of only over \$75 million in the imports of Kuwait, was searching for more markets for its products in the gulf country as its neighbouring country India, comparatively, had more shares in Kuwait's imports. Besides the economic relations between the two Islamic countries, the number of Pakistani expatriates in Kuwait has almost doubled over the past five years, with a total of 153,000 who were living and working in the foreign country.

Though Pakistan was exporting rice, textile items, leather etc to Kuwait, Islamabad is in highly disadvantageous position as far as the trade balance between the two countries is concerned, due to the huge import of oil. Both the countries had ratified the bilateral Trade agreement, which was signed on 24 July, 2002 which provides a framework for promotion and diversification of economic relations between Kuwait and Pakistan.—Agencies

All Day**UK to lobby for trade concession to Pakistan -- The Nation**

UK to lobby for trade concession to Pakistan

UK has said that it would lobby with other countries for providing flood assistance and trade concessions to Pakistan. Foreign Secretary of United Kingdom Mr. William Hague expressed these views in his meeting with Foreign Minister Shah Mehmood Qureshi on the sidelines of the 65th Session of the UN General Assembly in New York.

Foreign Minister thanked the Foreign Secretary for the assistance provided by the British Government and public for the flood victims of Pakistan. He underlined that this support was an indication that the bilateral relationship between the two countries went beyond the government level and needed to be built upon. The Foreign Minister also appreciated the leading role played by UK in facilitating discussions within EU for provision of trade concessions, says a press release received here on Saturday.

On the flood situation in Pakistan, the Foreign Minister informed his British counterpart that the government was now moving into the early recovery phase in which priority was being given to agriculture and in particular the upcoming wheat crop. Simultaneously, the government had initiated the process for damage needs assessment which was expected to be completed before the upcoming meeting of the Friends of the Democratic Pakistan in Brussels. The government had also created the National Oversight Disaster Management Council consisting of respectable persons to address the issue of transparency.

The British Foreign Secretary assured the Foreign Minister of UK's continued support in meeting the challenges posed by the recent floods. In this regard, UK would lobby with other countries for providing flood assistance and trade concessions to Pakistan. He said that he would attend the October meeting of FODP in Brussels.

All Day

Manufacturing 'China threat' -- The Dawn

Mr Selig Harrison, a noted American scholar on South Asia, writing in The New York Times on August 26 under the caption: 'China's Discreet Hold on Pakistan's Northern Borderlands' observes: "A quiet geopolitical crisis is unfolding in the Himalayan borderlands of northern Pakistan, where Islamabad is handing over de facto control of the strategic Gilgit-Baltistan region in the northwest corner of disputed Kashmir to China".

Claiming that China had deployed 7,000-11,000 troops in the area, he further observes: "The entire Pakistan-occupied western portion of Kashmir stretching from Gilgit in the north to Azad (Free) Kashmir in the south is closed to the world, in contrast to the media access that India permits in the eastern part, where it is combating a Pakistan-backed insurgency."

China has called the story "groundless," saying it was being put out with "ulterior motives" to hurt Beijing's ties with New Delhi and Islamabad.

That the Chinese would take over Pakistan's Gilgit-Baltistan is a ridiculous thought. But nothing is ridiculous when it comes to a hot propaganda war, particularly where the Indians are set to create a scare in the western capitals about China. Mr. Harrison has picked up the Indian script on Gilgit-Baltistan.

So ridiculous were Mr. Harrison's assertions that Pakistan's foreign office had to dismiss them as "figment of imagination". Its spokesman said, "Given Selig Harrison's well-known anti-Pakistan mindset, his gross misrepresentation of facts is hardly surprising.

Nor is it unexpected of India to create unnecessary hype using Mr. Harrison's tendentious article. China, at our request, is helping us in repairing the Karakoram highway, which has been severely damaged by the recent floods and landslides."

The hard fact is that China and Pakistan are jointly working on several projects in Gilgit-Baltistan, including the repair and upgrading of Karakorum Highway, which will take several years to complete and requires the presence of a large number of Chinese workers, but far below the numbers Harrison suggests. The road design requires tunnels to be constructed that he mischievously refers to as possible missile storage facilities.

Why, one may ask, would Pakistan store its missiles in this difficult mountainous terrain, far removed from the point of launch and when the area is prone to frequent, unpredictable and massive landslides and road blockages?

Would such an act not cause indefinite closure of this critical highway to traffic? Does it make any sense for China to store its warheads in another country in locations from where their timely and urgent retrieval cannot be guaranteed?

In January this year Karakorum Highway to China was closed in Hunza Valley after a massive landslide created the Attabad Lake which reached 22 km in length, displacing thousands and inundating over 20 km of KKH.

When the lake finally flowed over the landslide dam in June, it washed away several segments of the highway. Mr Harrison presents the road closure to the American readers as an ominous Sino-Pakistani conspiracy.

Mr Harrison remarkably twists the facts to please Indians. He has done this in the past and he has done it again. In 2006 Mr Harrison, a Washington based writer who styles himself as a Balochistan specialist, predicted in his articles in The New York Times and the French newspaper Le Monde Diplomatique that a successful insurgency would lead to the creation of a sovereign Greater Balochistan that would also include the Iranian Balochistan and Sistan province.

Then, he was promoting a Pentagon dream authored by a retired Col. Ralph Peter in his treatise 'Blood Borders'.

Some might dismiss these utterances as a misreading of events by Mr Harrison, but if one looks at the messages he is trying to send about China as an emerging threat in South Asia and Pakistan's abetment in Chinese expansionism, there is a method in his madness.

This propaganda line could have several geopolitical dimensions. It could provide India the occasion to pick a bone with Pakistan for allowing a purported Chinese ingress into a region that it claims to be its own. India could raise alarm about this perceived threat to South Asian security at international forums, to corner Pakistan.

India would expect the US to take another look at its Pakistan and China policy in the context of South Asia (India is unhappy at President Obama's suggestion during his China visit that Beijing could have a role to play in South Asia and might be able to arbitrate between India and Pakistan). And this could initiate a debate in Washington about the Chinese threat to western interests in the Gulf region and actions needed to prevent this.

The autonomy package Pakistan gave to the people of Gilgit-Baltistan has angered India and drew a strong protest. India looks upon this move as permanent integration of the region into Pakistan and it will not be surprising if it retaliates in some form.

Shortly after the elections in this new province and in tandem with Mr Harrison's article, which it cites as an evidence of Sino-Pakistani threat to Indian security, India lost no time in declaring its readiness "to face the Chinese threat".

Hindustan Times, in a story dated August 29, quotes military sources as saying that in view of the Chinese having escalated their "aggressive designs" on the country's border areas, "the Army has activated its airfields along the Line of Actual Control and enhanced its military presence and capabilities in the area. The roads to these airfields have been upgraded."

In reminding the US about Pakistan's oft alleged double-game and ignoring the position Pakistan has taken on these issues, Mr Harrison tries to call into question the US-Pakistan alliance.

He says, "What is happening in the region matters to Washington. Coupled with its support for the Taliban, Islamabad's collusion in facilitating China's access to the Gulf makes clear that Pakistan is not a US ally."

Mr Harrison plays upon western sensitivities about the security of the Persian Gulf when he tells Washington that "China wants a grip on the region to assure unfettered road and rail access to the Gulf through Pakistan."

By alluding that China's use of Gwadar port will threaten American strategic interests which, in fact, will be limited to the import of oil and raw materials and export of finished goods, Mr Harrison is taking a shot at Pakistan's economic interests. Gwadar port is planned to be a major revenue earner for Pakistan.

The Indians have always been wary of the development of Gwadar port in which they see a new Pakistani naval facility taking shape, and they fear this might lead to Chinese naval presence in the Arabian Sea.

A spanner thrown in the works would be a welcome step from the Indian point of view. Mr Harrison is all out to oblige them.

All Day

Only our fears can encircle us -- The Hindu

Instead of being alarmed at China's growing inroads in the region, India needs to take a harder look at its own role and find new ways to win neighbours and increase influence in the region's growth story.

No one would accuse Prime Minister Manmohan Singh of being alarmist. So when,

addressing the Heads of Missions last month, he spoke of paying close attention to “global powers exercising influence in the Indian Ocean Region,” it was assumed that the Prime Minister was genuinely concerned about China's growing role in the region. When he spoke to editors some days later about his concerns on China again, the assumption was sealed.

India's growing concern rose from two factors — the first, Beijing's sudden decision to provide Northern GOC General Jaswal with a stapled visa, saying his command includes a ‘disputed’ region; and the other, newspaper reports that the People's Liberation Army (PLA) had approximately 11,000 soldiers in Gilgit-Baltistan, digging tunnels and posing a direct threat to India across the LoC.

Diplomats on both sides now say they are ‘sorting out’ the visa issue, with Beijing on the back foot, particularly given that General Jaswal has travelled to China in the past. Meanwhile, the reported build-up in PoK was aggressively denied by Beijing and Islamabad, both insisting that the troops are there to help contain flood damage, and the impending threat of the Hunza dam overflowing, and also to work on the Karakoram Highway project. India's suspicions that China's army is now securing its land route to the Arabian sea via PoK have nonetheless grown, given that China has also wrested control of the Gwadar port back from the Singaporean Port Authority. The development ties in with the fear of India being choked by a strategic “String of Pearls” — a U.S. Defence Department term for China's ambitions for bases in the Indian Ocean Region. With Gwadar in Pakistan, Hambantota in Sri Lanka, Chittagong in Bangladesh, and the Sittwe port in Myanmar, it would seem the string is slowly turning into a choke-chain for India.

At one level, the fears of China overrunning Pakistan to open a front with India may seem far-fetched, even hysterical. At another, it may be a much needed wake-up call for India to reassess its preparedness to counter an increasingly assertive Chinese military. At an entirely different level, New Delhi's alarm in the past few weeks could be most constructive if it ensures that India takes a closer look at its own role in the region, and why China is making headway with so many of our neighbours.

Take Sri Lanka that has many reasons to welcome Indian investment. Whether it has been the tsunami, the war against the Liberation Tigers of Tamil Eelam (LTTE), or the post-war demining and rehabilitation effort, Indian agencies have been at the forefront to help. And yet, as Sri Lanka recasts itself as the Singapore of the region, it is China that is its biggest infrastructural investor, bagging many coveted projects given China's deeper pockets. Much of it is a result of Indian apathy — the Hambantota port, for example, was offered to India first. New Delhi's lack of interest in developing this strategically located harbour was easily the gain of China, which worked double time to complete the project with \$60 billion funded from China's Exim bank, building the port, the city centre, the airport, a stadium, and a massive convention centre. Many in India worry that Hambantota's future could include a Chinese naval base too.

While Indian concerns about Hambantota are well known, practically no one speaks of the port project that India does have, in the northern town of Kankesenthurai (KKS). Originally, after the tsunami, the project was handed to the Dutch, but after India showed interest, the Sri Lankan President tore up that contract and invited India to build the port. Yet 18 months later, this harbour near Jaffna has seen little by way of construction; even a feasibility survey taken in June 2010 has not yet been finalised. Meanwhile Hambantota will receive its first ship in November, some six months ahead of schedule. The contract for the Colombo port has just gone to a Chinese consortium — no Indian company having even tried to bid for it. Given that the National Thermal Power Corporation (NTPC)-Sampur coal 500-MW plant is already delayed years beyond its 2011 deadline, it is hoped that other projects India has committed itself to including the northern rail line, the Palaly airport and the Jaffna stadium will be dealt with more expeditiously.

While many in India would see these projects essentially as aid to a needy neighbour, it is time to invert the prism and see them, just as we accuse China, as ways of increasing our footprint and extending our ambitions to a sphere of

influence well beyond our land mass.

In January this year, a historic agreement with Bangladesh Prime Minister Sheikh Hasina seemed to redefine how India would deal with its neighbours. Amongst a slew of agreements came India's \$1-billion credit line — for 14 infrastructural projects. Even while the agreements were being finalised — Dhaka delivered some of the most wanted United Liberation Front of Asom (ULFA) militants. Despite opposition cries of a sell-out, Sheikh Hasina's India deal won her accolades in Bangladesh. Yet it took eight months before Finance Minister Pranab Mukherjee flew to Bangladesh to operationalise the credit line, and by the time he reached, India had decided to change its earlier offer of \$1bn at one per cent interest to 1.75 per cent — terms that took many in Dhaka by unpleasant surprise. Also, unless India relaxes its trade barriers to Bangladeshi goods, it will be accused of exploiting the transit rights only for its own benefit. It is hoped that Dr. Singh, whose trip to Dhaka is imminent, will address some of those concerns. Meanwhile China has moved into the delay gap on projects like the Chittagong port with ease, funding much of its refurbishment, as also the construction of the second Padma bridge, as it vigorously pushes MoUs on road links via Myanmar and a rail line connecting Beijing to Dhaka — as part of a \$2.2-billion Chinese package on infrastructure.

A bolder move, but one that would win many hearts is to consider lifting tariff and non-tariff barriers and duties unilaterally in the South Asian Association for Regional Cooperation (SAARC) region altogether. Suspend the reality of our relations with Pakistan for a moment to think about the impact of ending such protectionism in a year that has so devastated Pakistan's economy. According to estimates, the destruction of standing crops on two million hectares has virtually wiped out Pakistan's staple revenue from export of cotton, rice, and sugar. The country will be dependent on importing these for the next few years. With 77 million people likely to go hungry, and Pakistan's projected growth likely to fall by half to about two per cent, it is only natural that China's interventions in flood relief, rebuilding destroyed roads, schools and bridges, aid and trade will grow. The question is: will India watch with its customary alarm but do nothing?

On our other frontiers, it must be said, the government has made some moves — increasing development aid to Afghanistan to \$1.2 billion and discussing a \$1-billion dollar credit line to Myanmar as well. Describing some of these initiatives at Harvard University this month, Foreign Secretary Nirupama Rao said: "Today, with sustained high economic growth rates ... India is in a better position to offer a significant stake to our neighbours in our own prosperity and growth." It is equally important to stand that assumption on its head, and consider India's stake in the prosperity and growth of its neighbours. Whether it's Mauritius or Maldives, Nepal, Sri Lanka, Bangladesh, Bhutan, Afghanistan or yes, Pakistan — these are countries with close cultural, linguistic, historic ties to India no other country can match. As a result, it shouldn't be possible for China or any other superpower to encircle a country like India. The only thing that encircles us is our fear that they will.

PNS Saif, Chinese pledge fulfilled ((Important)) -- by Sultan M Hali
 PNS Saif, Chinese pledge fulfilled
 Sultan M Hali

China's delivery of the third F-22P frigate PNS Saif to Pakistan Navy is yet another burgeoning proof of Pak-China relations and fulfillment of Chinese pledge to support Pakistan's defence. In yet another landmark achievement in the expansion of the unwavering bilateral defence cooperation between Pakistan and China, Beijing has delivered the third of the four F-22P frigates PNS Saif to the Pakistan Navy (PN). The newly built warship of the sword class series constructed by Hudong Zhonghua Shipyard Shanghai was delivered in a colourful and impressive ceremony. As per the schedule, the PN's fourth F-22 frigate, being constructed at the Karachi Shipyard is progressing satisfactorily. This move by the Navy would be of great help to Pakistan in achieving self-reliance towards defence of its territorial

waters.

The F-22P or Zulfiquar (sword) class frigate, an improved version of the Chinese Type 053H3, is a general purpose frigate being built by China and Pakistan for the PN. The first ship, PNS Zulfiquar, was handed over to the PN on 30 July 2009 and the second, PNS Shamsheer, on January 23, 2010. The third, after undergoing sea trials has just been handed over, while a fourth is under construction. It has been reported that the F-22P Frigates are equipped with state-of-the-art weapons and sensors. The ships also carry Z9EC helicopters onboard. Pakistan had been negotiating with China for the supply of 4 frigates since the late 1990s. The contract was signed on 4 April 2006 with the conclusion of negotiations for financing and technology transfer. The first three have been built at the Hudong Zhonghua Shipyard in Shanghai, China, while the last is under construction in Pakistan by Karachi Shipyard and Engineering Works (KSEW). The \$750 million contract also includes 4-6 Harbin Z-9EC antisubmarine warfare (ASW) helicopters as well as ammunition for the frigates.

With the addition of these ships, the strength of PN Fleet has increased considerably with much needed capabilities, while contributing in enhancement of country's shipbuilding capabilities. The F-22P hull uses many of the radar cross-section reduction features of China's Type 054 frigate to help it evade detection by radars mounted on other ships, aircraft and anti-ship missiles. The 76.2 mm caliber main gun is a Chinese development of the Russian AK-176M, the main difference being that the Chinese variant adopts a re-designed stealthy turret to reduce radar detection. The gun is designed to engage ships, aircraft and anti-ship missiles. In front of the main gun are two 6-cell RDC-32 anti-submarine rocket launchers. The frigate's primary surface-to-surface missile armament comprises eight C-802 subsonic anti-ship missiles carried in two launchers with four cells each, fitted between the foremast and the funnel. These containers are also compatible with the CY series anti-submarine rockets and may be loaded with a combination of anti-ship and anti-submarine weapons.

The FM-90N surface-to-air missile (SAM) system is fitted between the main deck and main gun. The launcher has eight cells each containing one missile and is fitted on a mount that can be elevated and traversed in the direction of the threat. The FM-90N can engage several targets, including supersonic and sub-sonic sea-skimming missiles, using different guidance modes simultaneously. The system is also designed to engage small targets such as unmanned aerial vehicles (UAV). A close-in weapon system (CIWS), the Type 730B, is mounted on the aircraft hangar. Comprising two seven-barrel Gatling guns of 30 mm caliber, the F-22P is believed to be the first ship armed with the Type 730B, which uses off-mount sensors such as the Type 347G radar and the OFC-3 electro-optic director.

The guns are mounted side-by-side on the aircraft hangar, with the off-mount sensors in between. The CIWS can be upgraded with the FL-3000N fire-and-forget missile system by installing up to two single-round FL-3000N launchers on each existing CIWS gun mount. The Harbin Z-9EC anti-submarine warfare (ASW) helicopter is equipped with surface-search radar, low frequency dipping sonar, radar warning receiver, Doppler navigation system and armed with torpedoes. The helicopter can be armed with one torpedo on the starboard side. A small antenna on the roof may provide a data-link, allowing the Z-9 to act as a relay for targeting data between the ship and long range anti-ship missiles such as the C-802. The beauty of China's support to Pakistan is that it is willing to provide transfer of technology, help develop the infrastructure for indigenization and soft loans to support the project with no strings attached. Other nations are either just not willing to share technology. Even if they agree to provide transfer of technology, it is at exorbitant costs and may have strings attached. Some nations insist that Pakistani technology is too backward, lacks the skill and wherewithal and is unfit for accepting hi-tech expertise. China has proved over the ages that it considers Pakistan capable and worthy of keeping pace with the latest developments and making strides towards indigenization. The delivery of the F-22 frigates to PN is burgeoning evidence of the long lasting ties between Pakistan and China. In this period of global economic meltdown, China not only has a stable economy but it holds roughly \$1.5 trillion in US assets, at least 65 percent of China's total foreign

assets, and it is the second biggest foreign holder of US debt after Japan.

Pak-China joint ventures to produce JF-17 Thunder fighter aircraft, K-8 Trainer aircraft, Al-Khalid Tank, F-22 Naval Frigates have given a new dimension to Pak-China cooperation in the field of defense. Heavy Rebuild Factory (HRF) at Taxila, Pakistan Aeronautical Complex at Kamra was also established with Chinese assistance. The Karakoram Highway, the strategic port of Gawadar and nuclear energy reactors are a manifestation of China's sustained interest in Pakistan, which make it imperative for us to reach out to our Chinese friends for our common endeavours for building a better future for our peoples and overcome the challenges to both nations and strive for prosperity. In these trying times it is imperative that we recognize our true friends and hold on to them steadfastly.

UK-Aid provides 130,000 life saving items to flood-hit people in Pakistan -- 'Pakistan Times' Federal Bureau

UK-Aid provides 130,000 life saving items to flood-hit people in Pakistan
'Pakistan Times' Federal Bureau

ISLAMABAD: Emergency production lines in factories in Karachi and Lahore - funded by the UK's Department for International Development (DFID) - have produced more than 130,000 urgently needed aid items, including clean water storage containers and hygiene kits.

The factories have produced thousands of items every day for the last two weeks. The items are being distributed this week directly to critically affected people in Sindh and the Punjab, and will help fight the spread of disease.

A press communiqué issued by the British High Commission [BHC] said in Islamabad on Thursday that in total, the factories have produced:

- 41,000 Hygiene Kits;
- 56,600 jerry cans;
- 38,800 clean water storage containers.

In Karachi on Thursday, George Turkington, Head of UK's Department for International Development Pakistan, said: "Unless people can store clean drinking water and access basic sanitation there is a real threat of a public health disaster. That's why we took this resourceful approach and set up these emergency production lines in Karachi and Lahore to provide huge quantities of urgently needed items, in the shortest possible time. The UK will continue to stand by Pakistan, both at this critical life-saving time, and in the longer haul as we start to rebuild people's lives and communities."

The factories are H. Nizam Din & Sons (Pvt) Ltd in Karachi and H. Sheikh Noor-Ud-Din & Sons (Pvt) Ltd in Lahore.

Ali Ahmed, director of H. Nizam Din & Sons (Pvt) Ltd, said: "We are very pleased that we have been sourced for this production line to help affected flood victims and support DFID in their humanitarian work in Pakistan."

On Sunday 19 September, UK Development Secretary Andrew Mitchell announcement a further £70 million (nearly 9.5 billion rupees), from the UK Government to help people start rebuilding their lives, including re-starting agriculture, and getting children back to school, as well as further lifesaving aid for the south of Pakistan where the situation remains critical.

The UK Government has now committed a total of £134 million (nearly 18 billion rupees), while the UK public has generously donated a further £56m (approx 7.5 billion rupees) from their own pockets through the Disasters Emergency Committee (DEC) appeal.

The UK was one of the first countries to respond to this crisis. UK aid is already providing immediate lifesaving aid including funding towards UN airlifts; twelve planes funded by DFID packed full of vital aid; emergency shelter, safe drinking water, and latrines for millions of people; one month food packages for nearly one million people; an emergency field camp in the worst affected area near Sukkur; help for half a million malnourished children and pregnant/breastfeeding women; emergency health care; bridges shipped from the UK, and more.

The Department for International Development (DFID) is the UK's Government department responsible for promoting sustainable development and reducing poverty. The central focus of DFID is a commitment to the internationally agreed Millennium Development Goals to be achieved by 2015.

Nepal-Pakistan to sign FTA in October -- Himalayan News Service
Nepal-Pakistan to sign FTA in October

Himalayan News Service

KATHMANDU: Nepal and Pakistan are planning to ink Free Trade Agreement (FTA) during the meeting of Joint Economic Commission (JEC) scheduled for October. A high-level bilateral task force is set to be finalised that will discuss the matter in the JEC meeting.

"Government is setting up a team of delegation that will head for the JEC meeting," said Surya Prasad Silwal, Joint Secretary at the Ministry of Commerce and Supplies (MoCS).

JEC meeting is scheduled for October 19-20, this year in Islamabad. "The meeting will discuss all the economic aspects of the two countries," Silwal said, adding that the Finance Ministry is also preparing for the JEC meeting. The plan has been put on a fast-track basis after a

brief visit of Prime Minister Yousuf Raza Gilani to Nepal while on his way to Bhutan to attend the SAARC meet in Thimphu in April.

Even though, both Nepal and Pakistan are signatories to the South Asia Free Trade Agreement (SAFTA) and members of the South Asian Economic Union, the bilateral trade between the two countries remains negligible.

Pakistan's total export to Nepal is worth \$1.63 million whereas exports from Nepal to Pakistan have touched \$3.16 million.

Nepal will be the second country in South Asia to enter into a free trade arrangement with Pakistan after Sri Lanka that inked a FTA deal with Islamabad some years ago.

Nuclear-armed Pakistan takes over as chair of IAEA -- Press Trust Of India

Nuclear-armed Pakistan takes over as chair of IAEA

Press Trust Of India

Vienna/New Delhi, September 27, 2010

Seen by many as a rogue nuclear state, Pakistan on Monday ironically became the head of the governing body of the UN nuclear watchdog--International Atomic Energy Agency (IAEA). In an election at a special one-day meeting in Vienna, IAEA's 35-member board of governors appointed Pakistan Atomic related stories China, Pak in talks on new nuke plant India takes note of Chinese move on N-reactors in Pak Energy Commission's head, Ansar Parvez, as its chairman for the next one year. The Board is the most important policy-making body after the 151-nation general conference.

Observers in New Delhi did not attach undue importance to the development saying the post was rotating and Pakistan's candidature was endorsed by the Asian block. India had twice chaired the Board of Governors and Pakistan had done in once in the past.

Pakistan has taken over the chair the main role of which is to preside over debates and helping the Board of Governors reach consensus decisions, from Malaysia.

Pact on pvt role in TAPI pipeline -- APP

NEW DELHI: Turkmenistan, Afghanistan, Pakistan and India have agreed to rope in a global energy major to execute and manage a \$7.6-billion natural gas pipeline running their land, brightening the prospect of a steady flow of gas from central Asia to energy-hungry South Asia.

The decision was taken after Afghanistan assured to secure the pipeline through the Taliban heartland and Pakistan in-principle agreed to do so in its territory, two senior officials with direct knowledge of the matter said.

The private partner will be inducted through an international bidding by the four countries, jointly referred to as TAPI.

"TAPI nations have agreed that in the case of a single bid, the (single) bidder will be awarded the project," an official said.

The pipeline will start from the Dauletabad gas field in southeast Turkmenistan and after 145 km stretch in the country enter Afghanistan. After traversing 735 km in Afghanistan and 800 km in Pakistan, the pipeline will cross into India. The 1,680 km pipeline will have a capacity to transport 90 mmscmd (million standard cubic metres a day) gas. Asian Development Bank (ADB), the development partner of the TAPI project, had estimated its cost at \$3.3 billion about 10 years ago.

The decision to induct a private partner was taken at the TAPI steering committee meeting of energy ministers of the four nations on September 20 at Ashgabat, Turkmenistan's capital.

American and Russian energy companies are interested to invest in the project, the officials said. Induction of an energy giant in the consortium is expected to expedite the project and help minimise transportation risks through volatile Afghan and Pakistan regions.

Minister of state for petroleum & natural gas Jitin Prasada, who represented India in the meeting, confirmed the development but declined to comment on specific details.

"The pipeline is significant for India's energy security but its success will depend on keeping minimum transit fee and setting up institutional mechanism to address security issues. We are working towards that," Mr Prasada told ET after his visit to Ashgabat.

Pakistan will present an institutional framework for securing the pipeline in its territory at the 7th technical working group meeting, the officials said. The meeting date is not yet fixed, they said.

The Afghanistan government has already guaranteed the security of the pipeline by burying it underground and paying local communities to guard it.

Turkmenistan wants to sign the deal by December this year at a proposed head of states meeting and aims to complete the pipeline by 2014, the officials said. Gas accounts for 57% of Turkmenistan's total exports followed by oil (26%), the reason it wants the pipeline to start quickly.

At the meeting Turkmenistan offered confirmed 90 mmscmd gas supply to the three nations from its Osman-Yolten reserve, certified to have between 4.25 trillion cubic meters (tcm) and 13 tcm gas.

Gaffney Cline and Associates (GCA), a British audit firm, in its audit report of October 2008 puts proven reserves of natural gas in Turkmenistan at more than 7 tcm.

The possible gas reserves could be as high as 24.6 tcm.

India is expected to get about 38 mmscmd gas, the same as Pakistan. Balance gas will go to Afghanistan.

Pakistan, Kyrgyzstan agree on enhancing bilateral cooperation -- SANA

Pakistan, Kyrgyzstan agree on enhancing bilateral cooperation
ISLAMABAD, (SANA): Foreign Minister Makhdoom Shah Mahmood Qureshi met Foreign Minister of Kyrgyzstan, Mr. Ruslan Kazakbaev on the sidelines of the 65th UN General Assembly Session in New York. Both leaders reviewed the bilateral relations between the two countries, said a press release received on Wednesday.

Foreign Minister Ruslan Kazakbaev expressed sympathies on the tragic loss of life and extensive devastation caused by floods in Pakistan. He briefed the Foreign Minister on recent political developments in Kyrgyzstan.

He thanked for Pakistan's understanding on tragic events of June 2010 in Kyrgyzstan. He informed that Ministry of Education was devising plans to improve the academic conditions for Pakistani students. The academic year in most professional colleges in Kyrgyzstan would start after parliamentary elections in October 2010. It would help in saving an academic year of Pakistani students.

Foreign Minister Ruslan Kazakbaev emphasized the need to upgrade economic and trade relations between the two countries. He also sought Pakistan's expertise and investment in hydropower generation projects.

Mahmood Qureshi thanked the Kyrgyz Government on steps taken for safety and welfare of Pakistani students. He agreed for upgrading relations between the two countries, including development of trade and energy corridors. Foreign Minister Qureshi said that Kyrgyzstan could use facilities of Gwadar sea port for trade with the world.

The two Foreign Ministers agreed to revitalize the Joint Economic Commission and institute bilateral consultations between the two Foreign Ministries. The two sides also agreed to closely coordinate with the UN and other international organizations.

Foreign Minister Makhdoom Shah Mahmood Qureshi accepted the invitation to visit Kyrgyzstan at mutually agreed dates.

PM directs restructuring of Pakistan Railways on modern lines -- APP

PM directs restructuring of Pakistan Railways on modern lines
ISLAMABAD, Sept 27 (APP): Prime Minister Syed Yusuf Raza Gilani on Monday directed the Ministry of Railways to restructure Railways on modern and commercial lines to make it a viable financial entity. He said the root cause of operational inefficiency could be addressed by dualization as well as improvement of the railway track, enhancement of goods transportation and improvement in passengers service.

Chairing a high-level meeting to review progress of the implementation of Cabinet decision on restructuring of Pakistan Railways here at the ministry, the Prime Minister called for changing mindset of the officials to enhance operation efficiency through good governance and to make it a profit earning entity. He asked the Minister of Railways and the Finance Minister to work out a long term approach to improve operation efficiency and financial viability. The Prime Minister, in his opening remarks, observed that in the 21st century, Pakistan needs a cheap, efficient, reliable and secure mode of communication for millions of passengers and movement of goods. He urged the Pakistan Railways to reclaim its old glory to become a preferred mean of travelling for the common man. To achieve this goal, he added, the Pakistan Railways must under-go a total transformation. He said the Railways needs modern, faster, safer and reliable, infrastructure and

rolling stock. Being a public service utility, it should adopt service delivery and customer satisfaction as its guiding motto.

The Prime Minister said the Ministry of Railways is one of the most important ministries of the Federal Government and Pakistan Railways is a historical asset as well as a strategic entity which played an important role in socio-economic development of the country, he added.

He observed that it provided the much needed communication lines for transportation of people and goods across the country.

The Prime Minister said Pakistan Railway was once the cheapest and the most reliable mode of transport but today it is a liability rather than an asset.

He said the government could not afford to throw good money after the bad money as it is facing serious financial management challenges like rehabilitation and reconstruction of flood affected areas and security related expenditures.

He assured that the government would, however, like to do as much as it can to revive Pakistan Railways yet the latter should first put up a genuinely self-help effort and display performance improvement to qualify for financial assistance from the government.

The Prime Minister said last year the Federal Cabinet set up the Cabinet Committee on Restructuring of State Owned Enterprises (SOEs) to ensure good governance and reduce their losses and Pakistan Railways was one of the SOEs selected for the first phase of restructuring. "Much time has passed and I have yet to see tangible results on ground," he said.

The Prime Minister urged the Cabinet Committee on Restructuring to finalize the re-structuring proposals and place them before the Cabinet at the earliest.

He instructed that the re-structuring proposals should have a clear and doable road-map with time-lines and measurable targets and performance benchmarks.

He directed the ministry that in the meanwhile, the Pakistan Railways should put its house in order and begin work on improving management and bringing operational efficiency by utilizing the resources available in the organization.

He said the Pakistan Railways must focus on reducing operating costs while introducing innovation to increase internal earnings. At the same time, he added, it must also focus on better management and utilization of non-core assets to fund operational capacities.

The Prime Minister said safety and security should receive the priority it deserves. He pointed out that there are hundreds of un-manned railway crossings across the country which is a permanent public hazard. He regretted that many precious lives had been lost in the past including those of innocent school children. He directed the Pakistan Railways to take immediate steps for putting up gates at the un-manned railway crossings.

Federal Minister for Railways Haji Ghulam Ahmed Bilour apprised the Prime Minister of the steps taken to implement the Cabinet decisions. He also mentioned that due to shortage of locomotives, the Pakistan Railways is facing serious problems and difficulties.

Finance Minister Dr. Abdul Hafeez Shaikh, Minister of State for Railways Afzal Sindhu and the concerned senior officials attended the meeting.

Review port deal with PSA: Pakistan's navy chief -- The Business Times

Review port deal with PSA: Pakistan's navy chief

Pakistan may give Gwadar port contract to China

(ISLAMABAD) Pakistan should review a deal with the Port of Singapore Authority (PSA) to run a strategic shipping port, said Pakistan's navy chief, amid speculation that the contract may go to key ally China.

Pakistan is keen to become a conduit for trade to landlocked Afghanistan and Central Asia and now has three major ports - Gwadar in Baluchistan province and two at Karachi, 450km to the east.

Admiral Noman Bashir, also government adviser for maritime development, was quoted by Pakistan media calling for a review of the contract to run Gwadar with

Singapore's PSA International Ltd because the port was not operating to expectations.

'I'm saying this with great concern that the purpose for which the Gwadar port was built is not being achieved,' Mr Bashir told reporters in a news briefing shown on television on Friday.

'We have given them a lot of concessions and no commitment was taken from them in return. That's why this agreement should be reviewed.'

PSA, which runs ports around the world and is owned by Temasek Holdings, declined to comment.

Conceived over a decade ago, Pakistan hoped Gwadar, 70km east of the Iranian border and on the doorstep of Gulf shipping lanes, would handle transshipment traffic for the Gulf.

Mr Bashir's comments came on the heels of a media report last week saying the project may be given to China, which provided 80 per cent of its initial US\$248 million development costs.

China is already involved in engineering, mining, nuclear energy and construction projects in the country, and has invested in Pakistan's transport and mobile communication sectors.

'The expectation was that (PSA) would bring in trade, but it has not done so and turned the whole port - built with Pakistani and Chinese investments - into a white elephant,' said Rasul Bakhsh Rais, professor of political science at the Lahore University of Management Science.

He said the admiral's statements and earlier media reports were 'preparing the ground' for cancelling the deal and awarding operation of the port to China.

'I think it would be a wiser decision to cancel this agreement and tie up with the Chinese, who are interested in trade corridors and in gas and oil pipelines in the region.'

If under Chinese control, Gwadar would give Beijing more economic sway in the region and upset Pakistan's traditional enemy, India, which views China's ties with Islamabad with suspicion.

PSA International took over management and operational control of the deep-sea port in February 2007 for 40 years. -- Reuters

**Chinese firm bags deal to link Pak, Afghanistan, Uzbekistan by rail --
The Economic Times**

Chinese firm bags deal to link Pak, Afghanistan, Uzbekistan by rail

The proposed 700 kilometers line will run right through the hotly contested Taliban areas while connecting the in northern with Kabul and the two neighboring countries.

India has been eager to help Afghanistan build its railway system as part of the reconstruction efforts. But it has apparently been checkmated by China because of its influence as an investor in the local copper mines and Pakistan's aggressive support for the Chinese firm, sources said.

"This northern railway is part of a wider plan to extend the Afghan rail network to connect Afghanistan to ports in Iran and Pakistan," Wahidullah. Shahrani, Afghanistan's minister of mines. The rail link was essential for the transportation of iron ore and copper, he said.

The China Metallurgical Group Corporation, which has been involved in the development of Aynak copper mines, has been entrusted the task of carrying out feasibility studies, and work out the construction program.

MCC has estimated that the line will cost \$5 billion and take five years to be completed, and half of the time would be spent on the feasibility study. It is obvious that the long two and half years kept aside for feasibility study is actually the waiting period required to ensure that the Taliban areas are peaceful enough to begin construction work.

The agreement with Afghan government specifies that MCC will lay the line under a build own, operate and transfer concession after the local government approves the feasibility study. MCC president Zou Jianhui recently said that the security factor was something his company was watching closely because it would put its investment to grave risks.

Pakistan puts new life into ECO -- Kashgar Times.

Pakistan puts new life into ECO

Posted on 29 September 2010

Truck Carvan of ECO states to hit the road tomorrow Enforcement of transit transport framework agreement Muhammd Arshad

Economic Cooperation Organization (ECO) member countries have finally decided to enforce much awaited Transit Transport Framework Agreement (TTFA) by launching a Truck Carvan, which will start from Pakistan on Thursday. It will move across the region and terminate at Istanbul, Turkey after passing through Iran, Turkmenistan, Afghanistan, Tajikistan and Kazakhstan.

A symbolic send off ceremony will be held in Islamabad today (Wednesday) to be attended by dignitaries and businessmen. Being initiative of Pakistan, it was decided that the Caravan will be launched from Pakistan and the Trucks of all Member States (One from each) including Pakistan will assemble in Quetta.

Truck Caravan is being jointly organized by ECO Secretariat in Tehran and International Road Transport Union (IRU), the sources informed.

The TTFA, to provide access to land-locked countries, was signed among the 10 member states more than a decade ago for road, rail and inland water transportation in a bid to boost trade and social activities in the ECO region.

Pakistan being the pioneer member of the ECO is a strong advocate for promoting transit and transport links among the ECO member countries specifically for the landlocked Central Asian States and Afghanistan.

The TTFA lays down a comprehensive roadmap for establishing functional transit links across the region, will provide a way forward for linking the five Central Asian States namely Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan through road with the Ports of Pakistan and surely contribute to streamlining the transport operations and services. The TTFA will boost trade activities coupled with social links in the region as the member countries have already enhanced regional cooperation in areas such as trade, industry, transport & communications, energy and information technology.

The need for cooperation among the ECO member countries is also reinforced by the common challenges faced by them. These challenges include poverty, degradation of environment, food scarcity, threat of terrorism and extremism, narcotics trade, threat of epidemic diseases and the impact of global financial crisis.

Over the years Pakistan has made steady progress towards improving potential trade and transit links through up-gradation of national transport infrastructure and establishment of functional region-wide transit corridors. This up-gradation has provided a viable option to the Central Asian Republics for transit links.

Considering the importance of sea port access to the landlocked countries and the fact that these road connections would provide shorter route to these States, Pakistan has planned to develop a new National Trade Corridor (NTC) linking upcountry in North with Ports in southern cities of Karachi and Gwadar in order to reduce travel time and operating costs.

Transit transport will enhance social links among the ECO countries as well as they have interacted over the centuries through the fabled Silk Route. The route facilitated not just traders and invaders but also philosophers, saints, thinkers and artisans. This interaction was intense and spread over millennia. As a result, today, the people of the region share cultural, linguistic, ethnic and spiritual commonalities.

These commonalities are even more pronounced in case of Pakistan. Our cultural traditions, language, cuisine, and even religious undercurrents have predominantly Central Asian roots. The historic cross currents of ideas, civilization and culture among the ECO countries had been innately strong.

Under the colonial rules of British in South Asia and some seventy years of Soviet control of Central Asia the interaction among the countries in the region was assiduously curtailed but remained intact symbolically by travel, trade, migration and even conquest. The Silk Route, both physically and in terms of ideas, put down idle but the inherent regional similarities could not be eliminated as the effects of shared millennia of history could not be reversed by the antics of the Great Game.

Scope and potential exist in the region offer inter-regional economic and political activity for the nations in the area. The population of Central Asian States (CARs) is only 65 million but they are extremely rich in energy resources and other raw materials, such as gold, uranium, iron and non-ferrous metals.

Central Asia has 150 billion barrels of crude oil and 1234 trillion cubic feet of natural gas reserves and Pakistan affords a ready market for these resources.

Over the years Pakistan has made steady progress towards improving potential trade and transit links through up-gradation of national transport infrastructure and establishment of functional region-wide transit corridors. This up-gradation has provided a viable option to the Central Asian Republics for transit links.

Gawadar seaport is a significant project in this regard. Future trade patterns envision substantial cargo from CARs and Afghanistan. Gawadar's role in oil transportation across the regions is also envisaged.

Karakoram Highway (KKH), built with the assistance of our great friend China, affords access to Central Asia through China. A Quadrilateral Agreement for Traffic in Transit brings together Pakistan, China, Kyrgyz Republic and Kazakhstan through KKH.

Pakistan is also pursuing import of hydroelectricity and natural gas from Central Asia. We have credible international backing for the two projects. World Bank and ADBP are the lead institutional support for import of energy from Central Asia.

The ECO member states, which include Afghanistan, Azerbaijan, Iran, Kazakhstan, Kyrgyzstan, Pakistan, Tajikistan, Turkey, Turkmenistan and Uzbekistan have declared their intention to make improvements in the regional transportation and communications infrastructure by signing TTFA. It is good effort to boost trade and commerce activities but there are many hurdles to enforce the TTFA in letter and spirit.

An inadequate regional transport infrastructure has always been the major obstacle to implement the TTFA as links among the members are poor, and even existing networks are in disrepair. For example, as much as 60 percent of the road and bridge system in war-ravaged Afghanistan is in need of replacement. Many observers say ECO is unlikely to thrive until a comprehensive infrastructure is in place.

ECO's vision for the development of transport and communications networks was first outlined in Ashgabat Declaration of 1997, which called for the formation of a permanent commission to oversee infrastructure improvements. The document called for the creation of a network of roads, railways and ports that would make ECO goods easily exportable via shipping hubs in Iran, Pakistan and Turkey.

Subsequently, ECO established a program of action that began in 1998 and runs through 2007. The program outlines 12 objectives to stimulate trade and facilitate the movement of goods from landlocked regions to existing ports include the construction of a Trans-Asian railway; development of better border customs facilities; the establishment of a common postal area; the development of a Transit Transport Framework Agreement; the creation of an information mechanism to manage inter-state commerce; and the development of an inter-state fiber-optic telecommunications system. Other points in the programme call for the publication of studies, along with the convening of regular inter-governmental meetings, aimed at stimulating trade.

In the area of railway development, some progress has been achieved. For example, the Tejen-Seraks-Mashad railway linking Iran and Turkmenistan, inaugurated in 1996, increases the access of Central Asian states to the ports of the Persian Gulf and Arabian Sea, as well as to Turkish ports on the Black Sea and the Mediterranean.

However, other aspects of railway development appear stalled. Under a plan finalized in O

Tethyan Copper plans to invest \$3.2bn in Reco Dig -- Daily Times Tethyan Copper plans to invest \$3.2bn in Reco Dig

QUETTA: Tethyan Copper Company Pakistan plans to operate a world class copper and gold mine with 2.2 billion tonnes economically mineable reserves by deploying a cutting edge technology at Reco Dig, Chagai, Balochistan as a joint venture with the Balochistan government with initial \$3.2 billion foreign direct investment over four years.

"We have submitted a feasibility study to Balochistan government and are having talks with the provincial government to conclude an agreement which will result in take-off for the project in next four years," TCCP senior project geologist Asadur Rehman told a group of journalists who visited the site of project, 70 kilometres north west of Nokandi. "Balochistan will get 25 percent profit plus royalty. Balochistan government will invest 25 percent in construction, development of project."

He said if an agreement was signed with the Balochistan government, TCCP-

Barrick Gold Corporation and Antofagasta Minerals of Chile-will export condensate copper and gold through Gwadar port through 682km buried pipeline from Reco Dig to Gwadar at prices quoted on the London Stock Exchange. TCCP has so far invested \$214 million in Reco Dig project. He said estimated payable metal production at Reco Dig over about 56 years of mine life is 22 billion pounds of copper and 13 million ounces of gold. It has an average grade of 0.5 percent copper and 0.3 grammes gold per tonne. ppi

US to promote agriculture in Afghanistan, Pakistan

ISTANBUL - Hürriyet Daily News

Wednesday, September 29, 2010

The U.S. government is committed to providing expertise and assistance to Afghanistan and Pakistan's agricultural sector so that the countries can establish the necessary infrastructure to promote better productivity and higher food safety in their agricultural products.

"We will support the long-term development of agriculture in both countries," Darci Vetter, the undersecretary for farm and foreign agricultural services at the U.S. Department of Agriculture, said Wednesday during the agricultural meetings with Afghan and Pakistani leaders in Istanbul.

The trilateral meetings with the two Asian countries were supported by the government of the United States and ran Tuesday and Wednesday.

Food security, water management and advanced irrigation technologies, as well as the establishment of trade corridors for agricultural products, were the main areas of discussions. Participants set up priorities and drafted an action plan to help Afghan and Pakistani farmers improve productivity and trade relations.

"The main purpose of such an initiative is to bring peace to the region," Malik Zahoor Ahmad, the chief coordinator of the trilateral secretariat for Pakistan, said Wednesday, adding that promoting food security would lower poverty rates and illiteracy.

Projects to get Afghan farmers out of opium business

Afghanistan continues to be the world's biggest producer of opium in 2010, according to United Nations Office on Drugs and Crime, or UNODC, statistics.

Preventing opium production and distribution is one of the main challenges Afghanistan and other countries in the region have to face, said Vetter.

"We have to provide [Afghan] farmers with other real alternatives," she said, adding that they would earn larger incomes by cultivating high-value agricultural products such as fruit and nut trees.

She also said helping such agricultural products reach both domestic and foreign markets was crucial.

Abdul Ghani Ghuriani, the Afghanistan deputy minister of agriculture, said the country's government was working hard to address the opium production, which he said was more intensive in the southern part of the country.

"As this is a cross-cutting issue, we have developed cross-cutting strategies to tackle it," Ghuriani said, adding that the Ministry of Agriculture was trying to encourage farmers to produce legal agricultural goods by providing them capital and giving other policy incentives.

At the same time, he said other ministries were working to monitor the situation and stop and destroy poppy production and distribution.

Real action to be taken through projects

Afghan experts suggested establishing an irrigation institute to train and qualify agriculture academics and experts in both Afghanistan and Pakistan, thus encouraging cooperation as well as exchange of expertise and ideas.

Another project suggested by the working groups was founding a trans-border surveillance system in order to monitor animals shipped across the border. Foot and mouth disease, which is common in cattle and goats, is widespread in the region.

Vetter said the U.S. would work on small-scale and easily replicable and sustainable projects which would have long-lasting effects on the agricultural sectors in both countries.

Accord signed with US for \$831m under Kerry-Lugar Act -- Daily Times
 Accord signed with US for \$831m under Kerry-Lugar Act

- * US ambassador says funds being used in transparent manner
- * Money to fund key sectors, including democracy and governance

By Ijaz Kakakhel

ISLAMABAD: The United States and Pakistan on Thursday signed five agreements for the grant of \$831 million under the Enhanced Partnership with Pakistan Act, popularly known as Kerry-Lugar Act.

US Ambassador Robin Raphel and Economic Affairs Division Secretary Sibtain Fazal Halim inked the agreement. Speaking at the signing ceremony, Raphel said the US was working closely with the government of Pakistan and non-government organisations, and that the US funds were being utilised in a transparent manner.

Giving details of the agreement, the ambassador said that it was an important element in the implementation of the Kerry-Lugar Bill. It would make available the first tranche of \$831 million from over \$1 billion in development assistance funds that the US will provide to the US Agency for International Development (USAID). Raphel revealed that USAID had already provided \$224 million from the Kerry-Lugar funds to priority projects in Pakistan.

"We will implement our assistance in the most open, transparent and accountable manner, so the people of Pakistan and of the US know where the money is going," Raphel said, adding that the US government was in contact with the Pakistan government for long-term strategic dialogues, which included talks on financial assistance. The American government had also contributed \$340 million to the flood-relief efforts, she added. Answering a question about transparent use of the money, Raphel said the US had a number of monitoring mechanisms for this purpose. "We thoroughly assess the situation and make decision whether to extend our funds to an entity or government of Pakistan," she said, adding if the US government realised that the assistance was being misused, it could stop further funding. The ambassador said that there was no need to evaluate the performance of projects in Pakistan through third party evaluation.

The funds will be used for programmes in key sectors. The breakdown of allocation for various sectors is as follows: \$99 million for democracy and governance, \$131 million for health, \$179 million for education, \$144 million for creation of economic opportunities, \$56.5 million for agriculture, \$45 million for energy. \$111 million and \$66 million will be spent on stabilisation and human assistance in FATA and Khyber Pakhtunkhwa, respectively. Halim defended the country's financial and auditing system and claimed that the US government trusted them.

Pakistan Atomic Energy Commission in service of the nation --
ARTICLE

Pakistan Atomic Energy Commission in service of the nation

ARTICLE (October 01, 2010) : Pakistan Atomic Energy Commission (PAEC) has, over the years, built an extensive infrastructure for contributing to the socio-economic uplift of the country.

Its activities span a wide spectrum: from nuclear power generation to minerals development, from developing high yielding, stress tolerant crops to the treatment of cancer, and from design and fabrication of industrial plants/equipment to human resource development.

NUCLEAR ENERGY

Nuclear power is pollution free, cost competitive and safe. It is independent of seasonal effects and provides security of electricity supply. Owing to these unique

characteristics, it augurs well for sustainable development. PAEC is successfully operating two nuclear power plants with the third one upcoming; has 45 reactor-years of experience in nuclear power plant operation at its credit and plans to build more nuclear power plants in the coming years to contribute to the energy requirements of the country.

MINERALS DEVELOPMENT:

Prospecting, exploration and processing of minerals for local industry, and provision of expert geo-technical services in these areas. Indigenous development of nuclear fuel and materials for local nuclear power plants.

SUPPORT TO THE INDUSTRY:

PAEC is assisting the industry in its growth and competitive capability by providing:

- Design and fabrication services for the manufacture of large-scale mechanical systems, complete plants and modules
- Training/certification in welding techniques and site services for manufacturing & installation of plants
- Training/certification in Non-Destructive Testing Techniques along with services for testing of manufactured equipment and in-service inspection of plants

INSTRUMENTATION & CONTROL:

PAEC undertakes design and installation of Instrumentation & Control Systems for its own projects and for the general industry. Various services are being provided in this area.

RESEARCH & DEVELOPMENT:

- Contributing to basic research in collaboration with world scientific bodies
- Assisting local industry through Research & Development
- Based upon the excellence of its research labs and human resource quality, -- -- PINSTECH, a research institute of PAEC has been declared Regional Resource Centre of IAEA.

CANCER HOSPITALS:

PAEC is running 14 state-of-the-art cancer hospitals all over the country which are providing diagnostic and treatment services for cancer related diseases to around 500,000 patients annually, most of them free of charge. Four more such hospitals will be added shortly.

AGRICULTURE & BIOTECHNOLOGY:

Over the years, PAEC has developed more than 61 new high yielding, stress tolerant crops varieties, which are fetching additional income to the farmers

Providing Saline Agriculture Technology for economic utilisation of salt-affected lands in the country.

Expert services in this area are provided to IAEA member countries

- Offering irradiation services for enhancing shelf life of fruits and vegetables
- Development of an indigenous and low cost Laser Land Leveler, which drastically reduces irrigation water requirement to crops
- Leading role in Bio-Tech research and applications

HUMAN RESOURCE DEVELOPMENT:

PAEC's institutes namely Pakistan Institute of Engineering & Applied Sciences (PIEAS) and KANUPP Institute of Nuclear Power Engineering (KINPOE) offer Masters and Ph.D. degree programmes in Systems Engineering, Nuclear Engineering, Nuclear Medicine, Information Technology, Medical Physics, Nuclear Power Engineering, Materials Engineering and Process Engineering.

Pakistan's foreign exchange reserves hit \$16.78 billion record level -- RECORDER REPORT

Pakistan's foreign exchange reserves hit \$16.78 billion record level
RECORDER REPORT

KARACHI (October 01, 2010) : The country's total liquid foreign exchange reserves reached highest-ever level of \$16.788 billion because of high foreign inflows sent by overseas Pakistanis. According to the State Bank of Pakistan the country's total liquid foreign exchange reserves posted an increase of \$156.4 million to \$16.788 billion on week ended on September 24, 2010 from \$16.632 billion a week earlier.

Earlier, the country's liquid foreign exchange reserves were at peak level of \$16.76 billion on July 2, 2010. The major raise has been witnessed in the reserves held by the SBP, which reached near \$13 billion level. Reserves held by the SBP increased by \$156.4 million to \$12.99 billion during the last week as compared to \$12.794 billion a week earlier.

Foreign exchange reserves held by banks witnessed declining trend as they fell by \$41.7 million during the last week. With current decline, overall forex reserves held by banks rose to \$3.816 billion as compared to \$3.7665 billion a week earlier. Sources said during the last week the country also received \$451 million from the International Monetary Fund on account of Emergency Natural Disaster Assistance (ENDA) for flood victims.

PM to inaugurate Rs 12 billion Diamer Bhasha Dam soon: Ashraf -- Daily Times

PM to inaugurate Rs 12 billion Diamer Bhasha Dam soon: Ashraf

* Water and Power minister says India violating Indus Waters Treaty

* 1750MW added to national grid, 1,000MW more in six months

By Zeeshan Javaid

ISLAMABAD: Federal Minister for Water and Power Raja Pervaiz Ashraf on Thursday informed the National Assembly that Prime Minister Yousaf Raza Gilani would soon inaugurate the Diamer Bhasha Dam project that was being constructed at a cost of Rs 12 billion.

Ashraf informed the House that land been acquired for the dam. He said the government wanted to build new dams with province's assent, while it was working on the construction of small and medium-sized dams. Accusing India of violating the Indus Waters Treaty from August 18, 2008 to August 25, 2008, the minister said that water inflow at the Marala Headworks on Chenab River had reduced, resulting in the desertification of over 200,000 acres of cultivable land.

Ashraf said India could not construct a dam or any other structure that hindered water flow in rivers entering Pakistan, without taking it into confidence. Responding to a question, he said that Neelum-Jhelum Hydropower project, which would generate 969MW of electricity, would be completed within a year.

The minister informed the House that restructuring of the power sector had improved electricity supply and there was no load-shedding in industrial sector presently. "Load-shedding has substantially decreased, 1,750MW electricity has

been added to the national grid and 1,000MW more will be added within next four to six months," he said. There is a gap between demand and supply of electric power and the government is making all out efforts to bridge it, he added.

Ashraf said that all the power companies affiliated with the Pakistan Electric Power Company would be privatised. He added that they would work independently and would be responsible for their profit and loss. Pointing to kunda system that is used to steal electricity, he said all provincial governments and the federal government were taking steps to stop electricity theft, and stern action against would be taken against those involved in it.

The minister said that raising of Main Dam, Sukian Dyke, Jari dam and emergency spillways was almost complete. On the Mangla Dam Raising Project, he said that development of new towns for the people affected by the raising was underway and Rs 4.8 billion were needed to complete the work. The minister said Water and Power Development Authority had transferred about Rs 48 billion to the Azad Kashmir government to compensate the affected families.

Ashraf said that the power tariff was based on fuel prices in the international market, and with any upward shift in oil price necessitates increase in domestic electricity prices. He, however, stressed that the government did not want to burden the lifeline consumers with price hikes. Ashraf vowed action against those involved in inflated billing. Admitting line losses, he said that updating the system would cost billions of dollars. He said that the government was still providing a subsidy of Rs 20 billion to the power sector.

Separately, Minister for Labour and Manpower Syed Khursheed Ahmed Shah informed the House that the country was exporting over 4 million skilled and unskilled workers to various countries. He said MoUs had been signed with six Middle Eastern countries in this regard.

Adviser to Prime Minister Nawabzada Ghazanfar Gul informed the House that LPG prices had witnessed a surge of Rs 7 owing to the floods. He said the situation was returning to normal and a decrease of Rs 3 has been witnessed. He hoped that prices would return to old rates.

Afghan trucks allowed up to Wagah -- Indo-Asian News Service

Pakistan has granted permission to Afghan trucks to carry export goods to the Wagah border for onward dispatch to India, a minister said. The federal government Wednesday approved a revised Afghanistan-Pakistan Transit Trade Agreement that allows Afghan trucks up to the Wagah border. Under the old agreement, the Afghan trucks were permitted to carry goods only to the Pakistan-Afghanistan border at Torkham.

Information Minister Qamar Zaman Kaira said that the new agreement was an improved form of the treaty signed by the two countries in 1965.

Dawn reported that Pakistan and Afghanistan had finalised the new agreement July 19 this year but the move sparked a public outburst. Critics said it was done under US pressure for the benefit of India.

Now, in the new agreement, Afghan trucks will be allowed to carry goods to the Wagah border, but they will not be allowed to carry Indian goods to Afghanistan. In return, Pakistani trucks will be allowed to go through Afghanistan to central Asia, Iran and Turkey.

Cabinet approves Pak-Afghan transit trade agreement -- The PakTribune
Cabinet approves Pak-Afghan transit trade agreement

ISLAMABAD: The federal cabinet on Wednesday approved the Pakistan-Afghanistan Transit Trade Agreement according to which Afghan trucks would only be allowed access up to Wagha border and they would carry only Pakistani export goods back to their country.

"The trade between Afghanistan and India is already taking place under the 1965 agreement and since 1980, Afghanistan is exporting through the Wagha border between Pakistan and India," said Information Minister Qamar Zaman Kaira while briefing newsmen after the cabinet meeting chaired by Prime Minister Yousuf Raza Gilani.

The agreement was signed between Commerce Minister Makhdoom Amin Fahim and his Afghan counterpart Dr Anwar-ul-Haq Ahady in the presence of Prime Minister Gilani and US Secretary of State Hilary Clinton on July 18 this year. The opposition had expressed reservations on the agreement, saying it would give India access to Afghanistan via Pakistan.

Kaira said since 1980, the Afghan trucks were allowed up to the Torkham border but under the new agreement they would be allowed access up to Wagha. "In return, Pakistani trucks would be allowed to go through Afghanistan to the Central Asian Republics and Iran," he said.

"The new agreement approved by the cabinet does not allow export of Indian goods to Afghanistan through the Wagha border," he added. He said the prime minister had directed the Federal Bureau of Revenue and the commerce ministry to work to curtail the menace of smuggling. It has also been agreed in the agreement that financial guarantees equal to the amount of import levies of Pakistan have to be deposited by authorised brokers/customs clearing agents to check unauthorised trade and these deposits will be released after the goods exit the country.

In case, the goods do not exit the country within the specified time, the guarantees will be confiscated by the customs authorities. He said the cabinet also approved that the Pakistan Housing Authority will now be an autonomous body and would work more efficiently with the private sector to provide accommodation to the government officials and other people on a priority basis.

When asked about reports in the Western media which claimed that Chief of Army Staff General Ashfaq Parvez Kayani had given a list of tainted ministers to the government seeking their removal and why there was no clarification from the ISPR or the federal government about these reports, the information minister replied: "It is

not the job of the COAS to give any list, to tell who should remain in the cabinet. He is doing his job well. There is no need to clarify this baseless report."

Asked whether the cabinet discussed the recent statements of former president Pervez Musharraf, Kaira said, "Leave him, he is irrelevant now." He said the cabinet reviewed the implementation status of the cabinet decisions pertaining to the Narcotics Control Division, Board of Investment and Commerce Division.

He said the cabinet was told that around 85 per cent decisions relating to these divisions had been implemented while the remaining relating to discussions with foreign countries and other stakeholders were being pursued. He said the cabinet reviewed the second phase of rehabilitation of floods victims.

Kaira said floodwater had almost receded from the flood-hit areas of Khyber Pakhtunkhwa and the Punjab while in Sindh, 14 per cent floodwater had receded. The information minister said so far over 322,000 Watan Cards had been distributed among the flood-affected people. He said the cabinet approved the decisions of the ECC meeting and approved a programme being launched by the French Development Agency, the Asian Development Bank and the Government of Pakistan at a cost of 980 million dollars. "Under this programme, work would be initiated to meet energy crisis in the country with more efficiency," he added. Under this programme the ADB would provide \$780 million, including \$65 million for energy saver bulbs.

The minister said the cabinet also approved an agreement with Egypt regarding exchange of experts for technical training. The cabinet gave approval to a loan assistance agreement with Korea under which Korea will provide 180 million dollars for infrastructure, health, education and renewable energy projects.

Pakistan building 500 MW Wind Energy Farms07. Oct, 2010 0 Comments

ISLAMABAD: Minister for Water and Power Raja Pervez Ashraf has asked Alternative Energy Development Board (AEDB) to immediately process the proposals of Employees Old age Benefit Institute (EOBI) for setting up of 200 to 500 MW Wind Energy project in the country.

He said that while presiding over the Inter-ministerial meeting for setting up of wind energy project with local manufacturing. The meeting also attended by Federal Labour Minister, Syed Khursheed Shah, Minister of State for Defence Production, Sardar Salim Haider, Chairman, Heavy Industries Board, Taxila (HIT), Chairman EOBI, CEO, AEDB and other senior officials of the AEDB and HIT.

Raja Pervez Ashraf appreciated the EOBI for their keen to invest in the power sector by establishing Wind Power Project. He said that Pakistan has great wind energy potential. The wind energy is environment friendly power generation and the world is also trying to develop wind farms to generate cheapest energy for its consumers.

He said that the government of Pakistan is also encouraging investment in the alternative energy projects and number of LOIs have been issued to the potential investors. He said that the change in the energy mix is our policy and alternative energy and hydel projects are our priorities. The Minister also assured that after completing the required procedure, the AEDB will immediately issue LOI for the wind power project of EOBI.

The Labour Minister, Syed Khursheed Shah said that the Ministry is keen to invest the EOBI funds in the best national interest and the proposal to set up Wind Energy Farm will help to meet our future energy requirements. He said that the EOBI will set up wind power project of 200 to 500 MW with the collaboration of local

manufacturing. He said that it is our desire that the wind project should be completed within shortest possible time frame of one year.

The Minister of state for Defence Production, Sardar Salim Haider informed the meeting that Heavy Industries Taxila have the ability to develop some kind of wind energy machinery parts. He assured the meeting that the HIT will fully cooperate in the mage project and utilize all of its expertise.

The meeting decided to early process two feasibilities one for 200 MW and other for 500 MW wind projects. The report of the AEDB and HIT will be submitted in the next inter-ministerial meeting to be held next week.

Earlier, the Chairman EOBI briefed the meeting on their investment plan of wind energy projects and the Chairman HIT on the expertise of manufacturing of parts of wind turbines. Pakistan plans 200 to 500 MW Wind Energy Project. 'Pakistan Times' Business & Commerce Desk

Turkmenistan to help Pak generate 1000 MW of electricity -- Dr Jassim Taqui

Turkmenistan to help Pak generate 1000 MW of electricity
Dr Jassim Taqui

Islamabad—The main thrust of the Turkmen bilateral ties with Pakistan is to promote trade ties and to accelerate efforts for TAPI gas pipeline (Turkmenistan-Afghanistan- Pakistan-India). The capacity of 1400 km pipeline, have of which would run via Afghanistan, is estimated between 25 to 30 billion cubic meters gas per year, stated the Turkmen Ambassador Mr. Sapar Berdiniyazov in an exclusive interview with Pakistan Observer. He further stated that Turkmenistan is the largest “ Blue Fuel” producer in Central Asia.

Giving a background on the TAPI, Mr. Berdiniyazov said that on March 11, 2009 and during ECO summit in Tehran Mr. Gurbanguly Berdimuhamedov President of Turkmenistan and Mr. Asif Ali Zardari reaffirmed commitment to further strengthen bilateral relations and the construction of the TAPI. On August 30, 2010, President Berdimuhamedov talked telephonically to Zardari on the TAPI. During the conversation Mr. Zardari accepted the Turkmen invitation to participate in the summit of heads of the TAPI states. The summit would be held in December this year. Elaborating, Mr. Berdiniyazov said that Turkmenistan and Pakistan held two sessions of JMC successfully. The first session was held in Ashgabat last year. The second was held at Islamabad on August 24-26, 2010. Mr. Rashid Meredov, Deputy Chairman of Cabinets of Ministers of Turkmenistan, Minister of Foreign Affairs headed the Turkmen delegation. During the discussion, delegates from both sides presented various proposals to enhance cooperation in the fields of trade, energy, agriculture , livestock, science and technology, education, health, sports and tourism. At the JMC, Berdiniyazov disclosed, Turkmenistan offered export of at least 1000 MW electricity to Pakistan.

A Joint Working Group between relevant organization had been established which would start deliberation on this project. Turkmen delegates during the session paid official calls on President of Pakistan, Prime Minister, foreign Minister and Minister of Petroleum and Natural Resources and discussed TAPI, bilateral and regional cooperation. The two sides also underlined the importance of accelerating efforts to build TAPI pipeline on priority basis. In this regard, Turkmen side hosted the Steering Committee meeting of TAPI on 18-20 September, 2010 in Ashgabat where the landmark agreement was signed for TAPI multi-billion gas pipeline project. Mr. Sayed Naveed Qamar, Minister of Petroleum and natural resources represented Pakistan at the meeting. Berdiniyazov said that Turkmenistan is a hub of energy and is also a major energy exporter. Turkmenistan is exporting oil, gas and electricity to Russian Federation, Ukraine, Iran, Afghanistan and Turkey through existing pipelines. On December 14, 2009, the 7000 km long international Turkmenistan- China gas pipeline was also launched. It was a landmark in the contemporary history of Turkmenistan. The event was attended by Turkmen

President Mr. Gurbanguly Berdimuhamedov, Chinese President Mr. Hu Jintao and Presidents of the transit countries- Islam Karimov of Uzbekistan and Nursultan Nazabayev of Kazakhstan. This transnational pipeline will transport up to 30 billion cubic meters of Turkmen gas. On January 6, 2010, construction of the new Turkmenistan-Iran (Dowlejabat-Sarakhs-Hangeran) was completed and launched in Turkmenistan. The projected capacity of this gas pipeline is 12 billion cubic meters of gas annually. Answering a question on the future pipelines intended to be constructed, Berdiniyazov mentioned East-West gas pipeline which will link the largest gas fields in the country of a capacity of 30 billion cubic meters. The pipeline costs \$ 2 billion. By 2030, Turkmenistan intends to increase gas production to 250 billion tons per year and 110 million tons of oil per year. Similarly, Turkmenistan plans to increase gas exports to 125 billion cubic meters per year. Speaking on Turkmen policy towards Afghanistan, Berdiniyazov said that his government was keen to find a peaceful settlement to the issue of Afghanistan by negotiation and creating an atmosphere of national reconciliation.

Taking into account the neutral status of Turkmenistan, Ashgabat is ready to hold an international meeting under a UN auspices on confidence building in Afghanistan. Mr. Berdiniyazov paid rich tribute to President Gurbanguly Berdimuhamedov for proclaiming Neutrality in Turkmenistan and said he was proud to state that the United Nations welcomed and endorsed Turkmen Neutrality. He further said, "Neutrality is not just a legal status. It is an active position, a full-scale involvement in international processes through peacemaking and assisting in working out effective models of economic cooperation."

Pakistan government seek fund for Thar coal -- Business Recorder

Pakistan government seek fund for Thar coal

Friday, 08 Oct 2010 The government is to seek foreign funding for development of infrastructure to support early completion of Thar coal project. Official sources told Business Recorder that the Sindh Engro Coal Mining Company has completed the detailed feasibility study of the coal mining project, estimated to produce 6.5 million tonnes per annum of coal from block II of Thar coal fields.

Sources said that the feasibility study proves that the project is technically viable. However, to ensure its economic viability the infrastructure related to Thar coal development is of critical importance, which has to match the timelines of the project. During recent presentations before the president and the prime minister, the infrastructure development initiatives were discussed in detail and both leaders had urged all relevant ministries to expedite project approvals on fast track basis.

In terms of Rule 6 and 11 of the Rules of procedure of the Council of Common Interests prompt action has to be taken by concerned federal and provincial governments to give effect to the decision of the CCI. According to sources, no investor can achieve financial close for the project of this level without provision of robust infrastructure. Provision of infrastructure is the responsibility of the government. Hence, it requires appropriate commitment on the part of the government to attract and retain investment for this kind of project.

Thar Coal & Energy Board is actively pursuing the task and is focused on developing an enabling environment which includes developing physical infrastructure that can facilitate the mining and power generation. In order to develop physical infrastructure for development of Thar coal, initial feasibilities/estimates suggest ensuring local/foreign funding of approximately PKR 148.09 billion. This includes funding of PKR 29.75 billion for water supply, PKR 12.75 billion for effluent disposal, PKR 17 billion for constructing railway network and PKR 4.24 billion for improvement of road network. To evacuate 10,000MW from Thar coal based on production projections, laying and installing transmission network is necessary from Thar that would require an allocation of at least PKR 85 billion.

Sindh government has urged for preparation of a comprehensive strategy and roadmap by Economic Affairs Division to explore international financing options. In this regard, it has been proposed that a core group may be constituted by EAD to expedite and follow up with international agencies, international banks through Pakistani Economic Ministers abroad, and other available financing options including but not limited to Pak-China "Five Year Development Program on Trade and Economic Cooperation".

**LCCI flays Afghan-Pakistan Transit Trade Agreement APTTA approval
-- RECORDER REPORT**

LCCI flays APTTA approval

RECORDER REPORT

LAHORE (October 09, 2010) : The Lahore Chamber of Commerce and Industry, while criticising the approval of Afghan-Pakistan Transit Trade Agreement (APTTA) termed it against Pakistan's national and economic interests and said it is bound to increase unemployment, poverty and further slow down the process of industrialisation in the country.

The agreement that was approved by the federal cabinet would allow Afghan trucks to fetch goods from Wahga due to which the existing trade volume between Pakistan and Afghanistan would nose-dive to new lows as India would be catering to Afghanistan's business needs at more competitive rates in an efficient way, said LCCI President Shahzad Ali Malik in a statement on Friday.

The Indian manufacturing sector would get a new boost while Pakistan's entire industrial sector would suffer badly because the Afghanistan's orders would now be directly landing to the hand of Indian businessmen instead of Pakistan. "There is no second opinion about it that the ultimate beneficiaries are India and Afghanistan" he added.

The opportunity provided to Afghanistan to export to India is also likely to be misused as had been in vogue for the last many years. Because of corrupt practices, the Afghani goods destined for India are likely to get their way to Pakistani markets turning the country into a trading hub instead of a manufacturing place thus hitting the country's economy hard, Malik maintained.

"APTTA is harmful to Pakistan's economy as whole and counterproductive for local industry as it would be catalysing smuggling. This is not only trade and industry that would be falling prey to the proposed Agreement but the transport sector would also get a blow. The Afghani trucks on their way back to Afghanistan would be carrying Pakistani merchandise to Kabul or other destinations depriving Pakistani transporters of their business, which they were doing for the last many years, he added.

TIKA opens office in Pakistan to enhance assistance operation

--

APP

TIKA opens office in Pakistan to enhance assistance operation
ISLAMABAD, Oct 13 (APP): The Turkish International Cooperation and Development Agency (TIKA) would establish its office in Pakistan to strengthen its cooperation for the development of various projects and programmes in the country. In this regard, Cooperation Protocol for establishment of the office in the country, was signed by President TIKA H.E. Musa Kulakhkaya and Hassan Nawaz Tarar, Additional Secretary, Economic Affairs Division on Wednesday.

TIKA, within the framework of this Protocol will provide assistance to Pakistan by dispatching experts, trainers, advisers, technical personnel, assistants and auxiliary staff.

It would also provide the necessary materials and equipments used within the framework of various investments, projects and programmes.

TIKA would train Pakistani experts, executive officers, diplomats, trainers and scholars both within and outside Pakistan.

In addition it would provide various services in the field of infrastructure besides assigning the preservation of cultural heritage.

TIKA is the Turkish government's Development Cooperation Agency which has coordination offices in 20 countries across Africa, Asia and Europe, delivering development assistance to partner countries through its projects and activities. Turkey had pledged US\$ 100 million during the Tokyo Donors Conference. Out of this, an amount of US\$ 10 million has already been disbursed as budgetary support, while the balance amount of US\$ 90 million will be spent on development projects/programmes.

The grant will be administered by TIKA.

'Pakistan Times' China Bureau**

PAF to participate in Int'l aviation, aerospace exhibition next month
'Pakistan Times' China Bureau

BEIJING (China): Pakistan Air Force (PAF) will participate for the first time in an international aviation and aerospace exhibition being held in China next month.

Addressing a press conference to brief about the salient features of the 8th China International Aviation and Aerospace Exhibition to be held in Zhuhai, in Guangdong province the Deputy Secretary General of the provincial government Lin Ying who is also member of the standing Committee of the air show along with other senior officials said that an aerobatic team of Pakistan Air Force "Sherdils" will demonstrate their acrobatic skill at the Air show.

He said that besides performance of Sherdils, the Pak, China jointly produced fighter aircraft JF-17 also known as "Thunder" fighter will also participate in exhibition in which world famous aircraft manufacturers including Boeing, Airbus, Rolls-Royce and Rosoboron export besides Chinese manufacturers would also show case their products.

The Air and Technical attaches at Pakistan Embassy attended the press conference. In an informal talk with the Vice-Mayor Chen Ying, the Air Attach said that PAF is ensuring maximum participation in the Air show and Chief of Air Staff of PAF will be attending the ceremony in Zhuhai.

This is for the first time, that China made K-8 aircraft and JF-17 Thunder fighter, a co-production of Pakistan and China will be the flying in the Air show, he said.

The Vice-Mayor Chen Ying said on the occasion that he was extremely happy to say that PAF is taking part in the exhibition in a big a way. "This demonstrates Sino-Pak strong friendship in all dimensions", he observed.

**Pak Urges Turkey to Facilitate Trade by Upgrading New Rail Link --
An International Initiative for Global Trade**

Pak Urges Turkey to Facilitate Trade by Upgrading New Rail Link

Pakistan President Asif Ali Zardari and Premier Syed Yusuf Raza Gilani conveyed to the visiting Prime Minister of Turkey Recep Tayyip Erdogan that their country was desirous of upgrading the new rail link between both nations to maximize trade. The first Economic Cooperation Organization (ECO) freight train started its journey from the Pakistani capital, Islamabad, on August 14 and reached 14 days later in Istanbul, former capital of Turkey via Tehran.

The 6,500km (4,040 mile) trial service via the Iranian capital, Tehran, is a pilot project of the regional ECO, and Islamabad expects the link to boost Pakistan's trade with Turkey and Iran - currently estimated at \$1bn - by as much as 50 percent. The ultimate aim of the project is to start a regular passenger train service between the ECO member states and provide a link to Europe and Central Asia.

While Gilani received Erdogan, he expressed his gratitude for extending a helping hand to the victims of the recent devastating floods of his country. Turkey provided funds to the tune of \$200mn, out of which around \$126mn were donated by the Turkish business community and ordinary people.

In response, Turkey's prime minister said it was natural for Turkey and Pakistan to help each other in hard times. He recalled Pakistan had not left Turkey on its own during its War of Independence and while the country was hit by a massive earthquake in 1999.

The Pak premier also emphasized that Ankara should encourage its private sector to collaborate even more closely with Pakistani counterparts in key sectors like construction, infrastructure, engineering, energy, agriculture, tele-communications, mining and textile, etc.

The ECO is an inter-governmental regional organization established in 1985 by Iran, Pakistan and Turkey for the purpose of promoting economic, technical and cultural co-operation among the member states. Apart from the founding members, the organization includes Afghanistan, Azerbaijan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan.

SUPARCO to launch Paksat 1R satellite next year -- Dawn

KARACHI: Pakistan will launch its telecommunication satellite "PakSat 1R" on August 14, 2011. The satellite will replace the current telecommunication satellite developed by Hughes System.

This was stated by Secretary SUPARCO, Arshad H Siraj on Monday. Talking to Dawn.com, Siraj said that the satellite will replace the existing PakSat 1 which will be inactive and outdated next year. The satellite already has shown signal eclipse of 88 days in a year. In PakSat 1R, the "R" means replacement.

Paksat 1 and R: the History

Telecommunication satellites are put in orbit 35,700 km above the equator, and on that particular altitude they move in-sync with Earth, thus completing the rotation in 24 hours and remaining stationary with respect to a particular position on the ground, which is why they are also called "geostationary satellites". However, only a limited number of satellites can be placed in that particular orbit because only one satellite can be put on each degree. Hence, 360 satellites can be placed in an imaginary circle above the globe.

The International Telecommunication Union (ITU) allocates the satellite place in geostationary orbit on a first-come-first-serve basis. But after allotment of a position, a deadline is needed for a party to launch its satellite in a given time and in case of failure, the allotment is handed over to other nations or parties who were in queue.

According to Secretary SUPARCO, in the 1980s, Pakistan booked eight slots in the orbit. In mid 90s Pakistan Telecommunication Authority (PTA) inked an agreement with Alcatel for a satellite. But in the mean time, a few telecommunication satellites launches failed worldwide and other problems halted the launch of the Pakistani satellite, causing Alcatel to cancel the agreement. Pakistan then also lost its allotted slots in orbit.

The deadline of the only slot left, 38° East, was April 19, 2003 and after that Pakistan also lost this space. The Former President of Pakistan, Pervez Musharraf asked the authorities to find a solution. A high level committee reported that buying and replacing a satellite of Hughes is the only option to secure the slot.

So Pakistan bought the Hughes satellite designed for Indonesia and moved it in the occupied slot in December 2002.

Paksat 1R

A hallmark of Pak-China joint venture, Paksat 1R will be launched on August 14, 2011, the Independence Day of Pakistan, which also happens to be the date for the 50th anniversary of SUPARCO. Working on this project will also give experience and confidence to Pakistani scientists and engineers. Many of the testing elements have been developed by experts of SUPARCO.

But the question is that why is Pakistan developing a telecommunication satellite rather than taking advantage of many commercially available satellites?

Siraj answered that it is not only important for capacity building but for self-reliance purposes as well in case of an embargo or other hurdles from advance countries as seen in past.

Siraj said that the Paksat 1R data and signals will be received by satellite ground stations located in Karachi and Lahore. Paksat 1R will have 26 transponders which will carry dozens of digital TV channels.

University in Gilgit to start Chinese language classes -- The Express Tribune

GILGIT: The Karakoram International University (KIU) in Gilgit plans to start Chinese language classes to reduce the communication gap between the people of the two neighbouring countries, official sources told The Express Tribune on Sunday.

"The management is discussing the idea and classes will be held soon," officials said, adding that the course will be extremely beneficial for those doing business in China as well as those wishing to acquire higher education in the neighbouring country. The Karakoram Highway is the only land route connecting Pakistan with China via Gilgit.

"Learning Chinese is a basic necessity for the Pakistani business community as no other language is spoken in China," they said.

With over 10 disciplines already being taught at the university, thousands of students from Gilgit-Baltistan are enrolled at the KIU.

Many feel that teaching Chinese will also have a positive impact on Gilgit's economy as more people will become involved in the Pak-China trade.

"Pakistan enjoys exemplary ties with China. The language will act as a bridge and further strengthen bilateral cultural and trade ties," they said.

Chinese Co to construct 335km of KKH: Alamgir -- Observer

Chinese Co to construct 335km of KKH: Alamgir

Islamabad—Federal Minister for Communication Arbab Alamgir Khan has said that an agreement has been signed with Chinese Company for the construction of 335 kilometers of Karakoram Highway which will cost \$ 510 million. He said the project is to be completed by 2012. He said 1600 Chinese are also working to bring the level of Attabad lake down by 50 metres and this will clear three villages which are now under water. He said blasting work has started to bring down the level of the lake. He said financial assistance would be sought from a Chinese bank for the construction of the damaged portion of KKH which has come under water. He said the area of the road which has come under water would be raised by ten meters to avoid such mishap in the future. For this ten new bridges would have to be built

In an interview with INP on Wednesday, the Communication Minister said an MOU has been signed with well known Chinese company CRPC for the building of 153 km of road from Thakot to the site of Bhasha Dam which will cost Rs 20 billion.

He said WAPDA has paid the cost of 550 kanal of land to Gilgit Baltistan Government for payment to the owners of the land acquired for Bhasha Dam. He said the Prime Minister is expected to inaugurate the construction of this road in the beginning of next month.

About damages to national highways due to floods, he said Rs 17 billion would be required for the construction and repair of roads and bridges in Khber Pakhtoonkhwa, Punjab and Sindh. He said his Ministry has demanded Rs 25 billion from the Government for the construction M-8 from Gwadar Port to Quetta.

He emphasized the importance of Karakoram Highway for Pakistan and said that a lot depend on this highway for Pakistan's trade with the new emerging economic power of the world, namely China. He said because of lack of attention of the previous governments, the KKH is in very poor shape. He said 600 KM distance between Islamabad and Gilgit takes 18 to 20 hours instead of 12 hours

The Communication Minister said 335 kilometres of KKH between Khunjerab to Raikot is not useable while a significant part of the road has come under Attabad lake. He said the Communication Ministry is making efforts to bring the road back to traffic worthy —INP

Mega projects to be given to Chinese companies: Zardari wants LPG pipeline to be laid from -- ISLAMABAD

Mega projects to be given to Chinese companies: Zardari wants LPG pipeline to be laid from Gwadar to China

MUSHTAQ GHUMMAN

ISLAMABAD (October 20, 2010) : President Asif Ali Zardari has directed the ministries concerned to lay a pipeline from Gwadar to China and from Gwadar to his hometown Nawabshah for supply of liquefied petroleum gas (LPG) to Karachi, Hyderabad, Nawabshah and Sanghar, sources told Business Recorder. Progress on this project was recently discussed at a meeting recently held under the chairmanship of President Asif Ali Zardari.

Sources said that Pakistan's Ambassador in China has also been directed to address a letter to the Chinese government in co-ordination with Foreign Ministry. The government has also decided to constitute a think-tank, with 20 to 40 years vision, that would look at the regional markets of Africa, Middle East and South Asia (Minister of Education/Foreign Ministry to co-ordinate), and a special task force will be set up for China projects to process and move forward all projects.

Sources said that mega projects, which Pakistan's budget cannot finance, require innovative finance packages eg Gwadar Port, railway from Pakistan to Turkey and Pakistan to Afghanistan. It has also been decided that Basha dam project should be put forward to the Chinese government immediately.

According to sources, BOT projects do not need approval of ECC. Three Gorges Company may be asked to provide a proposal on Bunji darn on BOT basis for further analysis by Ministry of Water and Power under Rules of Business. China is interested on a joint co-operation mechanism in energy sector, especially hydro and coal. The Chinese have called for a conclusive coal policy before they will consider any investment.

Sources said that Pakistan feels that there is a need to talk to the private sector to ascertain what products could be exported to China. Ambassador at Large, Khalil Ahmad explained that CHINT Group of China is interested in 10 megawatt solar projects, and has been asked to launch the project. AEDB and Ministry of Water and Power will ensure early processing of this offer.

Sources said that the President wants up to 20,000 Pakistanis to be trained in China and learn Chinese language. Minister for Education will contact big companies with contracts in Pakistan such as China Mobile to fund scholarships. Finance and Foreign Ministries would support Pakistani interpreters to learn Chinese.

The President is also of the view that Pakistan's young must learn Chinese working practices. Fifty to a hundred nurses would be sent to China under the programme. China is also being requested for a special interest-free loan for Pakistan's film industry. Coins will also be printed: One side Z A Bhutto and Benazir Bhutto and the other side Mao Tse-Tung and President Hu Jintao. It has also been decided that public sector works should start in Badin power project plants (5000 megawatt under supervision of Secretary General Salman Farooqi). He is engaged in talks with General Electric regarding new plans.

Korean firms to invest \$1,000m in health, energy sectors -- Daily Times

Korean firms to invest \$1,000m in health, energy sectors

* Mobile hospitals and preparation of vaccines included in the plan

* Light-emitting diodes to be imported for energy conservation

By Shabbir Sarwar

LAHORE: A consortium of Korean companies has decided to make an investment

of \$800-\$1,000 million in Pakistan in health and energy sectors, stated a three-member Korean delegation during their visit to Daily Times and Daily Aajkal offices here on Tuesday.

The team included delegation members Shinsung-Lux Technologies Director Sales Sang Jin Kim, CEO GP Corporation Kyung-Hwan and President Korea Digital Media Communication You Kiho while their host in Pakistan, Chief Executive DiShazen Group of Companies Mr Rana Imtiaz A Khan.

The delegation members told Daily Times that it was their third visit to Pakistan and they had separate meetings with Governor Slaman Taseer, health minister and businessmen. They said they have finally come to know that there are lots of opportunities for foreign businessmen in Pakistan due to suitable environment here. Therefore they have decided to invest \$800-1000 million in health and energy sectors.

To a question about the plan of investment, the delegation members said that for health sector they would establish mobile hospitals for the areas where facility of hospital and dispensary is so far not available in Pakistan. These hospitals would be established in big busses and on demand these would be shifted to other areas, they said. This proposal has won praise of the deferral health ministry. Additionally – vaccines of various diseases would be prepared in Paksitan and after meeting national requirement here they would be exported to Iran, Bangladesh, Afghanistan and India, they said.

For energy conservation, they have a plan to import Light-emitting diodes (LED) to Pakistan, which would guarantee more power conservation compared to energy savers. Campaign would be launched for use of these LEDs in homes, offices and other places. Manpower will be trained by taking delegation to Korea – giving them proper training there and then employing them here in Pakistan. Many Pakistani products would be exported to Korea and some Korean products would be imported keeping in view the price factor, they said. The Korean team would soon dispatch containers for clothes, medicines and food for the flood victims of Pakistan.

All Day**Pakistan important economic partner: Swiss CG -- APP**

Pakistan important economic partner: Swiss CG

KARACHI, Oct 20 (APP): Pakistan is an important economic partner of Switzerland in Asia. This was stated by the Consul General of Switzerland in Karachi, Didier Boschung, at a reception on Tuesday evening.

He pointed out that Switzerland and Pakistan enjoy very cordial relations that go back more than 60 years.

The Consul General said that Switzerland in the last several years has usually been among the top five nations in terms of foreign direct investments in Pakistan.

He said a number of bilateral economic agreements facilitate business activities between the two countries, and many leading Swiss multinational companies are operating in Pakistan.

The Consul General pointed out that trade between Pakistan and Switzerland had increased during the past few years.

In view of the existing market potential, trade and investment performance could be further improved.

GENEVA: India, Afghanistan, Pakistan, and Turkmenistan will sign an agreement in December to build a 1,800 km long trans-border gas pipeline estimated to cost US \$7 billion. -- SANA TV

GENEVA: India, Afghanistan, Pakistan, and Turkmenistan will sign an agreement in December to build a 1,800 km long trans-border gas pipeline estimated to cost US \$7 billion.

"A Memorandum of Understanding (MoU) was signed recently between the four countries – India, Afghanistan, Pakistan, and Turkmenistan – and it will be operationalised by their leaders when they meet in December," Eklil Ahmad Hakimi, deputy foreign minister of Afghanistan, told reporters on Monday.

The proposed project will supply gas from the resource-rich Central Asia to energy-starved South Asia.

"This is a huge project involving energy cooperation between Central Asia and South Asia," the Afghan minister said, suggesting that the 1800 km underground pipeline will create employment for 20,000 people in his country now facing enormous security threats.

Hakimi, who is participating in an international meeting on regional cooperation in Central Asia, including sustainable development of Afghanistan.

He also mentioned about peace talks that are currently underway in Rome, saying terrorism is not originating from Afghanistan.

US special representative for Afghanistan Richard Holbrooke and General David Petraeus and the Afghan Foreign Minister Zalmi Rassoul are talking part in these talks.

Meanwhile, the United Nations Economic Commission for Europe along with ESCAP has convened a two-day meeting on how to speed-up regional cooperation in Central Asia, particularly in generating economic development in Afghanistan.

"Whereas little can be achieved without a minimum level of security, any progress made on the security front would be short-lived without being buttressed by a development effort to allow Afghanistan to build a sustainable future," said Andrey Vasilyev, UNECE deputy executive secretary.

In a background paper prepared for the meeting, the UNECE maintained that without neglecting the decisive importance of the security dimension, it is imperative to focus on the "civilian development effort".

Countries in Central America are land-locked pursuing divergent paths of economic development are facing a huge security challenge.

"Threats to Central Asia from Afghanistan have a regional dimension," said the UN official, suggesting that instability from Afghanistan spills over into bordering countries such as Uzbekistan, Tajikistan and Turkmenistan.

US to finance around \$ 40 mln for agri development in Pakistan : Gondal -- APP

US to finance around \$ 40 mln for agri development in Pakistan : Gondal
ISLAMABAD, Oct 21 (APP): Minister for Food and Agriculture, Nazar Muhammad Gondal said on Thursday that agricultural development projects worth around 40 million Dollar have been approved under Pakistan-US Strategic Dialogue.

The Minister, who is part of a high-powered delegation that attended Pakistan-US Strategic Dialogue in Washington, said that the working group approved allocations for various agricultural projects, including nine million dollars for wheat production and rust disease prevention, nine million dollars for cotton production and disease prevention, nine million dollars for prevention of food and disease in livestock and

some other programmes.

He told a news channel that this was the third or fourth meeting with main focus on increasing wheat and cotton production and controlling their diseases in Pakistan.

Nazar Gondal said the projects would also be financed under Kerry-Lugar Bill and USAid and their implementation is expected to start from next month.

He said the meeting also discussed strengthening of Pakistan Agricultural Research Council (PARC) and utilization of already allocated grants. Flood situation in Pakistan was also discussed in detail.

British Home Secretary meets President, PM -- Observer

British Home Secretary meets President, PM
Pak seeks intel sharing to thwart attacks in West

Staff Reporter

Islamabad—President Asif Ali Zardari on Monday called for greater international cooperation to counter extremism and terrorism and stressed the need for capacity building of Pakistani security forces to counter the threat.

Talking to Ms. Theresa May, British Home Secretary and Minister for Women and Equality who called on him at the Aiwan-e-Sadr, the President said both Pakistan and the United Kingdom share a common enemy and have to work together against it.

He said the democratic dispensation has evolved domestic consensus against the extremists' elements and would take all measures to neutralize the threat.

The President also appreciated the British assistance during the devastating floods and said Pakistan appreciates valuable assistance from the international community and its friends in this hour of distress.

He also thanked the British Government and the British Prime Minister for advocating Pakistan's case for getting access to EU markets.

Matters related to Pak-UK bilateral relations and cooperation, strategic dialogue, fight against militancy, floods relief and rehabilitation works, trade access to EU for Pakistan's goods, multifaceted collaboration between Pakistan and United Kingdom and various measures taken by the government for women development and empowerment were discussed during the meeting.

British Home Secretary and Minister for Women and Equality Ms. Theresa May assured British government's continued support to the democratic dispensation in overcoming difficulties due to war against terrorism and the devastation caused by unprecedented floods.

She lauded the contribution of Shaheed Mohtarma Benazir Bhutto for empowerment of women and strengthening of democratic institution and appreciated that the government was following her legacy. She said that both Pakistan and UK need to work together for strengthening of democracy in the country.

British Home Secretary also called on Prime Minister Syed Yusuf Raza Gilani. During the talks Gilani said, despite daunting challenges, Pakistan will continue to fight the menace of terrorism for the sake of peace and prosperity of the world. He hoped that the international community would honour its pledges made at the Tokyo Donors' Conference last year to address these primary issues.

The Prime Minister said that security and economic situation are intricately linked as poverty, lack of education and under development are the root causes of extremism and terrorism.

The Prime Minister proposed that Pakistan and Britain should consider recreation of a mechanism as well as parameters for cooperation between their security agencies.

He further stressed upon sharing of information and real time intelligence to enable the Pakistan authorities for taking the pre-emptive measures against any possible threat to UK and other western countries from terrorists. The Prime Minister expressed the concern on inordinate delays and high rate of rejection of visas to Pakistani politicians, businessmen, professionals and students by the UK High Commission in Islamabad.

He emphasized that the British visa service for Pakistani citizens should be resumed from Islamabad as earlier, since the underlying reasons for its shifting to Abu Dhabi did not exist anymore. The Prime Minister said that he was looking forward to receive the British Prime Minister in Islamabad in December to formally re-launch the strategic dialogue between the two countries and expressed the hope that Prime Minister Cameron's visit would impart new impetus to the cooperation in areas of finance, industry, defence, security, agriculture and cultural activities. During the meeting, Mrs. Theresa appreciated Pakistan's efforts and its role as a bulwark against terrorism to contribute towards the regional and world's stability.

She said that her government wants to work in a cooperative way with Pakistan on matters relating to counter terrorism and she would like to have an in-depth discussions during her recent trip to Pakistan to prepare and finalize cooperative framework on these issues before Prime Minister Cameron's visit.

She said that no country in the world have faced such magnitude of devastation, as did by Pakistan in the recent floods. She recalled British government and peoples' efforts to generate assistance to Pakistan.

United Kingdom Foreign Affairs Committee delegation led by H.E. Mr. Richard Ottaway MP (Chair), called on General Khalid Shameem Wynne, Chairman Joint Chiefs of Staff Committee (CJCSC) at Joint Staff Headquarters, Chaklala and discussed regional security situation especially developments in Afghanistan and other matters of mutual interest.

According to ISPR, The delegation comprised of Mike Gapes MP, Andrew Rosindell MP, Frank Roy MP, Sir John Stanley MP, Rory Stewart MP and David Watts MP. According to military sources, the UK delegation talking about Pakistan's key role for peace and stability in Afghanistan said that the manner in which Pakistan is fighting war on terror it will help in bringing peace and stability not only in region but in the world as well.

The delegation supported the reconciliation process initiated by the Karzai government said that the Afghans themselves have to play a leading role in the process.

Sources told that Gen Shameem Wayne on the occasion emphasized government point of view and said that all tribes and races should be taken into confidence for peace in Afghanistan. The two sides also agreed to further strengthening bilateral cooperation between Pakistan and UK in the fields of defense, security and armed forces.

German ILF wins IP gas pipeline feasibility study contract -- Tehran Times (Business Recorder)

German ILF wins IP gas pipeline feasibility study contract

The Pakistan government has awarded a \$55 million feasibility study contract to ILF, of Germany, for the \$2.5 billion Iran-Pakistan (IP) gas pipeline project with the condition that the consultant ""will complete its job in only 12 months"", against original plan of 18 months.

The consultant will complete feasibility study on banking proposition to raise funds for the project, environmental aspect, pipeline route and land acquisition for procurement of land for the project within stipulated timeframe.

The consultant will complete the feasibility study for the project in two phases and likewise get the payment from the government of Pakistan. Sources said that Pakistan had a plan to give the consultant one-and-a-half years for completing the feasibility study for IP gas line project, but now, with rising energy shortfall in

demand and supply and already faced with a delay of around one year, the government cut down feasibility study time from 18 to 12 months.

Pakistani officials informed the visiting ILF team that all issues with the Iranian authorities have been settled, including gas sale and purchase agreement (GSPA) and third-party certification for uninterrupted supply of gas from the source field to Pakistan for 30 years, and now it was the time to act swiftly and complete the gas line as early as possible to make practically possible to import the much-needed gas from Iran.

Pakistan and Iran had taken years to reach an agreement for finalizing thorny issues of IP such as gas pricing, source field dedication to make sure that Pakistan gets required gas supply for total project lifetime of 30 years. Other than bilateral issues with Iran for this key project, Pakistan had resisted pressure from various international players like U.S.A. to make it possible that Pakistan does not miss the opportunity to import gas from the nearest external source.

"Now we are comfortable that after continuous effort for years, IP gas line is going to enter practical phase to help Pakistan get gas from Iran to meet its rising shortfall in demand and supply," an official of Petroleum Ministry said. He confirmed that the Petroleum Ministry had successfully concluded deliberations with ILF, Germany to award feasibility study during last two days, and the consultant had agreed to complete the work in revised timeframe to help Pakistan enter construction phase in 2012.

Pak-Afghan to promote media cooperation -- APP

Pak-Afghan to promote media cooperation

ISLAMABAD, Oct 26 (APP): Afghan media delegation visited the Associated Press of Pakistan (APP) on Tuesday and emphasized on fostering relations between the two countries with the help of media. The two sides agreed to cement bilateral media ties including the exchange of media delegations. It was agreed that both countries would provide training facilities to their professional journalists for their capacity enhancement and skill-building in the backdrop of mushroom growth of media institutions.

The Afghan delegation said that aim of the visit was to promote culture of sharing their experiences in development of media. They appreciated the role of APP and agreed to further strength bilateral cooperation.

APP officials said that Pakistan wants to strengthen close cooperation with Afghanistan in all media sectors.

They agreed that both countries need cooperation in the media sector keeping in view the latest media trends in the world.

Media delegation highlighted the already established strong media ties between the two countries. They said that the journalists of their country are getting benefit from the interaction with journalists from neighboring countries.

The delegation emphasized that joint ventures in holding cultural events could give new dimension to bilateral cooperation. Moreover, both the countries could further benefit from joint productions and the exchange of already produced programmes.

General Manager of APP Syed Zulfiqar Hameed briefed the delegation about working of the organization and on video news service (VNS) which would help strengthen the media exchange between the two friendly states.

GM APP also assured them full support and cooperation in exchange of news. Chairman Daily outlook Publication Dr. Hussain Ali Yasa, Foreign Editor, Pajhwok, Afghan News Agency Abasin Zaheer, Radio Liberty Afghanistan Faizullah Qadash, Managing Editor, Kabul Radio Program "Islam Watander Pashtu Service Mohammad Ashuq, News Abdul Qadir Zadrar and conducting officer Qamar-uz-Zaman were members of the delegation which visited the news agency.

REFILE-Tethyan Copper to go on with Pakistan mining-exec -- Thomson Reuters

REFILE-Tethyan Copper to go on with Pakistan mining-exec

* Says in talks with government over project

* Expects production to start by end of 2015

By Amena Bakr

DUBAI, Oct 25 (Reuters) - A \$3 billion foreign joint-venture copper and gold mining project in Baluchistan province in southwest Pakistan will go ahead as planned despite plans by the provincial government to cancel it, an executive said on Monday.

The provincial government said earlier this year it would cancel the project to ease anger in Pakistan's biggest but poorest province over outsiders' exploitation of its natural resources.

"The project is going ahead and will not be cancelled, we are now in talks with the government and we expect production to start by the end of 2015," Gerhard Von Borries, chief executive of Tethyan Copper Co. Ltd., told Reuters on the sidelines of an industry event in Dubai.

Tethyan Copper Co. Ltd is a joint venture between Canada's Barrick Gold (ABX.TO: Quote) and Chile's Antofagasta Plc (ANTO.L: Quote), one of the world's largest copper miners.

It had been granted exploration licence for Reko Diq site in 2006. The site's ore reserves, a mixture of minerals including gold and copper, are estimated at more than 4 billion tonnes.

"The copper deposits are relatively low grade and we estimate the cash cost to be 85 cents per pound," Borries said. "Once production starts we are planning to double our investment in the project, so we'll add another \$3 billion," he added.

The provincial government owns 25 percent of the project, while the remaining is owned by Tethyan Copper, Borries said.

"Under the current plan the government would need to come up with its own equity, but we can also finance them with a very low interest rate ... we are also looking at employing 90 percent of the workforce from the local community."

Baluchistan is Pakistan's biggest province in terms of area but only has an estimated 10 million to 12 million of the country's 165 million people.

The province is home to one of the largest copper deposits in the world. China's Metallurgical Construction Co. (MCC) operates the Saindak mine, which has estimated ore reserves of 412 million tonnes. (Editing by James Jukwey)

Govt investing in ports to boost trade: Gilani -- Daily Times

Govt investing in ports to boost trade: Gilani

* PM inaugurates FAP Terminal at Port Qasim

* Project completed in 24 months at cost Rs 10 billion

Staff Report

KARACHI: Prime Minister Syed Yousaf Raza Gilani said on Tuesday that the government was committed to developing the ports and shipping industry in order to boost trade.

He said this while inaugurating Pakistan's first state of the art and fully automated dry bulk cargo handling and storage terminal at Port Qasim.

Appreciating the efforts of Fauji Foundation, Akbar Group and Portia Management Services (FAP), the PM said that the Pakistan government had taken all possible measures to assist and encourage the growth of ports and shipping industry as an important tool for trade promotion and development. "Terminals such as FAP are the need of the hour to develop Pakistan and our government will continue to assist with long term investments by providing incentives and reducing financing cost for port projects. With this port, Pakistan's position as a gateway to the region is further strengthened, serving as a boost to our marine and logistics services on various levels," the PM said.

"Following examples of various developing countries, the government is always seeking new avenues to facilitate and encourage foreign investment into the country through provision of incentives and business friendly policies in the shipping and ports sector," the PM said.

Gilani said that the ports were vital to the economic development of Pakistan. "Efficient ports and terminals lower the cost of imports, bring revenue through exports, increase our foreign exchange reserves and enhance tax collection through greater transparency," he added.

Speaking on the occasion, Minister for Ports and Shipping, Babar Khan Ghauri said, "The ports and shipping sector in Pakistan had a brilliant run in the last decade witnessing significant additions in capacity building across Pakistan's coastline. This world class addition to the existing facilities of Port Qasim Authority (PQA) will help Pakistan achieve its goal of becoming a regional hub of international trade."

FAP Chairman Lt Gen (r) Hamid Nawaz, FAP Vice Chairman Ghouse Akbar and other senior FAP officials were present at the occasion.

The project has been completed in a record duration of 24 months at the cost Rs 10 billion. The terminal is capable of handling 4.1 million metric tonnes of dry bulk cargo per annum.

FAP is a public limited company registered with the Securities and Exchange

Commission of Pakistan (SECP) with its registered office in Karachi, Pakistan. The company is a joint venture between Fauji Foundation, Akbar Group and Portia Management Services Limited (part of the Peel Ports Group, UK). National Bank of Pakistan had recently acquired 10 percent stakes of the company.

KARACHI: Rental power plants will add 1,700 megawatts of electricity to the national grid by the end of this year, announced Prime Minister Yousaf Raza Gilani on Tuesday while visiting the shrine of Abdullah Shah Ghazi in Clifton. So far 1,704MW have been -- Published in The Express Tribune

KARACHI: Rental power plants will add 1,700 megawatts of electricity to the national grid by the end of this year, announced Prime Minister Yousaf Raza Gilani on Tuesday while visiting the shrine of Abdullah Shah Ghazi in Clifton. So far 1,704MW have been added.

About 2,000MW have been added to the power-generation system, he said, warning, however, that demand is also increasing because of population growth.

To a question, he said that law and order was a provincial subject and that the provincial leadership was chalking out a line of action to deal with the situation. "I want to clarify here that no operation is being carried out either against any group or in any specific area," he added. The federal government would assist if need be. The PM condemned terrorism and said that only a handful of people were behind such acts and out to disturb the peace and destabilise the country for their own agenda.

When a reporter referred to Federal Minister Dr Babar Awan talking to Pakistan Muslim League-Q's Chaudhry Pervaiz Elahi, Gilani said that there was no harm in having a meeting with the PML-Q leaders; it was part of Benazir Bhutto's reconciliation policy. When he was elected there was total unanimity in the House and the PML-Q's votes had also made him PM. For this government, the politics of reconciliation would continue. There are, after all, coalition governments in all the provinces.

"It is a good omen that we have an alliance with all political parties in the country," he said. "Tell me if we don't have a coalition with any [one] political party."

To another question, the PM said that the judiciary was playing its role. "We respect all institutions," he added. The prime minister said that the government wanted to establish a federal court in Islamabad but before this the judiciary would be taken into confidence. "We will not take any step, which leads to a misunderstanding between the judiciary and government," he said.

Meeting with Sindhi media

Additionally, the construction of the Kalabagh Dam would not go ahead unless all provinces agreed to it and it has become a "dead issue". "If consensus evolves among all the provinces and the Council of Common Interest gives permission, then the dam can be built," he added. But construction of the Bhasha Dam would start soon as the provinces had agreed.

The PM said this while talking to editors and CEOs of Sindhi newspapers and television channels at a meeting at Chief Minister House.

The objective of his visit to the city was to directly interact with the Sindhi media. The prime minister said that he had done media studies which is why he had a "personal emotional attachment" to the media. Journalism studies have benefitted him in the field of politics, he added.

Gilani said that the process of transition from a dictatorship toward democracy is under way in the country and institutions are also passing through a phase of

evolution. We faced different challenges but never deviated from the manifesto of the party, he said. Some people were talking about the accountability of the government. "I request them to please give us five years and let the people decide in the upcoming elections," he said.

A meeting would be held in Lahore on Wednesday, when Foreign Minister Shah Mehmood Qureshi would give a briefing about the breakthroughs achieved in his recent visit to the US.

Gilani said that the economic recession has affected the entire globe but Pakistan had survived as, fortunately it is an agricultural country. He added that the matter of Thar coal has also been resolved and the provincial government is working on it.

The Sindhi media informed the PM about their problems and he said that he would talk to the federal minister for information and broadcasting on meeting them. To a suggestion about the performance of Pakistan Television Corporation (PTV), Gilani said that he would also meet the newly appointed MD.

There are 35 Sindhi dailies and 10 to 12 private Sindhi television channels.

Korea keen to invest in Pak industrial sector -- The Nation

Korea keen to invest in Pak industrial sector

RAWALPINDI - Ambassador of Republic of Korea in Pakistan, Choi Choong Joo, has said that his country is eager to enhance trade relations with Pakistan by investing in its industrial sector.

"Korea is fully aware of the problems being faced by Pakistan especially in its industrial sector and his country will invest in Pakistan to enhance the bilateral trade relations," he added.

He expressed these views at a meeting with Rawalpindi Chamber of Commerce and Industry (RCCI) President Syed Ali Raza during a visit, informed chamber spokesman Bilal Khan Niazi here on Tuesday.

The Ambassador said that South Korea is the active member of the Friends of Democratic Pakistan (FoDP). He said that Pakistan has a healthy environment for investment and investors from all over the globe should invest in Pakistan and assured his full cooperation in this regard.

Speaking on the occasion, RCCI President Syed Ali Raza said that Pakistan is situated in a geographically important location. He said that total trade volume between the two countries is around 1.11 billion dollars, which was very low.

Raza said that Pakistan's major exportable items that could be imported to Korea were cotton, leather, surgical goods, fruits and furniture. He stressed that the bilateral trade relations must be enhanced.

He said that the Korean Embassy should cooperate with the local business community and Pakistani businessmen should be given access to the Korean trade markets. "Business community of both sides should visit each other to find different exportable items for their countries", he said.

Senior Vice President Mian Muhammad Ateeq, Vice President Dr Shimail Daud, former presidents and members of Executive Committee were also present on the occasion.

UK to expedite visa issuance process for Pakistanis

UK to expedite visa issuance process for Pakistanis

* British home secretary says Pakistan, UK face same threat of terrorism

* Two countries sign MoU to counter human trafficking

ISLAMABAD: The UK is expediting visa issuance process for Pakistanis, who would now get their visas in minimum possible time, British Home Secretary Theresa May said on Tuesday.

While, acknowledging efforts and sacrifices of Pakistan in the war against terrorism, the British home secretary said Pakistan had rendered greater sacrifices than any other country in the war against terrorism.

May said the biggest threat to national security in both Pakistan and UK was terrorism.

She made these comments, while addressing a joint press conference with Interior Minister Rehman Malik at the Interior Ministry. Malik personally received the visiting British home secretary, who is on her first official visit to the country.

May said the Pakistani government had taken effective measures to combat terrorism and UK Prime Minister David Cameron was firm to promote the strategic dialogue between the two nations, and a key part of that was to get most out of our security relationship, she said. "My visit has identified a number of opportunities to enhance counter-terrorism agenda and it was agreed in the meeting with Interior Minister Malik that a joint working group would be constituted to combat terrorism," she added. May said that we had to make sure that action was taken against illegal immigrants, but we continue to enhance systems for those who are legally applying for visas.

The British home secretary said we are not only committed to promote bilateral ties with Pakistan, but also wish to extend cooperation in different sectors, adding that the UK government would provide 70 million pounds to Pakistan to create new job opportunities, women development, education and health sectors. Speaking on the occasion, Malik said the two sides signed a memorandum of understanding (MoU) to counter human trafficking. He said human trafficking had emerged as a great menace, and the Pakistani government had constituted a task force to curb it. Malik said Islamabad had requested London to deport Pakistanis illegally residing in the UK, adding that the government had also requested to share information of Pakistanis illegally residing in UK. staff report/agencies

UN starts wheat aid to 500,000 Pakistani farmers -- DAWN.COM

UN starts wheat aid to 500,000 Pakistani farmers

DAWN.COM

October 27, 2010 (5 days ago)

Some 2.4 million hectares of farmland were damaged by the floods, UN's Food and Agriculture Organisation stated. – AFP (File Photo)

ROME: The UN's Food and Agriculture Organisation said it had begun large-scale distribution of wheat seed in Pakistan to 500,000 farming families affected by catastrophic floods earlier this year.

The aid means the current planting season that ends in December will still take place, the FAO said in a statement, adding that it would also provide vegetable seeds and fertilizer and assist livestock farmers.

"Wheat is the main staple of the Pakistani diet so it is of vital importance that farmers receive seeds in time," said Luigi Damiani, a senior FAO official who is heading up the Rome-based organisation's efforts in Pakistan.

FAO said the aid would benefit a total of five million people, adding: "The food security of tens of millions of Pakistanis is at stake with the current planting season. The next harvest for wheat will not be until spring 2011."

FAO has so far received 67.44 million dollars (48.88 million euros) for its Pakistan aid plan out of a total funding requirement of 107 million dollars.

Some 2.4 million hectares (six million acres) of farmland were damaged by the floods, FAO said. – AFP

US to invest in power sector: Ashraf -- The News

US to invest in power sector: Ashraf

ISLAMABAD: Federal Minister for Water and Electricity Raja Pervaiz Ashraf said Tuesday US will invest in power sector to reduce country's rising electricity demand, Geo News reported.

The electricity will be produced through wind turbine process, he said.

He was talking to media men after coming back from US. The minister hailed Pak-US strategic dialogues, saying the strategic talks were 'successful'.

"US is aware of Pakistan's difficulties being faced in energy sector therefore US will invest in power generation to produce 150 megawatt of electricity, which will help curtail growing electricity needs," he said.

Also, US has shown agreement to help build dams in Pakistan, he said.

He said the government is expecting more investment in power sector from private companies.

Cabinet approves TAPI gas pipeline framework agreement -- Daily Times

Cabinet approves TAPI gas pipeline framework agreement

* Information minister says govt will take parliament into confidence on Pak-US Strategic Dialogue

* Govt planning to issue legal notice to Amnesty International

Staff Report

LAHORE: The cabinet has decided to approve the Turkmenistan-Afghanistan-Pakistan-India gas pipeline framework agreement because it is vital to cope with the current energy crisis in the country, federal Information Minister Qamar Zaman Kaira said on Wednesday.

He said Pakistan would do everything, which is in its favour, as it is an independent country and would not take any foreign dictation.

He was talking to reporters during a press conference on the cabinet meeting held on Wednesday under the supervision of the prime minister at the Governor's House. To a question about America's demand for a military operation in North Waziristan, Kaira stated that the matter, along with the recent Pakistan-US strategic dialogue, had been discussed in the cabinet meeting and the government had a clear policy of considering national interest before anything.

Parliament: The minister added that the government would give a briefing to parliament on the dialogue in its coming session to take it in confidence, as the Pakistan People's Party believed in taking all stakeholders on board in the government's policy matters, and even arranged a briefing by the chiefs of security agencies for parliament for the first time in history.

Commenting on the recent meetings between the Pakistan Muslim League-Quaid leaders and PPP leaders, including Prime Minister Yousaf Raza Gilani, Kaira said the PPP always believed in politics of unity and never did politics of division.

Legal notice: He said the Pakistan government had several reservations on the recent report issued by Amnesty International that ranked Pakistan as the 34th most corrupt nation in the world. He added that one of the federal ministries was even planning to issue a legal notice to AI.

He said another non-government organisation, PILDAT, had also issued a similar report, "but we should not believe such reports when they are against reality". He said even the opposition had lodged its protest against the PILDAT report for not being based on facts.

Kaira said that the government had given freedom to the Public Accounts Committee, and they tried to fix the issues pointed by the committee and considered themselves accountable to this parliamentary body. He said that the government was aware of the ongoing wave of inflation and how it was affecting basic household commodities such as flour, cooking oil, sugar, pulses, vegetables etc. He said the media was likely to make fun of him, as had happened in the past, if he urged the people to stop consuming sugar to keep the rates under control, but he said sugar was a basic commodity, which would not affect routine life if they reduced its consumption. He said this would definitely break the cartels of sugar sellers who even exploited the customers during Ramazan.

The minister said the government was investing in the local agriculture sector and had increased the prices of various items, including wheat, to encourage farmers instead of spending Rs 300 billion on procuring these things from abroad, adding that this had positively affected the rural economy.

He said that the cabinet had also discussed the relief package for farmers affected by recent floods in the country, along with the decision to approve the Islamabad Rent Restriction Bill and the decision to renew the defence agreement between South Africa and Pakistan.

It was the 67th meeting of the cabinet to date and the team not only discussed current issues, but also implementation on prior decisions. The foreign minister briefed the cabinet on the recently-concluded third round of strategic dialogue with the US. The salient features of the briefing included that Pakistan was among five countries out of the 184 countries in the world with which the US had strategic dialogue.

The dialogue upgraded to the foreign minister-level and political engagement in five sectors had been extended to encompass 13 sectors. The steering committee headed by the Pakistani foreign affairs secretary and Richard Holbrooke from the US would follow up on the decisions of the dialogue.

The cabinet deliberated on the forthcoming Pakistan Development Forum meeting to be held on November 14-15. It was mentioned that it is an annual event during which Pakistan would present the future economic development vision before the forum before prospective donor countries.

Council calls for more bilateral trade with Pakistan -- The Star

Council calls for more bilateral trade with Pakistan

KUALA LUMPUR: The Malaysia-Pakistan Business Council is calling for more bilateral trade between the two countries and stresses that Pakistan offers vast investment opportunities across many sectors, said new chairman Datuk Mohd Salim Fateh Din.

"Currently, only 12 to 13 companies from Malaysia have a foothold in Pakistan in the areas of real estate, energy and banking," he said after the council's inaugural meeting yesterday.

Also present was Pakistan High Commissioner Masood Khalid.

Masood invited Malaysian companies to invest in Pakistan especially in the businesses of livestock, food-processing, education, halal products, construction and Islamic banking.

"I can assure that foreign investors in Pakistan are making a lot of profits," he said.

Mohd Salim said the council had embarked on several trade projects such as setting up an abattoir in Pakistan and the import of buffaloes.

He added that total trade between the two countries stood at US\$1.7bil last year.

KARACHI: The Luksic Group will explore possibilities of making maximum investments and have cooperation with Pakistan government in various sectors, said chairman of the group and leader of a Chilean delegation, Andronico Luksic. -- Published in The Express Tribune

KARACHI: The Luksic Group will explore possibilities of making maximum investments and have cooperation with Pakistan government in various sectors, said chairman of the group and leader of a Chilean delegation, Andronico Luksic.

He was talking to Sindh Finance Minister Syed Murad Ali Shah at his office on Wednesday. He pointed out that his group was the second biggest financial institution with total assets worth \$34 billion.

Luksic suggested that Pakistan should keep Latin American countries in focus in order to attract investment and said he will request the Chilean government to open its embassy in Pakistan to further enhance economic ties.

Apprising the delegation members of investment prospects in Sindh, Shah said the province is very rich in natural resources and the government will extend every possible help to the investors.

Secretary Coal and Energy Development Department Sindh, Ijaz Ali Khan told the delegation that Thar coal field has tremendous potential and has an estimated coal reserves of 176 billion tons.

He said international competitive bidding for four blocks will be undertaken in a

month along with invitation of Expressions of Investment (EOI) for Thar infrastructure projects in a bid to set up a petrochemical complex.

'Netherlands wants to promote trade with Pakistan' -- Business Recorder

'Netherlands wants to promote trade with Pakistan'

RECORDER REPORT

MULTAN (October 28, 2010) : The Netherlands wants to promote trade between Pakistan and the Netherlands and planning to launch a programme through economic development by providing maximum job opportunities, said Joost Reinejes, ambassador of the Netherlands in Pakistan.

He was addressing the Executive Committee of Multan Chamber of Commerce and Industry (MCCI) on Wednesday chairman by its president Shahid Naseem Khokhar. He said that the Netherlands has offered up to 60 percent of funding to Pakistani SME projects worth 1.5 million Euros per project. He said that the Netherlands Private Sector Investment (PSI) programme was launched in Pakistan in 2005 with an annual budget of 70 million Euros that was aimed at alleviating poverty and strengthening private sector investment.

The funding, available under 40-60 arrangement, is subject to certain evaluation to be conducted by the officials of the Netherlands's government. Any Pakistani company could apply for the funding for any new project or for the value addition of an existing business project. Under this programme, a project in sportswear has already been completed while three projects in chemical and dairy sectors are in progress. Moreover, PSI is considering another three projects under the programme, he said. The total funding of 1.5 million Euros allows spending on Hardware (equipment, machinery), training of people and project management, real estate and operational costs excluded. The funds are released during the project, after achieving predefined results.

The evaluation criteria include partner expertise, organisational capacity and financial strength. The projects could be a business plan, operational plan or financial feasibility. Fulfilment of Corporate Social Responsibility, knowledge transfer and its spin off effects are few things that are a necessary part of evaluation criteria. The Netherlands issues three tenders per year in this regard, the official said.

Holland has also offered matchmaking facility to stimulate private sector in Pakistan. Speaking on the occasion, the MCCI President Shahid Naseem Khokhar expressed his concern over volume of trade between the two countries and said the two-way trade volume could have much bigger provided a little attention was paid by the concerned departments in the two countries. He stressed the need for participation in trade fairs and establishment of direct link between various representatives of organisations like MCCI. He called for a mechanism for the dissemination of all trade-related information that is a prerequisite to initiate joint ventures or to do business and said the MCCI is ready to extend co-operation in this regard.

President MCCI, Shahid Naseem Khokhar said that Pakistan and the Netherlands have always had good diplomatic and trade relationship. He said that Dutch assistance in terms of financial technical, educational and advisory support to Pakistan has always been great and worth mentioning. In the European Union, the Netherlands is one of Pakistan's most important export destinations after the UK, Germany and Italy. He said that analysis of trade figures between the two countries indicate that the total trade had declined from US \$966 million in 2008-09 to US \$742 million in 2009-10. Moreover, Pakistan's exports to Netherlands decreased from US \$468 million in 2008-09 to US \$389 million in 2009-10. On the other hand, he said, during these years, Netherlands's exports to Pakistan had also fallen from US \$498 million dollars to US \$353 million.

Khokhar said that joint efforts are needed to cease this trend from going further down. Moreover, the percentage share of the Netherlands in Pakistan's total exports has been ranging from 2.6 percent to 2.7 percent which can be increased by taking some sector-specific measures. Pakistan's main export products to the Netherlands are knitwear, articles of apparel, readymade garments, sugar and sugar confectionery, cotton, leather manufacturers, leather clothing, leather gloves, sport goods, pharmaceutical products, fruits and vegetables whereas Netherlands exports to Pakistan include cereals, electrical, electronic equipment, machinery, iron and steel, plastic, chemical products.

Pakistan offers Russia to set up Kalabagh Steel Mill -- Business Recorder

Pakistan offers Russia to set up Kalabagh Steel Mill

RECORDER REPORT

ISLAMABAD (October 20, 2010) : Pakistan has offered Russia to set up Kalabagh Steel Mill on equity/project sharing formula based on indigenous iron ore and coal projects, Business Recorder has learnt. In 1956, M/s Krupp of Germany offered to set up a steel mill on Kalabagh iron ore, coal and other minerals available within an 11 mile radius but the project was shelved due to the importers lobby.

In June 1966, another German company M/s Salzgitter produced 5,000 tons of quality steel from 15,000 tons of Kalabagh iron ore. The company offered in August 1967 to set up Kalabagh Steel Mill with a production capacity of over 0.8 million tons per year (mtpy) based on Kalabagh iron ore and imported coal. Some European banks offered loans for this project at the time, which confirmed technical and financial viability of the project, which was also shelved due to importers' lobby.

The subsequent year the Russian offer was accepted, however, they did not have the technology to produce steel from indigenous iron ore. Instead of reviving the German offer based on local raw materials, the site of the steel mill project was shifted to Karachi and Pak Steel Mill was established based on imported iron ore and coal.

Pakistan has offered Russia to support Pakistan Steel Mills to expand capacity from 1.2 million to 3 millions ton in the first phase and 5 million tons in the second phase. Pakistan has the largest reserves of iron ore in Dulband, Naukundi and Chaghi areas of Balochistan which can be used to support hydel projects like Bhasha dam.

GILGIT: Over 40,000 megawatts of electricity can be produced in Gilgit-Baltistan (G-B) if the available water resources are used properly, officials said on Thursday. -- Published in The Express Tribune,

GILGIT: Over 40,000 megawatts of electricity can be produced in Gilgit-Baltistan (G-B) if the available water resources are used properly, officials said on Thursday.

"The region is full of water reservoirs and is best suited for the production of power. If these resources are used in a suitable manner, more than 40,000 megawatts of power can be generated in these areas," a senior official in the Water and Power department said.

With the financial support of the Asian Development Bank (ADB) and other donors, a number of projects are in progress in this region. Shagar-thang Power project is one of them, 80 per cent of the total expenditure is being paid for by the ADB.

The dam is the largest project that is being funded by foreign donors. The Diamer-Bhasha Dam will be the highest dam in the world with a 272 metres high spillway and with 14 gates, each 11.5 m x 16.24 m.

Critics of the project have raised objections to the project as it will cause the inundation of over 50,000 ancient rock carvings and will destroy archaeological evidence in the region.

Meanwhile, the official said that nearly Rs13.5 billion will be spent on the 26 megawatt Shagar-thang project in the hopes that after its completion power shortages from the G-B region will.

"Technical evaluation of the project has been completed while the process of identification of consults is underway," he said, adding that the project will be completed by 2015.

Malaysian Chapter of Pak-Malaysia JBC launched -- Daily Times

Malaysian Chapter of Pak-Malaysia JBC launched

ISLAMABAD: Launching of Malaysian Chapter of Pakistan-Malaysia Joint Business Council (JBC) marks an important milestone to foster friendship, promote understanding and facilitate trade and investment between the business communities of the two countries, High Commissioner for Pakistan in Malaysia, Masood Khalid stated while addressing the inaugural meeting of the newly-constituted Malaysian Chapter of Pakistan Malaysia Joint Business Council, in Kuala Lumpur.

The High Commissioner said that launching of Malaysian Chapter of JBC was indeed a significant step forward, as it would provide a common platform to two private sectors to make business networking, promote and enhance trade in traditional items, identify non traditional items to broaden trade inventory, expand investment in existing sectors and to identify new areas for investment to make a fresh start in the bilateral trade, investment and economic cooperation between the two countries. He said that one of the main tasks of JBC should be to instill awareness in the business community about the benefits of Malaysia-Pakistan Comprehensive Economic Partnership Agreement (MPCEPA), which was signed in 2007 but remained underutilised.

He encouraged the JBC to formulate and set in place a comprehensive strategy to create awareness among the business community regarding enormous potential of trade and investment that exists between the two countries and to educate them on the concessions available to them in terms of reduced duties and tariff under MPCEPA.

Chairman, Malaysian Chapter of JBC, Dato Salim Bin Fateh Din said that formation of JBC was an offshoot of MoU signed between Federation of Pakistan Chambers of Commerce and Industry (FPCCI) and National Chamber of Commerce and Industry of Malaysia (NCCIM) in 2005.

He said that FPCCI of Pakistan is actively pursuing constitution of Pakistani Chapter of JBC, and after its formation, joint session of Pakistan-Malaysia Joint Business Council will be held to launch Joint Business Council. Once JBC was launched, it would provide a formal forum to the private sectors of both the countries to promote mutually beneficial business, trade and investment ties to bring about substantial increase in bilateral trade, investment and economic cooperation between the two countries, he added. staff report

Pakistan and China on Friday signed an agreement for a loan to set up the ground control system for a joint communications satellite to be launched next year. Pakistan's Ambassador to China Masood Khan signed the loan agreement with the Exim Bank of China for the Paksat-1R satellite's ground control project in Beijing, an official statement said. Paksat-1R will be launched on August 14 next year to replace the current communications satellite Paksat 1.

A contract for the satellite was signed between Pakistan's Space and Upper Atmosphere Research Commission (SUPARCO) and China Great Wall Industry Corporation in October 2008.

The contract for the ground control project was signed in October last year during Prime Minister Yousuf Raza Gilani's visit to China. A framework loan agreement between the two governments was signed in June. Under the agreement, China will provide a concessional loan of RMB 86.5 million for the ground control project.

Ambassador Khan said the agreement has further promoted Pakistan-China cooperation in science and technology and the satellite will become a symbol of the friendship between the two countries.

Once it is completed, the project will bring immense economic benefits to Pakistan, he said.

Pakistan and China have a long history of space technology cooperation.

Pakistan's first low orbit satellite, Badr-1, was launched by China in 1990. The two countries have continued to enhance their cooperation in peaceful applications of space technology under an agreement signed in 1991.

All Day**Pak-Afghan ink new transit trade pact -- IBN Live**

Pak-Afghan ink new transit trade pact

PTI | 11:10 PM, Oct 29, 2010

Islamabad, Oct 29 (PTI) Pakistan and Afghanistan have inked a new transit trade agreement that will provide Kabul goods access to India through the Wagah land border route and Karachi and Qasim ports. Under the agreement, Afghan trucks will be allowed to take goods up to Wagah and the two ports, from where Indian importers will receive consignments and carry them further using their own sources of transportation. However, Pakistan will not allow the Afghan trucks to carry back Indian goods through its territory. Pakistan's Commerce Minister Makhdoom Amin Fahim and his Afghan counterpart Anwarul Haq Ahadi signed the agreement in Kabul yesterday. The cabinets of Pakistan and Afghanistan recently approved the new agreement. The new agreement will replace one signed by the two countries in the mid-1960s. President Asif Ali Zardari today hailed the signing of the new agreement, saying the pact will boost trade and contribute to peace and stability in the region. In a message felicitating his Afghan counterpart Hamid Karzai on the signing of the Pakistan-Afghanistan Transit Trade Agreement yesterday, Zardari said the pact would lead to a "win-win situation for the two countries". "The agreement was a most welcome development for the region that would not only boost trade of the two countries but would also contribute to peace and stability by further strengthening the relations between the two countries," Zardari said. Economic development is the key to peace and stability in the region and this agreement will promote development by creating new vistas of opportunities for people, especially for those who have been the worst victims of militancy during recent years, he said. The pact will give Afghan goods access to India through the Wagah land border route and Karachi and Qasim ports. Zardari said every vehicle plying under this agreement will contribute to "enhancing mutual trust and thereby strengthen elements of peace through socio-economic development of the region". He expressed the hope that traders and the business communities of the two countries will take maximum advantage of the pact. US Special Representative for Afghanistan and Pakistan Richard Holbrooke and President Karzai witnessed the signing. PTI RHL

Pakistan, China to boost cooperation in space technology

By AZHAR MASOOD | ARAB NEWS

Published: Oct 29, 2010 22:15 Updated: Oct 29, 2010 22:15

ISLAMABAD: Pakistan and China have agreed to promote cooperation in space technology. Both countries have agreed to launch joint research and development ventures in intelligence gathering from space.

Pakistan and China have also agreed to replace current communication satellite PAKSAT-1 with Paksat-1R which will be launched on Aug. 14, 2011.

A highly-placed official from Ministry of Defense Production told Arab News: "We have agreed to develop in Pakistan and China advance satellite imagery gathering system, guidance system and early warning system for intruding missiles.

The official said an agreement for the project was signed between SUPARCO and China Great Wall Industry Corporation in the presence of President Asif Ali Zardari in Beijing in October 2008.

The agreement for the ground control segment of the satellite was signed in October 2009 during Prime Minister Yusuf Raza Gilani's visit to China. A Framework Loan Agreement between the two governments was signed in June

2010. Under the agreement, the Chinese government would provide RMB 86.5 million concessional loan for the ground control segment.

Militaries of Pakistan and China have already cleared the project. Experts from ground, air and naval forces of the two countries will be involved in the project during R & D stages and later during its physical implementation, officials said.

WASHINGTON: A better understanding of Pakistan's defence needs in the US capital may soon lead to an additional \$300-400 million of annual military assistance, besides a \$2.029 billion package announced last week.

Diplomatic sources told Dawn that the money would come from the Pakistan Counter-insurgency Capability Fund set up to help the country fight terrorists along and inside the Pak-Afghan border. Last year, the House Appropriations Committee approved \$400 million for the counter-insurgency fund.

In February this year, the Obama administration sought a \$0.5 billion increase in funds to bolster Pakistan's counter-insurgency capabilities.

The US administration was increasing the fund from \$700 million in fiscal 2009 to \$1.2 billion in the current fiscal year, which began on Oct. 1. Both the funds – the PCCF and the \$2.029 billion package for purchasing US weapons – are continuation of previous five-year programmes. But amounts under both programmes have been increased.

The five-year package for military hardware and training has been increased from \$1.5 billion, allocated in the previous package, to \$2.029. There will be a similar increase in the PCCF.

During last week's strategic dialogue, where the two packages were negotiated, the US also promised to reimburse \$750 million of arrears from the Coalition Support Fund. But Pakistani officials, who participated in the dialogue, said that "the talks' real achievement" was "a better understanding of Pakistan's position on North Waziristan".

The Pakistanis informed their American counterparts that they already had 39,000 troops in North Waziristan, more than those deployed in South Waziristan. Pakistan also assured the Americans that it's willing to continue and even expedite 'surgical operations' against the militants in North Waziristan but was not in a position to launch a full-fledged military operations. Besides having physical limitations, the Pakistanis feel that the operation may prove counter-productive if conducted without proper preparation to consolidate the gains achieved in the battlefield.

China: 'Pakistan is our Israel' -- Inter Press Service News Agency.

China: 'Pakistan is our Israel'

The world's most populous country is showing more international assertiveness, which bothers the US.

China's foreign relations are increasingly influenced by state run energy companies, study says [GALLO/GETTY]

When a US delegate once confronted a Chinese diplomat about Beijing's uncompromising support for Pakistan, the Chinese reportedly responded with a heavily-loaded sarcastic remark: "Pakistan is our Israel".

But judging by China's unrelenting support for some of its allies, including North Korea, Burma, Zimbabwe and Sudan, its protective arm around these countries is no different from the US and Western political embrace of Israel – right or wrong.

While China is battling the West over exchange rates, import tariffs and its territorial claims in the South China Sea, Beijing is also lobbying furiously to stall a Western-inspired proposal for a Commission of Inquiry on possible war crimes by the military junta in Burma (Myanmar).

"Such a commission should not be seen as a way to punish the government, but to prevent impunity and help prevent further abuse," says the UN Special Rapporteur on Myanmar, Tomas Ojea Quintana.

But China, which in January 2007 exercised its veto, along with Russia, to prevent Security Council sanctions against Burma, has not shown any willingness to back the proposal – even for a watered-down commission.

"Clearly," says one Asian diplomat, "China is trying to reassert its political clout at the United Nations as a counterweight to its defensive stand on currency and trade issues."

The New York Times newspaper said on Tuesday that the US administration is facing a "confrontational relationship" with an assertive China and is trying to respond to "a surge of Chinese triumphalism" by strengthening Washington's relationship with Japan and South Korea.

US President Barack Obama is planning to visit four Asian countries next month – Japan, Indonesia, India and South Korea – while bypassing China.

Meanwhile, UN Secretary-General Ban Ki-moon, who needs China's support in the Security Council if he decides to run for a second term next year, is currently on his fourth trip to China, having visited the country in May and July 2008, and in July 2009.

In recent months, China has prevented a Security Council resolution against North Korea over the sinking of a South Korean ship and also tried to suppress a UN report alleging the use of Chinese-made bullets in attacks on UN peacekeepers in Darfur, Sudan.

"China sees value in promoting its image as the Security Council member defending the rights of the developing world, and China sees value in relying on the UN to counter US power," said Linda Jakobson, director of the programme on China and Global Security at the Stockholm International Peace Research Institute (SIPRI).

Jakobson, an in-house China expert at SIPRI, points out that Beijing also sees value in participating in UN peacekeeping operations "both because this enhances the image of China as a responsible power but also because it gives Chinese military experience".

Still, China relented to US and Western pressure in supporting four Security Council resolutions imposing sanctions against Iran, one of Beijing's staunchest political, economic and military allies.

The fourth round of sanctions, all of them aimed primarily at Iran's nuclear programme, was imposed in June this year.

Justifying his country's support for the resolution, Chinese Ambassador Li Baodong was quoted as saying that Beijing wanted to make sure that sanctions would not affect the Iranian people or its normal overseas trade.

Jakobson said that China agreed to these sanctions after much deliberation and on the condition that the energy sector was excluded.

"This can be seen as a compromise solution on China's part," she said. "The exclusion of the energy sector was crucial."

Jakobson also pointed out that China wants to protect the massive investments by Chinese energy companies already in Iran or under negotiation with Tehran, and China wants to ensure that its long-term strategic plans for energy security are not threatened.

In a detailed policy paper released last month, and titled "New Foreign Policy Actors in China", SIPRI said the increasing sway of large state-owned energy companies have an increasing influence on foreign policy deliberations in China.

Jakobson, who co-authored the report with Dean Knox, said this is one example of that sway though it is noteworthy that there are other foreign policy actors who presumably were not inclined to advocate China's support of the resolution.

On the other hand, she said, there were presumably actors who advocated China's support for the resolution because China supports non-proliferation and does not want to see Iran go nuclear.

"If China had not supported the resolution, it would reflect badly on China's image and undermine its efforts to portray itself as a responsible global power," Jakobson said.

She said China attaches great importance to the United Nations and would like to see the role of the UN strengthened – though Beijing is wary of many proposals that want to expand Security Council membership and/or give power to members other than the present five permanent members, the United States, Britain, France, Russia and China.

The SIPRI report argues that actors outside the traditional power structure are increasingly shaping China's foreign policy.

Influential new actors on the margins include Chinese state-owned enterprises, especially energy companies, which, due to their widespread international outreach, affect China's bilateral relationships and diplomacy at large.

The others include local governments, especially in border and coastal provinces, which seek more lucrative trade and foreign investment opportunities.

At the same time, there is growing importance of researchers, who serve as advisors to officials and media, and netizens, who constitute a new pressure group that China's leaders at times feel compelled to take into account, not least during international crises.

The findings also point to a fracturing of authority in foreign policy formulation.

Diversification outside China's official decision making apparatus – along with changes within it – means that foreigners can no longer expect to only deal with one government agency or Party organ but must take into account multiple actors that

have both a stake and say in the decision-making processes.

Korea Offers Information Technology For All Sectors -- Online

Korea Offers Information Technology For All Sectors

Islamabad: There is a need to promote Korean investment in Pakistan through more interaction between the business communities of the Republic of Korea and Pakistan through exchange of delegations. Senator Waqar Ahmed Khan Federal Minister for Privatisation stated this during a meeting with the Ambassador of Korea to Pakistan Mr. Choong Joo Choi who called on the Minister here on Thursday.

Senator Waqar said that Pakistan provided a conducive investment environment in all the sectors without any discrimination between local and foreign investors by providing equal opportunities through a fair, open and transparent process. Pakistan offers an opportunity to Korean business groups and investor to take advantage of Pakistan's incentives extended through liberal investment, privatisation through Public Private Partnership (PPP) and economic policies, he said.

The Minister further said that it was for the Korean business groups to identify the areas of interests as we were presently in the process of restructuring and turning around the State Owned Entities for value addition prior to taking them to the market.

The Korean envoy Mr. Choong Joo Choi said that Korean companies were interested in offering Information Technology through e solutions for all sectors including health, infrastructure, economy, transportation, telecom and other social services to Pakistan. Korean investors would be keen to participate in the privatisation and investment opportunities in Pakistan along with development in software and hardware, he added.

The United States will provide Pakistan \$125million for the construction of two dams and repairing four existing projects, stated Federal Minister for Water and Power Raja Pervez Ashraf on Wednesday. -- Daily Times

The United States will provide Pakistan \$125million for the construction of two dams and repairing four existing projects, stated Federal Minister for Water and Power Raja Pervez Ashraf on Wednesday.

The federal minister made the statement while speaking to the media at Islamabad Airport. Speaking about the strategic dialogue between Pakistan and the US, he said that the US assured Pakistan of their cooperation to help control the power crisis.

He said that the Thar coal and other power projects were also discussed during the meeting, along with flood destruction and the construction of Diamer Bhasha dam. Ashraf said the US will also provide investment for the generation of 150 megawatts of electricity through windmill projects.

Buttressing Pak-Turkish linkages -- Observer

Buttressing Pak-Turkish linkages

Shanzeh Iqbal

The relations between Turkey and Pakistan are entrenched deeply. Both the countries share a common vision on many regional and international issues. The relations are based on mutual respect, trust and interest. The two countries face the same challenges and a common cultural heritage. Turkey has acknowledged on many forums the sacrifices offered by the Pakistani nation and its army in waging a war on terror. Turkey has rendered an unflinching support to Pakistan. Times have proved it. Turkey always came all out for Pakistan's assistance in the hour of distress. Tayyip Erdogan was the first foreign head of state when Pakistan was in the tight hold of the most calamitous earthquake in 2005. Turkey provided Pakistan 150 million dollars for rehabilitation works. Likewise in the aftermath of the flood of 2010, which caused colossal wreckage, it was the first country which started building of prefabricated home villages for flood affected people in the recent scenario.

Turkish model is indeed a role model worth follow suit as the Turkish nation hates corruption in all forms. Its politicians think for the wellbeing of their beloved country and the fellowmen also cherish the same vision. Significant economic growth of Turkey in the previous couple of years is a good example for Pakistan to pursue. Turkey has also supported Pakistan in bringing stability in Afghanistan and for holding the regional summits and Turkey Afghanistan Pakistan Tripartite Summit. The fourth summit on January 25, 2010 was intended at reestablishing the cordial relations between Afghanistan and Pakistan. It also tried to ensure the solidarity of cooperation ventures.

In order to amplify the business ties Pak Turkish CEO's Forum went on increasing cooperation in the areas of power, agriculture and mining. In October 2009 the Turkish PM came to Pakistan on a two day visit. PM Gillani and Mr Erdogan decided to boost their strategic partnership to fight militancy and to congeal the political, diplomatic and economic cooperation. Both signed a joint declaration in trade investment, agriculture, industry, culture, education and defense and to increase people to people contacts. The Focus was also laid on increasing interaction between the intelligence agencies to get rid of terrorism, illegal arms trafficking and terrorist groups. In 2009 an MoU was signed under which the business community was given exemption from visa requirements.

The Businessmen from the two countries with valid documents were allowed to visit and stay in each other countries without visa for 90 days. In the same year Pakistan went ahead with the Islamabad Tehran Istanbul international freight train service. This service was supposed to be operated as pilot project of Economic Cooperation Organistaion. Pakistan Turkey joint Ministerial Commission meeting agreed to enhance the volume of trade to US \$2b by 2010. CEO Forum was hosted by Turkey's Foreign Economic relations Board in Istanbul in January 2010. Punjab Chief Minister said on this platform that Pakistan considers the performance of Turkey as the best model. CEO Forum is intended to help evaluate the potential of private entrepreneur. Turkey's private corporations have invested markedly in industrial and construction projects, highways, pipelines, canals, fields of energy, infrastructure, textile, engineering goods, mining and agriculture. In January 2010 Pakistan and Iran agreed to start a \$20 b project to upgrade a railway link from Islamabad to Istanbul as a means of transporting cargo from Pakistan to Turkey. With the help of this 5 year project 11 days journey would be reduced to almost 4 days between the two cities. It will connect Pakistan with European countries through Turkey. The President Zaradri conferred Nishan-e- Pakistan, the highest of civil awards, on President Gul in April 2010 when he came on his visit to Pakisan and the honorary degree in International Relations by the Quaid-E-Azam University Islamabad. Earlier in October 2009 the President of Pakistan had conferred the same award on Tayyip Erdogan in recognition of his visionary leadership and his outstanding contributions in strengthening Pakistan-Turkey relations.

In July 2010 a defense delegation met the Turkish president in Ankara. There was

expressed a need to increase Pak Turkish joint defense projects Pakistan Defense delegation led by the Defense Minister, Ahmad Mukhtar. The Turkish leadership showed a deep interest for multi role combat aircraft JF-17 Thunder. Turkey and Pakistan have decided in October 2010 to materialize ideas of currency swap which will facilitate business, trade and commerce and upgrade the existing railway track between the two countries via Iran. It is a step ahead in ensuring the speedy transportation of cargo and would open new vistas of opportunities for the people. Moreover it will also lead to economic uplift and bring forth sustainable bilateral relations. It is also a step in furthering the mutual cooperation.

Turkey's initiative of developing a common Asian policy and helping Pakistan in making powerful the relations of Pakistan with Central Asian States must be appreciated. A multidimensional mechanism must be devised to address the regional issues as the unique geo strategic position of both can be vocal in bringing peace and prosperity. There is also a need for establishing framework of preferential trade with Turkey. It will open doors for free trade agreement. Currently Pakistan is exporting rice, sesame seeds, leather, textile, sports goods to Turkey and Turkey exports wheat, chickpeas, lentils, chemicals, transport vehicles etc.

Both the Turkish PM and the President have articulated the resolve that Turkey wants to invest on permanent basis to help infrastructure of Pakistan. The lukewarm political relations can be very favorable to yield good economic benefits obliging to both the countries. Strategic partnership as a result will lead to a win win position. The sectors where the government has to work include increased corporate sector cooperation, greater people to people contacts, exchange of students, media and intellectuals. Along with this transport, telecommunications, energy, water, public diplomacy and other industries are the areas where the attention must be focused. We must take advantage of the existing potential of Turkey. This can be a way to avert the looming shadows of misfortune hovering over the economy of Pakistan.

IMF delegation arrives in Pakistan

ISLAMABAD: The second delegation of the International Monetary Fund's review team has arrived in the country, led by Adnan Mazarei, head of the IMF review team for Pakistan.

Negotiations between the IMF and Pakistan, however, will start on Monday, according to finance ministry officials.

The technical team of the delegation had arrived earlier and was presented with data on Pakistan's performance in the first quarter of the current fiscal year and their notes will form the basis of policy negotiations.

Pak receives 3 high-tech F-16s
Tanvir Siddiqi

Islamabad—Pakistan on Saturday received three new high-tech F-16 aircraft from the US as part of 18 such fighter jets scheduled to reach the country by December.

The jets landed at the Shahbaz Airbase of Pakistan Air Force (PAF) in Jacobabad.

Three other aircraft had reached Pakistan in June, while the remaining would be handed over to Pakistan by the end of December.

Pakistani pilots were trained by the US Air Force prior to the handing over and they flew the aircraft to Pakistan.

A PAF spokesman said: 'Air Chief Marshal Rao Qamar Suleman has congratulated the Pakistani nation on enhanced strength of its fighter jets' fleet.'

Sources said arrival of five F-16 jets was scheduled for September 2010 but was delayed due to floods in August and September.

The government during Pervez Musharraf's tenure had struck a deal with the US for the purchase of 24 refurbished F-16 aircraft to enhance air warfare capacity of the country. The new government, after taking charge in 2008, decided to buy 18 additional new block-52 fighter jets.

Pakistan votes in favor of TAPI pipeline -- Stell Guru

UPI reported that Pakistan voted to give the green light to the Turkmenistan, Afghanistan, Pakistan and India natural gas pipeline.

Mr Qamar Zaman Kaira information minister of Pakistan said that it was vital for Pakistan to approve the multilateral pipeline from Turkmenistan to stave off an energy crisis in the country.

Mr Kaira said that if India balked on the project the other three members would move ahead without the other partner.

The 1,043 mile natural gas pipeline would transport natural gas from the Dauletabad field in Turkmenistan, one of the world's largest. The Western backed project is viewed as a rival to Iran's plans to transit natural gas from its South Pars gas field to Pakistan and India through the so called Peace Pipeline.

New Delhi said that it was concerned about the security of the TAPI project through parts of Afghanistan and Pakistan. The project however, received support from Kabul and Islamabad as well as the Asian Development Bank.

US to give \$150 million for the energy sector, says Pervaiz Ashraf -- Online

US to give \$150 million for the energy sector, says Pervaiz Ashraf
ISLAMABAD: Federal Minister for Water And Power Raja Pervaiz Ashraf has said that United States is assisting Pakistan in the construction and upgradation of dams as well as wind power energy etc and providing RS 150 million dollars for such projects.

Two billion dollars have been allocated for the energy sector in the Kerry Lugar bill. According to media reports on his way back from the United States while talking to the media Pervaiz Ashraf said that strategic talks with the US have been successful, whereas America has assured of his full cooperation to overcome the present energy crisis.

US is well aware of our energy crisis and is taking keen interest in this sector and is planning on investing in making small dams and wind power energy in order to generate 150 megawatts of electricity.

America is providing 60 million dollars for the construction of Sipara and Gomal Zam dams and another 65 million dollars for the repair and restoration of the power projects.

Minister for power also mentioned that the provision of cheap electricity and the construction of new dams was also discussed.

Cooperation of the Americans is also expected in the construction of Bhasha Dam.

It is expected that more investment would come from the private sector in the energy sector. Minister also said that further meetings will be held next month.

Our strategic commercial corridor(s) -- BR

Our strategic commercial corridor(s)

The writer is a retired brigadier and a former president of the Islamabad Policy Research Institute

As I wrote in my last column on these pages, Pakistan's 'strategic location' is strategic only if it returns to being the centre of commercial activity. While silk and other goods will still need transportation, today there is far more: energy resources from oil and gas rich Central Asian Republics (CARs) and minerals.

Let us, however, start with China. About a decade ago, China completed an oil pipeline from Kazakhstan to Urumqi, where it constructed an oil refinery. Suddenly, industry sprouted around Urumqi and the entire province has become rich. Goods produced around Urumqi are transported by rail and road to Chinese eastern ports, a distance of about 2,500 miles. From there, transportation by sea to the Far East and the Americas is easy, but to access the rest of the world Chinese ships go through the Straits of Malacca, travel almost 5,000 miles to reach the Gulf of Aden and another 5,800 miles to reach the Arabian Gulf. Most of this route has operational US military bases on it.

On the other hand, a rail link from Urumqi to Havelian in Pakistan, parallel to the Karakoram Highway, is already in the pipeline, despite some technical difficulties. From Havelian, a direct rail link will connect to Gwadar. An extension of the Kazakhstan oil pipeline from Urumqi to Havelian is also in the offing.

Once the rail-link is established, goods from Urumqi can be transported to Gwadar, a distance of less than 2,000 miles and, once they reach there, they will be at the mouth of the Arabian Gulf and a mere 1,000 miles from the Gulf of Aden!

We know that Afghanistan is rich in mineral resources. The most logical and shortest route for them to reach the seas is via Gwadar; as it is for the CARs. However, if Afghanistan is denied to the CARs, due to insecurity which is likely to prevail for the foreseeable future, the next most logical route is via Iran. This route is unacceptable to the US and the US is in a position to have its way in this matter.

The next route out for the CARs to reach the seas is through China, sharing the rail/road link to Gwadar. A rail link from Almaty (Kazakhstan) to Urumqi already exists. It would take little effort for other CARs to route themselves via Almaty. The US does not favour this route either, but it is not in a position to deny China to the CARs.

This is our strategic commercial corridor (henceforth SCC). Not only will it solve our energy crisis, the revenue generated through commerce can make us a modern day Singapore. The only hindrance is the unrest in Balochistan. That is why our unfriendly neighbour(s) are interested in stoking the unrest there.

Our political leaders cannot see the significance of this or are incapable of doing anything about it since our economic future is inextricably linked to the SCC and, therefore, to peace in Balochistan.

India is also energy starved. It tried to get oil from Myanmar but its plans were foiled by China. Without cheap energy resources, India will fail to achieve its ambitions. The cheapest method of transporting energy is through overland pipelines. For cheap energy to reach India overland, whether from the Middle East, Iran or the CARs, is through Pakistan; that is a geographic reality.

One day, India will acknowledge this truth and realise not only that a peaceful Balochistan is in our common interest but that our economic future is still tied to each other by an umbilical cord.

If we look at the energy and mineral rich CARs, the most logical route out for them is through Afghanistan on to Gwadar.

Opportunities galore for Chinese investment in Pakistan -- APP

Opportunities galore for Chinese investment in Pakistan

KARACHI, Nov 30 (APP): There are lot of opportunities for Chinese companies to invest in Pakistan by making 100 percent investment or through joint ventures. This was stated by former president SAARC Chamber of Commerce and Industry and former president FPCCI Tariq Sayeed in a meeting with a high level delegation from China Council for the Promotion of International Trade, Sichuan Province (CCPIT) Chengdu, China headed by Li Li, here at the Federation House, said a statement issued by Federation of Pakistan Chamber of Commerce and Industry (FPCCI) here on Tuesday.

The Chinese delegation invited Tariq Sayeed, who is also Patron-in-Chief of Pak-China Business Council of FPCCI and President FPCCI Sultan Ahmed Chawla to participate in the Second South Asia - Sichuan Business Promotion Seminar to be held in Chengdu on February 25 and 26, 2011.

They also requested Tariq Sayeed to invite 2 to 5 members of FPCCI to attend the said event.

The theme of the seminar will be "Investment and Trade" and is aimed to collect opinions from all sides to discuss more pragmatically with the leadership of Chambers and Associations from South Asian countries about all possible means to develop bilateral trade relations.

Tariq Sayeed thanked CCPIT for providing space to FPCCI for opening its representative office in Chengdu which has started operation since September 1, 2010.

He also appreciated them for providing FPCCI free stalls for the last two years for participation of Pakistani exporters in the exhibition, who are taking benefit from such offer of CCPIT.

He said there are lots of opportunities for Chinese companies to come and invest in Pakistan through making 100% investment or by establishing joint ventures in Pakistan.

Iran plans wind farm for Pakistan -- TEHRAN - UPI

Iran plans wind farm for Pakistan

TEHRAN, Dec. 6 (UPI) -- An Iranian company linked to the country's Energy Ministry said it plans to build a massive wind farm in Pakistan's southern Sindh province.

Iranian company SANIR, which is affiliated with the Energy Ministry, said it signed a \$100 million deal in Pakistan to build a 1,000-megawatt wind farm, the semiofficial Fars News Agency reports.

The report adds that Iran is the only country in the region that has the technological capability of building wind turbines.

The contract was signed with members of the Pakistani Chamber of Commerce, the report adds. The project aims to help Pakistan alleviate a looming energy crisis.

Both sides in June agreed to long-term natural gas contracts from the South Pars gas complex in the Persian Gulf.

Iran said it would ship as much as 750 million cubic feet of gas per year to Pakistan as early as 2014 when a pipeline from South Pars goes on stream.

Iran has pressed for the pipeline, which is dubbed the Peace Pipeline, since the 1990s. Western adversaries are pushing for a rival project from Turkmenistan.

Pak-China relations expanding in all dimensions: Chinese spokesperson
BEIJING, Dec 7 (APP): China's relations with Pakistan, its strong ally in South Asia, are expanding in all dimensions, Foreign Ministry Spokesperson Jiang Yu said here Tuesday. "China, Pakistan are good neighbours, partners and friends," she said. Responding to a question about the upcoming visit of Chinese Premier Wen Jiabao to South Asian countries, Jiang told a regular press briefing that both the countries enjoy "all weather friendly relations," and both the countries are cooperating in all dimensions. She pointed out that the all dimensional cooperation in various fields is proceeding smoothly "with good momentum."

The "consolidating China, Pakistan relation is the priority of China's diplomacy," Jiang said.

She said that her country is committed to consolidating traditional friendship and promoting bilateral ties with Pakistan.

China, she said would like to maintain the momentum of high-level visits to Pakistan as these would promote bilateral bonds of friendship.

The Chinese Premier Wen is scheduled to visit Pakistan in the second half of this month.

ECNEC to okay 22 projects tomorrow -- APP

ECNEC to okay 22 projects tomorrow

* Reko Diq gold scheme one of the projects to be approved

By Ijaz Kakakhel

ISLAMABAD: The Executive Committee of National Economic Council (ECNEC) scheduled to meet tomorrow (Dec 9) with Finance Minister Abdul Hafeez Shaikh in the chair is expected to approve 22 projects worth billions of rupees including Reko diq gold/copper project, which would attract over \$6 billion investment, sources told Daily Times here on Tuesday.

According to ECNEC agenda available with this scribe, the council would consider agriculture and food sector projects including Punjab Economic Opportunities Programme (PEOP) and Pak China National Project for Controlled Atmosphere (CA) and Advanced Ventilated Cold Storage worth Rs2.2292 billion.

The meeting will also consider "Promotion of Primary Education for Girls in selected districts of Khyber Pakhtunkhwa Province (WFP Assisted" and Basic Education Improvement Programme Phase-II KPK Province Norway Assisted submitted by the Education Ministry.

Energy sector projects include: National Compact Fluorescent Lamps (CFLs) Project; Power Distribution Enhancement Programme, Phase-II [(i) IESCO (ii) GEPCO (iii) FESCO (iv) MEPCO (v) PESCO (vi) HESCO (vii) LESCO (viii) QESCO; Addition of 500 and 220 kV substations and transmission lines for strengthening of existing NTDC system worth Rs 24.317 billion. Another energy project, include Combined Cycle power plant by installation of 320 MW UAE Gifted Gas Turbines & 120 MW Steam Units at GTPS Faisalabad.

The Health sector consists of 3 projects, which include: Prime Minister's Programme for Prevention and Control of Hepatitis (Prime Minister's Emergency Action Plan of Hepatitis), Expanded programme on Immunization (EPI) Revised, and National Programme for Family Planning and Primary Health Care (NP-FP & PHC), "The Lady Health Workers Programme" Phase-II.

The Higher Education, apex body may approve projects, which include Establishment of Shaheed Benazir Bhutto University, Benazirabad Sindh costing Rs 1.666 billion, and Islamabad and Fulbright Scholarships Support Programme (Revised).

Transport and Communication sector consist of two projects, namely "Improvement, widening and construction of kohlu-Sibbi Road Project (Length 162.5 km) (Re-revised)" and Procurement of (US Origin) 150 Diesel Electric Locomotives.

Physical planning and housing projects for approval are "Improvement of Water Supply System in Faisalabad (JICA Grants)" and Establishment of National Forensic Science Agency (NFSA) in Pakistan (Revised).

In population and Social Planning, ECNEC will consider Population Welfare Programmes (Islamabad Federal Activity, Punjab, Sindh, Khyber Pukhtoonkhwa, Balochistan and AJK).

Water sector projects include: Construction of 100 Delay Action Dams in Balochistan: Package-II (26 Dams); Punjab Barrages Improvement Phase-II (PBIP-II) (Rehabilitation and Modernization of Jinnah Barrage, Improvement and Modernization of the Irrigation and Water Management System - Monitoring and Evaluation of the project Impacts and Technical Assistance and Trainings); and Six (6) Dispersal Structures on Nari River, Construction of Ghazi Tuk, Khokhar, Erri, Haji Shaher and Remodelling/Rehabilitation of Mithri Weir and Canal System.

The government of Pakistan has decided to allow visa on arrival for 30 days to all Turkish nationals who possess valid US, UK or Schengen visas -- ISTANBUL

ISTANBUL: The government of Pakistan has decided to allow visa on arrival for 30 days to all Turkish nationals who possess valid US, UK or Schengen visas, said Prime Minister Yousaf Raza Gilani.

"We hope remaining formalities will soon be completed to conclude Visa Abolition Agreement for bona fide businessmen of Turkey and Pakistan," he said. Speaking at a meeting on Wednesday, hosted by Turkish Foreign Economic Relations Board DEIK, Gilani invited Turkish businessmen to explore Pakistan's business potential by investing in energy, oil and gas sectors.

"We seek your investment, desire joint ventures and want to work together in the spirit of a win-win partnership by providing conducive environment to do business in Pakistan. Bilateral trade volume of around \$782 million did not reflect the potential and opportunities that exist in two countries," he added.

He said steps had been taken by the government to promote trade and foreign investment. Despite some external and internal shocks in shape of global financial crisis, volatility in oil prices and energy shortfall, Pakistan's economy had shown resilience and modest growth this year, he stated.

Economic liberalisation, deregulation and privatisation in a transparent manner remain core principles of the economic reform agenda, he added.

He said Pakistan offered many attractive opportunities for investment in energy, textile, infrastructure development, agro-based industry, oil, gas and mining. He said the textile sector had been revamped and re-energised with a Rs40 billion investment support fund and asked Turkish businesses to consider setting up new units, entering joint ventures and relocating textile manufacturing units to Pakistan.

Gilani said the Karachi Fish Harbour, which has a recognised potential of \$1 billion, is being revamped and operations are being modernised. "We look for joint ventures for modern shrimp peeling units and mother vessels," he added.

Pak, Afghan enjoying cordial relations: Afghan Information Minister -- BR

Pak, Afghan enjoying cordial relations: Afghan Information Minister
ISLAMABAD (updated on: 2010-12-09 15:26:46 PST):

Afghanistan Minister for Information and Culture Dr Sayed Makhdoom Raheen said on Thursday that Afghanistan and Pakistan are enjoying cordial relations and people-to-people contact of brotherly countries will further improve bilateral ties.

Talking to APP before his departure to Kabul after visiting Pakistan, he said: "The relationship between two brother countries are cordial and based on centuries, we both nations are sharing happiness of life with each other."

He said: "We need to work together to create bright future for Pakistan and Afghanistan and for the whole region."

To a question, he termed his visit to Pakistan as excellent, saying Islamabad is more beautiful and bigger than before: "I will never forget this trip."

He termed meetings with Information, cultural and tourism Minister as very fruitful.

"We have discussed the issues beneficial for both the countries and talked about the renewal of the agreements signed by Pakistan and Afghanistan," he said.

He said he also invited three ministers to visit Kabul and they have accepted the

invitation.

To another question, he stressed the need for a visa free regime for Pakistani and Afghan journalists for travelling to each other's country as it would help promote greater cooperation in the media sector.

He also called for formation of a joint association of Pak-Afghan journalists, which would enhance interaction and coordination and help promote common causes, including fight against extremism and terrorism.

The Afghan Minister emphasized that more avenues should be explored to enhance cooperation for evolving Pak-Afghan joint media strategy to fight the menace of terrorism and change the extremist mindset.

Pakistan wishes to raise annual Sino-Pak trade up to \$18 bn -- BEIJING
Pakistan wishes to raise annual Sino-Pak trade up to \$18 bn
BEIJING: Pakistani Ambassador in China Masood Khan has termed visit of Chinese Premier Wen Jiabao to Pakistan as great important and hoped that the visit will open new opportunities and ways for trade and investment and besides his visit to India will not harm the Sino-Pak ties.

He expressed these thoughts in an interview to a private TV channel. He said that volume of Chinese investment in Pakistan has increased in recent years.

He said that important decisions will be taken during the visit of Chinese premier Wen Jiabao, which include inauguration of Sino-Pak Friendship Center, exchange of students, teachers, women and journalist delegations and others.

Masood Khan informed that current annual volume of Sino-Pak trade is \$7 billions, which is healthier than of the past years. He said about six thousand students are currently graduating from the Chinese institutions, but we wish this to further inflate up to 20 thousands.

He said global financial crunch has not affected our trade rather 25 percent increase in our exports is recorded in recent past years, whereas it has increased by 30 percent in current fiscal year collectively. Similarly, trade between the both countries has also grown at the 30 percent rate. If it continues to grow on similar pace, the volume of trade will attain annual target of \$18 billion after the next five years time.

He anticipated that during the visit of Wen Jiabao, China will agree to provide assistance for the restoration of communication and agriculture sectors destroyed by the recent floods.

Russian companies willing to invest in various sectors in Pakistan

KARACHI: Ambassador and Consul General of Russian Federation in Pakistan visited Federation of Pakistan Chambers of Commerce and Industry (FPCCI) and discussed matters relating to enhancing trade and economic relations between Pakistan and Russia. President FPCCI Sultan Ahmed Chawla briefed the delegation about the activities and functions of FPCCI. He stated that bilateral trade between Pakistan and Russia is around \$400 million, which is very low and is in the favor of Russia.

He said Pakistani businessmen are facing difficulties in getting business visa, whereas it is easier to get tourist visa. Sultan Ahmed Chawla said relations between the two countries lacked depth and dimension despite strong possibilities for mutual cooperation. Chawla stressed the need for strengthening bilateral relations between Pakistan and Russia and to activate trade and economic ties as well as opportunities for improving the investment climate and expanding direct contacts between the two countries' business communities. Ambassador of Russian Federation in Pakistan, Budnik Andrey said political relationships between the two countries are improving and the desire to raise the level of economic cooperation needs to be worked out. staff report

Malaysia starts breeding project of 'Neeli Ravi' of Pakistan -- BR

Malaysia starts breeding project of 'Neeli Ravi' of Pakistan

ISLAMABAD (updated on: 2010-12-10 19:04:14 PST):

The Malaysian Ministry of Agriculture and Agro-based Industry and Department of Veterinary Services have launched a pilot buffalo breeding project of Pakistani buffalo, "Neeli Ravi" known world over for its high yield of quality milk with rich fat content.

According to Pakistan's High Commission in Kuala Lumpur, the first ever consignment of 170 Neeli Ravi buffalos was formally handed over to the Malaysian Minister for Agriculture and Agro Based Industries, Datuk Seri Noh Bin Haji Omar by the High Commissioner for Pakistan in Malaysia Masood Khalid, in a ceremony, organized by the Department of Veterinary Services of Malaysia, in Kuala Lumpur, on Friday.

Speaking on the occasion, the Malaysian Minister for Agriculture and Agro Based Industry, Dato Sri Noh Bin Haji Omar said that Malaysia was deficient in production of milk and; therefore, imports most of the fresh milk to cater the domestic market.

He said launching of the pilot project of Neeli Ravi breeding facility in Malaysia, with the active technical support of Buffalo Research Institute (BRI) of the Punjab, the Malaysian Government will set up and develop its own dairy industry to meet domestic needs of fresh milk, and develop parallel facilities for the production of milk based products like Mozzarella cheese, fresh butter etc.

The High Commissioner for Pakistan in Malaysia Masood Khalid speaking on the occasion said import of first ever batch of 170 Buffalos of Neeli Ravi breed, which included 150 female and 20 male stock coupled with approval of an abattoir of Pakistan for export of frozen beef to Malaysia.

He said it had opened up a new window of opportunity for long term mutually beneficial cooperation between the livestock sectors of the two countries.

He said it would help both the countries to further explore trade and investment in non traditional items.

He said that Pakistan and Malaysia were ideally positioned to capture multi trillion dollar halal market, the world over.

Pakistan with 5th largest milk production, 2nd largest rock salts reserves, 10th largest mandarin production, 3rd largest mango production, 33rd largest potato production, 4th largest onion production, with animal population of over 110 million, coupled with Malaysian expertise in reprocessing and packaging can jointly capture a big chunk of fast growing multi trillion halal market, the world over.

Neeli Ravi called 'black gold' in Pakistan was the most important dairy breed adaptable and versatile of all the domestic animal of Asia and produces the highest yield of milk with an average of 7.5 litre per day.

Pakistan and Malaysia had signed two MoU and one Letter of Intent to promote cooperation in the live stock sector and halal business between the two countries during the visit of Minister of Agriculture and Agro Based Industry of Malaysia, Datuk Seri Noh Bin Haji Omar in Pakistan from December 14 to 17 last year.

Pak-Austria joint ventures to end power crisis -- APP

Pak-Austria joint ventures to end power crisis

ISLAMABAD: Pakistan and Austria agreed Thursday to capitalise on opportunities to forge cooperation in power sector to help overcome energy shortage in Pakistan.

As a part of the government's efforts to address the power shortages in the country, Federal Minister for Water and Power, Raja Pervez Ashraf, held a meeting with the Austrian Federal Minister for Economy, Reinhold Mitterlehner at Capital Vienna.

Both sides had wide ranging discussions on the modalities on how Pakistan could benefit from the Austrian expertise in small hydro sector as well as its state-of-the-art technology. Ashraf informed his Austrian counterpart Pakistan's total installed capacity for electricity generation was 20,000MW, while the demand for electricity was much higher. At the same time, it was growing at the rate of 10 percent every year.

He said the hydel-thermal mix in the country was 34:66, the reverse of ideal hydel-thermal mix of 70:30 required for the economic development. He highlighted country's hydropower potential was over 100,000 MW. Sites for 55000 MW had already been identified and several studies, including Diamer Basha (4500 MW), Bunji (5400 MW) and Kohala (1100 MW) were underway. app

Pakistan business team to visit Switzerland in 2011 -- PPI

Pakistan business team to visit Switzerland in 2011

KARACHI: Pakistan business delegation will visit Switzerland in first half of 2011 to further promote economic relations between the two countries.

An increased exchange of delegations could help Swiss entrepreneurs to get better picture of business environment in Pakistan and appreciate potential this huge market has to offer, Switzerland Ambassador to Pakistan, Christoph Bubb said Thursday.

Pakistan delegation's visit is being arranged by Swiss Agency for Development and Cooperation (SDC) in Karachi with its counterpart Swiss Asian Chamber of Commerce in Zurich.

Bubb said Karachi is one of the world's largest metropolitan cities and an important contributor to national and global economy.

It holds a particular significance for Switzerland as out of 18 Swiss multinational companies operating in Pakistan 15 were established in Karachi and successfully operating in pharmaceuticals, chemicals, banking and other service industries.

He said Swiss companies are generally satisfied with course of business and based on market potential maintain an optimistic outlook despite concerns to ongoing energy shortages and law-and-order situation.

He said bilateral trade between two nations has shown consistent growth over several years and is now further picking up in aftermath of global recession. The balance of trade has been in favour of Switzerland but Pakistan has considerably increased exports to Switzerland in past few years, he added.

SDC is successfully operating in Pakistan since 1966 and its program focuses on improving governance and increasing Income. Additionally, Swiss government initiated two years project Responsible Foreign Direct Investment in Pakistan to promote 10 globally accepted principles of UN Global Compact on key issues such as human rights, labour, environment, anti-corruption by engaging subsidiaries of Swiss multinational companies in Pakistan and their supply chain, he added.

He urged Pakistani and multinational companies to join this meaningful campaign which may herald a new era of integrated socio economic development in Pakistan which is facing difficult challenges and therefore extra efforts are needed.

Bubb said within first few days of catastrophic, SDC humanitarian aid took immediate measures to provide emergency relief to flood victims in northern districts of D I Khan and Karak. ppi

Pakistan, China air cargo service launched -- APP

KASHGAR: The air cargo service between Pakistan and China has been launched with the arrival of first maiden flight from Islamabad here on late Friday.

At the inaugural arrival ceremony, Sardar Aminullah Khan, Economic Minister at Embassy of Pakistan, Beijing, the Deputy Commissioner of Kashi prefecture and representatives of various related agencies including Customs, Civil Aviation, Quarantine, Immigration, port management and representatives of the Airline were present.

Speaking on the occasion, the Economic Minister highlighted the important aspects of the Pak-China relations.

“There is big potential for business for the air cargo service especially during winter season when the connectivity through land between the two countries remained suspended”, he observed.

He further pointed out that through cargo service, products of the two countries not only available easily whole the year in the markets of both sides but also in the Middle Eastern countries and Central Asian States.

He also appreciated the assistance provided by the Chinese government to Pakistan at the hours of the need.

Sardar Amin also stated the present economic policy framework of the Chinese government that envisages priority to the development of the western regions including Xinjiang with substantial investment.

The plan includes the development of infrastructure such extension of high speed train and other modes of transport and communication.

The special development zone status recently assigned to Kashgar was also discussed along with its impact on Pakistan in terms of expanded trade, development, investment and facilitation to Pakistan and the adjoining region of Central Asia.

The Minister appreciated the efforts of the sponsors of Rayyan Air Lines for successful operation of the first cargo flight from Pakistan which will go a long way in promoting the trade and investment between Pakistan, China and Central Asia. Cooperation extended by the local government and other agencies in this regard was also appreciated by the Economic Minister.

The Deputy Commissioner, Kashgar Wang in his speech described the importance of reliable communication links between Pakistan and China and expressed the desire for further expanding such connectivity.

He expected the introduction of passenger flights also by the airline. The Deputy Commissioner explained the huge potential of the region after recent efforts for fast development of the area which is necessary for transferring the benefits of the development to the people of the region in terms of better standards of life, employment and other basic facilities.

Captain Bhatti, Chairman of Rayyan Airlines also spoke on the ceremony. He appreciated the cooperation extended by the local government and the other related agencies of the government in Kashgar to make the launch of cargo service possible.

The flight took about 90 minutes from Islamabad to Kashgar and was received by the Deputy Commissioner, the Economic Minister and heads of all related agencies.

This was the first international cargo flight ever landed in the city and the participants in the ceremony were delighted with the initiation of the operation by an airline of the friendly country.

The Foreign office of Kashgar oversaw all the arrangements in this regard.

Pakistan-Turkey - a journey from 'brotherhood to strategic partnership' -- APP

Pakistan-Turkey - a journey from 'brotherhood to strategic partnership'

By Shumaila Andleeb

ISLAMABAD, Dec 10 (APP): From the love of Pakistanis for Kamal Atatürk to the Turks' affection for Jinnah - the brotherly relationship is ready to witness a shining era as Pakistan and Turkey have entered a new world of strategic partnership with signing of 17 Memoranda of Understanding in different fields. With 'Atatürk Avenue' in Islamabad and 'Jinnah Jadesi' roads in Ankara, the two capitals have got a new strategic dimension with the recent official visit of Prime Minister Yusuf Raza Gilani to Turkey.

The signing of 17 MoUs by the two countries has been regarded as a "turning point" to mutually benefit from each others' potential in the fields including health, education, agriculture, infrastructure, housing and media.

Turkey also offered to build schools and hospitals in Pakistan's flood-affected regions within six months.

Both the Prime Ministers of Pakistan and Turkey expressed conviction to take personal interest in ensuring practical implementation of the 17 MoUs.

Prime Minister Gilani's visit to Turkey also marks conferment of three separate honors for him. Turkish President Abdullah Gül awarded the Prime Minister with 'Jamhuriyat Nishan - The Republic Order' at a special investiture ceremony in recognition to furthering the relations between two countries.

Another award was Degree of Doctorate of Journalism for the Prime Minister by Turkey's prestigious Marmara University.

The University Rector termed Gilani as "Man of Culture" and said the institution was interested in learning from his experiences through his lectures.

Gilani also had the honour to address the Turkish Grand National Assembly, making him the first head of the government from Pakistan addressing the Turk parliamentarians.

Prime Minister Gilani who co-chaired the inaugural session of High Level Cooperation Council (HLCC) with his Turkish counterpart Recep Tayyip Erdoğan in Ankara, has termed the body as a "direct interaction between the cabinets of two Prime Ministers".

In the ancient city of Istanbul, the Prime Minister during his interaction with the Turkish businessmen offered them to invest in agriculture, housing, energy and infrastructure development, with an effort to for private sectors of the two countries to engage deeply with each other. The Foreign Economic Relations Board (DEİK) of Turkey expressed desire to strengthen the economic relations of two countries on a higher level.

Gilani told the Turkish businessmen that Pakistan had decided to give visa on arrival for 30 days to all Turkish nationals who possessed valid US, UK or Schengen visas.

He also expressed hope that the remaining formalities will soon be completed for the conclusion of Visa Abolition Agreement for bonafide businessmen of Turkey and Pakistan.

Pakistan and Turkey also reiterated their last year's agreement to increase bilateral trade volume to US\$2 billion by 2012.

Prime Minister Gilani concluded his visit with a saying that defines the crux of relationship between Pakistan and Turkey, as "The Pak-Turk relationship is a true sense of brotherhood. It is, as if we are a single family. We value these very special relations and will take them to even greater heights."

Russia, China keen on expansion project of PSM -- Daily Times

Russia, China keen on expansion project of PSM

Staff Report

KARACHI: Pakistan Steel Mills (PSM) has received Expression of Interest (Eoi) from 10 companies including China and Russia to boost its production from the present 1.1 million tonne per annum to 1.5 million tonne per annum.

“After appointing a consultant from international market for evaluating the Expression of Interest, the process of awarding this contract to a foreign company will be completed within the next three months,” CEO PSM, Imtiaz Ahmed Khan Lodhi said.

In this regard, PSM management has already given a detailed presentation to Federal Ministry of Industries and Production, and the Planning Commission of Pakistan, he said in an interview on Thursday.

According to CEO Pakistan Steel, after starting work on the first phase of expansion, the entity will initiate a second phase named Green Field Project to double its production capacity to 3 million tonne per year.

He said PSM has succeeded in restoring the confidence of foreign suppliers of raw materials (iron ore and coal) — with import bills amounting Rs 800 million.

PSM, he said, has also been approached by private firms registered in Brazil, Indonesia and others for supply of raw material.

Pakistan Steel, a state-run leading industry, was set up with cooperation of former Soviet Union in early 1970s near Port Qasim.

“Next month we will be in a no-profit-no-loss position. By the end of June 2011, Pakistan Steel will have a small net profit on its accounts,” Imtiaz Ahmed Khan Lodhi said.

Pakistan Steel has also repaid all its loans and is utilising its own resources to generate funds complemented with various effective budgetary and administrative measures to strengthen its liquidity position.

It has made procedures/policies very transparent especially of procurement to check possible corruption. Third party certification of raw materials has also been introduced to achieve the results.

With re-commissioning of its battery “Coke oven-I”, in February 2011, the Mills’ production will rise to 1.1 million tonne per year. PSM, at present, is operating at 50 percent capacity. With further improvement in raw materials stock position, the Mill will use its 60% capacity next month and in January 2011, it is expected to touch 70% of its total production capacity.

The Coke oven-I has been repaired at a cost of Rs 1.5 billion with the help of Russian experts. From next month, PS Billet Mill is expected to produce 0.3 million tonne billets per month.

PSM has been catering up to 20% of total steel demand of the country. For increasing its share in the market, the entity has started diversification of the products. Now, it will make improved quality sheets to beat the competitors within and outside the country. PSM has already an edge over other steel mills in private sector. PSM could influence the local steel market as its prices work as benchmark. It produces billets, hot rolled sheets and galvanised iron sheets, besides, selling its by-products, that is, coal tar, ammonium sulphate, slag and coke. PSM is the sole source of this coke for small steel units and foundries engaged in making wide range of steel products in the country, Lodhi said.

The Mills’ management has devised a new price fixation system with full transparency to ensure better profit margins. “PSM management has focused on developing and promoting indigenous sources of raw materials to cut its raw materials bill, ensure its availability and save foreign exchange for the country,” he added.

In local cases, PSM has to pay bill within one week after shipment of raw material whereas in foreign suppliers cases, the advance payment is needed and the price is also high. The local procurement will also help promote domestic industry and create jobs for the local people.

S Korea to provide Pakistan \$180 million soft loan -- Daily Times

S Korea to provide Pakistan \$180 million soft loan

* Both countries sign framework arrangement agreement

By Ijaz Kakakhel

ISLAMABAD: Pakistan and South Korea on Thursday signed a framework arrangement agreement under which S Korea would provide a soft loan of \$180 million for development projects in Pakistan.

The loan would be administered by the Korean Economic Development Cooperation Fund (EDCF) and Korean Exim Bank. The loan has one percent mark-up rate for 30 years having another five years as grace period. Under this arrangement, only special projects would be carried out.

Economic Affairs Division (EAD) Secretary Sibtain Fazal Halim from Pakistan's side and Ambassador of the Republic of Korea in Pakistan Choong Joo Choi signed the agreement.

With the signing of the agreement, Pakistan and Korea were able to sign loan agreements for development projects in priority areas that include infrastructure, renewable energy, vocational training, environment, health and education sector. Korea has shown interest to finance two projects that include construction of Malakand Tunnel with total cost of \$90 million and conversion of Municipal Solid Waste into energy and fertilizer in Faisalabad with a cost of \$35 million approximately.

EAD secretary said both Pakistan and S Korea have cordial and historic relations and Korea always extended useful assistance both in terms of technical and development. At present, he said Korea provided assistance in three developmental schemes with a total cost of \$63.8 million. These projects were Kepco in Gujranwala with \$45 million, NTDC 22KV line with \$17.3 million and Garment Centre Karachi \$1.5 million. All these projects are ongoing, he maintained.

Speaking on the occasion, the S Korea ambassador said the framework arrangement between the two governments is concerned with loans from the EDCF for the year 2010 through 2012, with the view to simplifying and streamlining the loans allocation procedures. Under this arrangement, he said the government of Pakistan would be entitled to avail the opportunity of EDCF loan from Korea up to an aggregated commitment amount of \$180 million.

He said the arrangement would also provide a platform for submission of project proposals to be financed under EDCF loan assistance in the priority areas. The repayment terms and the interest rate shall be specified in the loan agreement for the individual project.

At this time of Pakistan is facing economic hardships due to recent disastrous floods, ongoing war on terrorism and extremism and energy shortage in the country. Korea has come forward as usual and stands with Pakistan not only to play its due role to soften the situation at the time of need but also to further strengthen the existing bilateral economic cooperation between the two countries.

The Korean Embassy in a statement said that it was also pertinent to mention here

that the government of Korea established the EDCF in 1987 for the purpose of promoting Korea's economic cooperation with developing countries. Drawing on Korea's development experiences to date, the EDCF assists developing countries by providing necessary funding to assist in industrial development and economic stability. The Exim Bank of Korea was responsible for the operation of the EDCF including project appraisal, execution of the loan agreement and evaluation after project completion.

Swiss officials visit OICCI to identify industries -- APP

Swiss officials visit OICCI to identify industries

KARACHI: Swiss Ambassador Christoph Bubb along with the Consul General Didier Boschung visited the Overseas Investors Chamber of Commerce & Industry (OICCI) to familiarise himself with the business environment in the country and to obtain the ground realities of operating in Pakistan from the business community's perspective. The prime objective of the Swiss delegate's visit to OICCI was to identify avenues for bilateral collaboration with Pakistan including identification of sunrise industries, which may be of interest to Swiss investors. The current energy crisis along with the social and political situation of the country was also discussed in detail. The delegation inquired about the initiatives being taken by the government of Pakistan and stressed improving the image of the country for potential investors. During the meeting, the issue regarding violation of "Intellectual Property Rights" was also raised with particular reference to the data protection law for the pharmaceutical sector. Ambassador Bubb shared his concerns regarding policy implementation and lack of proper governance in the country. Speaking at the occasion, Ameena Saiyid - OBE, President OICCI said, "Despite these negative aspects, Pakistan still remains an attractive destination for investment and members of the Chamber have been running their businesses successfully in the region even during the difficult periods." Ameena assured the delegate that the government could further improve the investment scenario of the country by broadening the tax base, strengthening the education system, and developing facilities to provide technical training. The ambassador acknowledged the efforts being made by the OICCI and stated that more was needed on the international front towards eliminating misperceptions about Pakistan. As the foreign world often assumes Pakistan to be a war zone, which is quite contradictory to the reality. staff report

Pak to get six more F-16 aircraft from US on Dec 13 -- ANI

Pak to get six more F-16 aircraft from US on Dec 13

Lahore, Dec 11(ANI): Six new F-16 C/D Block 52 high-tech aircraft will reportedly arrive in Pakistan from the United States on December 13, after which the Pakistan Air Force (PAF) will have a total of 18 such aircraft.

In 2005-06, Pakistan had signed a contract with the US government for the acquisition of 18 F-16 C/D Block 52 aircraft, under which the PAF would receive these state-of-the-art aircraft from the US in staggered batches, the Daily Times reported.

While the first batch of three aircraft arrived in Pakistan in May 2010, and the second batch- of the same quantity- at the PAF Base in Shahbaz (Jacobabad) in October, six more aircraft reached the country in November.

The F-16 C/D aircraft is a high tech fighter aircraft equipped with state-of-the-art avionics suite and latest weapons with Night Precision Attack capability. These aircraft are part of the bid by the PAF to modernise and enhance its air defence capabilities. (ANI)

The 17,000 Km long Turkmenistan-Afghanistan-Pakistan-India (TAPI), natural gas pipeline project has been signed on December 11, 2010 -- APP

TAPI: The desired essence

Dr Raja Muhammad Khan

The 17,000 Km long Turkmenistan-Afghanistan-Pakistan-India (TAPI), natural gas pipeline project has been signed on December 11, 2010, during Ashkhabad Summit. The project is both unique and significant. Unique in the sense that, it is third time that concern parties has agreed for its construction, but practically no construction work on it could be started as yet, mainly because of security reasons, mainly prevailing in Afghanistan. Initially, the project was conceived as TAP (Turkmenistan-Afghanistan-Pakistan) during the Taliban regime in Afghanistan. Later it was revived twice; as TAP and TAPI during Karazai administration in Afghanistan. On December 11, 2010, the energy ministers of all four countries signed the framework agreement of the project, whereas, the Presidents of all countries less India signed the key document. Mr. Murli Deora, Minister of Petroleum and Natural Gas, represented India, who signed the key document also.

The envisaged route of the gas pipeline is from Turkmen Dauletabad gas fields to Fazilaka India via Herat-Kandahar (Afghanistan) and Quetta Pakistan. The designated capacity of the gas is expected to be 33 billion cubic meters per year. The estimated cost of the project is \$8 billion. Following the over-through of the Taliban regime in Afghanistan in 2001, the heads of the state of Afghanistan, Pakistan, and Turkmenistan met in Islamabad in May 2002. The heads agreed to constitute a steering committee, consisting of oil and gas ministers of three states. The committee requested the Asian Development Bank (ADB) for the requisite funding and technical assistance. The ADB after necessary analysis of the project, promised assistance for, "financing a techno-economic feasibility study that covered pipeline routing, preliminary design, cost estimates, and rapid environmental impact assessment, and to assess volume-price sensitivity."

In phase-1, ADB also supported a market study on demand for natural gas in Pakistan and northern India, and a risk analysis and risk mitigation study to address the concerns of gas-consuming countries and of downstream consumers in case gas supply is disrupted along the route of the pipeline. In a way, ADB, which is acting as the secretariat of the project, vigorously persuaded and compelled the basic partners of the agreement to include India into it? The technical assistance by the designers of ADB also include construction of underground reservoirs for the storage of natural gas in Pakistan in sufficient quantity for meeting the emergency requirements of the consumer countries, in case of shortage of supply at the source or interruption in between. The project is significant, because it is the first formal effort for linking the energy rich Central Asia with the energy deficient South Asia. Moreover, the project would provide an outlet to the land locked Central Asian Republics (CARs) through a shortest possible route for the rest of the world. At regional level, the project would lead towards a regional integration between the

South and Central Asia. The regional resources would be consumed by regional countries. It is worth mentioning that as compare to the former routes of oil and gas from CARs to rest of the world through Russia, Pakistan provides shortest excess to the regional countries for export and transportation of their natural resources via Arabian Sea as well as the overland route.

Another significance of the project would be that a huge number of human resources would be committed during the construction of the pipeline and even thereafter on monitoring, storage and security related and miscellaneous duties. As per estimate, over 12,000 jobs would be created for the Afghan people only during the pipeline construction. This would provide employments to the people in their respective areas, thus substantially reducing the unemployment in these countries. Apart from this optimistic aspect, for the countries like Pakistan and Afghanistan, the project would bring a huge amount of the transit fee, as the pipeline covers huge stretches through the Pak-Afghan territories.

Besides, a lot of positive aspects and hopes for the economic prosperity, the TAPI is expected to bring in, there are fears linked with the completion of this project. The pipeline has to pass through some rowdy areas of Afghanistan, still under the occupation of Taliban and warlords. The member countries of the TAPI and even the ADB have shown concern over the security aspects of the pipeline in the Taliban dominated areas and some areas of Pakistan, frequently hit by terrorists. Indeed, "The issue is not only security in the sense that you can't actually guarantee the safety of the pipeline, but actual construction is going to be difficult as well." In this regard, the ongoing efforts of Hamid Karazai for the reconciliation and re-integration of Taliban and warlords needs further impetus. Definitely the countries directly involved in the Afghan affairs; the US and NATO countries and India, which is massively involved in the garb of Afghan development have the primary responsibility to bring stability in that country. Of course, the other regional countries do have a role to play for the stability of Afghanistan, the way Pakistan is assisting the Karazai administration in the integration and reconciliation of Taliban with his Government. Luckily, the project has the tacit approval from the United States, the occupier of Afghanistan. US otherwise, encourage and support all oil and gas pipelines from the Central Asian and Caspian region to Asia and Europe from routes other than those passing either from Russia or from Iran. In this regard, it is also highlighted that, US still oppose the establishment of Iran-Pakistan gas pipeline. It was because of US pressure that forced India to withdraw from the project, previously known as the IPI (Iran-Pakistan-India) gas pipeline.

Pakistan welcomes Indian participation in this gas pipeline project. The terrorist hit country expect that all those who promote, abet and finance terrorism and sub-nationalism in Pakistan would now desist from this nefarious act for the greater cause of economic prosperity in South Asia. Let us make TAPI as the symbol of peace, stability, and economic prosperity of South and Central Asia.

Turkey to upgrade PAF F-16s -- The Nation

Turkey to upgrade PAF F-16s

ISLAMABAD – Pakistan Air Force (PAF) has opted for Turkish Aerospace Industrial Complex 'TAI' for the Mid Life Upgrade (MLU) of its F-16A/B aircraft fleet in a bid to enhance its operational capability.

Well-placed defence sources told The Nation on Friday that Pakistan and Turkey signed an agreement in this regard last week and the multimillion dollars project would begin soon. Sources said that Pakistan has opted for 'TAI' - the Ankara-based Turkish aerospace industrial complex - just for the cost-effectiveness after its lengthy negotiations with the US manufacturers failed to bear fruits. "The US manufacturers of the F-16 aircraft were very expensive. Therefore Pakistan had to opt for Turkey," a source said.

Sources further said that under the agreement the project, that was expected to kick-start within next two months or so, would be executed in phases. The PAF, which currently has more than 40 F-16 A/B multi-roller fighter fleet, would soon start sending its F-16 aircraft to Turkey for the MLU.

TAI, established in 1984, is a joint venture of various Turkish companies and had successfully realised the co-production of F-16 fighters, CN-235 light transport/maritime patrol/surveillance aircraft, SF-260 trainers, Cougar AS-532 general purpose helicopters.

With its proven experience and know-how, TAI has improved its capabilities in the fields of design, production, modernisation, modification and systems integration of fixed and rotary wing air platforms, unmanned aerial vehicles and satellite.

Because of the high quality stringent standards including the NATO AQAP-2110, ISO-9001: 2000 and AS EN 9100, TAI has won position of a qualified supplier for Aermacchi, Agusta Westland, Airbus, Boeing, EADS CASA, Eurocopter, Lockheed Martin, Northrop Grumman, MDHI, Sikorsky etc.

Turkish delegation exploring investment opportunities in textile sector -- BR

Turkish delegation exploring investment opportunities in textile sector

ISLAMABAD (updated on: 2010-12-11 18:30:50 PST):

A 5-member Turkish delegation Saturday visited Board of Investment (BoI) to explore investment opportunities, particularly in textile and agriculture sectors.

The delegation comprised of Yasar Kucukcalik, owner of KUCUKCALIK Group, Turan Kaygusuz, owner of ILKON Group, Hakan Datekin, Onur Kaygusuz and Serdar Autsuoglu, Owner of ANKA Textile.

Turkish delegation showed great interest in the areas of textile and agriculture, said a BoI press statement issued here.

Speaking on the occasion, Yasar Kucukcalik gave a brief detail about KUCUKCALIK saying that as an international manufacturer for home textile market it was producing 7 million meter fabric per month and 85 pct of this amount is exported to the 46 different countries with the power of 2000 employers.

The delegation members assured for helping exchange of information regarding investment, policies besides exploring possibility of enhanced commercial and economic cooperation between the two friendly countries and the potential of two-way investments.

BoI, Executive Director General, Humayun Sikandari gave a detailed presentation on Investment policy, incentive package, Special Economic Zones and tremendous potential available in the field of agriculture, textile and energy.

He highlighted that the current investment data from July-Sep 2010 is \$1.3 million and expressed the hope for a huge increase after the current visit of the Prime Minister and Chairman Board of Investment, Saleem H. Mandviwalla to Turkey.

He further added that Pakistan was the 4th largest cotton producer and 3rd largest cotton consumer adding that textile was the main driver of export for the last 50 years and the sector has enjoyed the investment of US\$ 7.5 billion over the last ten years.

Talking about the incentives provided to the investors, he added we have availability of internationally acclaimed raw cotton and there are Dedicated Textile and Garment `Cities.

There is notable reduction of import duty to 5% on textile machinery and parts and ginning presses adding Research and Development (R &D) support of 6% and turnover tax reduced to 1% and Sales tax reduced to 2%.

While land is available at; Karachi Garment City, Lahore Garment City and Faisalabad Garment City to develop the industries including light engineering factories, textile industries, garment industries, ginning factories, power looms & carpet industry.

Chairman BOI Saleem H. Mandviwalla and Secretary BOI Anisul Hussnain were also present on the occasion.

Turkmenistan's neutrality contributing to regional peace, security: FM -- BR

Turkmenistan's neutrality contributing to regional peace, security: FM
ASHGABAT (updated on: 2010-12-11 15:05:52 PST):

Foreign Minister Shah Mahmood Qureshi on Saturday appreciated the 'Permanent Neutrality' stance of Turkmenistan and said it had contributed to regional peace, security and stability.

He was addressing the International Conference on Permanent Neutrality of Turkmenistan here, as part of series of ceremonies marking the 15th anniversary of neutrality of the land locked Central Asian Republic.

Foreign Minister Qureshi who is here as part of President Asif Ali Zardari's delegation for the inking of the Turkmenistan- Afghanistan-Pakistan-India (TAPI) gas pipeline project said Pakistan was proud to be among the select group of nations co-sponsoring the UN General Assembly Resolution on Turkmenistan's Permanent Neutrality.

Qureshi termed it a potent prescription for lasting peace and said the policy was based on time honoured norms of relations among the sovereign states and added it was a reflection of wisdom and sagacity of the Turkmen leadership.

He said the revival of the TAPI summit was a historical milestone and said it would bring durable peace and sustainable development in the region.

Later talking to APP, the foreign minister said the President held important discussions with his Turkmen counterpart last night, covering whole range of issues.

Foreign Minister Qureshi said Pakistan has urged Turkmenistan to go for barter trade of commodities between the two countries as it would enable them both save their foreign exchange reserves. He said during the talks the two sides agreed on a broadening the areas of cooperation, with a particular focus on trade, enhancing connectivity and cooperation in energy.

He said the two sides also took into account the defence and security cooperation between their countries and discussed ways to enhance it further.

Islamabad—The auspicious ceremony for the Inauguration of the Pakistan Russia Business Forum (PRBF) was held at the Creek Club.

The ceremony was visited by respected and renowned guests from Pakistan and Russia. Mr. Tariq Iqbal Puri, the Chief Executive TDAP was the Chief Guest at the event. His Excellency Mr. Andrey S. Budnik, the Ambassador of Russian Federation in Pakistan and the Chief Patron of PRBF was present along with other Consul Generals and Diplomats. Heads of the many private and public corporations including friends from Press and Electronic media also participated in this ceremony. The venue was packed with highly reputed individuals from Russia and Pakistan.

Abdul Rauf Tabani, the Founder President of PRBF, gave the opening address and welcomed all the guests. He highlighted many areas including the Russian diplomatic relations with Pakistan and how successfully they have been developing at the regional and international levels and both countries having huge possibilities for expansion of mutually advantageous business relations. He emphasized on the need for further structural improvements in terms of duties, visas and marketing. He also laid focus on how majestic the Russian Federation is in terms of geographical features and economics.

The President's address was followed by the Speech of Brigadier (R.) Mr. Tariq Khalil, Secretary General of PRBF. Mr. Tariq Khalil highlighted the past and present relations of both countries and their group participation in joint-venture projects with Russian Partners.

His Excellency Mr. Andrey S. Budnik also addressed the guests and expressed his views on the improving relations between the two countries. He also mentioned that the political and bilateral levels are successfully standing on a positive note, which means that this is the best time for improving and strengthening them further. The Chief Guest of the evening, Mr. Tariq Puri also expressed his point of view and covered areas of interest that have and will improve the Pak-Russian ties. He mentioned the need for reviving the airlines, liberalization of Visa policy for easy movement if businessmen, development of the banking sector, opening of warehouses and cold-storages in Russia to make Pakistani trade more cost-effective, he also highlighted the fact that the officials from the Russian Federation should assist Pakistanis by introducing local marketing schemes specifically targeted to support us.

Tariq Rafi, the Chief of Organizing Committee of the Inaugural Ceremony in the end conveyed the vote of thanks to the audience. The event also included the official launch of the PRBF Website held by the Chief Guest, Mr. Tariq Puri.

PRBF Momentos were presented by H.E. The Ambassador Mr. Andrey S. Budnik to Mr. Tariq Iqbal Puri and by Mr. Abdul Rauf Tabani to H.E. The Ambassador. The program was followed by the dinner hosted by PRBF.

Pakistan, China to ink series of agreements

ISLAMABAD (updated on: 2010-12-13 14:23:30 PST):

Pakistan is expected to ink a series of agreements as Premier Wen Jiabao of China visits Pakistan aimed at boosting cooperation in energy and agriculture sectors and further strengthen strategic cooperation.

During the three-day official visit to visit Premier Wen will hold meetings with President Asif Ali Zardari, Prime Minister Syed Yusuf Raza Gilani and other Pakistani leaders.

"China is Pakistan's true and most reliable friend. The Government and people of Pakistan look forward to welcoming their most honoured friend," a statement from the Foreign Office said.

The Chinese Premier is expected to hold "in-depth exchange of views" with Pakistani leaders to intensify strategic coordination and communication, supporting disaster re-construction work, intensifying culture and people to people exchanges and coordination on international and regional affairs to safeguard common interest.

Premier Wen who will arrive here after his visit to India at the invitation of Prime Minister Yusuf Raza Gilani will also address a business forum and meet chief executives of Pakistani companies.

Around 150 business leaders will accompany the Chinese premier and the visit will provide a unique opportunity for two countries to enhance their trade and commercial ties by inking several agreements.

Projects of around 20 billion dollars have been completed in Pakistan with Chinese help. Work on projects of 14 billion dollars was continuing, while agreements would be signed for another 20 billion dollars will be signed.

Premier Wen will also deliver a key note speech on Pakistan, China relations at a special joint session of parliament on Dec 19, besides having interaction with the Pakistani media.

He will be briefed about the recent flooding at a briefing for at the National Disaster Management Authority at the PM Secretariat.

The Chinese premier will also attend the inauguration ceremony of China Pakistan Friendship Centre, that houses a paintings exhibition. He will also hold meetings with opposition leaders and services chiefs.

President Asif Ali Zardari will hold a banquet in honour of the visiting dignitary.

Pakistan-Norway keen to enhance coop to promote peace in region --

BR

Pakistan-Norway keen to enhance coop to promote peace in region

ISLAMABAD (updated on: 2010-12-13 14:20:48 PST):

Pakistan and Norway on Monday expressed keenness to further strengthen and broaden bilateral ties and work together to fight against the war on terror and promote peace and stability in the region.

At a meeting held between Minister for Defence, Ch. Ahmed Mukhtar, and the visiting Norwegian Defence Minister, Ms. Grete Faremo an agreement was reached to further bilateral ties with the aim to promote peace and stability in the region.

The meeting exchanged views on various subjects including defence cooperation, Pakistan's counter terrorism efforts and its contribution in UN peace keeping operations and security situation of the region.

Talking to his Norwegian counterpart, the Minister said that Norway was a friendly country and a valued partner on various international and regional issues, and Pakistan was keen to work closely with Norwegian government for furthering the bilateral relations.

Ch. Ahmed Mukhtar said both countries needed to enhance collaboration in the field of defence production and proposed to undertake joint ventures especially in ship building and sea boats manufacturing sectors.

The Minister also conveyed that Pakistan was keen to purchase F-16 aircraft fleet which was reportedly being replaced by Norway with F-35 Lightning-II Joint Strike Fighter (JSF).

The meeting also discussed Pakistan's anti-terror efforts. The Minister briefed the Norwegian defence delegation about the contribution and achievements made by Pakistan against the war on terror.

He said that the international community was not helping Pakistan in true sense as the war on terror was a very expensive affair.

He noted with concern that the international community had given hopes but failed to fulfill its commitment to establish Reconstruction and Opportunity Zones (ROZs) in FATA which were essential for bringing social and economic prosperity in the terror-stricken region.

He termed the recent statement of the German Chancellor Angela Merkel during a press conference with the Indian Prime Manmohan Singh in Berlin as unfortunate blaming Pakistan for the Bombay terrorist attacks.

He regretted that the friendly countries were giving such biased and unfair statements despite the fact that Pakistan had been paying a heavy cost than any other country in the world, in terms of man and material losses, against the war on terror.

On the issue of cross border movements, the Minister said that there was no cross border movement by the terrorists from the Pakistan's side of the border.

He said that it was un-understandable that Pakistan was being blamed for the skirmishes taking place in Afghanistan despite the fact that Pak-Afghan border was manned by NATO/ISAF forces.

The Minister also appreciated the Norwegian support for the Internally Displaced Persons (IDPs), flood victims and the development of Pakistan social sector particularly its assistance of US \$ 7 million and US \$ 11 million for the establishment of 350 community schools in FATA and basic improvement projects in the Khyber Pakhtunkhwa province respectively.

Admiring Pakistan's sacrifices and anti-terror contribution, Ms. Grete Faremo said that Pakistan had been playing a vital role against the war on terror, saying Pakistan's role was very essential to defeat and eliminate terrorist elements.

She said that regional approach towards bringing peace and stability in Afghanistan was very important. She informed that Pakistan's role and contribution in defeating terrorism and bringing peace and stability in the region was of significant importance.

Norwegian Defence Minister urged that both Pakistan and Norway needed to work together to promote regional peace and defeat terrorism. She also deeply admired Pakistan's role as the biggest contributor to UN Peacekeeping Missions.

Chinese PMs visit to help boost economic, trade development -- BR

Chinese PMs visit to help boost economic, trade development

ISLAMABAD (updated on: 2010-12-14 14:57:48 PST):

Welcoming the forthcoming visit of Chinese Premier, Wen Jiabao, the Islamabad Chamber of Commerce and Industry (ICCI) President on Tuesday said that the visit would further enhance economic and trade cooperation between the two friendly countries, besides boosting the confidence of the business community.

"Chinese Prime Minister is coming with a large business delegation comprising about 250 top businessmen, hence providing an opportunity to the business persons to explore ways for developing trade relations with their Chinese counterparts," ICCI President, Mehfooz Elahi told APP.

He was optimistic that the visit would pave way for enhanced trade to meet the target of enhancing trade volume to \$15 billion by 2015.

"Pakistan has multi-dimensional and deep-rooted relationship with China and long-standing ties of friendship between the two countries are underpinned by mutual trust and confidence," said Elahi earlier while addressing a business community at the chamber house.

He said that a number of agreements, worth millions of dollars, in different sectors including energy, infrastructure, engineering, software technologies, telecom, furniture, real estate and tourism, mineral and mining, chemicals and printing, automobile, agriculture and food processing, water, industry and defence are expected to be signed during the Premier's visit.

He said Pakistan was an agro-based country, however, agriculture productivity is not up to the mark due to use of traditional measures, adding Pakistan was looking forward to China to give technology assistance to modernize agriculture.

He was of the view that establishment of industrial facilities and upgradation of communication infrastructure, besides boosting trade between the two countries will also enhance regional connectivity.

He appreciated the Presidency level meeting between both countries to resolve Pakistan's energy crisis through development of hydel, thermal and solar energy projects adding that Chasma project was subsequently resumed as a cooperative project between Pakistan and the China Nuclear Energy Industry Corporation.

Mafooz said China and Pakistan have witnessed steady growth in mutual investments in recent years adding investment of more than \$1.3 billion was made by China in Pakistan in the last few years.

He said that the combined effect certainly will be Pakistan's economic revival adding improved relations with China will also contribute towards Pakistan 's security in the changing regional geo-political environment.

Pak financial system size increases to Rs 9.2 trn by June 2010 -- BR

Pak financial system size increases to Rs 9.2 trn by June 2010

KARACHI (updated on: 2010-12-14 16:30:32 PST):

Pakistan's financial system size, in terms of assets, increased to Rs 9.2 trillion by end-June 2010 showing a robust growth of 20 percent from December 2008 level of Rs 7.71 trillion.

According to State Bank's Financial Stability Review 2009-10, released here Tuesday, the stability of the financial system is largely derived from the pre-

dominant position of the banking sector as other components of the financial system continue to grow at a more gradual pace. Domestic banking sector assets constitute 73.2 percent of total financial system assets.

The Report, which presents an assessment of financial stability for 2009 (CY09) and the first half of 2010 (H1-CY10), is based on the theme of Role of Government in the Financial Sector and assesses the government's developmental role in enhancing the financial development in the country.

It said the bank deposits, which have a key contribution in maintaining financial stability, grew by 13.5 percent in CY09, and 8.2 percent in H1-CY10, bringing the total deposit of the banking system to Rs 5.1 trillion by end-June CY10. This bodes well for enhancing prospects of financial stability, especially keeping in view the slowdown in deposits growth in CY08.

The deposit growth is largely driven by the growth in home remittances of 23.9 percent (in USD terms), gradual economic recovery, and the substantial increase in government borrowing, a portion of which flows back into the banking system in the form of deposits, the report added.

The Report opined that healthy deposit growth is indicative of banks' resilience to the competition from the National Savings Schemes (NSS), which generally offer a higher rate of return than bank deposits.

It said that the pace of deterioration in the quality of advances slowed down considerably as in CY09 Non-Performing Loans (NPLs) increased by 24.2 percent to Rs 432 billion and further by 6.4 percent to Rs 460 billion by end-June CY10. Going forward, NPLs remain a key cause of concern for the banking sector, it added.

However, the Report noted that structural weaknesses in the process of revenue generation, significant rigidities in government spending, expansion in quasi-fiscal operations have added to the fiscal burden, which is increasingly financed from the financial system.

It pointed out that the banks' exposure to the government increased significantly during 2009 and in the first half of 2010, with particular concentration in the power sector due to the ongoing issue of circular debt, and continued increase in lending to public sector enterprises and commodity finance in general.

Pak-China natural alliance enjoying close defence, economic ties -- APP

Pak-China natural alliance enjoying close defence, economic ties

ISLAMABAD (updated on: 2010-12-14 11:51:05 PST):

Dr. Shaheen Akhtar, Analyst and Senior Research Fellow in Institute of Regional Studies has said that Pakistan and China are natural allies and enjoying close defence and economic ties.

Talking to Radio Pakistan she highlighted the importance of Wen Jiabao's visit to Pakistan and said that the visit is aimed at boosting ties in trade, energy and investment sectors. China has expressed keen interest in solar, hydel and nuclear energy sectors to address Pakistan's energy crises, she added.

She said that the visit is also aimed at developing an energy corridor linking Gwadar and China through a highway and also through fiber optics. China is expending its role as observer and economic player in region and it is investing in Afghanistan also.

Dr Shaheen Akhtar said China wants stability in region and peace in two regional nuclear powers; India and Pakistan. Pakistan has become a very critical element in the region viewing the US interests in the region and its close relations with China. In this situation China has become a soft balancing power too.

She said President Zardari's continuous visits to China were aimed at economic ties and cooperation. China and Pakistan are developing strategic partnership keeping the IAEA safeguards in view and in the backdrop of US-India nuclear deal, she added.

Dr Shaheen Akhtar said that there are positive prospects of increasing bilateral trade between the two countries.

Pak-China to sign 20 agreements/MOUs during Wen Jiabao visit -- BR
Pak-China to sign 20 agreements/MOUs during Wen Jiabao visit
ISLAMABAD (updated on: 2010-12-14 19:46:20 PST):
China and Pakistan will sign 20 agreements and Memorandums of Understanding (MoUs) during visit of Chinese Prime Minister Wen Jiabao.

This was stated by China's ambassador to Pakistan Liu Jian in an interview to APP here on Tuesday.

He said China's Premier Wen Jiabao and Pakistani leadership will hold wide ranging discussions to draw a five year blueprint to expand their economic and trade relations.

He said the top priority of the visit of Chinese Premier to Pakistan will be to further solidify already strong strategic ties with medium and short term plans of action.

China's Premier Wen Jiabao will pay a three day official visit to Pakistan from December 17 to 19.

This will be the second visit of the Chinese Prime Minister during which he will hold talks with the Pakistani leadership on bilateral, regional and international issues of mutual interest.

The ambassador said Wen Jiabao will be leading a large business delegation from China. The delegation comprising more than 250 business leaders will attend a business summit.

The two sides are expected to sign 20 Memorandum of Understandings (MOUs), which will convey a message of growing ties, he added.

The ambassador said the visit will be of great significance as both countries will emphasise on deepening and broadening their ties in multi-faceted fields.

"Pakistan and China are good friendly neighbours with long history of relations spread over decades." Both countries will celebrate 60 years of their diplomatic relations next year.

Liu Jian said not only governments of two countries have a growing strategic partnership but their people are also coming closer with exchange of youth visits and scholarships for each others students.

He said both sides are now aiming to take their ties to a new height by building up on their remarkable mutual achievements in various areas including economy,

trade, investment, energy, communication, agriculture and defence production.

The ambassador said at present Pakistan is China's second largest trading partner in South Asia and China is Pakistan's third largest trading partner, third largest import source and fifth largest export market of Pakistan.

He said the bilateral trade was growing as in the first nine months of this year, the volume grew by 29 percent as compared to last year and China's imports rose by 36 percent during the same period.

Calling ties of Pakistan and China as time tested and all weather, he said both countries are playing a critical role for regional peace and stability.

He mentioned the assistance given by both countries to each other in the aftermath of natural disasters.

China gave sincere and timely help to Pakistan during tragedy of floods and was taking active part in the reconstruction phase, the envoy said.

He appreciated that political leadership of Pakistan will be together when Premier Wen Jiabao will attend official events.

Liu Jian said the visit will prove to be a milestone and further consolidate Pak-Sino relations.

He said China respects Pakistan's sovereignty and territorial integrity and its system of governance based on national traditions. All of Pakistani leadership is welcomed to visit his country any time, he added. He said President Zardari has better understanding of China as he shared experiences during his earlier six visits to China. The ambassador said Pakistan made great endeavours and offered sacrifices in the fight against terror and China respects its continuing efforts to implement strategy against militancy.

Referring to the cooperation in energy sector, he said there are 120 ongoing bilateral projects which will bring tangible benefits to the people of Pakistan.

The ambassador said besides meeting top leadership of Pakistan, Wen Jiabao will interact with common people who contributed in strengthening bonds between the two neighbours.

The talks will also focus on enhancing people to people contacts and increasing the number of scholarships.

Six China provinces to have Russia-sized GDP by 2020 -- APP

Six China provinces to have Russia-sized GDP by 2020

BEIJING (updated on: 2010-12-14 11:50:06 PST):

The economies of six provinces in China will be as big as those of Russia or Canada by 2020, a study has shown, highlighting the challenges faced by Beijing as it tries to cool the red-hot economy.

Describing its forecast as conservative, British banking giant HSBC said China would resemble a "collection of second-tier developed world and leading developing countries" by the end of the next decade.

"Sizzling growth should continue for at least another five years," analyst Zhang Zhiming said in a report titled "Inside the Growth Engine" and published this month.

Zhang forecast six provinces would have annual gross domestic product worth more than one trillion dollars by 2020 -- roughly equal to the economies of Russia,

Canada, Australia, and South Korea.

The fast-growing provinces were the southern manufacturing hub of Guangdong, Hebei in the north, Shandong, Jiangsu and Zhejiang in the east and Henan in the centre.

The World Bank expects China's entire economy to grow 10 percent this year before slowing to 8.7 percent in 2011 -- well above the government's oft-stated full-year target of eight percent.

But provincial growth rates could be much higher as local officials seeking to improve their career prospects try to impress their bosses, Zhang said.

"Local governments have managed to beat Beijing's growth targets by a few percentage points every year since 1980," Zhang said.

China will be requested to revive refinery project -- Business Recorder

China will be requested to revive refinery project

ZAFAR BHUTTA

ISLAMABAD (December 15, 2010) : Pakistan will request Chinese Prime Minister Wen Jiabao to revive Coastal Oil Refinery project at Gwadar in Balochistan which was shelved in 2009-10 due to China's declaration of the province as a no-go area for Chinese nationals, sources in the Petroleum Ministry told Business Recorder. According to official documents the reason for the Chinese government's decision to abandon projects in Balochistan is slow progress and economic recession.

The proposed project was part of China's plan to invest \$12 billion in multiple schemes in Pakistan. During former president Pervez Musharraf's visit to China in February 2006, China had expressed interest in constructing an oil refinery in Gwadar with the capacity to refine 60,000 barrels crude oil per day.

If the Pakistan government succeeds in convincing China to restart the oil refinery project the country would have two refineries as UAE state run International Petroleum Investment Company (IPIC) has also expressed interest in setting up Khalifa oil refinery in the country on which work is suspended due to the controversy with Pakistan government over the extension of the Managing Director of Pak-Arab Refinery (Parco) Rasheed Jung's tenure.

Pakistan is ready to offer incentives to lure the Chinese back to Balochistan: 20-year tax holiday and waiver of one percent Workers Profit Participation Fund (WPPF) to set up Coastal Refinery is also part of the incentives. The Chinese companies will be urged to participate in oil and gas exploration activities either separately or in a joint venture with Oil and Gas Development Company Limited (OGDCL).

Pakistan and China are expected to sign a Memorandum of Understanding (MoU) on energy co-operation during Prime Minister Jiabao's visit scheduled for 17-19 December 2010. Pakistan and China had also considered a feasibility study for an oil pipeline from Gwadar port to western China to link it to the Persian Gulf. This proposal was shelved after China's withdrawal from the coastal oil refinery project. "Now the proposal for oil pipeline will also be discussed," sources added.

Pak links up with China's Kashgar ahead of Premier Jiabao's visit -- ANI

Pak links up with China's Kashgar ahead of Premier Jiabao's visit

2010-12-15 12:40:00

Mustaqbal PakistanAds by GoogleA new political party to move Pakistan into a new era www.mustaqbal.pk

Pakistan and China have inaugurated the first air cargo service linking Islamabad with Kashgar in China's northwest Xinjiang province, just three days before the visit of Chinese Premier Wen Jiabao to the Pakistan capital.

A Pakistan charter airline, Rayyan Air, operated the first 90-minute flight, the Asia Times web site has revealed.

The Islamabad-Kashgar air cargo route was opened last week.

Chinese Premier Wen Jiabao is due to visit Pakistan for a strategic dialogue from December 17.

Beijing has also agreed this month to extend cooperation in 36 development projects worth 13.2 billion dollars to boost economic activity in flood-hit areas of Pakistan.

Kashgar, located near the borders of Pakistan, Uzbekistan, Kyrgyzstan,

Afghanistan and India, is well placed to become an important air logistics base.

Cargo shipped between China and Pakistan has so far mostly gone by truck across a border closed from the end of December to May each year due to the severe winter climate.

The air cargo service will make products of the two countries available the year round and make markets in Central Asian states more accessible for Pakistan.

It will also augment Beijing's efforts to develop the western regions of China, including Xinjiang, home to Muslim Uyghurs, helped by better communication with projects such as an extension of high-speed train services from the eastern part of the country.

Kashgar was recently given the status of a special economic zone and it is hoped it will become a major trade and transport hub. (ANI)

Premier Wen to launch China's top private bank branch in Pakistan -- BEIJING

Premier Wen to launch China's top private bank branch in Pakistan

BEIJING (updated on: 2010-12-15 11:00:52 PST):

Chinese Premier Wen Jiabao is going to open a branch of Industrial and Commercial Bank of China (ICBC), the top private bank of China during his visit to Pakistan starting from Friday.

The ICBC is the world's biggest bank by capitalization.

According to an article from a Chinese scholar published here in an English daily ahead of Premier Wen visit to all weather ally, by the end of this year, the trade between China and Pakistan will be worth \$7 billion, with an annual growth rate of 29 percent.

The growth rate of trade between the two countries is expected to grow by over 30 percent over the next five years and the trade volume could increase to \$18 billion.

But the level of economic cooperation does not reflect the close and lasting political and military ties between the two countries, writes Li Xiguang, a professor of Tsinghua University, Beijing.

"We are all-weather political allies. Since September 2008, Pakistani President Zardari came to China almost every four month, beating any heads of state in terms of frequency of visiting China," said Pakistan's ambassador to China, Massood Khan,

"China has a very positive image in Pakistan. We support China's policy on Tibet, Xinjiang and human rights," said Khan.

"But we also need to have an all-weather highway between our two countries," he said. Two years ago, Chinese and Pakistani engineers and road builders started extending the width of the Karakorum Highway from 10 meters to 30 meters.

Chinese engineers have completed a feasibility study for the building of a railroad and an oil pipeline to link Kashi in Xinjiang and Gawadar in Pakistan's Balochistan Province at the mouth of Gulf.

Sixty percent of China's imported oil comes from the Middle East and 80 percent of that transported to China through the Straits of Malacca.

With the construction of the Kashi-Gawadar railroad and oil pipeline, Gawadar, a warm-water and deep-sea port, will handle most of the oil tankers to China.

It will provide China with the shortest possible route to the oil-rich Middle East, replacing the dangerous maritime route through the South China Sea, East China Sea and the Yellow Sea. "Through Gawadar, oil will come to China and goods will go to West Asia and the Gulf, bringing China closer to countries such as Turkey and Iran," Khan said. "The highway will stimulate the economic growth in Pakistan. With the recovery of the legendary Silk Roads through Pakistan, Pakistan will become an economic hub once more."

"If China joins Pakistan in building its desperately-needed power stations, Pakistani people will feel the warmth and brotherhood every night when they turn on the light in their home," Khan said.

"In the streets of Pakistan, it seems that everyone knows Wen is coming," said Khan.

Gilani for Chinese help in making Gwadar Port effective -- APP

Gilani for Chinese help in making Gwadar Port effective
Thursday, December 16, 2010

By our correspondent

ISLAMABAD: Prime Minister Yousuf Raza Gilani on Wednesday hinted at expanded cooperation with China, including a plan to make the Gwadar Port fully operational with Chinese assistance.

"We will discuss with China the mechanism to make the Gwadar Port operational during the visit of the Chinese Prime Minister Wen Jiabao," said the prime minister in an interaction with editors, columnists, anchorpersons and senior correspondents here at the Prime Minister's House.

During his 40-minute interaction, the prime minister focused on the Chinese Prime Minister Wen Jiabao's visit to Pakistan and did not discuss the latest political situation.

At the outset, Information Minister Qamar Zaman Kaira made it clear that this interaction would focus on the Chinese prime minister's visit to Pakistan. "You want to say that they should not ask questions about the ministers," the PM quipped.

In response to a question regarding Wen's visit to India prior to Pakistan, the prime minister said Pakistan would welcome a Chinese role in bringing Pakistan and India to the negotiation table, as Islamabad desires friendly relations with all its neighbours. "We appreciate their improved ties with India," he said.

He said Pakistan and China enjoyed time-tested relations marked by similarity of views and support for each other in all international fora, so their relations could not be compared with any other country.

The prime minister said Pakistan had offered trilateral trade among Pakistan, China and Afghanistan to enhance regional trade. Asked about the possibility of a civil nuclear deal with China, he said there was ongoing cooperation between Pakistan and China on civil nuclear energy. He said Tuesday's meeting of the NCA had reiterated that Pakistan would not accept any discriminatory approach towards the civil nuclear programme.

PM Gilani said the government and the people of Pakistan were looking forward to the visit of Premier Wen Jiabao as it would strengthen the already existing all-weather, historic and strategic friendship between the two countries.

The Chinese premier, besides holding meetings and wide-ranging talks with the Pakistani leadership and interaction with the Pakistani businessmen and entrepreneurs, will also address the joint sitting of parliament.

Asked about details of the agreements that will be signed with China during the visit, the prime minister referred the question to Pakistan's Ambassador to China Masood Khan, who said that 13-14 MOUs would be signed between the two governments.

Prime Minister Gilani said developing and further enhancing its relationship with China was the cornerstone of Pakistan's foreign policy, as Pak-China ties — the seeds of which were sown by Shaheed Zulfikar Ali Bhutto and Chinese leaders Mao Ze Dong and Chu En Lai — were growing with cooperation in diverse fields. "History is a testimony to strong Pak-China relationship." He said the people of Pakistan would never forget the generous support and assistance of China after the 2005 earthquake and again during the recent devastating floods.

He hailed the Chinese help and assistance in the construction of the Karakoram Highway. He said Pakistan had declared the year 2011 as Pak-China Friendship Year. He said Pakistan and China would strengthen their defence, cultural, educational, energy relations.

Asked about security of Chinese nationals working in Pakistan, the prime minister said the government had ensured security for Chinese nationals working in Pakistan and the Chinese government was quite satisfied with these security arrangements.

The prime minister was of the view that there should be more cultural cooperation and more people-to-people contacts between the two countries. He said the Pak-China bilateral trade was continuously growing, as Pakistan's exports to China last year witnessed a 37 per cent surge.

He further said that with increased cooperation in diverse fields, the level of bilateral trade between Pakistan and China was expected to reach US\$15-\$18 billion in the next five years.

Pak-China sign \$ 275 million project for KKH repair

ISLAMABAD, Dec 18 (APP): National Highway Authority (NHA) and China Roads and Bridges Corporation on Saturday signed \$ 275 million agreement for repairing Karakorum Highway (KKH) damaged with Attabad accidental lake in Gilgit-Baltistan. Chairman NHA, Altaf Ahmad Chaudhry and Chairman Roads and Bridges Corporation of China, Wen Gong signed the agreement on behalf of their respective sides. Briefing the media on the bilateral agreement, the chairman NHA said that the accidental lake of Hunza Attabad has badly damaged several portions of KKH that need urgent repair. The Chinese engineers have advised to bring down the surface of the lake by at least 30 feet down to carry out repair work of the damaged portion.

He said that 15 km of the KKH will be recovered by bringing down the surface of the lake while the rest of the damaged portions will be reconstructed under an agreement between the two countries.

The reconstruction including digging of six km tunnel, six high raise bridges and 70 small bridges will take six years under the project and will cost \$ 275 million, he added.

Another milestone in Pak-China ties -- Observer

Another milestone in Pak-China ties

Dr Raja Muhammad Khan

The three days visit of Chinese Premier Mr. Wen Jiabao, has attained another milestone in the history of bi-lateral relationship of Pakistan and China. This visit is indeed of a unique significance, as it covers all aspects viz; the strategic, political and economic. During the visit, Premier Wen Jiabao made sure that he meets all stakeholders in Pakistan. Apart from the traditional meetings with the President and Prime Minister, Chinese Premier met with leaders of all political parties of Pakistan. Rather, it was a rare mosaic of Pakistani political, religious, and territorial leadership gathering to welcome their all time friend in Islamabad. This gathering was indicative of the fact that, there exists no second opinion about Pakistan's relationship with the People's Republic of China. No global leader ever has such a reception and united response and indeed a spirit of love from Pakistan ever. Premier also had a detail meeting with the Armed Forces heads under Chairman Joint Chief of Staff Committee and assured further enhancement in the ongoing cooperation in the field of defence. Premier Wen Jiabao declared that, "Beijing would never give up on Pakistan."

Following the establishment of Pak-China diplomatic relationship in May 1951, both countries has attained many milestones in their bi-lateral relationship. Pakistan, otherwise among the first few countries, which recognized this great communist state, proved its friendship by making strong lobby in getting the UN membership for China. The initial slow pace of mutual understanding got an impetus following the Sino-India war of 1962. In the era of Field Martial Muhammad Ayub, then Foreign Minister (later Prime Minister), Zulfikar Ali Bhutto formalised this relationship on the strategic direction. Through his strategic vision, he made Pak-China relationship as an essential and never changing pillar of the Foreign Policy of Pakistan. The same vision exists even today and Pakistan maintained it as an inalienable part of its diplomatic relationship.

China has always appreciated its deep-rooted friendship with Pakistan and acknowledges Pakistan's untiring efforts for getting her closer to United States in early 1970s. Indeed, through this collaboration during the peak days of the cold war, Pakistan lessened the tension, previously existed between US and the China. Following this collaboration, China got an opening and diplomatic and trade excess into the Western world, whereas, US got a Communist friend in Asia. In a way, Pakistan proved its significance and vision as a broker of international facilitator if not mediator. Thereafter, Chinese markets and goods were introduced at the global level and its economy started prospering to a level of second to US only in the contemporary world today. For the United States, this was the first moral and diplomatic pre-eminence over former Soviet Union.

During the visit of Prime Minister Wen Jiabao, Pakistan and China concluded economic deals worth \$35 billion in total. These deals include; 17 agreements, four memorandum of understanding (MoU) and a joint venture. This indeed is a new record of the economic deals and agreements in the history of traditional friends. Both Premiers attended the Pak-China Business Cooperation summit, participated by 260 Chinese delegates with their 150 Pakistani counterparts. On this occasion, Chinese Premier, reiterated his resolve to enhance the bilateral trade with Pakistan

in the coming years in a bid to improve the flow of investments between both countries." He said that, "his country would increase investment in Gwadar Port. The port currently being administered by Port of Singapore Authority (PSA) was constructed by China in 2006. Chinese Premier promised that his country would remove the trade barrier between Pakistan and China by improving trade infrastructure and promoting Pakistani exports to his country.

Earlier Prime Minister Yousaf Raza Gillani, appreciated Chinese investment in Pakistan, especially in the energy sector of Pakistan. Prime Minister Gillani said that, "We would encourage Chinese companies to consider investments in the energy sector, which assures certain returns. Our energy requirements are expected to increase from 20,000MWs to more than 160,000MWs by the year 2030." In fact Pakistan is not a resource deficient country, but problem lies with the technical expertise, infrastructure development and finances. Today, apart from huge amount of unexplored oil and gas, "Pakistan has 185 billion tonnes of coal reserves, which would be converted into energy to satisfy Pakistan's growing demand." Besides, Pakistan welcome, Chinese experts for the exploration of its oil and gas resources. Prime Minister assured Chinese investors for special economic incentives like; "duty-free import of plant and machinery, exemption from sales tax and income tax." Pakistan and China are already working for the development of the Pak-China Trade Corridor along the Karakoram Highway (KKH). In this regard, the highway is being upgraded and laying of a railway track along the KKH is in progress. Upon development of this overland route, there would be further boost to the economic relationship. Pakistan is otherwise becoming a hub for the oil and gas from Central Asia and Middle East. With the improvement of communication infrastructure, oil and gas from these regions can easily be transported to the Chinese territories either through oil tankers or through an overland gas pipeline. Premier Gillani assured his counterpart for the safety of Chinese nationals working in Pakistan. He said, "Besides a comprehensive Free Trade Agreement and the Joint Five Year Economic Programme, we are now jointly endeavouring to establish closer financial and banking sector cooperation."

Chinese Premier also addressed the Joint Session of the Pakistani Parliament, indeed, a unique honour for a dignitary as well as the host itself. He assured Pakistan that, China supports Pakistani point of view/ stand on Kashmir issue. Kashmiri must get their right of self-determination as per UN resolutions. China indeed, rejects all Indian assertions of betraying Pak-China relationship and regional domination by India. China does not support Indian case for a permanent membership of UNSC. China also assured Pakistan for its full supports on Pakistani position on the Afghan issue. The visit truly proved that Pak-China relationship is higher than mountains and deeper than oceans.

—The writer is an International Relations Analyst.

China, Pakistan relations moved beyond bilateral dimension -- APP

China, Pakistan relations moved beyond bilateral dimension
BEIJING, Dec 20 (APP): Pakistan's Ambassador to China Masood Khan has said that the just concluded 3-day official visit of Chinese Premier Wen Jiabao to Pakistan has further reinforced our strategic cooperative partnership adding that Chinese Premier termed wisely that "China, Pakistan relations have moved beyond bilateral dimensions". Talking from Islamabad on CCTV News, "Dialogue," a flagship programme on current affairs beamed in major cities throughout the world, Ambassador Khan said that these relations have now required broader regional and international ramifications.

Regarding historic reception the Chinese leader received in Pakistan, Ambassador Khan said that "Premier Wen Jiabao is a popular figure here and China is a love country for the people of Pakistan" adding that it was the reason the people greeted Chinese premier with core of their hearts. Ambassador Khan also informed that it was an important occasion in the history of the two countries when Premier Wen addressed the joint session of the Pakistani

parliament.

He said that Premier Wen along with Pakistani Prime Minister Syed Yusuf Raza Gilani on Saturday inaugurated the Pakistan, China Culture Centre which will help bring the people of the two countries more closer and to know in better way the rich culture the both countries enjoy.

During presence of Premier Wen here the "economic ties between the countries have been expanded dramatically", he observed.

In this regard, he said that preparations were made well for Pakistan, China Business Cooperation Summit in which number of agreements and Memorandum of Understanding were concluded.

With the visit, he said the strategic partnership, economic cooperation, culture and people to people ties have moved Pakistan, China friendship to higher platform.

The Ambassador to a question termed the Chinese assistance for Pakistan for flood relief and reconstruction as it was generous, it was Timely, it was unconditional and it was recognized by the Pakistan leadership.

During this visit, Ambassador informed that Premier Wen Jiabao also announced an additional amount of about US\$ 400 million which will be in form of concessional credits.

But, he pointed out that Premier Wen in the United Nations also announced 200 Million dollars for the upgradation of infrastructure damaged due to massive floods.

Wen remarks turned a new page in Pak-China friendship : Yang APP

--

Wen remarks turned a new page in Pak-China friendship : Yang
BEIJING, Dec 20 (APP) Chinese Foreign Minister Yang Jiechi said here on Monday that Premier Wen Jiabao's visit to Pakistan was of great significance in advancing the all-weather strategic partnership of cooperation between China and Pakistan. Yang said that Premier Wen's remarks on the China-Pakistan friendship and the cooperation initiatives he proposed during his visit have turned a new page in the China-Pakistan friendship and cooperation. Yang, who accompanied Wen on his visits to India and Pakistan from December 15-19, told reporters that during his stay in Pakistan, Premier Wen met with President Asif Ali Zardari, Prime Minister Syed Yusuf Raza Gilani, as well as leaders of the parliament and the main political parties, and top military leaders.

Echoing Wen's remarks on the China-Pakistan ties, the Pakistani side stressed that pursuing friendship with China was the bedrock of Pakistan's foreign policy and national consensus, and that Pakistan was ready to work together with China to make their friendship last from generation to generation.

Leaders of the two countries had an in-depth exchange of views on further strengthening and deepening the China-Pakistan strategic partnership of cooperation as well as on major international and regional issues, and they reached broad consensus, Yang said.

A consolidated and deepened all-weather strategic partnership of cooperation between China and Pakistan would serve the common interests of the two countries and peoples, and contribute to peace, stability and development in the region and the world, Wen said.

The Chinese Premier urged the two sides to seize the opportunity of the 60th anniversary of the establishment of diplomatic relations next year to promote traditional friendship, deepen practical cooperation, and make the partnership more extensive and productive.

Wen also reaffirmed China's support to Pakistan in its efforts to safeguard national sovereignty and social stability, and to achieve economic independence and sustainable development.

The two sides signed a joint statement, deciding to establish an annual meeting mechanism between leaders, and a foreign ministers' dialogue mechanism, according to Yang.

They also signed a number of documents on bilateral cooperation in economy, energy, finance, culture and other areas.

In July, Pakistan was hit by heavy floods, and now the country is at a critical period of reconstruction.

During his visit, Premier Wen announced a package of aid plans for post-flood reconstruction in Pakistan, saying China would continue to help Pakistan in the post-flood phase and provide resources and technical support for disaster prevention and forecasting technology.

On economic and trade cooperation, Wen stressed the two countries should expand the scale of bilateral trade, promote exchanges between the enterprises of the two sides and raise the level of China-Pakistan economic and trade cooperation.

The two sides also identified infrastructure, energy and agriculture as priority areas of bilateral cooperation.

On the cultural sphere, Wen and his Pakistani counterpart Gilani jointly announced 2011 as the Year of China-Pakistan Friendship.

The two nations will sponsor a series of celebration activities and events to further broaden people-to-people exchanges, and thus promote mutual understanding and friendship.

He pointed out that Wen's visits to India and Pakistan were a major diplomatic move of China bearing a far-reaching strategic significance.

He termed the visit to two South Asian countries as fruitful and successful with rich achievements.

Both India and Pakistan are important countries in South Asia, Yang said, adding the development of China's relations with the two countries would have an important influence on peace and prosperity not only in South Asia, but also in Asia and the world at large.

To develop friendship and good relations with India and Pakistan and promote mutual trust and cooperation is the common aspiration of China and its neighbours, Yang said.

Oman accepts Pak proposal for maritime trade, Gwadar-Muscat ferry -- Pakistan Times

Oman accepts Pak proposal for maritime trade, Gwadar-Muscat ferry
'Pakistan Times' Business & Commerce Desk

MUSCAT (Oman): Oman on Tuesday expressed willingness over Pakistan's proposal to initiate ferry service and maritime trade as it would go a long way in generating economic activity and contributing to the progress and prosperity of the two countries.

Minister for Ports and Shipping Babar Ghouri says that Oman also agreed on closer collaboration between the ports of Pakistan and Oman and said it would open new avenues of trade and business besides generating economic activity in the region.

The Minister said the cooperation between the port of Gwadar and Oman's upcoming ports in Sahhar and Dukkum would create new opportunities for the traders and skilled professionals of two countries to explore the trading potential.

The Minister said Pakistan would provide every facility to Oman's private sector to run a ferry service between Gwadar and Muscat. He said Pakistan's skilled workforce had a great demand in Oman, as around 175,000 Pakistanis were already contributing towards Oman's economy.

He said the skilled Pakistani manpower was acting as a bridge not only in cementing the trade ties between the two countries but also bringing equal dividends to the two economies.

Minister of State for Ports and Shipping Nabil Gabol said that the two countries had historical and bilateral relations with decades old economic ties. He described talks between the two countries as very positive and said both identified new opportunities.

Speech by Ambassador Liu Jian at the 2011 "China-Pakistan Friendship Year" and New Year Reception -- APP

Speech by Ambassador Liu Jian at the 2011 "China-Pakistan Friendship Year" and New Year Reception

2011/01/03

Your Excellency Foreign Minister Makhdoom Shah Mahmood Qureshi,

Ladies and gentlemen,

Good evening!

First of all, I would like to thank H.E. Asif Ali Zardari, President of Pakistan and H. E. Syed Yusuf Raza Gilani, Prime Minister of Pakistan, for their encouraging and inspiring congratulatory letters on the occasion of commencement of the "China-Pakistan Friendship Year". I would also like to thank all of you for being with us tonight. Today is of special significance. It is the first day of the year 2011. It is also the first day of the "China-Pakistan Friendship Year" where we will jointly celebrate the 60th anniversary of the establishment of diplomatic relations between our two countries. On this fantastic occasion, I am more than pleased to launch the "China-Pakistan Friendship Year" and greet the year 2011 together with all of you at the newly inaugurated Pakistan-China Friendship Center which symbolizes our all-weather friendship in the new era.

The year 2010 just passed witnessed a continued stable and vigorous growth of the China-Pakistan strategic partnership of cooperation. Recently, as the screen showed, Chinese premier Wen Jiabao paid a successful and historic official visit to Pakistan. The premier made broad contact with Pakistan leadership as well as people from all circles. The two sides reached broad consensus on further consolidating and deepening the China-Pakistan all-weather strategic cooperative partnership. We signed the China-Pakistan Joint Statement and announced the establishment of the leaders' annual meeting mechanism and the foreign ministers' dialogue mechanism. The two governments signed over 10 cooperation documents covering economy, technology, energy, finance, culture and other fields. Premier Wen Jiabao announced a package of plans for China's involvement in Pakistan's reconstruction efforts and China's new assistance initiatives. The business of our two countries signed 20 commercial contracts valued at more than \$10 billion showcasing the huge potential for bilateral economic and trade cooperation. Chinese premier Wen Jiabao's productive and successful visit is of great significance to further consolidating and deepening the traditional friendship and pragmatic cooperation between our two countries.

I would like to point out that the Pakistan government and people welcomed Premier Wen Jiabao with great warmth and enthusiasm. The extensive involvement of the Pakistan people from all walks of life is a vivid depiction of the brotherly friendship that they have towards the Chinese people. It impressed the Premier's entourage and all the Chinese. I would like to take this opportunity to express our sincere gratitude to the people of our two countries who have been engaged, either directly or indirectly, in the preparation and reception work of this historic visit. I would also like to extend our highly appreciation to all the friends who have always been dedicated to the China-Pakistan friendship.

Ladies and gentlemen,

Over the past 60 years since we established diplomatic relations, our two countries have developed an all-weather friendship and conducted multi-dimensional cooperation. In the face of a volatile international situation, the China-Pakistan

friendship remains as strong and solid as a rock standing firm despite the passage of time. This is only because we always respect each other, highly trust each other, and wholeheartedly help each other. The two peoples, sharing weal and woe, have made passage together in hard times and written a number of touching chapters in our history. In 2008, when a massive earthquake struck China's Wenchuan, Pakistan gave all its tents in reserve and provided swift emergency assistance to us. The Chinese people will never forget it. Last year, when Pakistan was hit by the catastrophic floods, the Chinese government and people felt as much pain as our Pakistan brothers did and offered timely, sincere, unconditional help to Pakistan in an unprecedented manner. As Chinese Premier Wen Jiabao elaborated in his speech at the Pakistan parliament during his recent visit, the China-Pakistan friendship has been deeply rooted in the hearts of the two peoples. It is in our blood, and has become our noble and firm conviction. A close neighbor means more than a distant relative. China and Pakistan will always be good neighbors, close friends, trusted partners and dear brothers.

Ladies and gentlemen,

This year marks the 60th anniversary of the establishment of diplomatic relations between China and Pakistan. During his recent visit, Premier Wen Jiabao and Prime Minister Gilani jointly announced the year 2011 as the "China-Pakistan Friendship Year". To celebrate this historic occasion, the two sides, based on the consensus reached between the two leaders, will hold a series of wonderful commemorative activities covering fields like politics, economy, culture, education, sports, military and others. We all believe that such activities will definitely further promote mutual understanding and brotherly friendship between the two peoples and bring our strategic partnership of cooperation into a new high. I sincerely hope that all the friends present tonight will continue to care about and support the China-Pakistan friendship, actively participate in activities celebrating the "China-Pakistan Friendship Year" and make fresh contributions to our traditional friendship and pragmatic cooperation.

I wish you all a very happy and prosperous new year! And I wish the event of the "China-Pakistan Friendship Year" a complete success.

Thank you!

Year long celebrations of Pak-China friendship starts -- APP

Year long celebrations of Pak-China friendship starts

ISLAMABAD, Jan 2 (APP): Year long celebrations on the occasion of 60 years of diplomatic relations between Pakistan and China commenced here last night with a function held at Pak-China Friendship Centre at a colourful ceremony attended by a large number of Pakistanis and Chinese nationals. Foreign Minister Shah Mahmood Qureshi was the chief guest on the occasion while the launching ceremony of Pakistan-China Friendship year 2011 was attended by Chief of Naval Staff Noman Bashir, diplomats, members of the federal cabinet, politicians, business community representatives, Chinese working in Pakistan and elite of the federal capital.

The ceremony was jointly hosted by Ministry of Foreign Affairs and Chinese Embassy at Pakistan-China Friendship Centre which has built by China and donated to Pakistan as symbol of everlasting friendship.

The diplomatic relations between Pakistan and China established in January 1950 when Pakistan recognized China while Pakistan opened its embassy on May 21, 1951.

Inaugurating the year long celebrations, Foreign Minister Shah Mahmood Qureshi said Pakistan and China enjoy excellent political and diplomatic relations and time has come to take a leap forward to bind the two nations together economically in all the fields.

The Foreign Minister said there was tremendous goodwill and trust between the two countries and they can move towards economic integration.

He said the present government is concentrating on economic diplomacy as national security and territorial integrity are closely linked to economic strength.

Qureshi pointed out that despite some of the economic difficulties because of security situation and fight against extremism and terrorism, Pakistan is recognized internationally as emerging economy with great potential to grow and prosper.

The Foreign Minister said Pakistan and China are cooperating with each other in a number of fields including economy, trade, energy, infrastructure and defence.

"The two countries have unanimity of views on regional and international issues, they support each other at international fora and their defence cooperation is progressing satisfactorily," he said.

He pointed out that the process of economic integration between the two countries was somewhat limited but there is scope and potential to enhance it manifold.

He acknowledged that China has invested billions of dollars in many projects in Pakistan.

The minister said there are thirteen thousand Chinese engineers and workers in Pakistan contributing to the socio-economic development of the country.

He said the two countries have signed a number of agreements including the one relating to currency swap that will help broaden the economic interaction and achieve target of fifteen billion dollars bilateral trade by 2015.

Qureshi also expressed the confidence that the decision to open branches of the largest Chinese bank in Karachi and Islamabad would facilitate Chinese investment in Pakistan.

Chinese Ambassador to Pakistan Liu Jian speaking on the occasion expressed the confidence that strategic relationship between the two countries would continue to grow.

He said the Chinese Premier paid a very successful visit to Pakistan recently which would help forge ties between the two countries.

The Chinese ambassador said the Pakistani government and people welcomed Premier Wen Jiabao with great warmth and enthusiasm.

He said in the last 60 years, since the establishment of diplomatic relations, the two countries have developed an all weather friendship and conducted multi-dimensional cooperation in different fields.

The Chinese ambassador said despite volatile international situation, the China-Pakistan friendship remained as strong and solid as a rock standing firm despite the passage of time.

"This is only because we always respect each other, highly trust each other, and wholeheartedly help each other," he said.

He said while celebrating the 2011 as year of friendship, both the countries will hold a series of wonderful commemorative activities covering fields like politics, economy, culture, education, sports, military and others.

On this occasion, a photographic exhibition was also organized depicting different aspects of bilateral relations including high level exchanges, people-to-people contacts, sharing of hard times and participation of China in the economic development of Pakistan.

In his inaugural remarks, Foreign Secretary Salman Bashir said this year also marks establishment of diplomatic representation between the two capitals as Pakistan recognized China in January 1950.

He also read out on the occasion messages addressed by President Asif Ali Zardari and Prime Minister Syed Yusaf Raza Gilani to their Chinese counterparts on launching of the friendship year.

In their messages the two leaders expressed determination to take this friendship and partnership to new heights.

Salman Bashir, who had been Pakistan's ambassador to China said, "I and my family will never forget the kindness, love and affection that we received from our Chinese friends during my stay there."

He said Pakistan-China friendship is legendary a fascinating romance between two peoples, deeply rooted in national ethos, since times immemorial.

Salman Bashir said, the leadership, the Government, the Armed Forces and, above all, the people of Pakistan and China are united in their resolve to safeguard their national interests, uphold national dignity and frustrate and defeat any evil designs against their motherland.

He said, "Our two peoples will continue to march, hand-in-hand, on the high road to peace and prosperity."

Later a cultural show, depicting folk songs of different areas of Pakistan were presented on this occasion to start the year long celebrations. Chinese cultural dance was also presented by the Chinese dancers.

KARACHI: Dr Mirza Ikhtiar Baig, Hon Consul General of Yemen in Sindh and Adviser to Prime Minister on Textile, attended the 6th Session of Pak-Yemen Joint Ministerial Commission meeting in Sana'a on Dec 28-29, 2010. -- APP

KARACHI: Dr Mirza Ikhtiar Baig, Hon Consul General of Yemen in Sindh and Adviser to Prime Minister on Textile, attended the 6th Session of Pak-Yemen Joint Ministerial Commission meeting in Sana'a on Dec 28-29, 2010.

The Pakistan delegation was represented by Mir Hazar Khan Bijarani, Minister for Industries and Production, Dr Ikhtiar Baig and Sohail Rehan, Joint Secretary Economic Affairs Division, says a press release.

Both sides agreed to increase the present level of trade of \$170 million, particularly in the field of pharmaceutical, oil, gas, rice, foodstuff, electric fans and footwear.

The private sector of Pakistan has proposed an investment of about \$100 million in LPG Extraction Gas project in Yemen to export LPG to Pakistan. A four member technical committee has been constituted, headed by Dr Mirza Ikhtiar Baig and representative from Ministry of Oil and Minerals, Yemen. Both sides agreed to establish the Pak-Yemen Investment Company for the promotion of investment.

The Yemeni Minister of Industry and Trade, Yahya Y Al-Mutawakel, and Pakistani counter part Mir Hazar Khan Bijarani have agreed to negotiate a Free Trade Agreement (FTA) between the two countries.

Dr Ikhtiar Baig also took up the matter of holding the meeting of Pak-Yemen Joint Business Council of Federation of Chambers, established in 2006 as per an agreement signed by Dr Baig and his Yemeni counterpart. It was also decided to promote cooperation in the field of healthcare, agriculture, fisheries, education, technical training, industrial and infrastructure.

During the visit, the delegation had meetings with Prime Minister of Yemen Dr Ali Mohammad Mujawar, Foreign Minister Dr Abu Bakr Abdullah Al-Qirbi, Deputy Minister of Oil Eng Abdulmalik M Alama.

The foreign minister of Yemen appreciated the efforts of Dr Mirza Ikhtiar Baig for promotion of bilateral trade and investment between the two countries.

The Ambassador of Pakistan Dr Syed Khawaja Alqama hosted a dinner reception in honour of the visiting Pakistani delegation, attended by Minister of Education, Minister of Industries & Trade and leading businessmen, Tarek A Hayel Saeed, United Insurance, Ahmed H Shumailah, Chairman Shumailah Group, Monnwar Al-Fakhri, Al Fakhri Oil Services, Omar M Omar, MD Universal Group.

Dr Ikhtiar Baig invited Yemeni businessmen to attend the Expo Pakistan to be held in Karachi in February 2011. The next Pak-Yemen JMC will be held next year in Islamabad.

Quetta, Jan 3(ANI): Afghan transit trade through Gwadar port can boost economic activities in Balochistan, Chief Minister Nawab Aslam Raisani has said. -- APP

Quetta, Jan 3(ANI): Afghan transit trade through Gwadar port can boost economic activities in Balochistan, Chief Minister Nawab Aslam Raisani has said.

Buzz up! Talking to reporters, Raisani said the transit trade was imperative for sustainable development of the port.

He said he had suggested to British officials that fuel to NATO troops battling the Taliban in Afghanistan should be supplied through Gwadar port because doing so

would be economical.

Raisani also said the Balochistan Government was ready to provide security to NATO vehicles travelling through Gwadar, however, adding that the roads had been adversely affected by heavy NATO containers and oil tankers passing through Balochistan.

"The US and NATO have to only invest 1.5 billion dollars for construction of roads, and then they can easily supply fuel to their troops in Afghanistan from Gwadar," the Dawn quoted the CM, as saying.

All Day

Raisani seeks NATO fuel transportation via Gwadar -- Daily Times

Raisani seeks NATO fuel transportation via Gwadar

QUETTA: Balochistan Chief Minister Muhammad Aslam Raisani said that he had asked the relevant authorities to supply fuel to NATO forces in Afghanistan through the Gwadar Port. He said the provincial government was ready to provide security to NATO supplies if they were transported through the Gwadar port.

Talking to media persons on Sunday, Raisani said that the NATO forces would have to invest \$1.5 billion for construction of roads structure for easy transportation of oil to Afghanistan through the Gwadar port. He observed that the highways were badly damaged by heavy NATO containers and oil tankers passing through Balochistan. He also said the Afghan Transit Trade through Gwadar Sea Port could promote trade and business in Balochistan besides opening new opportunities for employment. The Afghan Transit Trade through Gwadar Port was the need of hour for development of the port, he added. app

China's 'all-weather friendship' with Pakistan: Implications for India --**IDSA COMMENT**

IDSA COMMENT

China's 'all-weather friendship' with Pakistan: Implications for India

R N Das

January 4, 2011

China's balancing act in its diplomatic posturing in the sub-continent was evident when Premier Wen Jiabao flew to Pakistan for a three-day visit after concluding his three-day India visit in December 2010. While there are discernable changes in China's foreign policy, friendship with Pakistan has remained a constant. The only other exception is with respect to Beijing's relationship with Pyongyang. So deep is the all-weather friendship between China and Pakistan that the visit of Premier Wen to India and Pakistan was declared almost simultaneously in Beijing, in deference to Pakistan's sensitivities. It was Wen's second visit to both countries in the last five years, though there was a difference this time around. During his previous visit in 2005, New Delhi was Wen's last port of call out of the four nations that he visited, while this time New Delhi preceded Islamabad. This simply cannot be a mere coincidence, but planned and consciously scheduled.

In view of the importance of Premier Wen's visit to Pakistan, it is imperative to analyse its achievements and significance. The high point of the visit was the honour extended to the Chinese Premier to address Pakistan's Parliament, an honour that India had offered to President Barack Obama during the latter's visit to India in November. In a country where the military wields considerable clout, the Pakistani offer was more of a symbolic gesture than a substantive one. In his address entitled 'Shaping the future together through thick and thin,' Premier Wen used the phrase "brothers forever" to describe the relationship between the two countries. He went on to note that "China-Pakistan friendship is full of vigour and vitality, like a lush tree, with deep roots and thick foliage." And he added that "China-Pakistan relationship is strong and solid, like a rock standing firm despite the pressure of time."¹ Besides reinforcing the strategic commitment to Pakistan, a number of important announcements were made during this address. Premier Wen also recalled Pakistan's consistent and full support to China in the past at some crucial junctures on various issues, including Taiwan, Tibet and Xinjiang.

It is worthwhile to recall in this context India's role and contributions at a very critical time when China was seeking admission to the United Nations. When the Korean War broke out in 1950, India voted in favour of the United Nations action against the North, but when China entered the Korean war India resisted the condemnation of China as an aggressor by the General Assembly of the United Nations in order not to enlarge the area of hostility. In its efforts to bring about a settlement, India served as a channel of communication of Chinese intentions and requirements to the outside world, and consistently pressed for the recognition of the People's Republic of China as the rightful representative in the United Nations. Further, in September 1951, India declined to attend the Conference at San Francisco for the conclusion of a peace treaty with Japan because, among other reasons, China was not a party to it.² Beijing should not forget these Indian efforts.

If the achievements of Premier Wen's visit to India were more pronounced in terms of economic content, his visit to Pakistan was more characterised by political and strategic significance. Although China has been helping Pakistan in all fields, particularly in its defence modernization and development including the nuclear programme, its recent help in mitigating the flurry of floods in Pakistan was unprecedented in its volume and magnitude, and suggests the depth of the strategic relationship between the two countries. China had offered about \$ 250 million worth of aid to Pakistan. As part of the aid, China sent a team of experts to the PoK region in November last year, as claimed by China, to help Pakistan expedite its reconstruction work. An article in China Daily claimed that the aid to Pakistan has created many records in the history of China's aid and relief work in other countries.³ The Chinese claim of humanitarian assistance to Pakistan has, however, been taken with a pinch of salt by the western media.⁴

One more important announcement came when Premier Wen declared that China had decided to provide 500 government scholarships to Pakistan in the next three years, and that 100 Pakistani high-school students will be invited to participate in the Chinese Bridge Summer-Camp in China. Wen also said that China may explore the possibility of a currency-swap agreement with Pakistan. During his visit the two sides also signed 35 new pacts, expected to bring \$30 billion of investment into Pakistan over the next five years.

China's adversarial relationship with India has been one of the important factors in its all-weather friendship with Pakistan. Such an intimate relationship between the two had developed at a time when China's global profile had not developed to the extent that is discernable now. Over the years, Sino-Indian relationship has also matured to a greater degree of engagement. China is now projecting itself as a responsible global power, beyond the sub-continent and the region. One can fathom China's primordial commitment to Pakistan and China's imperative need for Pakistan's support to rein in Muslim separatists operating in China-Pakistan border in the Uygur region, but China needs to calibrate its relationship with Pakistan in the context of these changes and in such a manner so as not to arouse any misgivings in New Delhi. Although India has expressed concerns about China's engagement in infrastructural projects in PoK and about Beijing's support for Pakistan's nuclear weapons programme, the Sino-Indian relationship has acquired an independent dynamism and is not hamstrung by the all-weather friendship between China and Pakistan. Neither should Beijing have any anxiety about India's strategic relationship with the United States with which China itself has a deeper all-round engagement and cooperation. An important issue which needs to be noted is that while the Pakistani foreign minister was quoted as saying that China's position is 'clear about Kashmir', the Chinese Premier seems to have maintained a studied silence on the Kashmir issue. This prompted an editorial in an important English daily which commented that "Prime Minister Yusuf Raza Gilani may have been fishing for a Chinese role in facilitating dialogue with India on Kashmir but it is apparent that Beijing is keen to reiterate its neutrality on the issue." If the lofty goals of the Asian century are to be realized in full measure, the giants - China and India - need to correct the trust deficit between them and forge better understanding and cooperation.

Stable Balochistan army's dream: Kayani -- Daily Times

Stable Balochistan army's dream: Kayani

Staff Report

SUI: Chief of Army Staff General Ashfaq Kayani on Monday said strong, stable and thriving Balochistan remained an utmost dream of the army as it could help make Pakistan prosperous.

He inaugurated a military college in Sui and also announced establishment of an education city. Separately, Balochistan Governor Nawab Zulfiqar Ali Magsi and Chief Minister Nawab Aslam Raisani inaugurated the academic block and hostel of Balochistan Public School. A large number of parliamentarians, Baloch tribal elders, military officials and locals were present on the occasion. The governor and chief minister appreciated the efforts of the army in bringing education and social development to remote areas of the province.

In his address, COAS spoke about various projects initiated by the Pakistan Army with the support of locals and the provincial government. He said 22,786 Baloch students were studying in educational institutions, which were being run by the army and Frontier Corps.

In addition, 4,268 Baloch students were benefiting from Chamlang Beneficiary Education Programme, whereas, 662 Baloch students were studying in reputed institutions of other provinces.

To enhance technical skills of Baloch youth for better job opportunities, Balochistan Institute of Technical Education (BITE), which is managed by the Pakistan Army,

has so far trained 1,673 individuals.

In this regard, Gwadar Institute of Technical Education will also start functioning soon. The army chief hoped that establishment of the education city would open new avenues of development and prosperity in remote areas of Balochistan.

Pipeline and regional stability -- Pak Tribune

Pipeline and regional stability

Wednesday January 05, 2011 (1718 PST)

The long-awaited gas pipeline agreement TAPI was signed in December 2010 by the heads of Turkmenistan, Pakistan and Afghanistan and the Indian PNG Minister, Murli Deora, in Ashgabat. This marks a new era of pipeline diplomacy between the energy-rich Central and the energy-deficient South Asia for resources.

The Turkmenistan-Afghanistan-Pakistan-India (TAPI) is a natural gas pipeline being developed by the Asian Development Bank (ADB) at an estimated cost of \$7.6 billion. It will transport Caspian Sea natural gas from Turkmenistan through Afghanistan into Pakistan and then India. The gas supply is expected to start by the end of 2014 or early 2015, as stipulated in the agreement. The 1,680-kilometre pipeline will run from the Dauletabad gas field, in Turkmenistan, to supply 33 billion cubic meters gas to Afghanistan, and then through Quetta and Multan in Pakistan. The final destination of the pipeline will be the Indian town of Fazilka, near the border between Pakistan and India. Under the agreement, both the countries will get 42 percent of the supply quota, while the remaining would be given to Afghanistan.

By and large, TAPI is expected to boost the economies of all the four participating countries and would promote cooperation among these states. Further, it is a vital project for the development and progress of the region, and serve the cause of maintaining peace in South and Central Asia. Thus, the four countries need to take concrete steps to make it a reality, specifically because of their economic interests. It would provide revenue and diversification of export routes for Turkmenistan. For Pakistan and India, it would address energy deficits, while the potential for export to other countries through the Pakistan's Gwadar Port is an added advantage. In Afghanistan, it would provide revenue for development and gas for industrial enterprises. At the same time, the deal is consistent with the US declared policy of linking Central and South Asia and diversifying export routes for the Turkmen gas.

Another significance of the project is that a large number of human resources would be recruited for the construction of the pipeline, and thereafter on monitoring, storage, and other related assignments. According to estimates, more than 12,000 jobs will be created for the Afghan people, only during its construction. In the long run, it would provide direct and indirect employment opportunities to the people of all the four countries, thus substantially reducing unemployment in these countries. Apart from this positive aspect, especially for the countries like Pakistan and Afghanistan, the project would bring a huge amount of the transit fee, as the pipeline covers long stretches through the Pak-Afghan territories – only Kabul could reap \$1.4 billion a year.

The project is, indeed, the first formal effort for linking the energy rich Central Asia with the energy deficient South Asia. Moreover, it would provide an outlet to the land-locked Central Asian Republics (CARs) through a shortest possible route for the rest of the world.

Besides, a lot of hope for the economic prosperity TAPI is expected to bring in, there are fears linked with its completion. The gas pipeline will pass through some Taliban-dominated areas in Afghanistan. TAPI member countries, and the ADB, have shown concern over the security of the pipeline in these areas, and also some areas of Pakistan that are frequently hit by the terrorists. Since Afghanistan and Pakistan are facing the menace of terrorism, construction cannot begin unless concrete measures are adopted to put an end to the unrest, which mainly requires a political solution rather than military one.

As decided, TAPI's construction will start by 2012, while all the member states hope to complete by the end of 2014. But many believe it is not possible because of the security concerns in Afghanistan, and Pakistan's FATA and Balochistan. However, since the demand for energy in both India and Pakistan is increasing, they have no option except to complete it.

Pakistan's gas requirement is increasing annually by 10 percent; therefore, TAPI is considered vital for fulfilling its growing energy requirement. In addition, it has welcomed India's participation in the project. Pakistan will receive up to \$700 million royalty a year, as a transiting state supplying gas to India.

For Afghanistan too TAPI is very important and it will be the biggest project in the country. That is why the Karzai government has shown its resolve to deploy five to seven thousand security forces to safeguard its route. Kabul seems to have the political will and a powerful economic incentive to keep the Taliban away from TAPI. In this regard, the ongoing efforts of President Hamid Karzai for the reconciliation and reintegration of the Taliban needs further momentum.

Prior to TAPI, the Iran-Pakistan-India (IPI) gas pipeline agreement was signed, despite USA's opposition. Islamabad is still not ready to abandon IPI because of its severe energy crisis, which is a legitimate reason to undertake multiple energy projects. India too has not shelved IPI, but it is concerned about the security in Pakistan.

Anyway, both Pakistan and India are energy-deficient countries; they need to do what is in their best interest. So, the economic dependence of Turkmenistan, Afghanistan, Pakistan and India on each other for energy resources is likely to improve bilateral ties among them, which will ultimately add to regional stability.

China's western push strengthens Pakistan links -- ((Important Article))

China's western push strengthens Pakistan links
Ananth Krishnan

China and Pakistan are expected to discuss long-pending plans to accelerate construction of rail-lines and a pipeline from Kashgar in China's west to the port of Gwadar on the Persian Gulf, during Premier Wen Jiabao's three-day visit to Islamabad which began on Friday.

The Silk Road oasis town of Kashgar, which lies a few hours away from the Pakistan border along the Karakoram Highway, is at the centre of China's plans to develop its restive Muslim-majority Xinjiang region, which neighbours Pakistan. China has recently announced it will build a trading hub in the city, which will serve as a platform for Beijing to deepen economic and strategic links with energy-rich West and Central Asia.

The plan, officials and analysts say, is bringing new importance to Beijing's ties with Islamabad, given that Pakistan will play a crucial role, both from the point of view of diplomacy and simply, geography, in linking China with Afghanistan and West Asia.

"One of the most important reasons why we value our relations with Pakistan is that the country can play the role of a bridge between China and the Muslim world," Hu Shisheng, a scholar at the China Institutes for Contemporary International Relations (CICIR) told The Hindu in a recent interview ahead of Mr. Wen's visit.

Kashgar's transformation from an ancient Silk Road town to a modern trading hub is gathering pace, said Muhammed Ahmed Khan of the Kashgar-based Pakistan Business and Investment Promotion Council, in an interview during a visit to the city earlier this year.

When Mr. Khan, a trader from Rawalpindi, first moved to the sleepy oasis town, business was hard to come by. The long drive to Kashgar through the Karakoram highway, from the town of Gilgit in Pakistan-occupied Kashmir (PoK), posed numerous obstacles – flooding, stray boulders and weathered roads - and kept most businessmen away.

But a decade on, that trickle of businessmen has grown into a flood, Mr. Khan says. The Pakistani community in the city is growing. "The Chinese are welcoming more and more Pakistanis to put in long-term investments here," says Liaqat Ali of the Gilgit-based 7 Brothers trading company, who makes the three-day drive to Kashgar twice a year through the Karakoram.

The view from the window of Mr. Khan's modest office, located along a dusty highway in Kashgar's suburbs, shows a city in the throes of transformation.

Trucks carrying construction equipment clog the roads, as construction cranes work day and night to transform the historic old town into a sprawling Economic Development Zone — the "Shenzhen of the West", as one Chinese official says, referring to China's first Special Economic Zone.

The investments, say Chinese analysts, indicate China's long-term intentions to strengthen economic links in the region.

Chinese engineers in Kashgar have recently completed a feasibility study for the building of a railroad and an oil pipeline, according to Li Xuguang of Tsinghua University.

Sixty per cent of China's imported oil comes from West Asia. The construction of a pipeline from the port at Gwadar, which is being built by China, will reduce Chinese dependence on the narrow Malacca Straits, through which 80 per cent of China's supplies pass. "It will provide China with the shortest possible route to the oil-rich Middle East, replacing the dangerous maritime route through the South China Sea, East China Sea and the Yellow Sea," Mr. Li wrote in the Global Times this week.

The plans have been accelerated since July 2009, when ethnic unrest in Xinjiang, between native Uighurs and China's majority Han Chinese who have migrated to the region, left at least 197 dead. "After July, China will carry forward plans to build a new economic development zone in Kashgar, as part of modified development policies in the frontier region," Mr. Hu said.

"Accompanying this kind of development in western regions, we value our relations with external surrounding regions, specially in the west, a lot, in terms of development, security and stability."

Pakistan's renewed importance was recently evident, according to Mr. Hu, after the floods in Pakistan last year. "That is why this year after the unprecedented floods in Pakistan we donated about \$ 250 million," he said. "This kind of assistance never happened in China's history before."

100-member Chinese youth delegation leaves for Pakistan -- APP

100-member Chinese youth delegation leaves for Pakistan
BEIJING, Jan 7 (APP): A 100-member youth delegation comprising people representing various segments of society belonging to different parts of China left here for Pakistan on Friday. The delegation is visiting as per decision taken by Pakistan and China during Chinese President Hu Jintao official visit to Pakistan in 2006. As per decision, 100 youths from both sides will visit each other countries with the objective to better acquaint with the history and rich culture and achievements made by Pakistan and China in various sectors.

Talking to the leader and members of the delegation prior to their department for Islamabad, Ambassador Masood Khan said that Pakistan and China enjoy very close strategic partnership adding that the two countries are committed to work for establishment of peace in the region and beyond.

"We are committed to fight against terrorism, extremism and separatism", he observed.

He said that both the countries are supporting each other views on various regional and international issues on different forums.

Tracing the history of Pakistan, China friendship, as well as cooperation in various areas including economy, Ambassador Masood Khan said that the strong foundation of friendship was laid by the forefathers of both the countries.

Time is now ripe to transfer the legacy of shining history of friendship to the younger generations, he observed.

He said that the visit will be beneficial to learn more about Pakistan as the youths would shoulder the future responsibility of their country.

During their week long stay in Pakistan, the delegation will meet Pakistani leadership, visit higher learning educational institutions in Islamabad and Karachi, besides holding interaction with their peers in both the metropolis.

The delegation comprising youths, students and young entrepreneurs representing various sectors of Chinese economy, Speaking on the occasion the leader of the delegation and Chairman All China Youth Federation Mr. Ni Jian said that Premier Wen Jiabao during his last month successful visit to Pakistan said that our friendship would pass from generation to generation.

BEIJING: China is ready to put in place a deep space monitoring network in 2016 to support the country's future space missions, a senior scientist has said. -- The Economic Times

BEIJING: China is ready to put in place a deep space monitoring network in 2016 to support the country's future space missions, a senior scientist has said.

The network will consist of two monitoring stations in China, one in northwestern region of Kashgar and the other in northeastern region of Jiamusi, Xinhua reported.

A third station will be in South America, Qian Weiping, chief designer of the Chang'e 2 mission's tracking and control system, was quoted as saying.

Efforts are being made to upgrade or build monitoring stations in the three locations by equipping them with large-caliber antennas, Qian said.

The upgradation work in Kashgar and Jiamusi will be completed in 2012 to provide monitoring support for China's lunar orbiters, Chang'e 3 and Chang'e 4, while the monitoring station in South America will be created in 2016 to assist in the lunar orbiters return to Earth, he added.

BoI, Chinese Counselor discuss progress of MoUs -- APP

BoI, Chinese Counselor discuss progress of MoUs
ISLAMABAD, Jan 7 (APP): Minister of State and Chairman Board of Investment, Saleem Mandviwalla on Friday held a special meeting with Commercial Counselor of China to discuss the plan for pursuing 40 Memorandum of Understandings (MoUs) signed so far. Mandviwalla also informed the counselor

about the responsibility assigned to him by President to produce results out of MoUs signed between Pakistan and China during the visits of President of Pakistan to China and Chinese Premier Wen Jiabao's visit to Pakistan.

He said that both leaders are concerned to mature the agreements on urgent basis and suggested that all the private and public organizations holding MoUs and agreements with Chinese companies would be called for a meeting to present the progress on all accords.

It is noted that BOI witnessed MoUs of more than US\$.10,300 million with Chinese companies during the Pak-China Business Summit 2010.

A special committee, comprising BOI and Chinese officials started working on accomplishing these accords before the visit of Chinese President this year.

Gwadar port's unrealised potential -- Business Recorder

Gwadar port's unrealised potential

EDITORIAL (January 10, 2011) : Talking to journalists the other day, the Balochistan Chief Minister, Nawab Aslam Raisani, made a strong plea for using the Gwadar Port for Afghan Transit Trade. He said that he had asked the 'relevant authorities' to supply fuel to the Nato forces in Afghanistan through this port, and that the provincial government is ready to provide security to Nato supplies.

Mindful of the fact that the roads are in disrepair - according to him, because of heavy Nato containers and oil tankers movement along the route - he said that Nato countries would need to invest \$1.5 billion in road construction for easy transportation of oil to Afghanistan via Gwadar.

The Chief Minister obviously is concerned about the underutilisation of the port, which has a great potential to serve as a regional transit hub, creating substantial business and employment opportunities in the province. Unfortunately, the project has failed to take-off in a big way. Two major hurdles have hindered its progress. One is an unsavoury controversy surrounding the awarding of operating rights contract to the Port of Singapore Authority. The other problem, as the CM pointed out, pertains to the poor state of roads connecting the port to the Chaman border crossing into Afghanistan.

Considering that the US and its allies are committed to start troop drawdown in July this year, his suggestion that the Nato countries invest as much as \$1.5 billion in the construction of roads sounds rather unrealistic at first. But not so in view of the fact that the US and its allies have to undertake a huge reconstruction and rehabilitation effort to restore a semblance of stability to the war-devastated Afghanistan. The task will take several years to complete, and is likely to go beyond the final withdrawal date of December 2014.

Of course, there is the Torkham border route as well, which Nato has been using more regularly than the Chaman crossing. But the latter route offers a shorter and convenient passage to all parts of Afghanistan, hence the idea may be worth its while for the Nato nations to pursue. The government, nonetheless, must not wait for the Western nations for help to realise the full potential of the port, on which rest its dreams of making Gwadar the gateway to the resource-rich Central Asian Republics.

It is also to serve as an important link for China with West Asia as well as Africa from where it plans to bring oil, drastically reducing the transportation time and cost as compared to the alternative routes. Things being what they are, the government needs to make two quick decisions: one about the port contract, which reports suggest, is about to change hands from Singapore to China; and the other regarding the upgrade of the road system in accord with international standards. Only when these issues are resolved, will the Gwadar Port become truly functional, bringing the much-awaited benefits to all concerned.

Pak-China trade jumps by US \$ 2 bln to US \$ 8.7 bln -- APP

Pak-China trade jumps by US \$ 2 bln to US \$ 8.7 bln

BEIJING, Jan 28 (APP): In the past one year - 2010 - Pakistan-China bilateral trade has registered an overall growth of 28% and touched the figure of US\$ 8.7 billion, while in 2009, the volume of the two sides trade was US \$6.7 billion. Masood Khan, Pakistan's Ambassador to China, while welcoming the swift increase in the volume of bilateral trade said that the most remarkable growth had been in Pakistan's exports which increased last year by 37.44%; while imports from China also grew by 25%.

The Ambassador attributed the growth in Pakistani exports to the enhanced market of cotton yarn and mineral products in China.

"The trend seems to be pretty stable," he noted.

"Despite the encouraging growth pattern, we would not sit on our laurels. There is a long way to go as we have to achieve the US \$15 billion mark and move beyond it in the near future," Masood Khan said.

Pakistan and China have resolved to increase their trade to US\$ 15 billion in the shortest possible time. The recent trend of growth in Pakistan-China bilateral trade has put the two countries on a fast track to achieve this target.

In 2010, the biggest spurt in Pakistani exports to China has been in cotton yarn, home textiles, garments, ores and mineral products, copper and copper scrap, leather goods, fish products, electrical goods, and medical and surgical instruments.

To give a fresh stimulus and to promote Chinese investment in Pakistan, the second meeting of Pakistan-China Free Trade Commission (FTC) was held in November last year.

Furthermore, during Premier Wen Jiabao's visit to Pakistan last month, the two sides decided to launch in the first quarter of this year the second phase negotiations of Pak-China FTAs with the objective to enhance trade liberalization and to promote economic and trade growth of the two countries.

Pakistan has requested China for unilateral tariff concessions for 268 of its product lines. If these concessions are agreed, Pakistani exports to China will increase even more rapidly.

Pakistan exports to China, cotton yarn and fabrics, synthetic yarn and fabrics, garments, home textiles, chromium and other ores, fish and fish products, vegetable and animal products, marble, granite and stone products, medical instruments, sports goods, carpets etc.

From China, Pakistan imports, polyester and silk fabrics, polyester staple fabrics, fertilizers, tyres, mobile communication equipment, gas turbines, motorcycle parts, combustion piston engines, electrical appliances, iron and steel products, and various other forms of machinery.

Premier Wen Jiabao and Prime Minister Syed Yusuf Raza Gilani in recent meetings had agreed to take a series of measures to improve the balance of trade in Pakistan's favour by encouraging frequent visits of Chinese purchase missions to Pakistan, Pakistani traders' and trade associations' participation in major Chinese Trade Fairs and Expos.

It has also been decided by the two sides to hold seminars as well as to enhance visa facilitation.

Pakistan has also proposed to China for the development of an efficient Electronic Data Interchange (EDI) to realize the full potential of the FTAs.

Pakistan Oilfields Profit Rises 57% on Higher Output -- APP

Pakistan Oilfields Profit Rises 57% on Higher Output

By Khurram Anis - Jan 28, 2011 4:49 PM GMT+0500

inShare.1More

Business ExchangeBuzz up!DiggPrint Email .Pakistan Oilfields Ltd., the nation's third-biggest energy explorer, posted a 57 percent increase in second-quarter profit after oil and natural gas production rose.

Net income in the three months ended Dec. 31 climbed to 2.97 billion rupees (\$34.7 million), or 12.55 rupees a share, from 1.9 billion rupees, or 8 rupees, a year earlier, the Rawalpindi-based company said in a filing to the Karachi Stock Exchange

today. Sales rose to 6.74 billion from 4.77 billion rupees a year earlier.

"An increase of 9 percent in average light crude oil prices also helped gains," Umer Bin Ayaz Mujtaba, an analyst with JS Global Capital Ltd., wrote in a report to clients on Jan. 26. The company's gas production increased 83 percent and oil output 23 percent from a year earlier, he said. Mujtaba has a "hold" recommendation on the stock.

Energy demand in Pakistan, which imports more than 80 percent of the oil used in the country, is growing at 5 percent annually. Pakistan is targeting \$15 billion in investment to develop its oil and gas industry by 2014 to help reduce its import bill.

Pakistan Oilfield shares fell 0.3 percent to 328 rupees as of 4:05 p.m. local time on the Karachi Stock Exchange.

Crude oil in New York climbed 12 percent to an average of \$85.24 a barrel in the three months ended Dec. 31 from a year earlier, according to data compiled by Bloomberg.

'Pakistan, Bosnia need to improve economic ties' -- Commerce report 'Pakistan, Bosnia need to improve economic ties'

RAWALPINDI - Pakistan and Bosnia need to improve political and economic relations to promote bilateral trade and investment as the current volume of trade is far below the respective potential of both countries.

Ambassador of Bosnia Herzegovina in Pakistan Arman Limo made these remarks while talking to President of Rawalpindi Chamber of Commerce and Industry, Syed Ali Raza Saeed Shah during his visit to RCCI here. Vice President Dr Shimail Daud, members executive committee and renowned businessmen of the city were also present on the occasion.

The Ambassador said that both the countries have common religious and cultural relations that should be promoted to strengthen trade and economic ties. He said Bosnia is organising the second International Investment Conference Sarajevo Business Forum 2011 on April 6-8, 2011 in Sarajevo. He invited Pakistani businessmen to participate in this event to explore more business opportunities.

Arman Limo said that Pakistani businessmen should consider Bosnia for joint ventures in the area of common interest. Pakistani products including rice, surgical instruments, sports goods and textile etc. have good potential in Bosnian trade markets and Pakistani businessmen should establish direct trade links in Bosnia to grab better market share, he added.

The Ambassador said that Bosnia is an ideal place for the foreign investors and has a great potential for tourism as well. Islamic states must invest in each others states and Pakistan and Bosnia can play a very vital role in this regard, he proposed. He invited business community for trade with Bosnia and suggested to divert their business activities using Bosnia as Gate Way for exporting and capturing the European international trade markets.

Speaking on the occasion President RCCI Syed Ali Raza said that Pakistan and Bosnia has still unexplored market for businessmen of both countries. He said frequent exchange of business delegations and establishing direct B2B contacts are the options which should be used to exploit untapped bilateral trade and investment potential in both countries.

Ali Raza said that Pakistan and Bosnia have low trade volume which should further be enhanced through emphasizing on non-traditional items for the mutual benefit of the people of two countries.

He said Pakistani products including rice, sports goods, surgical instruments, pharmaceutical, leather & textile products etc. can be exported to Bosnia and

proposed that Bosnian businessmen should look into the opportunities to develop business relation in the identified areas. President RCCI also invited the honourable chief guest to participate in the upcoming RCCI Trade Expo.

Bestway Group invests \$230 million in UBL -- Business Recorder

Bestway Group invests \$230 million in UBL

LONDON (January 29, 2011) : The Bestway Group, the UK based conglomerate founded and chaired by Sir Anwar Pervez, has announced that it has increased its shareholding in United Bank Limited (UBL) to 51.07% by acquiring an additional 20% of the shares from the Abu Dhabi Group.

HSBC provided fully integrated advisory and financing solutions and acted as sole bank in the deal. All regulatory approvals from SBP, CCOP and SECP have obtained. UBL is Pakistan's second largest private bank. In 2002, a consortium consisting of Bestway Group and Abu Dhabi Group acquired 51% of UBL shares together with management rights and control of the bank through the Government of Pakistan's privatisation process.

The consortium currently owns 61.37% of the bank with Bestway Group at 31.07% and Abu Dhabi Group at 30.30%. After this investment, the management rights and control of the bank will continue to remain within the same consortium. No changes are being made in the senior management or in the board of directors. Zameer Chaudry, Chief Executive of Bestway Group said.

"This is a strategic long term investment for Bestway Group. We are delighted to make this acquisition as we believe that UBL is a solid bank with a huge potential for the future". Chaudry stated, "This investment is a testimony of Bestway Group's long term commitment to UBL and Pakistan".

Mark Haines, HSBC's Head of Corporate Banking in the Thames Valley commented: "Bestway Group is a long-standing customer and a thriving business. This funding demonstrates our ongoing commitment to the company, and is a great example of how HSBC can help customers to take advantage of international growth opportunities."

UBL has an asset base of \$7.6 billion, advances of \$4.3 billion, deposits of \$5.98 billion, CAR of 14.4% and EPS of 8.7x. UBL has a vast network of over 1,100 branches in Pakistan and a strong presence in Middle East, North America, Europe, China and Central Asia. It has a UK based subsidiary, United National Bank which has six branches in UK. UBL provides employment to over 14,500 people and serves over 5 million customers.

Since 2002, UBL has achieved numerous milestones in all aspects of its business. With a wide ranging dynamic portfolio of globally competitive products and services, and a proven track record spanning over half a century, UBL today is at the forefront of the banking sector in Pakistan as well as in the region.

In looking to the future, Chaudry said, "UBL shall continue to focus on strengthening its balance sheet through acquisition of low cost deposits and improvement in asset quality, as well as grow its international business in a secure and selective manner". "Overseas Pakistanis play an indispensable role in the development of Pakistan. Bestway Group is proud to be a part of non resident Pakistani diaspora and we hope to develop UBL into a conduit for bringing in more investments into Pakistan from other non resident Pakistanis", said Chaudry.

Bestway Group is among the top ten family businesses in UK with annual turnover of £2.1 billion. Bestway Group's wholesale operations are the 2nd largest in the UK with an 18% market share. It trades from 61 warehouses, covering over 5.5 million sq ft of selling space, offering a product range of over 25,000 items and serving over 120,000 independent retailers and foodservice customers nationally. The Group also provides employment to over 5,000 people in UK.

Bestway Group's wholesale operations continue to expand. In June 2010, the Group acquired the Bellevue business from the Bensons in Scotland. In October 2010, the Group opened a new state of the art warehouse in Aintree, Liverpool. A month later, in November 2010, Bestway Group acquired the Martex business in

Scotland from CJ Lang. In a short period of six months, the Group added six warehouses to its existing portfolio, taking the total to 61 warehouses. Bestway Group's cement operations ie Bestway Cement Limited is the 2nd largest cement manufacturer in Pakistan. It has four state of the art cement plants with a total capacity of 6 million tonnes per annum and employs over 3,000 people. The company is also the largest exporter of cement to Afghanistan and India.-PR

ISLAMABAD: The Kingho Group being the largest private group of China has expressed its keen interest to Invest in Thar Coal project. -- The Express Paper

ISLAMABAD: The Kingho Group being the largest private group of China has expressed its keen interest to Invest in Thar Coal project.

A seven-member delegation of M/s. China Kingho Group, headed by Executive Vice President Ma Xiaomin, visited Board of Investment (BOI) to explore investment opportunities in Pakistan in coal sector and development of coal fields of Thar, Badin, says a statement issued here.

Minister of State and BOI Chairman Saleem H.Mandviwalla stressed that in order to sustain economic growth, Pakistan needed to develop its indigenous energy resources rapidly.

Proposed investment in development of Thar coal mines would provide benefits like strategic energy resource, import substitution of expensive raw furnace oil (RFO), lower power tariff for coal-fired power plants, and improve socio economic development in Thar region.

It will also lead to skilled job creation and transfer of technology, he remarked.

Director Mineral and Natural Sources, Azhar Khan told that Thar coal field in Sindh is spread over more than 9000 sq km and is bestowed with 175 billion tons of lignite coal, which can fuel power generation of over 100,000 MW for more than two centuries.

EDG Board of Investment Humayun Khan Sikandari informed that Thar coal field has been declared SEZ, and the investor will enjoy Corporate Income Tax Holiday of 5 years and 10 years for Developers of the Zone.

The head of delegation Kingho Group of China, told the BOI officials that through years of effort, has achieved a diversified but integrated development pattern which is composed of coal mining, washing and sorting, production, transportation and sales of coal, together with iron ore mining, chemical metallurgy, salt chemicals, building materials, logistics, and hotel and tourism businesses.

China Kingho Group being the largest private group has manpower of 64,000 and possesses 22 billion tonnes of reservoirs of coal and 800 million tonnes of iron ore, he said.

Power distribution system: Pakistan and ADB ink \$242 million deal on improvement -- Business Recorder

Power distribution system: Pakistan and ADB ink \$242 million deal on improvement

ISLAMABAD (January 29, 2011) : Pakistan and Asian Development Bank (ADB) on Friday signed an agreement to invest 242 million dollars in improving power distribution system in the country. The signing ceremony was held here at Economic Affairs Division. The agreement was signed by Sibtain Fazal Halim, Secretary Economic Affairs Division and Rune Stroem, country director ADB, while the project agreement was signed by the representatives of all the 8 Distribution Companies (DISCOs).

The loan is meant for Tranche-2 of the Power Distribution Enhancement Investment Programme under Multi-tranche Financing Facility (MFF). ADB's total MFF programme is of 810 million dollars (US \$800 million OCR and US \$10 million ADF). The programme is comprised Multi-tranches and the same will be implemented in ten years period. The objective of the project is to rehabilitate, augment and expand power distribution systems and remove system bottlenecks in the project area.

The project shall add 3,380 Megavolt-Amperes (MVA) of transformer capacity, 387 km of new distribution lines, and improve security of supply to customers by moving toward compliance with regulatory security standards governing planning and operation of the distribution system and reliability improvement on the lower voltages. The project is expected to be completed by March 21. Speaking on the occasion the ADB's country director said that energy conservation and energy efficiency is the fastest and cheapest way of increasing electricity supply. "This project will not only reduce electricity lost during delivery to the customers but also improve the quality of service by helping to get rid of technical bottlenecks," he added.

Swiss envoy for more trade with Pakistan -- APP

Swiss envoy for more trade with Pakistan

By our correspondent

Saturday, January 29, 2011

LAHORE: Swiss government is trying to strengthen trade relations with Pakistan, the Swiss Ambassador to Pakistan Christoph Bubb said speaking at Lahore Chamber of Commerce and Industry (LCCI) on Friday.

He said the Swiss Business community was ready to make further investments. Switzerland was one of the largest foreign investors in Pakistan, the envoy said.

Transfer of technology for textile industry was a viable investment option for Swiss businesses. Several Swiss companies were already operating in Pakistan and doing a successful business, which is enough to prove that the Swiss investment has a bright future in this country, he said.

Bubb expressed the hope that Swiss investment would see a boost in coming months due to liberal investment policies.

ICBC leads charge as Chinese banks go global -- AFP

ICBC leads charge as Chinese banks go global

By Boris Cambreleng (AFP)

BEIJING — ICBC, the world's largest bank by market value, is proving the most aggressive Chinese bank in expanding abroad, serving Chinese firms that are increasingly active globally after the financial crisis.

Of the country's "big four" banks, ICBC is leading the way as Chinese lenders restart plans that were put on hold by the global crisis and seize new opportunities left in its wake.

Bank of China fulfilled that role in the 1980s, but times have changed as Chinese firms have been widely encouraged to invest abroad and Beijing seeks to boost the global profile of the yuan, the experts say.

"BoC and ICBC are roughly at parity in terms of overseas activity. But it does indeed appear that ICBC is emerging as the most international of the Chinese banks," IHS Global Insight analyst Adam Breen told AFP.

For Andy Xie, an independent economist based in Shanghai, the process is the logical result of the global expansion by Chinese companies, which are branching out to secure vital natural resources and explore new markets.

"Even Chinese companies of medium size are going global. If Chinese banks don't offer them services offshore, then they might switch to other banks like HSBC that have both a China presence and an international presence," Xie said.

This month alone, ICBC opened branches in Paris, Amsterdam, Madrid, Milan and Brussels -- following on from existing offices in London, Moscow, Frankfurt and Luxembourg.

In December, it extended its reach to Pakistan. The month before, reports said ICBC was eyeing a takeover of South Korea's Kwangju Bank. It already has two branches in Seoul and one in the port city of Busan.

In addition the bank took advantage of this month's high-profile visit to the United States by President Hu Jintao to announce it had signed a \$140 million deal to buy a majority stake in the US subsidiary of Bank of East Asia.

If the agreement gets approval from US banking regulators, ICBC will become the first Beijing-controlled financial institution to acquire retail bank branches in the United States.

ICBC, which employs 386,000 people worldwide and has more than 200 million customers, now has more than 160 branches outside mainland China and more than 16,000 in the country, according to its website.

Experts say Chinese banks' global expansion is only just beginning.

"It is rapid expansion only from a very low base," explained Michael Pettis, a professor of finance at Tsinghua University in Beijing.

"China is the second-largest economy in the world but in terms of outward direct investment, it is probably eighth or ninth."

At first, the banks will serve Chinese companies looking to invest in or buy local businesses, before they target foreign enterprises doing business with the Asian economic powerhouse, experts say.

Eventually, they will be viable competitors to local banks, mainly by offering more cost-effective service, Pettis told AFP.

"The Chinese banks might become competitive in a few years, and they will probably be competitive where the Japanese were competitive in the 1980s and that is because they provide low funding cost," he said.

ICBC chairman Jiang Jianqing told the Wall Street Journal at last week's World Economic Forum that the bank's focus for now would be "mainly on emerging markets, which have good prospects for growth".

"For the American market, we are walking in a very careful way," Jiang said.

Breen, a specialist on China's banking sector, said the "big four" should focus on developing economies, "where competition is lower, economic growth potential is greater, and the existing domestic banks are less sophisticated".

In developed countries, "their best option is to purchase existing banks in those sectors if they want to expand there," Breen said.

But he cautioned that "major regulatory obstacles" could block Chinese banks' path in nations such as the United States, where most analysts expect ICBC to face a lengthy process to win approval for the Bank of East Asia deal.

Pakistan's FTA with Indonesia to boost trade -- source: rupeenews.com

Pakistan's FTA with Indonesia to boost trade

Sunday, 30 January 2011 21:47

Economy

Trade between the ancient Pakistanis of the Indus Valley and the ancient Indonesian has been going on for centuries. Islam spread to Indonesia by Arab traders who on many occasions left the Mekran Coast of Pakistan.

The term "India" has always been ephemeral. For many Europeans Indonesia was "India". Indo-nesia used to be called the Dutch Indies or "Dutch India" which competed with British India which competed with "Indo-China" or French "India" (Vietnam).

Indonesia is the largest Islamic country in the world. Its Muslims are devout and humbly. Indonesia has been a great partner and supporter of Pakistan. In fact during the reign of President Sukarno relations were extremely close. Jakarta helped Pakistan defend itself in 1965. Indonesia had placed its entire fleet of submarines in the hands of the Pakistan Navy.

As a young boy, this author had requested the Indonesia Embassy for this picture of President Sukarno and had it placed in his room as a poster.

The brutal overthrow of the elected Sukarno by th CIA implant Suharto reduced the government to government contacts but there is deep rooted affinity for the Pakistani people in Indonesia—especially the older Indonesians.

The President of the SCCI Ghulam Mustafa Chaudhary said goods made in Sialkot such as sports equipment, surgical instruments, leather products, martial arts uniforms and musical instruments could find a good market in Indonesia. "The main hurdle is the lack of a direct link between business communities of the two countries.

The Indonesian Ambassador of Indonesia to Pakistan Ishak Latuconsina confirmed that the Free Trade Agreement (FTA) between Indonesia and Pakistan would soon. This has been in the works for many years, and its implementation will be a boon for traders in both countries.

The Indonesia Ambassador was addressing a meeting of the Sialkot business community at the Sialkot Chamber of Commerce and Industry (SCCI). Ambassador Ishak vowed to make efforts to boost trade between the two countries. He affirmed that he would fully support and ensure easy access of Pakistani products to Indonesian markets.

The Ambassador invited the Sialkot business community to do business in Indonesia and also participate in industrial exhibitions and trade fairs being held in Indonesia. He also agreed with SCCI proposal regarding the regular exchange of updated trade information and mutual trade delegations to enhance trade between the two countries.

The biggest Islamic nations must increase their trade and worl to increase prosperity between the people.

IDB to finance Pak power project -- ARAB NEWS

IDB to finance Pak power project
By ARAB NEWS

Published: Jan 31, 2011 01:18 Updated: Jan 31, 2011 01:18

JEDDAH: The Islamic Development Bank (IDB) has signed an agreement to extend its long-term lease finance (Ijara) facility of up to \$90 million for the development of the Uch-II combined cycle independent power plant project in the Baluchistan province of Pakistan.

International Power PLC of the UK is sponsoring the project, which will add a net generation capacity of 375 MW to the national grid under a 25-year contract with the National Transmission and Distribution Company of Pakistan and thereby make a significant contribution to improving the power supply situation of the company. The deal was signed on behalf of the IDB by its Vice President (Operations) Birama Boubacar Sidibe. Besides IDB, the project is also expected to receive long-term debt finance from the Asian Development Bank, International Finance Corporation and Export-Import Bank of Korea.

Pakistan to invite fresh bids for 3.5 mil mt/year LNG supply mid-Feb -- APP

Pakistan to invite fresh bids for 3.5 mil mt/year LNG supply mid-Feb
Karachi (Platts)--31Jan2011/650 am EST/1150 GMT

Pakistan is to invite fresh bids for the supply of around 3.5 million mt/year of LNG by mid-February to meet the country's energy needs after its law ministry told the government to scrap the deal with GDF-Suez, a petroleum ministry official said Monday.

"The ministry of petroleum will float a tender to invite companies to participate in bidding for the import of LNG, and setting up of an LNG terminal mid-February," Imtiaz Kazi, a secretary at the ministry, added.

Pakistan is facing an acute energy shortage and is suffering a shortfall in excess of 1 Bcf/day as consumption is around 5.2 Bcf/day against output of 4.2 Bcf/day.

The government last week at a meeting of country's apex decision-making body, the Economic Coordination Committee, or ECC, headed by finance minister Abdul Hafeez Shaikh decided to scrap deal with GDF-Suez.

In February 2010, the ECC, then headed by former finance minister Shaukat Tarin, awarded an LNG supply contract to GDF-Suez. Under the deal, Netherlands-based 4Gas was to set up an LNG terminal, while GDF was to supply the gas.

But Pakistan's Supreme Court in April 2010 annulled the deal and directed the government to start the bidding process afresh.

The deal awarded to GDF Suez was for a medium-term supply contract for 2.75 million mt/year over six years. The contract price was 3.95% Brent plus 75% of the maximum of the US' Henry Hub and the UK's National Balancing Point, plus \$1.58/MMBtu.

Later, the ECC also approved a second contract with GDF Suez for another 1.5 million mt/year of LNG for long-term supplies at 15.2% of Brent plus \$0.50/MMBtu for a period of 20 years, subject to further price improvements through a final round of negotiations with GDF.

The long-term price formula would be fixed for 10 years and be renegotiable for the second 10-year term.

Meanwhile, fresh bids could delay the process by another year, exacerbating Pakistan's existing gas shortfall of almost 1 Bcf/day and creating further hardships

for consumers, an industry observer said.

The country's gas supply shortage would be 3.18 Bcf/day in 2014, as projected gas supply would be 4.28 Bcf/day against demand of around 7.46 Bcf/day.

Obama should offer Islamabad a much more expansive US-Pakistani relationship if it helps win this war.” -- WASHINGTON

February 2, 2011 (2 days ago)“Obama should offer Islamabad a much more expansive US-Pakistani relationship if it helps win this war.” — File Photo
WASHINGTON: The Obama Administration should offer Pakistan a civilian nuclear energy deal as well as a trade program under a “much more expansive” US relationship with the key regional country as part of efforts to win more Pakistani cooperation toward a successful outcome of the Afghan conflict, a prominent American expert argued Tuesday.

In a policy brief, Michael E. O’Hanlon, who is director of research for the Foreign Policy program at the Brookings Institution, endorses the Obama Administration’s policy to build a relationship of trust with Pakistan but underlines that bold new measures are needed to get greater and sustained Pakistani cooperation in the anti-terror fight along the Afghan border.

“Two major incentives would have particular appeal to Pakistan. One is a civilian nuclear energy deal like that being provided to India, with full safeguards on associated reactors,” says Dr O’Hanlon, who has also authored a book on Afghanistan.

He advocates that “Pakistan’s progress on export controls in the wake of the A.Q. Khan debacle has been good enough so far to allow a provisional approval of such a deal if other things fall into place as well, including Islamabad’s compliance with any future fissile production cutoff treaty.”

On the importance of US striking a free trade accord, the expert says struggling economically; Pakistan needs such a shot in the arm.

“A trade deal could arguably do even more than aid at this point,” he observes.

However, O’ Hanlon stipulates, that Pakistan should be given these deals if the US comes out successful in Afghanistan as he claims that the Afghan militants use Pakistani tribal regions to sustain insurgency and need to be tackled strongly by Pakistan.

The expert suggests if Afghanistan turns around in a year or two, the deals can be set in motion and implemented over a longer period.

Favoring the current US policy toward Pakistan, O’ Hanlon notes in the policy brief, that “part of the right policy is to keep doing more of what the Obama administration has been doing with Pakistan -building trust, as with last fall’s strategic dialogue in Washington; increasing aid incrementally, as with the new five-year, \$2 billion aid package announced during that dialogue; encouraging Pakistan-India dialogue (which would help persuade Islamabad it could safely move more military forces from its eastern border to its western regions) and coordinating militarily across the Afghanistan-Pakistan border region. But President Barack Obama needs to think bigger.”

The clarification that the US-led ISAF mission will continue until 2014, and indeed beyond, at the November Lisbon summit was a step in the right direction but more is needed.

“Obama should offer Islamabad a much more expansive US-Pakistani relationship if it helps win this war.”

Entitled “Improving Afghan War Strategy,” the policy brief also emphasizes promoting Afghan political organizations built around ideas and platforms, not individuals and ethnicities, in a change from longstanding American policy that could improve the quality of governance in the country.

The brief also proposes taking pressure off the bilateral US-Afghan relationship on the issue of anticorruption, largely by creation of an international advisory board

consisting of prominent individuals from key developing countries like Indonesia and Tanzania that have had considerable success improving their own nations' governance in recent times.

'UK working hard to promote Pakistan's investment climate' -- APP
'UK working hard to promote Pakistan's investment climate'

LAHORE (February 02, 2011) : The British Government is working hard to promote the investment climate of Pakistan, and the British High Commission in Pakistan may soon organise an investment conference in United Kingdom to highlight the economic potential of Pakistan.

This was stated by Dr Peter Tibber, the British Deputy High Commissioner during his visit to the Lahore Stock Exchange. Dr Peter Tibber was welcomed to the Exchange by Aftab Ahmad Chaudhry, the MD/CEO of Lahore Stock Exchange. The visiting dignitary also held a detailed meeting with the Board of Directors and the past Chairmen/Vice Chairmen of the Exchange and a cross section of the multinational CEOs during the visit.

The delegation also comprised of Alastair King Smith-British Deputy Political Counsellor. Farid Malik, CSO/COO LSE, briefed the visitors about the role and function of LSE. He also highlighted the role of LSE in the development of the capital market in the country.

He stated that LSE was the first stock exchange in the country to introduce electronic trading back in 1997 and had gone to indigenously develop its own trading platform called ULTRA. This trading platform had subsequently been sold to Karachi, Islamabad and Ghana Stock Exchanges. LSE was also the only stock exchange to focus on retail expansion by setting up regional trading floors.

He emphasised that stock exchange markets in Pakistan offer a favourable and open environment to foreign investors. Highlighting this fact, he informed that according to NCCPL figures, foreign investors now hold 8 percent of total market capitalisation and more than 30 percent of fleet-float of local equities is held by foreigners.

The MD LSE, Aftab Ahmed Chaudhry highlighted various steps taken by the Exchange in recent times to enhance the confidence and trust of the investors in the functioning of the Exchange as a frontline regulator. Especially, the Exchange is committed to provide transparent and fair dispute resolution mechanism for adjudicating the disputes arising between the member/broker of the Exchange and investors.

For this purpose, the Exchange has revamped the Office of Chief Regulatory Officer of the Exchange. "Enormous investment opportunities in Pakistan are still untapped and are available for foreign investors," he stated. He impressed upon the visitors to play proactive role in apprising the foreign investors about the opportunities of investment in Pakistan in the prevailing business environment.

Peter Tibber lauded the efforts of LSE for playing pivotal role in the development of the capital market. He informed the LSE Board members that efforts are being made to arrange a conference in the coming weeks for apprising the business community in UK about the investment opportunities available in Pakistan.-PR

Construction of new Gwadar Airport: Centre releases Rs 90 million to CAA, Senate told -- Daily Times

Construction of new Gwadar Airport: Centre releases Rs 90 million to CAA, Senate told

RECORDER REPORT

ISLAMABAD (February 03, 2011) : The federal government has released Rs 90 million to Civil Aviation Authority (CAA) for the construction of new Gwadar International Airport under public sector development programme (PSDP). In a written reply to the House on Wednesday, Defence Minister Chaudhry Ahmed Mukhtar said that an amount Rs 50 million was released during 2008-09 and Rs 40 million in 2009-10.

Giving year-wise utilisation of the allocated amount of Rs 90 million during 2008-09 and 2009-10, he said that Rs 5 million was utilised for topographic survey, Rs 2.500 million for soil investigation, Rs 50 million for design consultancy, Rs 1.300 million for purchase of vehicles, Rs 1.275 million for salary of staff, 0.829 million for press advertisement and Rs 29.096 for civil works during the said period. Meanwhile, the minister also told the House that a total of 174 employees had been reinstated by PIA under Sacked Employees Reinstatement Ordinance-2009 (SERO-2009).

He said that out of 174 reinstated employees, a total of 36 employees were entitled to receive financial benefits, which implies total financial impact of about Rs 420 million. He clarified that so far no employee had been reinstated in PIA under Sacked Employees Reinstatement Act 2010 (SERA-2010). To a question, he said that facility of non-accompanied personal effects (cargo facility) was being provided to all airports, including Peshawar Airport, which was part and parcel of cargo operations.

State Minister for Interior Tasleem Qureshi informed the House that as many as three million illegal immigrants are residing in Pakistan other than Afghans refugees while only few Afghan nationals were repatriated on the report of security agencies after cancellation of their registration.

He said that the figures had been provided by the National Alien Registration Authority (NARA) adding that the number of African national is 50,000 out of which 30,000 to 35,000 are living in Karachi, Islamabad and Rawalpindi along with nearby villages of the twin cities while the rest are living in other cities. To a question Qureshi said that in accordance with the provision of Foreigners Act, 1946 the foreigners illegally residing in Pakistan in contravention of the said law are apprehended by the local police as well as Federal Investigating Agency (FIA).

In 2008, he said FIA had registered four cases against Africans illegally residing in the country and in 2009 two cases were registered, while since 2010 only one case was registered, he added. Meanwhile Qureshi informed the House no amount was paid to the UN Commission for the investigation into the assassination of Benazir Bhutto, however, he added that the government did bear the boarding and lodging besides ticket expenses of the visiting members of the commission.

To another question, he said that a total of 11789 cases of violence against women were registered in the country since January 2009. Giving details, he said that 1656 cases were registered in Khyber Pakhtunkhwa while 8433 in Punjab, 680 in Sindh, 333 in Balochistan, 272 in Islamabad, 362 in AJK and 62 cases were registered in Gilgit-Baltistan during the said period.

He said that nine women police stations have been established at Karachi, Larkana, Hyderabad, Peshawar, Abbotabad, Islamabad, Lahore, Rawalpindi and Faisalabad where female police officers are dealing with the women cases. Besides, he added that Ladies Complaints Units (LCUs) have also been established in ICT Islamabad at Margalla and I-9 Police Station which are functioning.

Minister for Narcotics Control Arbab Muhammad Zahir told the House that over 640 drugs and narcotics peddlers were arrested last year. Of these, he added that 193 were convicted by the courts while trial of the remaining 382 persons is underway.

Iranian gas price will be double to that of local gas, NA told -- Daily Times

Iranian gas price will be double to that of local gas, NA told

* Naveed Qamar says security threats hampering exploration of oil and gas in Balochistan and Khyber Pakhtunkhwa

By Ijaz Kakakhel

ISLAMABAD: The National Assembly was on Wednesday informed that the imported Iranian gas would cost the country double as compared to existing gas prices. Currently, the gas price is about \$5 per mmbtu while keeping in view the existing oil prices in international market (\$100 per barrel), the price of Iranian gas would be about \$10 to \$12 per mmbtu. Federal Minister for Petroleum and Natural Resources Syed Naveed Qamar, while answering questions, said that the gap between demand and supply of gas was widening and hence could not be imported at higher prices. The government has signed agreement on Iran-Pakistan gas pipeline project.

Every country has to complete its pipeline distribution works within its boundaries. Pakistan has to lay down gas pipeline from Iranian border to Gwadar and then from Gwadar to Nawab Shah. The minister informed the House that Iran had linked gas price with 77 percent international crude oil price in international market. For Iran-Pakistan gas pipeline project, the government had hired consultants, carried out surveys and soon the work on the project would be kicked off. To another query the minister informed the National Assembly that Balochistan had oil reserves but even then, domestic oil demand could not be met. He said 85 percent oil demand was met through imported oil. In order to increase indigenous production of oil and gas, the government carried out massive exploration during the year 2010. However, after the 18th Amendment, the shares of provinces have increased by 50 percent, and the provinces have to come forward for the exploration of oil and gas.

The minister said that gas reserves were discovered in Zin block, Balochistan areas and its exploration required huge investments.

The majority of oil and gas blocks in Khyber Pakhtunkhwa (KP) and Balochistan were found in security-threatened areas, which were causing problems for the government in its exploration. However, he assured that the Oil and Gas Development Company Limited would carry out exploration work in Balochistan with the assistance of Pakistan Army and security forces.

ADB to provide loan for Pakistan's first wind farm, Project, to be completed in 2012 -- PPI

ADB to provide loan for Pakistan's first wind farm Project, to be completed in 2012, will provide 56.4 megawatts electricity as compared to current 6 megawatts.

ISLAMABAD: The Asian Development Bank will be providing a loan to help fund the first privately owned and financed wind farm in Pakistan. The output from the plant will provide much-needed additional power for Pakistan, improve the country's energy security, and lower reliance on fossil fuels.

Zorlu Enerji Elektrik Uretim will use the \$36.8 million loan to install wind turbines to increase the output of its wind farm – located in the southern Sindh province, 100 kilometers northeast of Karachi – from the current 6 megawatts to a total 56.4 megawatts.

“Acute energy shortages, caused by low investment, are cutting into Pakistan's economic growth,” said Michael Barrow, Director in ADB's Private Sector Operations Department. “This deal should provide a bankable template for future privately funded wind projects, and send a signal that Pakistan's wind sector is attractive for private sector investment and financing.”

Pakistan relies heavily on imported fossil fuels for the bulk of its energy needs. However, this is costly, puts a heavy burden on Pakistan's foreign exchange reserves, and leaves the country vulnerable to supply disruptions and global price fluctuations. Investment in new capacity has lagged, whereas demand has surged by over 40% over the past five years, resulting in regular brownouts in all major urban centers and the introduction of power rationing. This has forced shops and industries to close early, undermining Pakistan's economy. The Government of Pakistan is now engaged in a major drive to expand its energy sources, including tapping renewable energy resources such as wind, given around 50,000 megawatts of capacity are available in the south of the country alone.

“We estimate that three to five projects will come on line following ADB's support for Zorlu Enerji's wind farm,” said Siddhartha Shah, Senior Investment Specialist in ADB's Private Sector Operations Department.

Zorlu Enerji, listed on the Istanbul Stock Exchange, owns and operates Turkey's largest wind farm. It is 68% owned by Zorlu Holding AS, one of the largest conglomerates in Turkey.

The existing 6 megawatt wind farm project is currently dispatching power to the Hyderabad Electric Supply Company. Once the second construction phase is complete – expected in 2012 – the 56.4 megawatt wind farm will supply power to the national grid through a 20-year take-or-pay power purchase agreement with the National Transmission and Dispatch Company. The approved tariff will ensure that the electricity is priced competitively, with the rate dropping over time as project debt is paid down.

“The project will have multiple benefits including helping realize the government's target of 6% renewable energy in the total power mix by 2030, and contributing to employment opportunities and economic growth in one of the poorest regions of the country,” said Mr. Shah.

The total cost of the project is \$147 million with 30% financed through equity provided by Zorlu Enerji and the rest through US dollar-denominated loans from ADB, the International Finance Corp., the ECO Trade and Development Bank and a Pakistan rupee loan from Habib Bank. ADB's loan will carry a tenor of 12 years with a two-year grace period.

ADB has taken the lead in supporting the Pakistan Government's efforts to attract private sector capital into the power sector. Initiatives include financing the country's first private sector run-of-river hydropower project – the New Bong Escape Power Project in 2009, as well as financing three combined cycle power plants using domestic gas; Fauji Kabirwala Power Company Limited, Foundation Power

Company Daharki Limited, and Uch-II Power Private Limited

BEIJING: From January to December 2010, Pakistan's exports to China increased by nearly US \$ 500 million and their overall growth rate was 37.4 per cent. -- BEIJING

BEIJING: From January to December 2010, Pakistan's exports to China increased by nearly US \$ 500 million and their overall growth rate was 37.4 per cent.

According to the figures released by China Customs, the total Pakistani exports to China last year were US \$ 1.7 billion compared to US \$ 1.2 billion in 2009.

Since 2006, Pakistani exports to China has been gradually climbing. The total volume of Pakistan-China trade rose by US \$ 2 billion to US \$ 8.7 billion approximately.

Last year, textiles, ores and mineral products, leather, chemicals and plastics, sports goods, iron and steel, surgical instruments showed the trend of faster growth rates.

In 2010, Pakistan's imports from China also increased by US \$ 1.4 billion and the total volume of imports from China stood at US \$ 6.9 billion. The trade deficit right now for Pakistan is US \$ 5.2 billion.

"The two governments have agreed on a series of measures to reduce the trade deficit" said Ambassador Masood Khan on Friday adding that in this regard, China would be sending purchase missions to Pakistan to identify suitable Pakistani products for Chinese markets.

He pointed out that Pakistani traders and businessmen will be attending major trade exhibitions in Kunming, Guangzhou, Xi'an, Urumqi, Kashghar, Dalian, and Beijing.

Trade seminars would also be held to create greater space for Pakistani products in China.

Meanwhile, Pakistan has requested assistance from China in vocational and technical training in the areas of value added textiles, gems and jewelry, ceramics, surgical instruments, leather and light engineering.

At the last meeting of the Free Trade Commission (FTC), China agreed to consider the proposal and invite Pakistan to identify specific training needs in these areas.

Pakistan has also requested China to give unilateral tariff concessions to 268 Pakistani product lines.

Pakistan is the second largest trading partner of China in South Asia.

GILGIT: The Chinese government has provided Rs5 million for the education of Ugur students studying in Gilgit-Baltistan (G-B) and Rawalpindi. -- The Express Tribune paper

GILGIT: The Chinese government has provided Rs5 million for the education of Ugur students studying in Gilgit-Baltistan (G-B) and Rawalpindi.

Abdur Rehman Bukhari, the General Secretary of the Gilgit-Baltistan Chinese Overseas Association (G-BCOA), said on Wednesday, "The Chinese Ambassador to Pakistan handed over the money in a ceremony in Islamabad."

Known as Ugur, the Muslims community of China now settled in G-B and Rawalpindi had migrated from China's Sinkiang province before partition. The money will be spent on the education of students studying in G-B and Rawalpindi, meaning those of Ugur origin will not have to worry about tuition fees for at least one year, said Bukhari. He added that the funds for 2011 had been provided in advance.

There are nearly 5,000 Ugur families in Pakistan, many of whom have maintained ties with their relatives in Kashgar and other parts of Sinkiang. Bukhari said that around 500 students would benefit from the money and that G-BCOA would verify the data of students enrolled in various Pakistani schools before depositing their fees.

In 2010 the Chinese embassy in Pakistan arranged a post-Eid party for Ugurs in Gilgit. The party was attended by officials of the Chinese Road and Building Company and dozens of representatives of G-BCOA.

Pak businessmen urged to avail investment opportunities in GCC -- APP Pak businessmen urged to avail investment opportunities in GCC

4 February 2011 DUBAI — Pakistani businessmen in the UAE have been advised to take advantage of the immense opportunities in the UAE and the Gulf region as well as in several sectors of the emerging markets,

“Pakistan has everything to offer. It is matter of building confidence in ourselves,” Jamil Ahmed Khan, Pakistan Ambassador to the UAE, told members of the Pakistan Business Council, Dubai.

“With 40 per cent of the world’s liquidity, the Gulf region has so much to offer to the world. Major growth is also taking place in the region’s defence sector,” the ambassador said, asking PBC members to tap on these opportunities and draw maximum benefit from them.

Khan said that as a result of fast economic growth at home, India will not be in a position to provide labour to the Gulf region in next six to seven years. “This gap can be filled by Pakistan,” he said adding that the Pak businessmen can also benefit from the investment that would be taking place in countries on the silk route.

Khan said that he had arranged meetings with the CEOs of Korean and Turkish companies operating in the UAE. Korea alone has \$50 billion investment in the UAE. These companies need men and material for their projects and Pakistan can meet their manpower needs, he said.

He said that the funds have been approved for additional equipment and manpower at the Pakistan Embassy and the Consulate to expedite the issuance of machine-readable passports and NADRA identity cards.

“We are in the process of giving contract for the works and expect the project to benefit the community in about six weeks,” Khan told Khaleej Times on Sunday.

Pakistan Consul General Tariq Iqbal Soomro said the introduction of an evening shift for passports and NADRA cards at the consulate had reduced the pressure on the morning shift and allowed the community to visit the consulate at their convenience.

Tahir S. Schon, President of the Council, said they planned to publish a regular newsletter and a business directory. At present the Pakistan Business Council of Dubai has over 300 members comprising of active Pakistani Businessmen and companies from various trade and Industrial sectors in UAE.

He said that the council has eight events scheduled for this year. They are: SAARC and PBC joint networking breakfast in February, Business with China and the Far East seminar for traders in March, Opportunities in the GCC interaction with all the top GCC Business Councils in April, family outing in May, a seminar on Islam and Business in June, presentation on UAE inheritance law in July, Eid get together and musical evening in September, and Pakistan Business Mela in October.

Certificates were distributed among 12 senior members of the Council.

Zardari urges construction of smaller dams on war footing -- APP

Zardari urges construction of smaller dams on war footing

Staff Report

ISLAMABAD: President Asif Ali Zardari on Friday advised to undertake completion of small dams on war footing as this would not only help the development of land and water resources to harness their full potential but would also generate employment opportunities for the poor besides distribution of state lands of the command areas amongst poor women.

The president said this during a presentation given to him at the Presidency regarding the progress made so far in building small and medium dams in various parts of the country. The presentation was attended by Secretary General to the President Salman Faruqi, Sindh Minister for Finance Syed Murad Ali Shah, Sindh Minister for Irrigation Jam Saifullah Dharejo, WAPDA Chairman Shakil Durrani, President's spokesperson Farhatullah Babar and senior officials of the concerned federal and provincial departments.

President's spokesperson, Farhatullah Babar, said that in line with the vision of the president to concentrate on building a number of small to medium dams, the presentation was in continuity of the previous meetings held to review the progress made so far in this regard.

Babar said that the president during the meeting emphasised upon the adoption of sprinkler irrigation and solar pumps irrigation. He said the government has envisioned to take advantage of public-private partnership in such projects to ensure efficiency, effective monitoring and early completion of the projects.

The briefing informed that financial assistance of \$700 million from Exim Bank of China has been arranged. It also informed that 200,000 acres of land would come under command areas of the three dams, namely Derawat, Nai Gaj, and Naulong. The president hoped that the involvement of Pakistan Agriculture Research Council (PARC) and Institute of Water Resources and Hydropower Research China (IWHR), being the specialised organisations, would help in utilising full benefits of small/medium dam projects.

Pak-US group agrees to add 10,000MW to national grid -- APP

Pak-US group agrees to add 10,000MW to national grid

Hanif Khalid

Monday, February 14, 2011

ISLAMABAD: The Pak-US energy sector working group has discussed a five-year public sector power generation enhancement plan (PSPGEP) 2010-15 whereby 10,000MW new capacity would be added to the national grid.

The plan, for the first time lays down various locations, technologies and fuel that will be used to achieve the envisaged additions, says an official document made available to The News here on Saturday.

According to the document, the plan firmed by the Pakistan Electric Power Company (Pepco) has been discussed between the Pakistan and US teams for concept clearance. It says as the National Power Plan 1994 is also under review by the Pepco and National Transmission and Despatch Company (NTDC) for updating till 2030, the PSPGEP would add on to it rather would act as a catalyst.

To obviate the capacity-specific de-rated position, the implementation and execution of eight schemes have been discussed between the two working group leaders, Secretary Water & Power Javed Iqbal and David Goldwyn and David Lipton.

Among these schemes, the power plants that are under execution by the Northern Power Generation Company Limited (NPGCL) or Genco-III include the new combined cycle power plant project at Nandipur with the power generation capacity of 425MW and new combined cycle power plant project at Chichoki Mallian with the capacity of 525MW while the Central Power Generation Company Limited (CPGCL) or Genco-II is executing the combined cycle power plant replacement project at TPS Guddu with the capacity of 747MW.

The prospective power plants contemplated for replacement of old and inefficient machines and taken up with the US side for support included 350MW at NGPS Multan, 350MW at SPS Faisalabad and 200MW combined cycle plant at TPS Shahdara.

The projects will be executed by Genco-II. The future projects to be executed by Genco-III include 120MW combined cycle plant at TPS Sukkur and 200MW combined cycle plant at TPS Quetta.

"The implementation of exhaustive power generation programme being capital intensive has been suggested for financing through a combination of internal and external investments originating from the domestic Public Sector Development Programme, public-private partnership, grants/loan from MLBs/US-supported aid agencies and bridge financing modes," the document says.

According to the document, the US side was informed that during the preceding years the Gencos remained deprived of firming up power generation building capacities as no significant addition of higher capacity power plants could be made in the system.

China 2nd largest global economy and opportunities for Pakistan ((Important)) -- By Mehmood-UI-Hassan Khan

China 2nd largest global economy and opportunities for Pakistan ((Important))
Feb 15 2011.By Mehmood-UI-Hassan Khan

According to recent official figures of the Japanese government and the IMF (2011), China has surpassed Japan and succeeded to become world second largest economy after the US. The country of 1.4 billion souls has achieved it after three decades of spectacular socio-economic growth. During this period despite global economics recessions and financial crunches, China's economy stood firm, stable and sustainable.

The above diagram clearly verifies that China has been eclipsing Japan economically and now its GDP stand at US\$5.879 trillion which is grater than Japan's GDP US\$5.474 trillion. Many international economists around the globe are forecasting that China will pass the United States as the world's biggest economy as early as 2030. America's gross domestic product was about \$14 trillion in 2009.

In recent years, China has started to reshape the existing global economic order and system by virtue of its growing dominance of international trade, its huge deposits of foreign exchange reserves and United States government debt and its voracious appetite for oil, coal, iron ore and other natural resources.

The above given diagram indicates China's leading trade partnership with many countries around the globe. China is already a major driver of global growth. China the new economic superpower has begun to assert greater influence in Asia, Africa and Latin America by promoting bilateral trade, investments and joint ventures of multibillion dollars.

Beijing has also determination to shape global dialogues on a range of issues and it asserts that the dollar must be phased out as the world's primary reserve currency. And while the United States and the European Union are struggling to grow in the wake of the worst economic crisis in decades, China has continued to climb up the economic league tables by investing heavily in infrastructure and backing a \$586 billion stimulus plan in 2009-2010. According to the latest data of the World Bank (January, 2011), China's economy is forecast to expand about 10 percent in 2011 continuing a remarkable three-decade streak of double-digit growth.

According to the Washington-based institute for international economics in terms of purchasing power, China overtook the U.S. as the world's largest economy in 2010. It further elaborated that in purchasing power parity (PPP) terms the size of China's economy was U.S. \$14.8 trillion in 2010, compared to the U.S. economy's \$14.6 trillion. It is now the world's biggest auto market and the largest energy consumer.

New Chinese model of economic growth

During the recent time of global economic and financial crises the government of China introduced new economic growth model due to which it has succeeded to mitigate the bad effects of ongoing global economic recession on its macro-economy.

- (a) Role of the state, concentrates much more on increasing domestic demand for the products of the expanding industrial base.
- (b) Relies on building trading ties with the countries in its immediate neighborhood.
- (c) Paradigm shift in structure of the economy.
- (d) Mega projects of urbanization in order to discourage migration process
- (e) Exports-oriented policies and mechanism
- (f) Equitable exchange rate management
- (g) High levels of domestic savings invested in United States Treasuries.
- (h) Active participation of private sector
- (i) Renewal of agricultural sector especially in western provinces such as Xinjiang and Gansu.

Vast opportunities for Pakistan

Pakistan and China have jointly declared 2011 as “Pak-China friendship year” in recognition of 60 years of exemplary, all-weather friendship that has stood the test of time. Being the second largest economy of the world offers vast opportunities for the government and private sector in the country in the fields of energy, construction, agriculture and science and technology etc. China has already become the second leading economic partner of Pakistan and its entrepreneurs are making huge investments in the country. The Chashma power plants, heavy mechanical and electrical complexes and Gwadar deep sea port are the prime examples of Chinese huge investments in Pakistan.

During the recent visit of Chinese Prime Minister Wen Jiabao both countries signed 17 agreements, four MoUs and one joint venture worth \$15 billion for investment in various sectors of the economy. Moreover, both the countries agreed to initiate a new 5 year development plan.

The public-private sector of Pakistan is keen to extend ties with Chinese firms in the field of energy in order to overcome its severe energy shortage. Many Chinese companies such as Harbin Power Engineering Company Ltd., Dongfang Electric Corp., CWE, Sinohydro Corp., Zhongyuan Engineering Group, Gezhouba Group, CMEC, and CMC are working in the energy sector of Pakistan. Chinese private companies are engaged with 40 projects amounting \$5 billion of hydropower, thermal power, nuclear power, and electricity transmission and transformation. Chashma Nuclear Power Plant II and the Neelum-Jhelum Hydropower Station and the Sardhi wind power project are the prime examples of extended Pak-China energy cooperation. Remarkably, a project of \$6.5 billion generating 2,300MW of electricity through wind turbines and solar panels was also recently signed.

The bilateral trade between the two countries was \$6.8 billion in 2008, which was higher by 30 per cent as compared to the 2007. Bilateral trade volume in the first five months of 2010 increased by 31 percent and Pakistan's exports to China grew by 72 percent, as compared to the same period 2009. It is expected that trade between Pakistan and China is likely to surge to \$18 billion in the next 5 years.

Pakistan needs to extend bilateral ties in the fields of agriculture, seafood, basic raw materials, coal and marble. It must set up joint ventures with Chinese private companies with buy-back arrangements due to which our labours can learn Chinese technology, increase productivity as well increase yield per acre, and export backed arrangements with China will help us to further increase its exports to China.

Expected cooperation

Sectors

Defence production, Reko-Diq Copper Mining project in Balochistan, energy generation, technology development, industrial base and software park building and communications infrastructure to promote ICT sector, including e-government, e-commerce and e-enterprise.

According to the central bank of China (January, 2011) rose by \$199 billion to \$2.85 trillion, the biggest quarterly gain since 1996. Pakistan and China agreed to start currency swap which could be win-win situation for both the countries.

Concluding Remarks

Pakistan and China are strategic friends and now being the second largest economy of the world prospects are very bright to further strengthening of bilateral trade relations between the two countries in the days to come. The government of Pakistan must protect the Chinese interests as well as investments in the country. Joint ventures with China hold the key of success for Pakistan.

APP

UNDP to build 100,000 houses for flood affected people of Sindh
KARACHI, Feb 21 (APP) - United Nations Development Programme (UNDP) will build 100,000 residential units (houses) to provide shelter to flood affected people in Sindh. This was stated by Administrator of UNDP Ms. Helen Clark while talking to media on Sunday at village Bagho Tewno near Khairpur Nathan Shah, some 300 kms from here after handing over ownership documents of two- room houses under the rehabilitation programme for the flood affected people of the province. She said the cost of one house is US dollars 1000.

She said that so far, dollars 80 to 90 million have been spent from committed US dollars 120 million in aid for flood affected people in the province.

She said UNDP is working with the federal and provincial government to work out the need for housing in the flood affected areas.

The UNDP Administrator said that 800,000 houses have been damaged in Sindh alone and added that other donors including World Bank and donor countries were mobilising funds for the rehabilitation of the flood victims.

Ms. Helen, who is second in command after Secretary General Ban Ki-moon and a former prime minister of New Zealand said that she was pleased to see that locals were working to rehabilitate their houses in collaboration with funding agencies and government.

Meanwhile, she was informed that there was dire need for supply of more water pumps to flush out the water from flood-hit areas.

A director of UNDP, Ajay Chavvar, Sindh Minister for Rehabilitation Muzaffar Shujra, Provincial Advisor to Chief Minister on Economic Affairs, Qaiser Bengali and Local MPA Imran Leghari were also present on the occasion.

Tokyo, Feb 22 (ANI): Pakistan President Asif Ali Zardari said that Japan should extend similar kind of cooperation to his country on peaceful uses of nuclear energy like that of India. -- ANI

Tokyo, Feb 22 (ANI): Pakistan President Asif Ali Zardari said that Japan should extend similar kind of cooperation to his country on peaceful uses of nuclear energy like that of India.

"If Japan is willing to cooperate with India in nuclear technology and is giving nuclear technology for peaceful purposes, I do not see any reason why we should not deserve the same," The Nation quoted Zardari, as saying.

On being asked whether he would raise the question of nuclear technology cooperation during his meeting with the Japanese counterpart, Zardari said: "I do not know what questions would be raised during discussions. It depends upon the circumstances there."

Both India and Pakistan are not signatories to the Nuclear Non-proliferation Treaty, and the talks between Japan and India have raised concerns among survivors of the 1945 US atomic bombings of Hiroshima and Nagasaki, who fear that such negotiations could splash water on global efforts for a world without nuclear weapons, the paper said.

Japanese firms, however, have keen interest in providing nuclear power generation technology and related equipment to India, which plans to build 20 new nuclear power plants by 2020.

Zardari refuted report media reports that Pakistan has more nuclear weapons than India, saying, "There is always a difference between facts and fantasy." Zardari, who has already arrived in Japan, is scheduled to hold talks with Prime Minister Naoto Kan and meet with Japanese business leaders and companies doing business with Pakistan. (ANI)

Zardari's Japan visit brings tangible benefits for Pakistan -- APP

Zardari's Japan visit brings tangible benefits for Pakistan

By Munir Hussain

ISLAMABAD, Feb 24 (APP): The visit of President Asif Ali Zardari to Tokyo has given a new impetus to bilateral relations as political and business leaders of Japan finalized proposals for investment in various sectors in Pakistan. During his visit, President Zardari met with Japanese business leaders, who showed keen interest in making further investment in industrial, infrastructure, energy and railway sectors in Pakistan. Japan is the fourth largest investment partner of Pakistan.

During the visit, Tokyo offered over Rs. 14 billion interest-free loan to Pakistan for rebuilding roads and bridges destroyed in the devastating floods in Khyber Pakhtunkhwa. This loan is repayable after 40 years at a nominal interest rate of 0.01 per cent and will be utilized for building 400 kilometers of rural roads, 120 kilometers of provincial roads and over two kilometers of bridges that were washed away during the floods.

President Zardari held talks with Japanese Emperor Akihito, Prime Minister Naoto Kan, Foreign Minister and Minister for Economy, Trade and Industry and explored avenues to strengthen the already existing bilateral ties in multifaceted fields.

The Japanese investors agreed to set up special captive power plants in a special economic zone and offered trade concessions to Pakistan.

The two sides agreed to begin joint ventures in food and agriculture, energy, water resources, infrastructure development and for establishing of a special economic zone near Karachi over an area of 2,000 acres for investment by Japanese entrepreneurs.

Emperor Akihito and Prime Minister Kan appreciated and recognized Pakistan's role in the war on terror and noted numerous sacrifices of its security forces and people.

The visit laid the groundwork for a tripartite conference of corporate leaders of Afghanistan, Pakistan and Japan to further explore the prospects of joint economic collaboration in the border regions for the uplift of tribal areas as a means of fighting militancy.

For decades Japan has been assisting Pakistan in social, health and education sectors. Japan has also played a key role in holding the first meeting of Friends of Pakistan in Tokyo.

During his meetings, President Zardari stressed on establishing a regular dialogue mechanism at the level of foreign ministers, for enhanced market access through FTA and GSP plus trade concessions, educational and vocational training for FATA (Federally Administered Tribal Areas), enhanced Japanese ODA and support for upgradation of infrastructure in Khyber Pakhtunkhwa for facilitating trade on the Pak-Afghan border and beyond.

President Yamaha Motors told President Asif Ali Zardari during a meeting in the Japanese capital that Yamaha Motors Pakistan will spend \$150 million and set up a new plant at a 50-acre plot in Bin Qasim.

Yamaha Company would bring advanced technology to Pakistan initially manufacture 22,000 motorcycles of 125-150 cc with EFI engines per year and during next ten years the annual production of its factory will reach 750,000. The project is expected to create 45,000 jobs.

China, Pak to enhance military ties

25. February 2011

China and Pakistan have announced a packed military exchanges' schedule in 2011. This would include two joint military exercises, Chinese media quoted visiting Pakistan Joint Chiefs of Staff Committee chairman Gen Khalid Shameem Wynne as saying on Wednesday. The two countries would participate in a multinational naval drill in March besides two bilateral army and air force exercises. Chinese People's Liberation Army chief Gen Chen Bingde told the Pakistani general that China is willing to work with his country to develop the mechanism of defence and security talks, deepen strategic cooperation and contribute to the peace, stability and common development in the region and the world, the official Xinhua news agency reported.

President Asif Ali Zardari met Saudi Second Deputy Prime Minister Prince Nayef bin Abdul Aziz Al-Saud in Kuwait on Saturday night to discuss bilateral relations and the current situation of the region.

The late-night meeting was held at the Bayan Palace after the two attended Kuwait's golden jubilee celebrations.

President Zardari visited the Gulf state on a special invitation from Kuwait's Amir, Sheikh Sabah Al-Ahmad Al-Sabah, to attend celebrations marking his country's independence day.

Pakistan's Ambassador in Kuwait Iftikhar Aziz said that the president also urged upon the Kuwaiti leadership to increase the number of Pakistani skilled labourers in the country.

Talking to PTV, Aziz said the President discussed bilateral ties and the enhancement of trade between both the countries with the Amir of Kuwait, the crown prince as well as other dignitaries.

He said that the president's visit should prove to be productive by attaining more investment opportunities. Aziz said that more than 153,000 Pakistanis are currently working in Kuwait, who send \$450 million remittances annually to Pakistan.

Swiss chamber attracting Pak textile producers -- app

Swiss chamber attracting Pak textile producers
Amanullah khan

Karachi —A large trade delegation from Pakistan is scheduled to visit Switzerland in May to explore business opportunities and boost bilateral trade between the two countries; this was announced by the Consul General of Switzerland, Didier Boschung at a meeting with office bearers and members of Korangi Association of Trade and Industry (KATI). The Swiss diplomat also invited the KATI industrialists to also become a part of the delegation which is being organized by Swiss Business Council (SBC) with the collaboration of Swiss Asian Chamber Zurich and Swiss Consulate General Karachi.

“I am optimistic that the business alliance of these two bodies will open new doors and create new business opportunities to further stimulate economic ties between the two countries”, Boschung said. He said that textile machinery is the major import into Pakistan from Switzerland and the Swiss manufacturers have received very good response in the largest textile machinery exhibition – Megatech 2011 recently held at Lahore Expo Centre.

He said that about 99 per cent of all companies in Switzerland are belonged to the SMEs sector and provide 67 per cent of all jobs. He further said that the bilateral trade between the two countries was reached to half a billion Swiss francs in 2008 but it fell down to 360 million francs in 2010 due to economic slow down. He however said that the Switzerland is the 5th largest foreign investor in Pakistan .

Boschung said that Switzerland has joined Schengen Space in 2008 and the businessmen and visitors can enter into Switzerland with the Schengen Visa. He informed that applications for Schengen visa can be submitted to the Embassy of Switzerland in Islamabad via the Fedex/Gerry's visa services in Karachi or directly at the visa counter of the Embassy.

China begins construction of Fast Attack Craft for Pak Navy -- APP

China begins construction of Fast Attack Craft for Pak Navy

China Pakistan Navy

Posted On: Mar 04, 2011

A file photo. BEIJING (PTI): China recently began the construction of two state-of-the-art fast attack missile crafts for the Pakistan Navy in addition to several naval frigates it is building for its close strategic partner.

The keel-laying ceremony of Fast Attack Craft FAC(M) of Pakistan Navy was held at Xingang Shipyard in China's Tianjin city.

Pakistan Navy has signed a contract with China Shipbuilding & Offshore International Company Limited (CSOC) for construction of two state-of-the-art missile crafts which will be equipped with latest weapons and sensors.

According to the arrangement, one craft would be built in Tianjin while the other would be constructed at Pakistan's Karachi docks.

The first craft was expected to join the force in October this year. There is no word about the financial arrangements for the construction of the two vessels.

China, a major supplier of weapons systems to Pakistan, is involved in a host of defence projects with its close ally.

These included development of new fighter aircraft JF-17 Thunder which is being produced in both the countries with engines supplied by Russia.

China is also constructing a number of naval frigates for the Pakistan Navy which so far took delivery of three frigates and the fourth one is being constructed with Chinese cooperation in Karachi Shipyard and Engineering Works.

The commencement of the construction of the new missile boats followed the visit of Chairman Joint Chiefs of Staff Committee of the Pakistan Army, Gen. Khalid Shameem Wynne last week to take part in the eighth round of security dialogue between the two countries.

The talks focussed on finalisation of new projects to expand their defence cooperation as well as steps for timely completion of ongoing projects.

US asked to fund Bhasha Dam under KLL -- APP

US asked to fund Bhasha Dam under KLL

Mehtab Haider

Friday, March 04, 2011

ISLAMABAD: Pakistan has formally requested the USA to provide \$7.5 billion for 40 development projects, including the Diamer Bhasha Dam, under the Kerry Lugar Law (KLL). The funding for this crucial hydropower project may be made part of financing plan for the next financial year 2011-12, it has been learnt.

Initially, Islamabad made a request for 39 development projects with estimated cost of over \$12 billion and Bhasha Dam was not part of that wish list. "But recently, Pakistan made a fresh request to include construction of this mega project as part of \$7.5 billion funding coming over the next five years in shape of KLL," one of the top officials of economic team revealed while talking to a select group of journalists here on Thursday.

Dwelling upon the lingering controversy over Raymond Davis episode that harbours the potential of derailing bilateral ties between the two countries, the official confided that John Kerry during his latest visit to Pakistan asked the concerned authorities about specific measures required to be taken by Washington to end this confrontational atmosphere between the two countries.

He said that Pakistan forwarded 40 projects of four major areas including energy, food security, human resource development and others. "If USA agrees to provide

much less amount even \$5 to \$10 million for construction of \$11.5 billion Bhasha dam it will help to lure other multilateral and bilateral donors in a great way," the official added. He said that the Asian Development Bank (ADB) had asked the government to evolve consensus on Diamer Bhasha Dam among the federal government, four provincial governments and Northern Areas and also made payments for land acquisition. The Council of Common Interest has granted its approval for Bhasha dam and payment of compensation for land acquisition is also underway, he maintained.

When asked about the slow release of funds under KLL, the official said that the process of donor funded projects took more time as completion of mechanism starting from opening up assignment account, arrangement of counterpart funds in Pak rupee and proposal for request (RFP), bidding and many other hectic requirements consumed a lot of time. "It is an achievement that USA has agreed to provide around \$874 to \$900 million through government's sponsored agencies and ministries concerned out of total \$1.5 billion per annum under KLL," he further said.

He said that USA had provided \$180 million during the last financial year that included \$75 million for Benazir Income Support Programme (BISP), \$45 million for HEC and \$65 million for Malakand IDPs. During the ongoing financial year, USA has provided \$60 million for Post Flood Recovery and was going to provide \$190 million for Citizen Damage Compensation of flood affected areas. Pakistan and USA have also assigned \$40 million for Gomal Zam dam and \$26 million for Satpara dam and these funds are expected to be released soon. He said that the government had estimated to receive around \$4 billion during the current fiscal year but it is likely to face a shortfall owing to Islamabad's inability to arrange counterpart funding in the wake of financial constraints.

Multi-million dollars LNG import project in doldrums -- app

Multi-million dollars LNG import project in doldrums

By: Ahmad Ahmadani | Published: March 05, 2011

PrintFacebookDiggStumbleUponText Size

ISLAMABAD – The fate of multi-million dollars Mashal Liquefied Natural Gas (LNG) integrated import project is in doldrums as it has been delayed for yet another time on technical grounds, sources informed on Friday.

Sources in the Ministry of Petroleum and Natural Resources told The Nation that one other major reason in the delay in re-tendering of the project was site of its change as site from onshore to offshore operations so the proposed multi million dollars LNG supply project has been delayed because of technical hitches.

“Since this requires highly technical studies to proceed on with the proposed project, therefore, new technical studies have to be completed before re-tendering of the project”, sources added.

Zaar Qadir, Spokeperson of Ministry of Petroleum and Natural Resources on Friday while talking to The Nation informed that by early June 2011 necessary requirements regarding award of re-tendering of multibillion dollars import of LNG and setting up Liquefied Natural Gas terminal project would be completed. He said the government has decided to change the site from on shore (Port Qasim Karachi) to a new offshore site. “ I am hopeful that after the completion of both Met Oceanographic Study and Environmental Impact Assessment Study (EIAS), the concerned authorities will be able to award the tender”, he said adding that this due process would take two months to complete the above said required studies.

Over a question, spokesperson of Petroleum Ministry however seemed hopeful and replied that during first half of 2013, the Government of Pakistan would be able to commission the tender. “ It would be an open tender where any party either new or old can participate”.

Sources in Petroleum Ministry privy to this development informed that after the debacle of GDF-Suez and Dutch firm 4Gas LNG supply deal, the cash strapped PPP-led government would float a tender to invite companies to participate in a bid for import of LNG and setting up Liquefied Natural Gas terminal project in light of Economic Coordination Committee (ECC) of the cabinet to float tenders for multimillion dollars Mashal Liquefied Natural Gas (LNG) integrated import project in June 2011.

It may be recalled that on February 11, 2011, Imtiaz Qazi Secretary Petroleum Ministry while talking to this correspondent informed that the tender would be floated in mid of February, 2011 through international media and private parties would be invited. Over a question, he said that bid would be invited in three phases, first bid will be for met ocean graphic study as it is not a fix terminal and will be located in off-shore, second bid will be for environment impact assessment study (EIAS) and third bid will be for initiating physical work, he added.

PESHAWAR: Governor Khyber Pakhtunkhwa, Barrister Masood Kausar Saturday said that Pakistan and Turkey enjoys remarkable people to people cordial relations, but there is need to further cement these friendly ties in boosting economic cooperation among both -- app

PESHAWAR: Governor Khyber Pakhtunkhwa, Barrister Masood Kausar Saturday said that Pakistan and Turkey enjoys remarkable people to people cordial relations, but there is need to further cement these friendly ties in boosting economic cooperation among both the brotherly countries.

He expressed these views while addressing a ceremony held here in connection with officially handing over of Honorary Consul Generalship of Turkey to Senator Salim Saifullah Khan.

Turkish Ambassador, Mr. Mustafa Babur Izlan, Former honorary Consul General, Brig (R) Mehmood Jan, Diplomats from Bangladesh, Afghanistan and other countreis, parliamentarians and high ranking officials attended the ceremony.

Governor Barrister Masood Kausar said Pak and Turkey are two brotherly countries having much similarity in culture, tradition and history. Both the countries, he

continued, stood behind each other and supported the cause of each other at time of need and crisis.

Infact, he added, Pakistan is mostly at the receiving end at time of need in crisis like natural disasters or military adventures with neighboring country.

Turkey remained the first country which provided help and assistance to Pakistan in the wake of devastating earthquake and floods. People cannot forget practical support of Turkey to Pakistan in 1965 and 1971 wars, he added.

However, its time to boost economic relations between Pakistan and Turkey, Governor reiterated.

Speaking on the occasion, Turkish Ambassador, Mr. Mustafa Babur Izlan said brotherly relations between Turkey and Pakistan are strengthening with every passing day.

"It is gratifying to note that in the development of relations between our two brotherly countries, a stage has now been reached where this relationship can serve as a model for many other states to follow," he added.

Turkish Ambassador added that built upon such sound foundations, the cordial relations between Pakistan and Turkey have stood the repeated tests of time. Politically, we have been supporting each other in all international forums.

Mustafa Babur said he and his Turkish fellows always consider Pakistan as their next home.

He said its time to vow on this auspicious occasion that we shall spare no efforts to further strengthen the fraternal ties between our two countries through mutual cooperation in all fields.

New Honorary Consul General of Turkey, Senator Salim Saifullah Khan in his speech said his priority will be further strengthening already existing strong cultural and religious bonds between people of Pakistan and Turkey.

He said he will also endeavor to explore avenues for joint ventures of Pakistan and Turkey for the economic stability and prosperity of our country. He said we should have to learn and benefit from the experience and success of Turkey who has recovered from a very problematic situation to a strong economic country.

He also called for a special meeting to discuss opportunities through which Pakistan can benefit from Turkey.

Earlier, Turkish Ambassador for handover exequatur to newly Honorary Consul General of Turkey, Salim Saifullah Khan. He also hoisted Turkish flag at the resident of Senator Salim Saifullah Khan.

Cheema said that according to an industrial survey, 17-year-old machinery was being used by the Pakistani industrial sector, which consumed 3,000 megawatt extra electricity. Similarly, in the agriculture sector, outdated machinery was used in tubewells, which cost higher, he said and added that if the energy conservation programmes would not start, Pakistan could face severe loadshedding. He called for a change in lifestyle for energy conservation plans and said that the work, which could be done in daylight, should not be delayed. Dr Arafa Syed said that the Wapda employees got free electricity thus they did not bother for energy conservation. She said rulers after coming into power forget the needs of public.

Punjab University Vice-Chancellor Prof Dr Mujahid Kamran said that in Pakistan, successive governments continued the policies on nuclear programme while the rest of policies and projects were closed. He said if the successive governments would not have disturbed the power generation programmes, then there would have been more mega dams constructed in Pakistan.

Former commerce minister Humayun Akhtar Khan said previous political and dictatorial governments were responsible for power crisis in Pakistan. He said if the PPP would construct the Kalabagh Dam, they would forgive their all corruption and misdeeds. He said the PPP must educate the people of Sindh that the KBD would be favourable and beneficial for them. He said their government had approached the Chinese government for energy generation project for Thar coal but it did not respond.

Brazil to invest in Ethanol and Bio Fuel sector in Pakistan -- APP

Brazil to invest in Ethanol and Bio Fuel sector in Pakistan

RAWALPINDI: Brazil would invest in Ethanol and Bio Fuel sector in Pakistan to overcome the prevailing energy crisis of the country. The Brazilian Embassy would facilitate the Pakistani business community to enhance the bilateral trade between the two countries.

This was stated by the Brazilian Ambassador Alfredo Leoni while talking to the traders and industrialists during his visit to the Rawalpindi Chamber of Commerce and Industry (RCCI) here on Wednesday.

Alfredo said that his country has developed Bio fuel and Ethanol sector and eager to assist Pakistan in this sector. He said that his country was fully aware of the energy crisis of Pakistan and keen to help her friend in the said sector.

The Ambassador said that Brazil is the third largest sugar producer of the world and can help Pakistan to curb the sugar crisis as well. He stressed the need of the continuous contacts of the business communities of the both countries to gear up the trade relations. He ensured his full cooperation in this regard.

Speaking on the occasion President RCCI Ali Raza said that Brazil has achieved immense progress in agriculture , mining and service sectors. "Brazil must help Pakistan for the betterment of the said sectors in the country", he added. President RCCI said that trade volume between the both country is around \$170 million which is very low, it is need of the hour to promote the trade activities between the two friend countries.

KARACHI: The Karachi Electric Supply Company (KESC) has signed a Memorandum of Understanding (MoU) with a Chinese company to convert two of its boilers at the Bin Qasim Thermal Power Station from furnace oil to coal, said KESC Manager Strategic Planning and Business Development Ammar Ali Talaat.

The conversion aims to reduce KESC's reliance on furnace oil and will result in cost savings for the company and the consumers in the form of tariff reduction, he said while speaking at an energy awareness conference, organised by KESC at NED University here on Saturday.

He pointed out that Pakistan can save approximately \$1 billion if power plants are converted to coal from furnace oil.

KESC to install 300MWcoal-based power plant -- APP

KESC to install 300MWcoal-based power plant

our correspondent

Sunday, March 06, 2011

Karachi

The Karachi Electric Supply Company (KESC) has partnered with a British company for its Thar coal power project as the foreign company would do the mining while the KESC would install a coal-based power plant of 300 Megawatt (MW) whose capacity will be enhanced to 1200 MW in future.

Participants of an energy awareness conference, held here on Saturday, were informed that the KESC had signed a Memorandum of Understanding (MoU) with a Chinese company for the development of Sonda-Jherruck Integrated Coal Mine and Power Plant Project in District Thatta. The annual production of this project would

be 1.8 million tonnes of coal.

The conference held at the NED University of Engineering & Technology was aimed at creating awareness among the university students about need to shift from traditional energy resources to renewable energy. The KESC was the main sponsor of the event

Addressing the NED University students on the use of coal power as an alternative energy source in Pakistan, a KESC official Ammar Ali Talaat, said the KESC had earlier signed another MoU with a Chinese company to convert two of its existing boilers of Bin Qasim Thermal Power Station from furnace oil to coal.

The conversion aims to reduce KESC's reliance on furnace oil and result in cost savings for the company and for power consumers in the form of tariff reduction.

The KESC official said that coal was keeping pace with consumer electricity demand and according to a recent study coal would still account for about 45 to 50 per cent of world's power generation in 2025.

Pakistan has huge reserves of coal and it provides the best solution for its energy crises, said the KESC official.

The speaker at the conference pointed out that in Pakistan the potential 3000 MW power plants run on furnace oil and if measures are taken to convert these power plants to coal, the country will be in a position to save approximately one billion dollars.

Pak firm offers dates to Spanish chain

By our correspondent

Sunday, March 06, 2011

ISLAMABAD: A Pakistani firm has offered a major Spanish retail chain to import dates from Pakistan, a statement said.

Harvest Tradings Chief Executive Officer Ahmad Jawad offered supply of Pakistani dates to the visiting El Corte Ingles Group delegation, headed by Borja de la Cierva. El Corte Ingles is the 34th largest retail chain in the world the statement said.

Pakistan is the fourth largest producer of dates and is rated among the largest producers of date palm in the world with over 150 different varieties, Jawad said in the statement.

He urged with the Food and Agriculture Ministry to devise a strategy to promote value added date exports and date processing through private and public sector partnership.

"The projected target of date exports from Pakistan till June 2010 was 160,000 tonne worth \$55.0 million, but due to packaging delays we could not achieve target," he said.

Pak-Bosnian trade may rise five times: envoy -- app

Pak-Bosnian trade may rise five times: envoy

Mehtab Haider

Saturday, March 06, 2011

ISLAMABAD: The bilateral trade between Pakistan and Bosnia can be increased five times over the medium-term from the current two million euros per annum, Bosnian Ambassador to Pakistan Armin Limo said in an interview with The News.

Islamabad can use Bosnia to send its products to different European countries, he said. "Pakistan can send its products to Bosnia directly. Currently Pakistani made-ups are reaching our homeland through other countries that results in increased prices," the Ambassador said during the one-hour talk at the Bosnian embassy.

He said that they could help Pakistan in areas of energy and defence production as Bosnia possessed expertise in these two sectors. He said that Bosnia possessed expertise in construction of mega dams, transmission lines and grid stations and Pakistan could utilise its experience to overcome its energy crisis.

“During the era of former Yugoslavia, our Army was one of the biggest in the region so defence production is also remarkable. We can provide assistance to Pakistan in this regard.”

Limo said that Bosnia was making efforts to become part of EU and improved bilateral ties with Pakistan could help the country to boost its exports in years ahead when Bosnia would possibly join the 27-member bloc.

The Ambassador said that they were arranging Sarajevo Business Forum (SBF) from April 6 to 8 in Bosnia this year in which 30 to 40 businessmen from Lahore, Karachi, Islamabad and other cities would participate. “This year’s Sarajevo Business Forum will feature projects from energy, infrastructure, tourism, agriculture, wood industry, education, construction and banking,” he said.

The first SBF was held last year in which investors identified 157 projects worth \$15 billion for cooperation. The Ambassador said that this year organisers were aiming to attract even larger number of international investors willing to support projects or enter joint business ventures.

Limo said that they would invite Pakistan’s minister for tourism to attend the forum, which aimed to attract foreign investment for the country.

He said that the five independent states that had been part of former Yugoslavia now possessed population of over 20 million and Pakistan could boost trade ties with them by enhancing its exports of textile, rice and surgical and sports goods.

In the upcoming SBF, he said, more than 600 delegates would participate with whom Pakistani businessmen could develop networking to boost business.

The Ambassador said that the two countries’ good relations needed to be translated into enhanced economic cooperation. He recalled that former Prime Minister Benazir Bhutto visited Bosnia in 1994 when they were passing through their most difficult time. He said they could not forget that gesture of Pakistan’s political leadership.

Bosnia and Herzegovina and its neighbouring countries are safe, stable and an excellent gateway to the EU countries, he claimed. They have modern legislation adapted to the highest international standards ready to accept foreign investors, he concluded.

.PPAF sets up wind turbines, solar panels for power generation Monday, 07 March 2011 16:09 0 Comments ISLAMABAD: The Pakistan Poverty Alleviation Fund (PPAF), in partnership with Aga Khan Planning and Building Services- Pakistan (AKPBS-P), has set up w -- app

.PPAF sets up wind turbines, solar panels for power generation Monday, 07 March 2011 16:09 0 Comments ISLAMABAD: The Pakistan Poverty Alleviation Fund (PPAF), in partnership with Aga Khan Planning and Building Services- Pakistan (AKPBS-P), has set up wind turbines and solar panels to provide environmentally friendly electricity to approximately 6,500 people in 29 villages of district Thatta in Sindh province.

According to PPAF sources, the AKPBS-P, with the support from PPAF, the World Bank and the contribution by the village residents in the form of unskilled labour, installed 29 wind turbines, 29 solar panels and streetlights in various villages located in Thatta, which were without electricity for decades.

The immediate benefit of electrification is improved lighting, which is much brighter, cheaper and safe than that provided by kerosene lamps, the sources added.

They said that by utilizing local and renewable energy resources instead of diesel for power generation, not only protect the environment but also stimulates economic benefits for an improved quality of life.

A key reason why this village has not yet benefited from an electric grid connection is its geographical isolation that offered an extremely low return on investment made in grid extension. This challenge required a local and cost-effective solution which was provided by PPAF.

Call to build mega dams, including KBD -- app

Call to build mega dams, including KBD

Jawwad Rizvi

Monday, March 07, 2011

LAHORE: Pakistan needs construction of mega dams, including the Kalabagh Dam, on an immediate basis in order to meet its ever increasing energy requirements. There is a need to start work on other energy generation resources besides taking concrete steps for energy conservation.

These views were expressed by the participants of a seminar on 'Energy conservation: public and new trends' here at a hotel on Sunday. The seminar was organised by the Mir Kalilur Rahman Memorial Society (MKRMS) and hosted by MKRMS chairman Wasif Nagi.

Speaking on the occasion, Chenab Group Chairman Mian Muhammad Latif said that the textile sector was playing the role of the backbone of the national economy by creating 19 million jobs but it was badly affected by the energy crisis, which had crippled it. He said that due to the crisis, majority of textile units were operational just for two days a week, adding that the crisis had deepened in the Punjab after the 18th Amendment. He said due to the energy crisis, 8,000 workers were unemployed during last the two years just from his textile unit. He said globally, the industry was prioritised with regard to energy supply while in Pakistan, it was neglected.

Qayum Hajzi criticised the government for not prioritising the industry in the energy supply. He suggested the industry to follow efficient energy consumption pattern and opt for energy conservation methods.

Chairman Electrical Engineering Department University of Engineering and Technology (UET) Dr Muhammad Kamran said that there was a need to focus on hydel generation instead of thermal generation as electricity produced from furnace oil was costlier than others. He called for energy conservation programmes in various departments along with reviewing the electricity distribution mechanism. He

said the work should initiate on the energy generation projects.

Prof Dr Nadeem Hayat Malik said the health sector was also affected due to the energy crisis. He said hospital equipment was also damaged due to fluctuations in voltage and interrupted power supply, seeking uninterrupted power supply to the health sector, especially hospitals.

Former managing director Pepco Thair Basharat Cheema said that there was a need to create an awareness among the public about the energy consumption and conservation. He said the per unit electricity cost generated from Bhasha Dam would be Rs8 during the first 10 years. He said in the first 10 years, the cost of energy from any hydel power project was always higher. He said China itself was facing energy shortage, how it could provide cheap electricity to Pakistan. He said it was negative propaganda that China was ready to supply energy to domestic users at Rs500 per house. Similarly, Iran never offered free power supply to Pakistan, he said, adding that in the past, Iran offered power supply at 3 cent per unit and was now asking 11 cents.

Pakistan to provide Tajikistan easy access to its sea ports: Zardari -- **APP**

Pakistan to provide Tajikistan easy access to its sea ports: Zardari
ISLAMABAD, March 7 (APP):

President Asif Ali Zardari said on Monday that Pakistan was ready to assist Tajikistan to provide an easy access to its ports, especially the Gwadar Port. In this context, he said, "we are ready to discuss the conclusion of a Trilateral Transit Trade Agreement between Pakistan, Tajikistan and Afghanistan." Addressing a banquet held at Aiwan-e-Sadr here in the honour of Tajik President Emomali Rahmon, Zardari said that Pakistan was ready to discuss frameworks that would facilitate trade and economic relations between the two countries.

"We are keen to create an interface between the private sectors of the two countries," the President said.

The President said that Pakistan-Tajikistan relations were rooted in the centuries old bonds of history, faith, culture and traditions and it was a matter of great satisfaction that this relationship was strengthening with every passing day.

"The mutual feelings of friendship trust and confidence are reassuring," he said.

Highlighting the shared objectives and aspirations of the two countries, the President noted that the two countries were determined to work closely to strengthen the whole range of bilateral relations.

He said that Pakistan and Tajikistan were determined to work together to promote stability, peace and development in the region.

The President said that the foundation of the relationship was laid by Shaheed Mohtarma Benazir Bhutto nearly 17 years ago when she had sent him as a special envoy of Pakistan to Tajikistan.

The President said that Shaheed Mohtarma Benazir Bhutto had a vision of promoting regional trade and connectivity.

He said, "had those policies been continued, we would have been at much better position today and had not faced many problems such as the present energy crisis."

The President, on this occasion, also emphasized that the people, intelligentsia, civil society, business community and media should step forward and take ownership of the policies for the sake of ensuring their continuity.

The President said that the present government was picking up the threads to enhance and further strengthen Pak-Tajik relations and pursuing the policies that would promote regional trade and enhance collaboration to meet the challenges facing the region and bringing in socio-economic development.

Appreciating close partnership of the two countries within the frameworks of Shanghai Cooperation Organization, Economic Cooperation Organization, Organization of the Islamic Conference and the United Nations, the President said, "we will continue to strive to strengthen our partnership with Tajikistan."

He said it was a matter of great satisfaction that the two countries share a vision of regional development and connectivity.

CASA-1000 project aimed at providing 1000 megawatts of electricity to Pakistan

through Afghanistan was a concrete step for the realization of such vision, he said. The President said Pakistan was keenly interested in enhancing air and road links to Tajikistan.

He said that their region faced challenges of extremism, terrorism, narcotics and organized crime. "We have to work closely to overcome these challenges in order to promote peace and stability in our region."

Talking about regional situation, the President reiterated that Pakistan would extend all assistance to Afghan brothers in their quest for peace and prosperity, based on the time tested principles enshrined in the United Nations Charter.

The President also thanked the government and people of Tajikistan for their generous humanitarian assistance for flood victims in Pakistan last year.

The President hoped that the visit of Tajik President to Pakistan would become a new milestone in the brotherly relations between the two countries.

In his remarks, Tajik President Emomali Rahmon assured of his government's commitment to enhance trade and energy connectivity to bring regional prosperity. He said that Tajikistan had enough hydel resources to provide electricity to not only Pakistan and Afghanistan but also to other regional countries.

Emomali Rahmon said the two countries needed to strive for multidimensional relations whose indestructible foundations were built by their forefathers.

He said his generation was raised in the spirit of Allama Muhammad Iqbal.

The Tajik President expressed satisfaction at the strengthening bilateral relations and said their ties would be a model for other countries.

US to give 40pc aid via non-govt sectorBy Our Staff Reporter | From the Newspaper -- APP

US to give 40pc aid via non-govt sectorBy Our Staff Reporter | From the Newspaper

March 7, 2011 (4 days ago)Mr Grossman, on his first two-day visit to Pakistan, held a meeting with Finance Minister Dr Abdul Hafeez Shaikh. - File Photo

ISLAMABAD: With more than 75 per cent payment of the Coalition Support Fund (CSF) still due, Pakistan and the United States agreed on Sunday to channel 60 per cent assistance under the Kerry-Lugar-Berman Act through the government and 40 per cent in civil society initiatives.

Pakistan sought a clear system of information-sharing from Washington and a joint mechanism for oversight of the funding to be disbursed by the US through civil society organisations.

New US Special Representative to Pakistan and Afghanistan Marc Grossman will hold discussion on the joint oversight mechanism with the top political leadership on Monday against the backdrop of the diplomatic row over the Raymond Davis issue.

Mr Grossman, on his first two-day visit to Pakistan, held a meeting with Finance Minister Dr Abdul Hafeez Shaikh.

The Pakistani side is also reported to have expressed concern over an inordinate delay in setting up reconstruction opportunity zones (ROZs) in the tribal region because of legal hitches in the US.

The government believes the proposed zones might already have lost their 'opportunity' value. According to sources, the visiting envoy was told that more than 75 per cent of the payments for providing services to the coalition forces under the CSF were pending despite the implementation of a verifiable system for reconciliation of bills.

Mr Grossman promised to personally look into the billing claims and the verification process for speedy payments, the sources said.

An official statement said Mr Shaikh gave a detailed account of economic reforms undertaken to improve the economic conditions and highlighted budget priorities, including resource mobilisation, expenditure cut, tax measures and control of

inflation.

The minister gave an overview of the state of the economy when the government had taken over and said economic growth had been lost because of non-reconciliation of development with reforms and the whole macro-economic framework had been affected.

He apprised the US envoy of difficult decisions he had to take for transition of the economy towards development after last year's floods and increase in international oil prices.

Mr Grossman praised the economic measures and expressed the hope that they would benefit the people.

He said relations between Pakistan and the US were not only beneficial to both countries but also imperative for the region.

Praising Pakistan's focus on development of the energy sector, he said it was fundamental for the economic and social development of any country.

The American representative stressed the need for developing relations in terms of people-to-people contacts.

The finance minister said the main objective of the strategic dialogue was to shift the relationship from government to the people's level and strengthen it at the grassroots.

The two sides also discussed the establishment by the United States of an enterprise fund for better access of Pakistani products to the United States market.

Despite the Capital Development Authority's (CDA) reluctance, the government has directed it to take control of the Pak-China Friendship Centre. The decision was confirmed in a letter sent to CDA by the prime minister's Secretariat here on Monday. -- The Express Tribune

Despite the Capital Development Authority's (CDA) reluctance, the government has directed it to take control of the Pak-China Friendship Centre. The decision was confirmed in a letter sent to CDA by the prime minister's Secretariat here on Monday.

"It is an honour for the civic body to take responsibility of the Pak-China Friendship Centre," said CDA Spokesperson Ramzan Sajid.

He said that the CDA Chairperson Imtiaz Inayat Elahi had requested the director of the Jinnah Convention Centre to carry out necessary paperwork for the acquisition.

Sajid said the centre will be run following operational rules and procedures of the Jinnah Convention Centre, which is currently used to host various government and privately-sponsored events.

A CDA official on condition anonymity said that private firms are required to pay hefty amounts to hold events at the Jinnah Convention Centre and if the Pak-China centre is operated following the similar rules, "its returns can significantly reduce the financial constraints faced by the civic body". However, other CDA officials said it will be a difficult task for the civic authority to run such a large centre and arrange interesting cultural shows and exhibitions.

Inaugurated by Chinese Premier Wen Jiabao and Prime Minister Yousaf Raza Gilani, the Pak-China Friendship centre was constructed on December 18 at a cost of Rs3 billion. Spread over 12 acres of land, the centre houses an art auditorium with seating for 800, an exhibition centre, multipurpose hall, and a conference room seating 250.

Haqqani seeks investment in power sector -- app

Haqqani seeks investment in power sector

NEW YORK, March 8 (APP): Highlighting Pakistan's growing electricity needs, Pakistan's Ambassador to the United States Hussain Haqqani told American and Pakistani businessmen on Monday that his government was planning further structural reforms in the economy to attract investments both foreign and domestic. "The power sector offers a preferred area for investment," Haqqani said at a gathering billed as this year's biggest investment roadshow—"Pakistan Day Conference 2011". "Pakistan is looking for investments in power production," he said, while pointing that the country was short by about 5,000 MW in peak season.

Citing facts and figures, Ambassador Haqqani said Pakistan's economy remained resilient in the face of multiple challenges posed by rising food prices, oil prices, the catastrophic floods in 2011, global financial crisis and the cost of fighting war against terror.

"All foreign investment in Pakistan is fully protected by law and in addition to this; Pakistan has signed bilateral agreements for protection of investment with 47 countries and Avoidance of Double Taxation with 52 countries, including the US," Ambassador Haqqani told the well-attended conference.

The Pakistan envoy said new incentives and further liberalization measures include: (1): The capital markets are being developed along modern lines with the assistance of Asian Development Bank.

(2): The establishment of the Securities and Exchange Commission has improved the regulatory environment for stock exchanges, corporate bond market and the leasing sector.

(3): Pakistan is home to over 600 foreign companies, which means Pakistan

facilitates liberal investment policy.

(4): There has been stabilization in policies which is extremely vital for investors.

(5) Pakistan has a liberal foreign exchange regime with few restrictions on holding foreign exchange and bringing it in or out of the country.

(6): There are no limits on the inflow or outflow of funds for remittances of profits, debt service, capital, capital gains, returns on intellectual property, or payments for imported inputs.

(7): The facility for contracting foreign private loans is available to all those foreign investors who make investment in the approved sectors.

(8): Foreign controlled manufacturing concerns are allowed to borrow on the domestic market according to their requirement.

(9): There is a greater degree of transparency in procurement practices. International tenders are properly advertised.

(10): There is no restriction on payment of royalty / technical fee etc. in the manufacturing sector.

(11): Zero import duties on capital goods. The import tariff on agriculture machinery (not manufactured locally) for registered corporate agricultural projects will be zero-rated.

(12): The investors who invest in the newly opened sectors can import plant, machinery & equipment (not manufactured locally) at discounted rate of customs duty which is 5% and also avail first year allowance @ of 50% of the cost of plant, machinery & equipment.

(13): Zero import duties on raw materials used in the production of exports;(13) Foreign investors are allowed participation in industrial projects, on the basis of 100% foreign equity, without any permission from the Government.

(14): The manufacturing sector is open to foreign investment.

(15): Oil and gas is another sector in which investor can have offshore and onshore exploration. They can invest in refinement, pipelines and storage facility.

(16): Full repatriation of capital gains, dividends and profits.

(17): There is no requirement to obtain a No Objection Certificate (NOC) from the Provincial Governments for the establishment of projects, and,(18): Regulatory reforms have led to the establishment of a legal framework for licensing and regulating private housing lenders.

"The financial sector of Pakistan is regarded as one of the best performing sectors in our region," Ambassador Haqqani said. "The banking sector has shown robust performance. Other sectors with untapped potential like horticulture dairy, construction, infrastructure development, manufacturing and tourism can also prove highly profitable for any prospective investor. The initiative taken to set-up Special Economic zones (SEZs) and other industrial Zones will further harness the investment potential in the country."

ISLAMABAD: Country can generate over 350,000 MW electricity through wind against the total demand of about 21,000 MW in peak summer, urging the need for solid steps to explore the potential. -- app

ISLAMABAD: Country can generate over 350,000 MW electricity through wind against the total demand of about 21,000 MW in peak summer, urging the need for solid steps to explore the potential.

Official sources in Alternative Energy Development Board (AEDB) told APP that Pakistan has numerous resources to get energy and around 57,000 MW electricity could be generated only from Ghara-Keti Bandar corridor where average wind speed is more than seven meter per second throughout a year.

They said the corridor has potential which is twice of India and other sites in Balochistan, Punjab, and Northern Area which are being identified for power generation.

The sources said Pakistan is among the world's highest and fastest rising urbanisation and electricity is available to only 57 percent of the population while natural gas to 21 percent.

Only 45 percent of rural population have access to grid electricity and there is

extreme shortage of electricity and gas leading to load shedding.

Economic growth is also suffering due to gas and power load shedding, leading to closures of industries, they added.

They said the total installed and dependable capacity of the country's power sector is 20,231 MW.

11,735 MW could get from public sector while 8,496 MW from private sector, they added.

"By switching to alternative energy means, we can reduce dependence on imported oil, running into billions of dollars and undermining economic development," they observed.

It is pertinent to mention that USA has wind power installed capacity of 25,170 MW, Japan 1,880 MW, India 9,645 MW, Greece 985 MW, Egypt 365 MW, Iran 85 while Pakistan has only 6 MW so far.

The government has set up AEDB in 2003 for implementing policies programs and projects through private sector in the field of alternative energy.

Pak-Tajik presidents' determine to further strengthen relations in all fields -- SANA

Pak-Tajik presidents' determine to further strengthen relations in all fields

South Asian News Agency (SANA) · March 8, 2011 ·

ISLAMABAD, (SANA): President Asif Ali Zardari and his Tajik counterpart Emomali Rehmon have reiterated their determination to further strengthen Pak-Tajik relations in all fields of life.

Addressing the foundation of stone laying ceremony of Tajik Embassy in Islamabad on Tuesday both the leaders also expressed their commitment for working together for peace and stability in the region.

President Asif Ali Zardari said Pakistan is keen to strengthen infrastructure and energy connectivity besides further promoting trade and economic cooperation with Tajikistan.

He said Pakistan also wishes to closely cooperate with its centuries long neighbour to promote stability, peace and prosperity in the region.

He expressed the confidence that the current visit of the Tajik President will open new avenues of cooperation and give a stimulus boost to the rapidly growing relations between the two countries.

Tajik President in his remarks also expressed hope that his visit will go a long way in further stimulating relations with Pakistan. He said we have developed strong relations with Pakistan and it will remain major focus of Tajik foreign policy also.

The Tajik President expressed gratitude for Pakistan's support in overcoming tyranny in his country few years back and hosting intra-Tajikistan dialogue in Islamabad to resolve the issues.

He said he has held fruitful and constructive meeting with President Asif Ali Zardari which will help given new boost to our relations. He said Tajikistan intends to further develop multi-faceted relations with Pakistan which could mutually benefit the peoples of both the countries.

Pak, GCC ink MoU on strategic talks -- app

Pak, GCC ink MoU on strategic talks

Published: March 09, 2011

PrintFacebookDiggStumbleUponText Size

ISLAMABAD - Pakistan and Gulf Cooperation Council (GCC) Tuesday signed a MoU providing institutional framework to formally launch Pakistan-GCC strategic dialogue in Abu Dhabi.

Minister of State for Foreign Affairs Hina Rabbani Khar led the Pakistan delegation at the ministerial-level meeting chaired by H.H. Sheikh Abdullah Bin Zayed Al Nahyan, Foreign Minister of the UAE. UAE is the current chair of the Gulf Cooperation Council (GCC). All GCC member States participated in the meeting. Foreign Minister Sheikh Abdullah of UAE and Minister of State for Foreign Affairs Hina Rabbani Khar signed the MoU launching the Pakistan-GCC strategic dialogue. The MoU provided the institutional framework for this dialogue.

Addressing the meeting, the Minister of State for Foreign Affairs underscored the "immense potential of mutually beneficial partnership" between the GCC and Pakistan. She added that further strengthening Pakistan-GCC relations would remain "a cardinal principle of Pakistan's Foreign Policy".

Khar stressed on the Islamic/Arab collective strength. She added that the GCC-Pakistan institutional relationship would provide new impetus towards optimising and realising the "tremendous potential that our geographic proximity, solidarity and economic complementary confer on us." She called for early finalisation of the Pakistan-GCC free trade agreement.

The Minister of State requested the GCC countries to continue to support flood affectees by contributing to Pakistan's Citizen Compensation Fund.

The UAE Minister for Foreign Affairs welcomed the commencement of Pakistan-GCC Strategic Dialogue, adding that Pakistan had always been an important ally for the GCC. The Kuwaiti Foreign Minister said that Pakistan had "immense potential".

Pakistan is planning of buying six more submarines with options for joint development of future submarines with China. The reason for that is, because Pakistan is seeking for ways to strengthen its under-sea warfare capabilities. -- a))

Pakistan is planning of buying six more submarines with options for joint development of future submarines with China. The reason for that is, because Pakistan is seeking for ways to strengthen its under-sea warfare capabilities.

For now it is unknown what the class of the submarines is, but according to anonymous information Islamabad required an advanced under-sea vessel with air independent propulsion (AIP) system. This system will give the submarine the capability of staying submerged for longer and operating noiselessly.

The federal Cabinet of China was asked by the Defence Ministry to approve the purchase of the submarines in order to counter the "rising threats" for Pakistan. At the moment the Pakistan Navy has five active diesel electric submarines and 3 midget submarines. The submarines include Agosta-90b which are going to be equipped with MESMA AIP system, and Agosta-70.

Pakistan's Defence Ministry informed the Cabintet for the force imbalance in the country's Navy when it comes to the number of ships and submarines used in the fleet. The Navy is planning to acquire six AIP conventional submarines which will be able to operate in multi-threat environment under tropical conditions. After this deal is approved, the Pakistan Navy and China Shipbuilding and Offshore Corporation are expected to sign a contract for the joint development and production of submarines.

The "urgent naval requirements" aren't discussed for the first time as they were an issue discussed by President Asif Ali Zaradari during his visit to China in 2009. This problem was also discussed during Chinese Premier Wen Jiabao's visitation to Pakistan in December 2010.

The Naval Headquarters are pursuing the purchase of submarines from Chinese authorities due to the fact that they will receive full firm support for the submarine project. According to the proposed contract, four submarines will be manufactured at a Chinese Shipyard while the other two will be constructed in Pakistan.

The Co-development will not only include projecting and manufacturing, but also training of Pakistani personnel, upgrades of Pakistan Navy's shipyard and other things. At the moment Pakistan is finalizing a deal of inducting 36 J-10 fighter aircraft from China in a deal which has an estimated worth of over USD 1.4 billion. Islamabad and Beijing are also collaborating to build an advanced fighter — JF-17 or 'Thunder'.

All Day**Pak-US programme benefitting Pakistani educators -- app**

Pak-US programme benefitting Pakistani educators

ISLAMABAD, Mar 9 (APP): The Pak-US cooperation in education has led to sharing of best practices between the education sectors of the two countries and benefitted around 200 educators from Pakistan. The Pakistani Educational Leadership Project that focuses on; Science, English, Mathematics, Leadership, Research and Evaluation, ICTs and Environment is aimed at exposing educators to cross cultural educational initiatives for professional up-gradation and sharing of best practices between Pakistan and the United States of America.

Under the Pakistani Educational Leadership Programme, 160 Secondary Pakistani Educators have participated from all provinces and areas of Pakistan. Another 40 educators will be visiting the Summer Institute in summer this year, raising the number to 200.

The programme in Pakistan is managed by the Idara-e-Taleem-o-Aagahi (ITA) - 'Centre for Education & Consciousness' (www.itacec.org) and its recently established Institute for Professional Learning (IPL) affiliated to the University of Education (UoE) and the Higher Education Commission (HEC).

The core areas of the week-long American Reciprocal Program in March included Adaptability of the Institute's content to Pakistan's demographic and geographic challenges, lessons learned about grant themes and applicability to conditions on the ground.

The concluding Session of the Week-Long Reciprocal Programme was attended by Joint Education Adviser (JEA) Project Wing Arif Majeed Ministry of Education and Micah Risher US Embassy, Project Director PELI and Baela R Jamil Director programmes ITA,IPL.

Participants shared experiences on diversity, multiculturalism and tolerance, professional development and peace education.

The programme has been running successfully for 8 years and has received appreciation from Pakistani Counterpart Institutions for its valuable contribution to quality assurance and professional development in Pakistan - sensitive to local contexts, emergencies and heritage.

The Pakistani Education Leadership Project (PEL) Project and Institute (PELI), funded by the U.S Department of State, Bureau of Educational and Cultural Affairs, was launched in 2003.

All Day**World has interest in Pakistan's economic potential: Haqqani --****APP**

World has interest in Pakistan's economic potential: Haqqani

WASHINGTON, March 9 (APP): Pakistan's tremendous economic potential remains attractive for investors around the world despite international focus on security situation in the region, Islamabad's ambassador to the United States said. Ambassador Husain Haqqani told CNBC channel that Pakistan is "far more stable than people give it credit for" in the midst of attention to security and political issues. "Because Pakistan is a democracy, it is a fledgling democracy, there is a lot of noise. We are fighting terrorism and, at the same time, maintaining economic growth," said the envoy, who also underscored the vast investment opportunities existing in various sectors of the economy at a conference in New York. Haqqani noted in the interview that Pakistan's economic growth is going to be "relatively down" this year, partly due to devastating floods last summer.

"But other than that, the economy continues to move in the right direction. We are on track for economic reform, (although) we will be affected by high oil prices (as) we are a major oil importer."

"As a country that is at war (against terrorists) and has a fallout from the war in Afghanistan, we are a country that gets more attention because of security and political reasons than for economic reasons."

"But the country's economic potential remains something that a lot of people are interested in."

Islamabad is working to change the unfair tax structure of the past through steps like introduction of a general sales tax across the board in the country to try to recover more money from people who are liable to income tax.

He said the Pakistanis living below poverty line and those living on meagre income cannot be expected to pay taxes and this way only those earning enough are left to pay taxes.

Just as America witnessed a long battle over federal income tax imposition at the turn of the 20th century, Pakistan is also going through a similar process.

"Give us some credit. We will get there. We understand that that is the way forward. You cannot fuel an economy, you cannot have federal spending without people being taxed. We have to find a solution to both (tax) resistance and evasion."

Responding to a question about Raymond Davis, who is under detention since he killed two men in Lahore in January, the ambassador said Pakistan believes in dealing with the issue in accordance with the law. In the context of resolution of the issue, he also noted the importance of respect for sentiments of the Pakistani people.

"The important thing to understand is what Davis did is not conducive to good U.S.-Pakistan relations" in the current environment, with a lot of disapproval of the United States.

In answer to another question, Haqqani felt that both countries are conscious that the relationship is the single most important relationship in that entire region right now.

"On that hinges America's success in the war against al-Qaeda and the Taliban and stability of the vast region," he said, hoping that controversy over one individual would not be allowed to undermine the relationship.

Zardari, Gul agree to enhance cooperation in diverse fields -- APP

Zardari, Gul agree to enhance cooperation in diverse fields

* President calls for increasing bilateral trade with Turkey to \$2 billion by 2012

KUWAIT: President Asif Ali Zardari and Turkish President Abdullah Gul on Saturday agreed to facilitate the two countries' private sectors for increased joint ventures in trade and communication and to gain maximum benefit from their geo-strategic locations.

Zardari and Gul travelled back in the same car from the Loyalty Parade Avenue, a 50-minute drive to the Bayan Palace, after which talks between the two leaders also continued for more than half an hour at the Turkish president's villa.

The leaders, who are in Kuwait to celebrate the 50th independence day of the oil-rich country, exchanged views on wide-ranging regional and international issues, besides the situation in the Middle East and Afghanistan.

Zardari called for increasing bilateral trade with Turkey to \$2 billion and beyond by 2012, through encouraging public as well as private sectors to collaborate in key sectors such as infrastructure, engineering, telecom, mining and technology. He reiterated his call for urgent up-gradation of the existing railway line between the two countries for running of fast cargo trains in order to boost trade.

The president said that he had already proposed that the new fast cargo train be named 'Gul Train' after the name of the Turkish president. He said that during his recent visit to Japan, he had invited the Japanese investors to invest in the 'Gul

Train project' and had offered them to raise equity for it through the local stock market.

Gul said that Pakistan and Turkey enjoyed social relations that were rooted in centuries of old bonds of history, culture and religion. He expressed satisfaction over the frequency of interaction at the leadership level.

The Turkish president lauded the sacrifices rendered by the Pakistani nation and its armed forces in the war against terrorism, adding that the recent successes of Pakistan in the fight against terrorists had made them proud.

He expressed satisfaction over Pak-Turk defence cooperation and suggested increased military to military interaction, joint military exercises, training and related research and development.

On the Pak-Afghan-Turkey trilateral process, Zardari said Pakistan was committed to consolidating the gains made in engagement on Afghanistan to bring peace, stability and development in the country.

Zardari thanked Gul for Turkey's generous assistance to Pakistan at a time when the country had been ravaged by the worst floods in its history.

In the meantime, the president joined Kuwait's Amir Sheikh Sabah Al-Ahmad Al-Jaber Al-Sabah and world leaders in celebrating Kuwait's golden jubilee celebrations.

Around 40 heads of state and government, envoys and special representatives gathered at the 'Loyalty Parade' - the hallmark of the festivities, held at Kuwait city's north. app

ADB hopes Pakistan will benefit from CARs cooperation -- APP

ADB hopes Pakistan will benefit from CARs cooperation
our correspondent

Thursday, March 10, 2011

ISLAMABAD: The Asian Development Bank (ADB) hopes that Pakistan can benefit from the regional cooperation through connectivity with the Central Asian Republics (CARs) in areas of oil, gas, electricity, communication links and trade facilitation and related initiatives and peace building process in Afghanistan will result in enhancing the regional cooperation.

An initiative of 10-member countries — Central Asia Regional Economic Cooperation (CAREC) — that was also joined by Pakistan a few months back, possessed the potential to include projects of significance, such as, the Turkmenistan-Afghanistan-Pakistan and India (TAPI) gas pipeline, import of crude oil for utilising facilities of refineries, electricity and initiatives under the National Trade Corridor (NTC) for establishing road, rail and air links with Afghanistan and beyond CARs.

A three-member mission of ADB, led by Director Regional Cooperation of Bank, Ms Hattori, is visiting Pakistan to explore ways and means for the possibility for making part of Islamabad's specific projects for CAREC initiatives under its 2020 vision, which is currently preparation. Talking to the media here on Wednesday, along with ADB's representative in Pakistan Rune Storem, Ms Hattori, said that the CAREC initiative, resulted into undertaking crucial projects of \$15 billion in last 10 years which were currently being implemented with advance stage, and now this forum for enhancing regional cooperation would focus on three main areas of energy security, communication and trade facilitation and next 10 year strategy would be placed with the consultation of all 10 member states.

Rune Storem said that the TAPI was at quite advanced stage as gas price agreement was on cards. The regional states have made significant progress and the stage is set when it will be on the ground, he maintained.

He said that the ADB planned to provide financing for Peshawar-Torkham road in 2012 that would help to grant easy transportation of goods. He said that CAREC-SAARC cooperation was the dream of future as it was not yet on the negotiation table of member countries. He said that the member countries had decided to select non-controversial areas in order to enhance cooperation on the basis of better economic returns.

Pakistan, China aim to enhance tariff concessions to 90 percent -- APP

Pakistan, China aim to enhance tariff concessions to 90 percent

Thursday, March 10, 2011

ISLAMABAD: Pakistan and China will begin bilateral talks in the second phase of Free Trade Agreement (FTA) on Thursday (today) for enhancing tariff concessions from existing 36 percent to 90 percent, a senior official of the commerce ministry said on Wednesday.

A two-day dialogue at the federal capital will finalise the modalities of FTA for the next phase and will also review the first phase of the FTA, the official told The News.

Pakistan and China signed a free trade agreement on Nov 24, 2006. The base year for tariff reduction or elimination was 2006 for China and 2006-07 for Pakistan.

The commerce ministry official said that both sides achieved the set target of 36 percent tariff elimination on tradable items in the first phase of FTA.

The second phase of FTA will aim at tariff concessions of up to 90 percent for the next five years ending in 2017. The remaining 10 percent will be included in "no concession list", said the official.

Both sides will also chalk out a strategy to convert the region into free trade area by 2017, he added. The first installment concession of this second phase will begin from 2013.

Besides this second phase of FTA, the commerce ministry will continue to pursue Chinese authorities for concessions on an already forwarded list of 286 items, he added.

China has placed 2,681 tariff lines in category-I, 2,604 tariff lines in category-II, 604 tariff lines in category-III and 529 tariff lines in category-IV.

The category-V with 1,132 tariff lines will have no concession.

Pakistan has placed 2,423 tariff lines in category-I, 1,338 tariff lines in category-II, 157 tariff lines in category-III, 1,768 tariff lines in category-IV, 1,025 tariff lines in category-V and 92 tariff lines in category-VI.

Pakistan's trade deficit with China swelled from \$2.95 billion in 2006-07 to \$4.01 billion in 2007-08, fell to \$3.39 billion in 2008-9 and again rose to \$3.43 billion in 2009-10.

The commodities which registered a phenomenal growth from China include machinery and parts, chemical elements and compounds, fertiliser manufactured, yarn and synthetic fibres and construction material. —Aftab Maken

President for early finalization of Pak-China currency swap agreement

-- app

President for early finalization of Pak-China currency swap agreement
ISLAMABAD, Mar 10 (APP): President Asif Ali Zardari Thursday emphasized upon the early finalization of currency swap agreement between Pakistan and China saying that such arrangements should also be concluded with Turkey and Sri Lanka to promote and facilitate bilateral trade with these countries. The President expressed these views while chairing a meeting on the proposed currency swap arrangements, here at the Aiwan-e-Sadr on Thursday.

The meeting was attended among others by Minister for Finance, Revenue and Economic Affairs Dr. Abdul Hafeez Sheikh, Minister of State for Foreign Affairs Ms. Hina Rabbani Khar, Governor State Bank of Pakistan Shahid Kardar, Chairman Board of Investment (BOI) Saleem H. Mandviwala, Chairman All Pakistan Textile Mills Association (APTMA) Gohar Ejaz, Chairman Pakistan Business Council Asad Omar, senior government officials and Spokesperson to the President Farhatullah Babar.

Briefing media Spokesperson to the President Farhatullah Babar said that the Governor State Bank gave a detailed briefing on the progress made so far regarding currency swap arrangements between the People's Bank of China and the State Bank of Pakistan.

He said that the proposed arrangement was being examined from a legal perspective.

Talking about similar arrangements with Turkey and Sri Lanka, he said that Turkish authorities have responded positively towards considering such arrangement with Pakistan.

He said that a high level delegation from Pakistan recently visited Sri Lanka and held meetings with the Governor State Bank of Sri Lanka and Secretary Finance and held discussions on broadening economic cooperation between the two countries.

It may be recalled that during the visit of President Zardari to Sri Lanka in November last, he had offered assistance to Sri Lanka in cement, sugar and dairy industry and had urged the business community to take advantage of liberal trade policies of the country, through joint ventures and investment.

The President then addressing a business forum, comprising leading business personalities and corporate leaders, had emphasized upon the need to explore new and unconventional phase of economic cooperation marked by more trade, currency exchange and banking interchanges.

The President had also proposed currency swap arrangement between Pakistan

and Sri Lanka to reduce pressure on foreign exchange reserves of the two countries, Farhatullah Babar said.

Similarly the Turkish Prime Minister during his visit to Pakistan in October 2010 had welcomed currency swap arrangements with Pakistan, he continued.

During today's meeting, the President recalled his meetings with the leaderships of China, Turkey and Sri Lanka and their interest for entering into such arrangement with Pakistan.

Later, Minister for Finance, Revenue and Economic Affairs Dr. Abdul Hafeez Sheikh briefed the meeting about his recent meetings with the IMF officials.

US Embassy Supports Pakistan's Youth Leadership -- app

US Embassy Supports Pakistan's Youth Leadership

ISLAMABAD: The United States Embassy in Islamabad supported a youth leadership conference in Islamabad for Pakistani students, during which they gain leadership skills to help them create positive change in their communities.

The conference, entitled "Giving Youth Tools to Become Change Makers," was co-sponsored by the Pakistan-U.S. Alumni Network and organized by alumni of U.S.-government funded exchange programs.

The three-day event brought together 30 students (ages 16-18) from Punjab, Khyber Pakhtunkhwa, Sindh, and Islamabad. The students held discussions on problem solving, democracy, conflict resolution, and youth empowerment.

Speaking at the closing of the conference on March 6, Assistant Cultural Affairs Officer Saad Bokhari said, "Our message for the youth of Pakistan is that we will continue to support you by teaching leadership skills, critical thinking, and respect for tolerance to help you serve the needs of your communities."

The Pakistan-U.S. Alumni Network, launched in September 2008 by alumni of exchange programs in the United States, builds upon the shared values of the people of Pakistan and the U.S. to promote trust and understanding.

Coal termed future of Pakistan -- APP

Coal termed future of Pakistan

KARACHI: Pakistan has huge reserves of coal and it provides the best solution for its energy crises, speakers at an energy awareness conference said Saturday.

Ammar Ali Talaat manager strategic planning and business development KESC said coal is keeping pace with consumer electric demand and according to a recent study coal will still account for about 45-50 percent of world's power generation in 2025.

KESC has signed MoU with a Chinese company to convert two of their existing boilers of Bin Qasim Thermal Power Station from furnace oil to coal. The conversion aims to reduce KESC's reliance on furnace oil and result in cost savings for the company and the consumers in the form of tariff reduction. The KESC has partnered with a British company who will do the mining while KESC will put up a power plant of 300 megawatt, which will be enhanced to 1200 megawatt in the future. The speakers pointed out in Pakistan the potential 3000 megawatt power plants run on furnace oil and if measures are taken to convert these power plants to coal, the country will be in a position to save approximately one billion dollars. ppi

The first round of negotiations between Pakistan and China for the second phase of tariff concessions began in Islamabad on Thursday -- APP

ISLAMABAD:

The first round of negotiations between Pakistan and China for the second phase of tariff concessions began in Islamabad on Thursday.

Senior Joint Secretary Commerce Himayat Ullah Khan, the leader of Pakistani representatives at the meeting, expressed satisfaction with the implementation status of the first phase of a free trade agreement (FTA). "However, we feel there is a need to conduct an empirical evaluation to help us understand some of the issues which we could address better in the second phase of negotiations," asserted Khan.

The Chinese delegation, led by Deputy Director General Trade H E Zhu Hong, also met with Federal Minister for Commerce Makhdoom Amin Fahim. The commerce minister highlighted that the country's economy was under tremendous strain due to multiple factors such as the war against terror, global economic meltdown and the worst floods in Pakistan's history in August.

Fahim said that one of the main concerns of the stakeholders was the growing trade deficit with China.

The minister was told the first phase of negotiation is expected to conclude by the end of 2012.

Pak-China FTA expansion in June

Pak-China FTA expansion in June

ISLAMABAD, Mar 22 (APP): Pakistan and China will discuss expansion of Free Trade Agreement (FTA) between the two countries in the coming June with an aim to boost bilateral trade. "The concerned officials from Pakistan would visit Beijing in June and hold detailed discussions with their counterparts on the issues of eliminating the tariffs and prepare a comprehensive package for the implementation of the second phase of the FTA," a top official of the Ministry of Commerce told APP.

The first phase of the FTA is scheduled to end on December 31, 2012, which will be followed by the second phase from January 2013, the official added.

The respective organizations of the two governments have finalized the modalities for the negotiations for the implementation of second phase of the FTA during a two-day long session held in Islamabad during the second week of this month. According to Ministry of Commerce sources, both the countries will eliminate tariffs on around 90% products, both in terms of tariff lines and trade volume within a reasonable period of time on the basis of consultation and accommodation of the concerns of both the countries.

Meanwhile, Joint Secretary Commerce Rehmatullah Khan told APP that during the upcoming discussions on FTA, efforts would be made to minimize the trade gap between the two countries.

According to trade data, the overall trade between the two countries in 2010 was \$8.67 billion, showing an increase of 28 per cent. Chinese exports to Pakistan stood at US\$6.9 billion, showing an increase of 36 per cent while its imports from Pakistan were recorded at US\$1.78 billion, showing upward trend of 37 per cent, he added.

"During the recent negotiations, both the sides have realized that the growing trade gap needs to be minimized," Rehmatullah remarked.

He said that China was a huge economy and was having trade surplus with all partner countries, adding that the FTA proposals would be formulated in a way to help Pakistan boost exports to China to minimize the gap.

He said that enhancing trade volume between the two countries was a healthy sign, adding that negotiations for the second phase would also deal with this particular issue.

It is pertinent to mention here that Pakistan and China signed Free Trade Agreement in June 2006 which came into effect from July 2007. The FTA was aimed at reducing tariffs on each other's imports in two phases.

Pakistan eyes \$350b GCC trade

Pakistan eyes \$350b GCC trade

Posted on March 22, 2011

by admin786| Leave a comment

[Translate]

By Nissar Hoath

ABU DHABI — Pakistan is set to increase its trade volume with GCC countries from the current \$59 billion to \$350 billion by 2020 with the UAE being the largest partner.

Pakistan's Ambassador to UAE Jamil Ahmed Khan, a career diplomat, said the trade relations between Pakistan and the region have been thriving despite of economical turbulences worldwide.

"The trade relations between Pakistan and the UAE was on the rise due to economic changes. Trade with the UAE and other GCC countries are going to take a lead in accordance to surveys and studies. The volume of trade is going to enhance from \$59 billion to \$350 billion by the year 2020," Khan told Khaleej Times in an exclusive interview.

He said Pakistan being so close to the UAE should participant in enhanced trade activities, and Pakistan's traders and exporters need to work on this vision so they are able to match their output with the requirements of UAE and other GCC countries in the coming nine years.

"The embassy will be all out to guide them through in their endeavour to upgrade their system for the enhancement of export from Pakistan," he promised.

About the two-way trade with the UAE, he said the Emirates was the third highest partner with Pakistan worldwide, and will soon be the first highest partner in the near future.

"We have approximately a \$7 billion two-way trade volume between the two countries. This is annual average figure," he said.

Khan, who also served in the United Nations in different parts of the world as an special envoy, said there had been "a gradual increase [in the trade exchange] until the recession hit the entire world," and that time there was a slight decline otherwise there has been almost an eight per cent of increase in the trade volume between the two countries. It was from 2001 until the recession hit the world in 2008 and onward." He added the UAE has been the largest investor in Pakistan for a quite some time.

"Even now we see it as one of the highest investors in Pakistan. The UAE investment we see in Pakistan, it covers many fields. We have investors like Al Dhabi Group, etisalat, petroleum companies and so on. There are many UAE investors in Pakistan now."

Remittances boom

When asked about remittances from 1.5 million Pakistani expatriates in the country, Khan said there has constant increase making the UAE the world largest remitter.

"We have now surpassed all the countries all over the world in terms of remittances from overseas Pakistanis. We [in the UAE] are the number one country in the world in remittances, sending almost \$2 billion to Pakistan [on an average annually]. Now we have even crossed Saudi Arabia," he explained.

Shaikh Khalifa Coastal Refinery

On the long-awaited Shaikh Khalifa Coastal refinery of Abu Dhabi's International Petroleum Investment Company (IPIC) planned for construction in Balochistan, Khan said there have been delays due to some feasibility and procedural matters that are going on.

"We are strongly hoping that this refinery will finally be established in the near future. The process is still going on." The Shaikh Khalifa Point Refinery is a joint venture between IPIC, the international investment wing of Abu Dhabi National Oil Company (ADNCO), and Pak-Arab Refinery Company (Parco), a joint venture between Pakistan and Abu Dhabi. The project was set for inauguration in 2007 but has been delayed for various reasons.

In 2009, IPIC indicated it said it will delay or postpone the investment plan for the construction of the refinery in insurgency-hit Balochistan province of Pakistan due to some due to some problems and issues.

Agro industry

When asked about attracting investors from the GCC in the country's agro-industry, the ambassador said: "Pakistan could be a food basket for the entire GCC region, and we have already got not only requests but we have allocated thousands of acres of lands to various groups for agricultural farming for the purpose of having the secure food supply chain. We also have the understanding that more and more groups are coming to Pakistan to have chunk of land to become the food basket of not only the UAE but the entire GCC."

Khan said Pakistan has the capacity with surplus wheat last year. "We have surplus rice this year, and we had surplus rice and wheat last year. This year we are going to have, according to the estimates, surplus cotton. So we have everything in agricultural field in surplus. We can provide the surplus food to this region."

Referring to investments in mineral resources, the ambassador said Pakistan was already an important partner with the region in terms of downstream oil and gas projects. "We are already providing the region the assistance in terms of their downstream projects [in oil and gas]. In terms of upstream, we could think of doing it at a later stage. It requires a lot of investment from the side of any country that thinks of upstream, but downstream yes we are already there. We are already so many petroleum products and provide to the region," Khan concluded.

China announces 500 scholarships -- APP

China announces 500 scholarships

Our correspondent

Wednesday, March 23, 2011

Islamabad

China has announced 500 scholarships for Pakistani students for the next three years, whereas the number of scholarships will be increased each year. This was announced by Chinese Embassy Cultural Counsellor Yang Linhai.

He made the announcement while addressing a conference on 'Pak-China Friendship Year 2011' cultural activities reception and opening ceremony of Chinese experience centre. The event was organised by the Confucius Institute, National University of Modern Languages (NUML), here on Tuesday.

Yang Linhai appreciated the efforts of the NUML Confucius Institute. He lauded the performance of the Chinese and Pakistani students and said that the students studying Chinese language in the country are the future diplomats who can play their dynamic role in intensifying deeper understanding of the two countries as both the countries are good neighbours to each others.

"The leadership of both the countries has focused on the student-to-student relationships. For this purpose we are supporting Pakistani student delegations to visit China," he said.

Addressing on the occasion NUML Rector and Chairman Council of Confucius Institute Professor Dr. Aziz Ahmad Khan highlighted the efforts and achievements of the Confucius Institute for which the institute has been ranked first all over the world.

(The writer is a London-Lahore based businessman and a Pakistan Muslim League -- Dr Ashraf Chohan MPA

(The writer is a London-Lahore based businessman and a Pakistan Muslim League (N) MPA from Gujranwala)

Without leadership, people are crowds but with leadership crowds can become a nation. Although Muslims migrated from the Western side of the present Pakistan and Eastern Europe ruled India for nearly a thousand years, but during the English rule Muslims became less educated, financially weak and population in the Indian sub-continent. It was the leadership of Mr Jinnah who became their voice and negotiated with the English rulers to create a large country which had two parts on each side of India. Had the country only followed the leader after the death of Mr Jinnah, the then Pakistan was in an excellent strategic position to sustain as a strong nation and develop beside India and could have maintained equal relations, hence would have been in a much better position to resolve the mutual disputes. It is very sad that Pakistan had no immediate leader after Mr Jinnah who could have taken over the responsibility of building the nation. An ambitious Army General took over power soon after the birth of the country. The newly formed constitution was disregarded. No institution could build itself. Dictatorial rule overruled all the existing infrastructure which was left by the English rule.

Although Mr Bhutto managed to enjoy very popular support and won two elections, but today the nation cannot remember him for anything else but creating a severe conflict in the UN and isolated Pakistan internationally and within the country became so unpopular that he had to be removed by the Army and then, unfortunately, he was hanged. Presently, although the media is promoting certain people who do not enjoy a single seat in Parliament and we have to see faces giving lectures to the nation, but they are not in a position to win their own seats in Parliament. Believe me, this only happens in Pakistan. These so-called leaders, promoted by the media, are perhaps the establishment, namely Imran Khan, a few ex-Army generals, Islamic parties, but the fact remains that in the country the two largest parties include Pakistan Peoples Party who conducted the last election under the leadership of Benazir Bhutto and yet have to see and go through a test of the leadership of Mr Zarbri. Of course the other largest party is PMLN led by Mr Sharif. After these two parties the nation has given a mandate to National Awami Party, MQM, PMLQ and then a few independent or very small parties.

The present and immediate future of this country centres around Mr Sharif. His past performance speaks for itself. He started his politics in 1985 and became very popular Chief Minister of the Punjab and developed the Punjab during this period, which is part of the history. He became Prime Minister twice, but only for a very short period. Even then he was able to make a mark in the history of the country while tremendous efforts to develop the nuclear deterrent which has helped Pakistan to sustain against mighty India and will continue doing so in the time to come. Mr Sharif was known as a person who would do and deliver and without having any pennies in the Exchequer he started developing roads and motorways which are being extended throughout the country. His other efforts to boost the economy cannot be ignored.

The countries which have developed for their own defence and more importantly for their systems to look after their nationals have been able to do so because of democracy, independence, justice and an opportunity for all. None of the countries have developed through dictatorship and the remaining so-called dictators and kingdoms are being demolished one after the other after three very lengthy martial laws. It was Mr Sharif who had the heart and courage to meet his arch-rival, the leader of the Peoples Party in London in 2007 and managed to sign a contract, famously known as the COD, so that at

least the two major parties would resist any further difficulties and also managed to take on board a few other smaller parties as well. This document is still resisting Army rule and is a major blockage in front of military intervention. Although the Peoples Party backed out immediately after the birth of this contract, but yet the same party refers to this document whenever it suits them.

In the past days, Mr Sharif had been under tremendous stress due to failure of the Peoples Party Government to amend the allegations of serious corruption, mismanagement, unjustified appointments and wastage of huge resources. The Sharif worked very hard to restore the judiciary. He had to go on the road for long marches and this was not without threat to his life. He gave a number of notices to the present Government and warned them to improve the government. It was very easy for PMLN to join PMLQ and other smaller parties and had formed their own government and had removed the corrupt government of the Peoples Party but Mr Sharif believed that the party which has the majority must complete the tenure of five years. Very recently he gave an agenda list to the government to improve the standards for the government and alleviate poverty, work for power generation, assure a supply of gas, electricity, water and decrease the prices of commodities. The Government led by PPP gave no attention to these demands.

This hard work took its toll on the health of Mr Sharif and, unfortunately, last week he some heart problems and he had to be admitted in a London hospital in an emergency. Thank God that it was only a minor problem which has been successfully rectified and Mr Sharif has returned home.

Pakistan needs a leader like him much more than before. Pakistan is facing internal and external attacks, continuing to kill Pakistani nationals and violate borders. Internally there is repeated bombing on religious and security establishments. On top of that there are regular interruptions in the supply of gas and electricity. The bills of these suppliers have sky-rocketed, joblessness is at a peak and it has become extremely difficult for the poorest to make both ends meet. In this situation, Pakistan needs Mr Sharif desperately to come forward again and take charge of the government and solve all these problems which are gradually getting more complicated.

We thank God for restoring a full recovery to Mr Sharif and soon he shall return to the country to lead the nation.

Kind Regards,
Chaya Mistry
Secretary to Dr Ashraf Chohan MPA

Pakistan progresses with two gas pipelines projects -- APP

Pakistan progresses with two gas pipelines projects

Saad Hasan

Sunday, March 27, 2011

KARACHI: Pakistan is moving ahead with its plans to build two trans-national pipelines for the import of gas to meet its increasing energy needs, top government officials said on Saturday.

Both Iran-Pakistan (IP) pipeline and the much longer Turkmenistan-Afghanistan-Pakistan-India (TAPI) pipeline are vital for the country, which has seen cuts in gas supply to factories, they said.

"Let me assure you there is no pressure on me to slow down work on the IP," said Hilal Raza, the Managing Director Interstate Gas Company (ISGC), which is spearheading the two projects. "Turkmen gas is not a substitute for Iranian gas. We need both of them."

The United States and Asian Development Bank (ADB) support the 1,700-kilometer TAPI pipeline.

President Zardari along with Afghan President Hamid Karzai, Turkmenistan President Gurbanguly Berdimuhamedov and Indian Petroleum Minister Murli Deora signed the inter-governmental agreement for \$7.6 billion TAPI last year.

Renewed interest of Pakistan's government in TAPI created an impression that it might abandon the IP project because of US opposition to it.

The two pipelines will bring 2.075 billion cubic feet per day of gas into Pakistan. As per the official schedule, the first flows from Iran are expected in December, 2014, while TAPI will be completed by the end of 2016.

Raza said that demand for gas, which meets Pakistan's 50 percent energy needs, was too much. "Imports from these two pipelines and the LNG (liquefied natural gas) will all be absorbed by the system."

Domestic gas production stands at 4 BCFD. The demand has crossed 5 BCFD, according to some estimates.

A round of talks among representatives of the four nations involved in TAPI pipeline concluded in Islamabad on Friday. The talks are in the initial stages and price of Turkmenistan's gas is yet to be decided.

"The next meeting will be held in Delhi from April 25. Right now, the four countries are working on composition of gas, schedule for completion of the project and other documentation," said Raza.

About the IP pipeline, he said that the gas sales purchase agreement or GSPA had been signed with Iran and only the feasibility study needed to be completed.

There have been continuous delays in award of consultant contract for engineering design of the 1900-km IP pipeline. The contract for bankable feasible study and route survey was supposed to be completed in June 2010.

Additional Secretary Zafar Iqbal said that it was too early to suggest how the country intends to finance the two projects.

The cost of IP pipeline will come to around \$1.5 billion. It will zigzag 1900 kilometers from Iran's South Pars field to Sindh. Different routes are being considered for the project, but the most likely path is through Gwadar district, Balochistan.

The security of the Iran-Pakistan gas pipeline remains a big issue. Baloch militants who demand greater provincial autonomy attack gas pipeline infrastructure regularly.

But the cost of protecting the TAPI pipeline, which will pass through Afghanistan, would be much more and add up to consumer tariff.

Pak-Sweden relations strong'

Pak-Sweden relations strong'

By Saad Saud

Islamabad - Sweden has provided Pakistan \$ 100 million aid to Pakistan during the previous year for socio-economic and religio-political development. Ambassador of Sweden in Pakistan, Ulrika Sandburg while addressing a press conference here on Thursday in 'Meet the Press' program said that Sweden government believes in trade not aid and our bilateral relations are strong with Pakistan in trade and both the countries have strong mutual collaboration and co-operation.

She said that Sweden has given \$ 282 million assistance to Pakistan for earthquake relief and rehabilitation activities. Sweden has also provided military aid to Pakistan to safeguard its sovereignty and integrity, she said. Swedish trade companies are working in Pakistan moreover Swedish Trade Minister visited Pakistan in November and 20 Swedish trade companies were introduced and brought huge trade opportunity to Pakistan, she said.

She said that Sweden has partnership with Pakistan in the sectors of IT and Health. During 2011 Sweden has extended collaboration in the sectors of IT, technology, textiles, she said. Swedish Ambassador said that currently 20,000 students are studying in Sweden out of which 3,000 students are completing PhD and 6,000 students are studying in Masters in Swedish universities, she said.

The remaining students are graduation level students in the colleges adding that Sweden educational expenditures are lower as compare to U.S, U.K educational degree costs and the Swedish educational degree has equivalent value in the international market.

Ulrika Sandburg further elaborated that Sweden demands peace and stability in the region and terrorism must be condemned in each form. She said that Sweden condemned drone attacks.

She said "we have to combat terrorism in accordance with international and humanitarian law and you have to fight terrorism in accordance with the global strategy against terrorism. While talking on Swedish policy on Kashmir issue she said that the Kashmir issue must be resolved with peaceful dialogue between India and Pakistan.

Ulrika Sandburg said that Sweden respects all the religions and inter-faith harmony has significant importance to end religious extremism.

LAHORE

Punjab Chief Minister Shahbaz Sharif has said that Pak-China friendship is based on mutual respect and trust and has stood the test of time.

Addressing a function to mark 60 years of Pak-China diplomatic relations at the Chief Minister's Secretariat, he said that China was a sincere friend of Pakistan and played an important role in its progress. He said that the friendship between the two countries was an example to the rest of the world. He said that China had helped Pakistan in natural calamities and other testing times.

Ambassador of China in Pakistan, Liu Jian, Punjab Assembly Speaker Rana Muhammad Iqbal Khan, provincial ministers, advisors, Members of National and Provincial Assemblies, intellectuals, columnists, senior government officials and people from various walks of life were also present. He said the Chinese nation had achieved a remarkable progress through its hard work and commitment and China had become the second largest economy of the world. He said that China has achieved a prominent status in the world through austerity, proper setting up of priorities and tireless efforts and the credit for all this achievement goes to the senior Chinese leadership. He said he would visit China next month on the invitation of the Chinese Prime Minister during which agreements of cooperation would be signed in energy, infrastructure and other sectors.

Chinese Ambassador Liu Jian said that Pakistan and China had exemplary relations and their friendship was higher than the Himalayas and deeper than oceans. He said that China would continue to cooperate with Punjab in energy, infrastructure and other sectors.

Earlier, the Chinese ambassador held a meeting with Chief Minister Shahbaz Sharif and discussed matters of mutual interest. He also expressed his best wishes for the early recovery of Quaid Pakistan Muslim League-N Mian Muhammad Nawaz Sharif. He gave a cheque of Rs 3 lakh to the chief minister as a token for the provision of computers in Daanish schools.

Pak-China friendship exemplary: Chinese Ambassador -- APP

Pak-China friendship exemplary: Chinese Ambassador

LAHORE, March 29 (APP): Chinese Ambassador to Pakistan Liu Jian Tuesday said Pak-China friendship is an exemplary bi-lateral relationship which can be emulated by other countries of the world. He was talking to media after his visit to Punjab Institute of Languages, Art and Culture. The Ambassador appreciated the decision of governments of Pakistan and China to declare 2011 as 'Pak-China friendship year'. Liu Jian said that Chinese people have always shown interest in Pakistani culture and stressed that youth of both the friendly countries must be provided greater opportunities for learning each other's languages and knowing the respective cultures.

He said that he had wished to become ambassador of China to Pakistan when he had visited here about three years ago and expressed his pleasure on the fulfilment of his wish.

Earlier, the Chinese ambassador visited Punjab Art Gallery, FM95 Radio station. "Pak-China friendship may live long", said the ambassador on air. Ch Abdul Ghafur, Punjab Food Minister was also present on the occasion.

Pak-Indian IT Firms Bilateral Trade of \$ 5 billion

Pak-Indian IT Firms Bilateral Trade of \$ 5 billion

March 29th, 2011 Leave a comment Go to comments

Share this post on Facebook with your friends.

Pakistan and India can boost their mutual trade in Information and Technology (IT) sector up to colossal US\$ 5 billion through joint-ventures, investment and exchange of expertise.

This was stated by Jehan Ara President Pakistan Software Houses Association in the exclusive interview on her return to Pakistan after leading a delegation of country's top-notch figures of IT industry.

Briefing about her business trip, she said Pakistanis and Indian IT titans have decided to carry on their efforts for developing an "India-Pakistan e-land" at the border where people can meet, interact, teach, learn and jointly develop intellectual property.

They will work to convince their respect governments to allow telecommunications access to work across borders. They will continue to investment in young people, facilitate exchanges, and provide education and skilling to enable them to achieve their potential, Jehan Ara said.

Pakistani and Indian IT committee of Aman Ki Asha has successfully held the bilateral talks separately on both sides of borders in December and March aimed at enhancing trade ties in the field of IT, which is one of six sectors with great trade attraction between two countries.

"Indian IT market is huge with volumetric exports but it is lacking of high quality of services, in contrast, Pakistani market is small comparatively but has gained tremendous reputation with its products and services," she said and added "these two countries will aid each other to enhance their quantum and quality of IT services and products."

Pakistani IT firms are experts of gaming and animation whereas Indians are master service providers of IT-enable services, she said. How will it conducive the India set up their BPO's in Pakistan and exchange expertise of gaming and animation from Pakistan, she further explained.

There are lots of hurdles to set up software houses in each other countries by the two states but it is an easy solution to make a joint platform in third country such as UAE, Singapore or Malaysia, she said.

Visa policy by both states to IT entrepreneurs is very strict with tough conditions. Besides, there is no bank of Pakistan in India and Indian in Pakistan to ensure letter of credits (LCs) facility and exchange of money by the two sides. Therefore, these measures must be resolved by the both government to facilitate entrepreneurs of their countries, she said.

The third venue is the most viable option for IT entrepreneurs of India and Pakistan as a matter of fact that they could start work on mutual project at the earliest, which will pave the way towards real business and trade opportunities at cities of each other countries, President Pasha said.

She added the real growth in trade between the two countries particularly in the field of IT could multiply significantly when India and Pakistan establish and operate their offshore offices at each other lands.

She said the two countries have large young populations whose energies can, with proper education and skills training, be utilized productively in order to reap the 'demographic dividend' and build collaborative projects between the youth of both countries.

These countries have much to offer each other, with Pakistan providing a host of IT graduates that India could utilize by building collaborative development centers and India providing skills development to the significant IT product companies in Pakistan. The companies could also jointly tap the huge domestic market in both countries and global opportunities for IT solutions especially in emerging markets in the Middle East, Africa and South America, Jehan Ara said.

Pakistani and Chinese air forces are currently conducting joint exercises -- Hindustan Times

Pakistani and Chinese air forces are currently conducting joint exercises at an undisclosed location in Pakistan, according to a media report. Combat aircraft, pilots and technicians of the Pakistan Air Force (PAF) and China's People's Liberation Army Air Force (PLAAF) are taking part in the joint exercises codenamed "Shaheen-1", Geo News reported.

This is the first time that an air force contingent from China is participating in a military exercise in Pakistan.

The exercises have been designed to share mutual experiences, hone professional skills and get maximum benefit from the expertise of the two troops, the report said.

The visit also coincides with the year 2011 being celebrated as the "Year of Pakistan-China Friendship."

اسلام آباد (اے پی پی) پاکستان اور ملائیشیا نے دوطرفہ تجارتی و اقتصادی تعلقات کو فروغ دینے کیلئے مشترکہ بزنس کونسل قائم کر دی۔ پاکستان کے سرمایہ کاری بورڈ کے چیئرمین سلیم ایچ مانڈوی والا اور ملائیشیا کی جانب سے بین الاقوامی تجارت و سرمایہ کاری کے نائب وزیر مخرض بن تن مہاتیر نے کو الالمپور میں مشترکہ بزنس کونسل کا اعلان کیا۔ تقریب میں ملائیشیا میں پاکستان کے ہائی کمشنر مسعود خالد، خیبر پختونخواہ کے صوبائی وزیر صنعت و تجارت سید احمد حسین شاہ، وزیراعلیٰ سندھ کے مشیر برائے سرمایہ کاری محمد زبیر موتی والا، چیئرمین پاکستان ملائیشیا مشترکہ بزنس کونسل محمد سلیم فتح دین، پنجاب سرمایہ کاری بورڈ کے چیف ایگزیکٹو آفیسر سادات مظفر، نیشنل انڈسٹریل پارک کے چیف ایگزیکٹو آفیسر زبیر حبیب، ڈی جی سرمایہ کاری بورڈ اصغر عباس رضوی اور ملائیشیا کے سرمایہ کاری بورڈ کے ایڈوائزر، نیشنل چیمبر آف کامرس اینڈ انڈسٹری کے صدر سید فیروز شاہ اور نجی شعبے کے نمائندوں نے شرکت کی۔ اس موقع پر ملائیشیا کے بین الاقوامی تجارت و سرمایہ کاری کے نائب وزیر نے تقریب سے خطاب کرتے ہوئے مشترکہ بزنس کونسل کے قیام کو ایک تاریخی اقدام قرار دیا اور کہا کہ اگرچہ پاکستان اور ملائیشیا کے درمیان دوطرفہ تجارت میں اضافہ کا رجحان ہے لیکن دوطرفہ تجارتی تعلقات کو بڑھانے کے وسیع مواقع موجود ہیں۔ انہوں نے کہا کہ مختلف شعبوں بشمول زراعت، مینوفیکچرنگ اور انفرااسٹرکچر کے شعبوں میں موجود مواقع سے بھرپور استفادہ کیا جائے گا۔ پاکستان کے سرمایہ کاری بورڈ کے چیئرمین سلیم ایچ مانڈوی والا نے کہا کہ مشترکہ بزنس کونسل کی تشکیل سے دونوں ممالک کے نجی شعبوں کو روابط کے قیام کا پلیٹ فارم میسر آئے گا، جس سے دونوں ممالک کے درمیان دوطرفہ تجارتی اور سرمایہ کاری تعلقات کو فروغ ملے گا۔ دریں اثناء ملائیشیا نے پاکستان سے غذائی اجناس اور مصنوعات درآمد کرنے اور لائیو اسٹاک کے شعبہ میں پاکستان سے معاونت حاصل کرنے میں دلچسپی ظاہر کی ہے۔ ملائیشین وزیر زراعت عمر بن نوح نے کو الالمپور میں پاکستان سرمایہ کاری بورڈ کے چیئرمین سلیم ایچ مانڈوی والا سے ملاقات کی۔ ملاقات میں دوطرفہ تعلقات سمیت باہمی دلچسپی کے مختلف امور زیر غور لائے گئے۔ اس موقع پر چیئرمین سرمایہ کاری بورڈ نے ملائیشیا کی جانب سے پاکستان سے پھل، سبزیاں، چاول، ڈیری مصنوعات، مچھلی، گندم اور کائٹن سے تیار مصنوعات کی درآمدات بڑھانے پر زور دیا۔ ملائیشین وزیر نے کہا کہ ان کا ملک پاکستان سے غذائی مصنوعات درآمد کرنے اور لائیو اسٹاک کے شعبہ کی ترقی کیلئے پاکستان سے معاونت حاصل کرنے میں دلچسپی رکھتا ہے۔ سلیم ایچ مانڈوی والا نے اس سلسلے میں سرمایہ کاری بورڈ کی جانب سے ہر ممکن تعاون فراہم کرنے کی یقین دہانی کرائی۔ دریں اثناء چیئرمین سرمایہ کاری بورڈ نے ملائیشیا کی حلال ٹولپمنٹ کارپوریشن، ایس ایم ای کارپوریشن، ایسوسی ایٹڈ چائنیز چیمبر آف کامرس اینڈ انڈسٹری اور نیشنل چیمبر آف کامرس اینڈ انڈسٹری ملائیشیا کے عہدیداران سے بھی الگ الگ ملاقاتیں کیں، جن میں دوطرفہ تجارتی و سرمایہ کاری تعلقات کو فروغ دینے کے طریقوں پر تبادلہ خیال کیا گیا۔

KARACHI (Azhar Ali Khan): British Prime Minister David Cameron on Tuesday said that Pak-UK bilateral trade volume would be enhanced to 5 billion pounds by 2015. Addressing media men in a joint press conference with Pakistani Prime Minister Syed Yousuf Raza Gilani, Cameron urged the need to explore trade avenues. Citing illiteracy as the prime reason behind, he said, "Illiteracy is one of the core reasons behind extremism," adding the UK would help promote education in Pakistan. He said Pakistan has lost much against war on terror and this menace has also affected his country as well. "Pak-UK friendship is unbreakable," he reiterated.

34% Increase in Pak-Malaysia Bilateral Trade -- APP

34% Increase in Pak-Malaysia Bilateral Trade

April 11, 2011

Share this story on Facebook.

ISLAMABAD: The trade between Pakistan and Malaysia has touched \$2.5 billion mark in 2010 registering an over all increase of 34% compared to total trade of \$1.86 billion of last year.

Pakistan's High Commissioner in Malaysia Masood Khalid giving details of the bilateral trade Monday said since the signing of FTA between Pakistan and Malaysia in 2007, the bilateral trade was following an upward trajectory, said a press release received here on Monday.

\$2.5 Billion Trade: According to latest data released by Ministry of International Trade and Industry (MITI) Malaysia, the bilateral trade which stood at \$ 1.362 billion in 2007 has increased to \$ 2.5 billion in 2010. The High Commissioner said the balance of trade is heavily tilted in favour of Malaysia which needs to be narrowed by including non traditional items in the bilateral trade like marble and granite, gem and jewellery, fruits and vegetable, surgical, cutlery and sports goods, spices, leather, handicrafts, pharmaceutical products, ready-made garments and meat products.

He suggested that Malaysian side may send a trade delegation to Pakistan for identifying specific products for import by Malaysia. He said Pakistan High Commission is pursuing a number steps to increase the exports from Pakistan to Malaysia. Recently, import of beef from Pakistan had started which was now available throughout Malaysia. "Meanwhile, Nili Ravi buffalo of Pakistan has been exported to Malaysia to help pilot breeding project and efforts are under-way to export Pakistani mangoes to ensure their availability throughout Malaysia", he added.

The High Commissioner said as an endeavour to bring private sectors of the two countries closer to each other and to forge cooperation between the two countries in different areas Board Of Investment (BOI) of Pakistan and Malaysian Industrial Development Authority (MIDA) had jointly organised a one day seminar in Kuala Lumpur recently. He said a number of MoUs and agreements have been signed between the two countries to forge meaningful and result oriented cooperation in agriculture, halal sector, higher education as well as in the field of transportation besides Pakistan-Malaysia Joint Business Council had also been launched to promote interaction between the private sectors of two countries.

Pakistani Products: According to data the exports of Pakistani rice to Malaysia had registered an increase of 124.80% in 2010 with export of RM 198.62 million as against RM 88.3 million of last year. The cotton yarn registered an increase of 66.21% with an export of RM 37.87 million in 2010 compared to RM 22.78 million last year. Bed linen registered an unprecedented increase of 77.33% with an export of RM 3.42 million compared to RM 1.93 million last year. However, the exports which remained into the negative zone were fish, onion, maize, woven fabrics and synthetic staple fibre, electronic appliances, line telephony, part and accessories.

On the Malaysian side, the biggest increase in export to Pakistan was recorded in Palm Oil which registered 45.14% increase; natural rubber registered an increase of 40.57%; fibre board wood registered an increase of 18.46% whereas the items which remained in the negative zone were insecticides, synthetic yarn and automatic data processing machine, etc.

Zardari wants \$2 Billion Pak-Turkish trade volume -- Market Watch - Portal

Zardari wants \$2 Billion Pak-Turkish trade volume

April 12, 2011

Share this story on Facebook.

ANKARA: President Asif Ali Zardari arrived in Ankara on Monday on a four-day official visit to hold talks with the Turkish leadership for further cooperation and strengthen the existing bilateral ties.

He will hold meetings with Turkish President Abdullah Gul, Prime Minister Recep Tayyip Erdogan and Speaker Turkish Grand National Assembly Mehmet Ali Sahin.

Bilateral Ties: During his stay, President Zardari will visit the mausoleum of founder of the modern state of Turkey, Mustafa Kemal Atatürk, to pay his respects. The Turkish president will confer the Turkish state order medal Devlet Nishan on Zardari in a special investiture ceremony for his contribution to promote bilateral ties between the two countries. Zardari will also meet Turkish businessmen and members of various think tanks, academia and media. A delegation of leading businessmen from Pakistan will also visit Ankara who will interact with Turkish businessmen and discuss prospects for joint ventures in various areas of the economy.

Pakistani Ambassador to Turkey, Tariq Azizuddin, said that the visit would focus on enhancing bilateral trade with an effort to bring it at par with the Pak-Turkish political partnership. The leadership of the two countries has been holding consultations to increase bilateral trade, which was \$752 million two years back, he added. Owing to concerted efforts of both the governments, the bilateral trade rose to \$1 billion by 2010, Azizuddin said, adding that now the two countries want to take the trade volume to \$2 billion by the end of 2012.

Zardari, Gul vow to work hand in hand to create vibrantly growing economies -- By APP

Zardari, Gul vow to work hand in hand to create vibrantly growing economies
ANKARA - 13th April 2011

By APP

President Asif Ali Zardari and his Turkish counterpart Abdullah Gul on Wednesday resolved to continue working hand in hand to exploit the vast potential in industrial, energy, communication and infrastructure sectors of their countries to create vibrantly growing economies.

Addressing a joint press conference after a meeting between the two leaders and delegation level talks here at Cankaya Presidential Palace, President Zardari said that his visit would add a new chapter of cooperation and engagement between the two countries.

During the meeting, the two leaders held detailed discussions on bilateral matters and regional and international issues of mutual interest.

President Zardari was assisted in the talks by Defence Minister Ahmed Mukhtar, Railways Minister Ghulam Ahmed Bilour, State Minister for Foreign Affairs Hina Rabbani Khar and Chairman of Board of Investment Saleem Mandviwala.

The President was on his first bilateral visit to Turkey and his earlier five visits to the country were to attend trilateral summits on Afghanistan and international conferences.

The two leaders said that the talks focused on making operational Islamabad-Istanbul-Tehran freight train. President Gul said that the project would provide a trade route from Islamabad to European countries with goods taking about 11 days to reach Turkish markets.

He said that the railway track already existed but it needed to be upgraded and both the countries agreed to encourage private sectors to generate funds for the project.

The train is an important component of efforts of both the countries to build trade and energy corridors connecting South Asia and Central Asia, he said.

President Zardari said that Pakistan attached great importance to its relations with Turkey, which was the only Islamic country of the NATO (North Atlantic Treaty Organization) alliance and was also a member of the G-20, the economic grouping of the 20 biggest economies of the world.

During the talks, the two leaders expressed the resolve to raise their unique brotherly ties to pursue common strategic goals for achieving sustainable political and social stability and economic advancement.

They discussed prospects of various projects relating to infrastructure development, banking, investment, energy and trade and talked about ways to increase frequency of cultural and parliamentary exchanges, travel and tourism and people-to-people contacts.

President Zardari apprised President Gul of his government's efforts to rid Pakistan of the threat of terrorism and address the root causes of poverty and social deprivation, which create conditions for extremism.

President Zardari informed his Turkish counterpart of the policies that make Pakistan an attractive place for investment for the Turkish companies, which are already active in the country on numerous important projects.

Pakistan has a policy of establishing Special Economic Zones where investors will get incentives and it also allows remitting of capital and profits gained by foreign investors to their home countries, he said.

Agreeing that Turkish construction, engineering and energy companies have the financial strength and capacity to undertake mega projects, the leaders resolved that their governments would extend all support to the private sector in these sectors.

The two Presidents expressed confidence that their mutual efforts would help them in meeting the target of raising their bilateral trade volume to two billion dollars by 2012.

President Zardari termed the decision by the Supreme Court to accept a reference filed by him to revisit the judicial murder of PPP founder Shaheed Zulfikar Ali Bhutto as "landmark" and reflective of "political and democratic growth."

The government wanted to rectify a historical fault, he said adding, "We do not want revenge in history ... we just want that a historical wrong is corrected. If in future someone commits a similar wrong, then he would know that the history will never forgive him."

To a question the President said Pakistan's views on Afghanistan were clear and it believed success of Afghan-led reconciliation process was vital for the regional peace and stability.

He said Pakistan, Afghanistan and Turkey were coordinating at the political, military and intelligence levels to find a solution that was acceptable to the people of Afghanistan.

"War is defeat of the civilized mindset," he said, adding that Pakistan would support the Afghan government and people in maintaining peace and stability.

To a question, President Gul said recently the armed forces of Pakistan, Afghanistan and Turkey conducted joint military exercises. Turkey many times had the ISAF command in Afghanistan, it contributed 2000 troops for the country and then made significant contributions in improving health and educational facilities in Afghanistan, he said.

"But military aid is not enough. We have to win hearts in

Afghanistan," he said adding, "2011 is a critical year as foreign forces will be retreating from Afghanistan, whose army and police will take control of security. Our ultimate goal is to ensure peace and security in Afghanistan through our collective efforts."

To a question about efforts to end energy shortages in

Pakistan, President Gul said he himself contacted Turkish energy companies who were willing to invest in projects for power generation in Pakistan through coal and wind.

Gul said that Turkey has a customs union with Europe and it can be of help to Pakistan for its exports to European nations. Turkey is a hub for flights to all parts of Europe and being at the crossroads of both Europe and Asia, Turkey will extend benefits to Pakistan in gaining economic mileage, he added.

President Zardari expressed gratitude to the people and the government of Turkey for always standing by Pakistan's side and recalled the outflowing of help and assistance in the aftermath of the devastating earthquake and floods in Pakistan.

He said a visit to Turkey was just like visiting home and the two countries were bound by strong bonds of deep friendship, similarity of views and commonality of interests.

Earlier on his arrival at the Presidential Palace, President Zardari and his delegation were warmly received by President Abdullah Gul.

A smartly turned out contingent of Turkish armed forces presented guard of honour to the visiting dignitary and national anthems of the two countries were played amid boom of a 21-gun salute.

President Zardari inspected the guard of honour and afterwards he was introduced to the members of the Turkish cabinet.

.Pak-Turkey to increase bilateral trade: Mirza Thursday, 14 April 2011 10:38 0 Comments ISLAMABAD: Former Advisor to Prime Minister on Textiles and economist Dr. Mirza Ikhtiar Baig said that there is a great potential for the increase of bilateral trade and joint ventures between Pakistan and Turkey.

Talking to PTV, he said currently the trade volume of bilateral trade is 940 million dollars, while the leadership of both the countries have set trade target of two billion dollars between the two countries.

He said Turkey levied additional duties on textiles including Pakistani textiles and President Asif Ali Zardari should take up the issue with Turkish leadership and get exempted Pakistan from it. He said Turkey can provide a huge market for Pakistani textiles.

PM okays Pak-France Joint Business Council -- APP

PM okays Pak-France Joint Business Council

Posted on April 14, 2011 by admin

Prime Minister Gilani also requested the Secretary General of French Ministry of Foreign and European Affairs Pierre Sellal to support Pakistan's case in the European Union for the tariff concession on the import of 75 Pakistani products - mainly textile. - File Photo.

KARACHI: Prime Minister Syed Yousuf Raza Gilani approved the formation of Pak-France Joint Business Council between FPCCI and MEDEF to enhance bilateral trade and investment between the two countries.

This was stated by the Federal Advisor on Textile Dr Mirza Ikhtiar Baig here Thursday.

He said that a formal agreement is to be signed on the forthcoming visit of the French Prime Minister to Pakistan in May this year in the presence of representatives from FPCCI.

He said that Prime Minister Gilani also requested the Secretary General of French Ministry of Foreign and European Affairs Pierre Sellal to support Pakistan's case in the European Union for the tariff concession on the import of 75 Pakistani products – mainly textile.

Mr Baig pointed out that EU Trade Commissioner Karel De Gucht has told EU lawmakers that the Union was actively working on that to get a solution.

It may be noted that an original EU plan, unveiled in October last year had declared that duty suspensions would effect about 900 million euros worth of Pakistani exports to the EU and estimated Pakistan could boost sales to the EU by 100 million euros.

Pakistan focusing on to promote bilateral trade with regional countries: Dr. Firdous -- By APP

Pakistan focusing on to promote bilateral trade with regional countries: Dr. Firdous ISLAMABAD - 15th April 2011

By APP

Minister for Information and Broadcasting Dr. Firdous Ashiq Awan on Friday said that Pakistan was focusing on to promote its bilateral trade with regional countries like Iran, China and Afghanistan aimed at giving boost to economic activities in the South Asian region.

During the question-hour session of the National Assembly, she said that the President and the Prime Minister also wanted to provide increased trade facilities to Pakistani business community and easy access to the markets of European countries and Latin America.

The Minister said Pakistan had suffered a lot due to its active role in war against terrorism and was facing great economic hardships so "We are engaging the world asking them that Pakistan needs trade not aid."

Pak-Kazakh agreed to promote cooperation in various fields -- APP

Pak-Kazakh agreed to promote cooperation in various fields

ISLAMABAD - 15th April 2011

By APP

Pakistan and Kazakhstan have agreed to promote cooperation in various economic and technical fields during the 7th session of Pak-Kazakh Joint Ministerial Commission (JMC) here on Friday.

The 7th session of Pak-Kazakh JMC held here was co-chaired by Minister for Water and Power Syed Naveed Qamar and Vice Minister of Transport and Communication of Kazakhstan Azat Bekturov.

Both the delegates acknowledged deep historical, cultural and political relations between the two countries and expressed the hope that current momentum in translating excellent political relations into commercial and economic opportunities would further promote bilateral cooperation.

During the JMC, discussions were held on promoting cooperation in various economic and technical fields which include promotion of trade and investment, agriculture, joint venture in fields of manufacturing/SMEs, petroleum and natural resources, banking and finance, science and education, information technology, health, culture and tourism.

Both sides also agreed to encourage their respective chambers of commerce and industry to setup a Joint Business council to enhance interaction between the private sectors of the two countries.

The also finalized a Memorandum on mutual cooperation between JSC; National Agency on export and investment "KAZNEX INVEST" and Trade Development Authority of Pakistan (TDAP).

Gilani looks to boost trade with Kazakhstan -- APP

Gilani looks to boost trade with Kazakhstan

KARACHI - Prime Minister Yousuf Raza Gilani, along with a trade delegation, is likely to visit Kazakhstan this month, while the two countries have agreed to boost bilateral trade, through various steps discussed in the seventh session of the Pak-Kazakh Joint Ministerial Commission (JMC), held on Friday in Islamabad.

This would be Gillani's second visit to Kazakhstan following his visit last month.

Pakistan has already stepped up efforts to enhance trade relations with the landlocked Central Asian Republics in the last couple of years. Visit of the prime minister with selected Pakistani exporters/importers to Kazakhstan would promote bilateral trade – which is currently highly negligible, sources said.

The PM, who is scheduled to visit the foreign country for two days from April 26-27, 2011, would also be accompanied by a delegation of businessmen, traders led by Federation of Pakistan Chambers of Commerce and Industry (FPCCI), they added. During the forth coming visit, sources said, various agreements and Memorandum of Understandings (MoUs) were also expected to be signed between the two countries.

The two sides, sources claimed, would also check implementation status of the understandings made earlier – one of which was the 'Quadrilateral Agreement' to have a land route among Pakistan, China and other Central Asian States. Pakistan was interested to use the proposed land route, which links it with China, Kyrgyzstan and Kazakhstan. This land route will help enter markets of Central Asia, in addition to it being an alternative way for export to reach the Russian market.

Under the proposed route, sources said, goods from China were to reach the Bishkek market within a short time of eight to ten hours. Pakistan's goods, which are exported via Shahra-e-Karakoram to China, could easily be exported to the two Central Asian Republics (CARs) and then to the Russian border with comparatively lesser freight cost, sources claimed. The route was important for Pakistan, which enjoys the Quadrilateral Agreement and Free Trade Agreement (FTA) with China, they added.

The FPCCI group, led by Senator Ghulam Ali, would also meet members of Kyrgyzstan Chambers of Commerce and Industry, and other local businessmen to seek potential of joint investment and bilateral trade. The visit of PM Gilani was also aimed to increase bilateral trade volume. Interestingly, Pakistan was exporting goods worth a meager \$1.0 million, while it was importing around \$4.0 million worth goods from the foreign country.

Seventh Pak-Kazakh JMC: Earlier on Friday, the two countries have also agreed to promote cooperation in various economic and technical fields during seventh session of the Pak-Kazakh Joint Ministerial Commission (JMC) in Islamabad. The session was co-chaired by Minister for Water and Power Syed Naveed Qamar and Vice Minister of Transport and Communication of Kazakhstan Azat Bekturov.

According to sources, the two sides have discussed various steps for promotion of trade, agriculture, joint venture in fields of manufacturing/SMEs, petroleum and natural resources, banking and finance, science and education, information technology, health, culture and tourism.

Hafeez Shaikh seeks US investment in energy sector -- By APP

Hafeez Shaikh seeks US investment in energy sector

WASHINGTON - 16th April 2011

By APP

Finance Minister Dr Abdul Hafeez Shaikh has sought American private sector's investment in energy sector to overcome gruelling electricity shortages as he identified a number of opportunities existing in the key field.

Dr Shaikh, who is in Washington to attend the IMF-World Bank meetings, told

members of Pakistan-US Business Council Friday afternoon that Islamabad is carrying out economic reforms and remains committed to facilitating foreign investment.

Pakistan, he said, looks forward to investment for development of massive Thar coal reserves, completion of Diamer Basha Dam and other hydro-electricity projects as part of efforts to meet its expanding energy requirements, boost industrial growth and step up the process of economic development.

In the field of agriculture, he said, Pakistan seeks to increase productivity while investment in infrastructure projects would help raise the standard of living in the country.

"We expect good results from the interaction," Shaikh said after his discussions with representatives of major American companies at the US Chamber of Commerce.

The finance minister also hinted at discussions on new projects with the World Bank.

Hafeez Shaikh spoke about the Pakistani government's efforts to contain inflation, bolster revenue generation and achieve better growth prospects despite catastrophic floods last year. He was upbeat on substantial growth in exports this year, reflecting a 26 per cent increase over last year.

Pakistan's ambassador to the United States Husain Haqqani drew attention of the forum to the importance of strengthening economic and trade ties between the two countries.

Jay Collins, chairman of Pakistan-US Business Council, said economic ties are a vital aspect of the strategic relationship between two countries and praised Ambassador Haqqani's dedication to promoting economic relations.

During the visit, the finance minister is scheduled to have a meeting with World Bank and IMF leaders. The finance minister will also hold bilateral dialogue with US government on advancing economic ties and meet representatives belonging to the departments of State and Treasury, as well as USAID and White House officials.

Dr Shaikh will also meet with his counterparts from China, Saudi Arabia, Germany, Afghanistan, Iran and Britain's Minister of International Development.

Pakistani, Chinese finance ministers vow to further strengthen economic ties -- By APP

Pakistani, Chinese finance ministers vow to further strengthen economic ties

WASHINGTON - 17th April 2011

By APP

Pakistani and Chinese finance ministers reaffirmed their countries' resolve to further expand and strengthen bilateral economic and trade ties and coordinate closely on policies at financial institutions.

Finance Minister Dr Abdul Hafeez Shaikh and his Chinese counterpart Xie Xuren met here on the sidelines of the IMF-World Bank annual meetings.

"China and Pakistan have historic and close ties and we discussed progress towards speedy implementation of agreements and MoUs signed during Chinese Premier Wen Jiabao's visit," Dr Shaikh told APP after the meeting at the World Bank.

Both the finance ministers discussed economic reforms. The Chinese finance leader lauded Islamabad for undertaking economic reforms. Xuren briefed Dr Shaikh on discussions at the recent G-20 meeting.

Hafeez Shaikh said that Pakistan would welcome Chinese investment in petroleum sector either through new investments or buying stakes in existing enterprises.

Hafeez Shaikh held out Islamabad's commitment to facilitate Chinese investment in various sectors of the economy and invited Chinese companies to locate their businesses in the country. The two finance leaders also discussed currency swap.

UBL to help Chinese investors to explore Pak, ME -- Observer

UBL to help Chinese investors to explore Pak, ME

Beijing—Pakistan leading private sector bank, United Bank Limited (UBL), is offering to help Chinese enterprises explore the international markets in Pakistan and Middle East countries. UBL has witnessed robust growth and closer cooperation with Chinese business partners since establishing an office in Beijing in 2007, according to a bank announcement on Saturday.

It facilitates Chinese companies in contracting, trade and treasury services by taking advantage of its long experience operating in Pakistan and Middle East countries.

Wajahat Husain, the company's Group Executive and Head of International said at a reception in Beijing the other day that "we have provided background support, such as the environment, policy and social customs, for Chinese investors in four countries - Pakistan, United Arab Emirates, Qatar and Yemen." The trade between the United Arab Emirates and China has reached around \$24 billion, and UBL,

which has its international headquarters based in the UAE and strong relationships with government as well as top tier business groups, can be seen as making a positive contribution to the trade growth, said Wajahat Husain.

He also said Chinese investors show a growing, new interest in Bahrain, although the trade volume between the two holds at \$0.77 billion. UBL's Bahrain branch mainly participates in infrastructure, manufacturing, trading and retail.

Tianjin Pipe International Economic and Trading Cooperation has been in cooperation with UBL for about 20 years, and Xu Xiuqing, the Chinese company's Middle East and Former Soviet Regional Manager, said she is very satisfied with the high quality and good service of UBL. In Wajahat Husain's view, Chinese investors "research well" before investing in foreign countries and UBL is committed to be a "trusted partner" to Chinese out-bound business as the two neighbors celebrate the 60th anniversary of diplomatic relations.—APP

Powered by Translate Islamabad: A cargo train that will cover a distance of 6,500 km from Islamabad through Tehran to Istanbul will be "running in less than a year", an official said.

The ambitious project got a final shape during the April 11-14 official visit of President Asif Ali Zardari to Turkish capital Ankara.

Turkish Union of Chambers (TOBB) has said it will immediately start a company to run the project and the company will seek collaboration with Pakistan and Iran business groups to execute it, Associated Press of Pakistan reported.

"We are planning to get the train running in less than a year," TOBB president Rifat Hisarcikliglu was quoted as saying.

The weekly trains are expected to make a one-way trip in 11 days between Istanbul and Islamabad.

The report said the train will open up the European and Asian markets for Pakistan.

President Asif Ali Zardari, during his visit, held discussions with Turkish President Abdullah Gul, Prime Minister Recep Tayyip Erdogan, and Grand National Assembly Speaker Mehmet Ali Sahin.

Pakistan and Turkey are keen to expand their bilateral trade volume from existing USD 1 billion to USD 2 billion by year 2012.

Balochistan to get representation in Pak Army as per population share:

COAS -- By APP

Balochistan to get representation in Pak Army as per population share: COAS

GWADAR - 18th April 2011

By APP

Chief of Army Staff General Ashfaq Parvez Kayani said on Monday that youths of Balochistan would be recruited in Pakistan Army according to percentage of their province's share in the total population of the country.

He said this while addressing a ceremony of Gwadar Institute of Technology here. He said that 4000 Baloch youths had completed their training and joined the Pakistan Army while during the current year more 5000 youths would be recruited in the Army. The recruitment process has already been started in this regard, he added.

He said that the rules and regulations in connection with the recruitment process would be relaxed for youths of Balochistan so that maximum people could join the Pakistan Army from this province.

The COAS said that the Balochistan Chief Minister was responsible for maintaining peace in the province and Balochistan Frontier Corps would soon be replaced with the Army battalion, deployed in Sui area of Dera Bugti district.

He said there was no military operation being carried out in any part of the province. "Development and integrity of Pakistan links with the progress and prosperity of Balochistan as this province is rich with natural resources of natural gas, oil, coal and minerals" Gen. Kayani said adding that there was a need of technology and skilled manpower to get benefits from these natural resources.

He said the Army Medical College would be established besides Combined Military Hospital Quetta where students would get admission to four-year MBBS.

He hoped the Balochistan government would extend its cooperation to the Pakistan Army to improve natural mines and mineral resources of Dukki and Musakhail areas.

All Day**Gulf Cooperation Council to sign free trade agreement with Pakistan**

Gulf Cooperation Council to sign free trade agreement with Pakistan

Pakistan, all set to sign a Free Trade Agreement (FTA) with the Gulf Cooperation Council (GCC), would be at a disadvantage compared to the gulf countries which possess a huge economy. Pakistan must consider the weaker position of its own economy and should look to avoid repeating mistakes, the country had committed, during the FTA with China, sources told Pakistan Today. The country has exhibited a huge trade difference with China after signing of FTA, as there has been an influx of goods from the neighboring country in the last few years which took trade deficit to around \$4.0 billion.

The proposed FTA would not make a lot of difference in the duty structure, affecting the present bilateral trade, as import duty of zero to five percent in the GCC countries is already existent, they said. "Concerned authorities should thoroughly examine future implications of any agreement prior to its signing," they said, adding that the trade difference between Pakistan and China has significantly widened after implementation of the Pak-China FTA. Chinese cell phones, which have captured almost 90 percent of the market in Pakistan after the FTA, are an example while other foreign products have also easily captured a major share of the domestic market, they claimed.

However, according to sources, Pakistan and GCC were about to sign the FTA as negotiations over the draft of the proposed agreement were almost finalised.

Following the FTA, sources claimed that Pakistan was looking to boost its trade volume with GCC countries from the current \$59 billion to \$350 billion by 2020.

As trade relations between Pakistan and GCC countries were expecting to be multiplied in the near future, volume of trade will enter in the figure of hundreds. The Ministry of Commerce and other concerned departments were also submitting their inputs before formal signing of the agreement, while member countries of the council were also convinced about the issue, sources claimed.

Proposals from both sides have also been discussed in various rounds of negotiations on FTA during the last few years. Pakistan was also negotiating with different member countries of GCC including Oman, Saudi Arabia, United Arab Emirates, Bahrain, Qatar and Kuwait on the framework of FTA for the last four years. Besides Pakistan, the United States was also interested to have an FTA with the GCC, but some members of the council had raised objections.

However, proposal of including payment of the five percent duty by the governments of GCC members with free trade agreements with the US into a regional fund, tagging duty-free products exported under the FTAs, or routing them via existing free trade zones in the region, was also under discussion. Pakistan is trying hard to finalise the FTA at the earliest, while the third round of talks on the issue are expected soon to conclude the discussion. The Pakistan's ambassador to Riyadh Umar Khan Sherazi had, earlier, claimed that FTA with GCC would be signed before March this year.

Saudi Arabia keen to invest in energy, agriculture sectors: Hafeez Shaikh

WASHINGTON - 18th April 2011

By APP

Saudi Arabia is interested in investing in Pakistan's energy and agriculture sectors, Finance Minister Abdul Hafeez Shaikh said after meeting his counterpart from the

oil-rich country.

Dr Shaikh and Saudi Finance Minister Dr Ibrahim Bin Abdulaziz Al Assaf discussed investment opportunities that Pakistan holds out for Saudi businesses at a meeting on the occasion of semi-annual IMF-World Bank gathering.

"We have very close and longstanding relationship with Saudi Arabia and Ibrahim Al-Assaf is a longtime friend of Pakistan. We explored ways to further expand bilateral economic cooperation," Hafeez Shaikh said.

He also reaffirmed Islamabad's policy to facilitate foreign investment in various sectors of the economy including energy as the country seeks to overcome electricity shortages and spur industrial output.

The Pakistani finance minister also discussed economic cooperation with his counterparts from neighbouring Iran and Afghanistan.

With Iranian Finance Minister Dr Seyed Shamsuddin Hosseini, Shaikh discussed how the two countries could strengthen cooperation in trade and transport areas, particularly toward materializing the proposed launch of a cargo train from Iran to Turkey via Tehran.

Dr Shaikh also held talks with Afghan Finance Minister Omar Zakhilwal on expanding bilateral commerce. At the invitation of Zakhilwal, a delegation of Pakistani entrepreneurs will visit Afghanistan to look at investment opportunities in fields like minerals development and communication.

"Yesterday, I also met with Chinese finance minister — these meetings with leaders of neighbouring countries are part of our effort to focus on regional development cooperation," Shaikh said.

The finance minister was accompanied at the meetings by Secretary Finance Waqar Masood Khan, Chairman Federal Board of Revenue Salman Siddique, Governor State Bank Shahid Hafeez Kardar, Deputy Chairman

Planning Commission Nadeem ul Haq, Secretary Economic Affairs Division Abdul Wajid Rana and Counsellor Economic Affairs at the Pakistani embassy in Washington Zahid Hafeez.

Pakistan test-fired Hatf 9; Nuclear-capable Missile

Pakistan test-fired Hatf 9; Nuclear-capable Missile

April 19, 2011

[Share this story on Facebook.](#)

ISLAMABAD: Pakistan has successfully test-fired a newly developed short-range ballistic missile capable of carrying nuclear warheads on Tuesday.

The military said in a statement that the “Hatf 9” missile with a range of 60 kilometres (40 miles) “could carry nuclear warheads of appropriate yields with high accuracy”.

Deterrence Value: “The missile has been developed to add deterrence value to Pakistan’s strategic weapons development programme at shorter ranges,” it said, adding that “this quick response system addresses the need to deter evolving threats”. South Asian rivals India and Pakistan — which have fought three wars, two of them over the disputed Himalayan territory of Kashmir — have routinely carried out missile tests since both demonstrated nuclear weapons capability in 1998. Pakistan’s arsenal includes short-range, medium and long-range missiles named after Muslim conquerors.

Pakistan carried out nuclear weapons tests in May 1998, following similar tests by India. The neighbours were on the brink of a nuclear conflict in 2002 over tensions about disputed Kashmir, but began a slow-moving peace dialogue in 2004, which resumed in March after three years of suspension following November 2008 Mumbai attacks.

175 new coaches imported to cope with demand of passengers: Bilour -- SANA TV

175 new coaches imported to cope with demand of passengers: Bilour

South Asian News Agency (SANA) · April 30, 2011 ·

ISLAMABAD(SANA): Minister for Railways Ghulam Ahmad Bilour has said that one hundred and seventy-five new coaches have been imported to cope with the demand of the passengers.

He informed the National Assembly during question hour on Friday that 124 first class Sleeper Coaches have been replaced with AC Lower Coaches and attached with various trains to cater the need of the public.

Responding to a supplementary question the Minister said that a proposal is under consideration to lay down nine hundred kilometers rail track to connect Gwadar Sea Port through rail link. He said that a huge investment is required to make Pakistan Railways profitable.

Parliamentary Secretary for Food and Agriculture Liaquat Ali Khan informed the House that sufficient stock of sugar is available in the country and the price of the commodity is less as compared to other regional countries. He said that a number of steps have been taken to enhance sugarcane production in order to reduce dependency on sugar import.

Federal Minister Makhdoom Shahabuddin said that 1056 TB Centers are operational in different parts of the country to provide free diagnostic and treatment facilities to the tuberculosis patients.

He said that under Benazir Income Support Programme a Health Insurance Policy is being formulated for the poor segment of the society.

Minister of State for Foreign Affairs Hina Rabbani Khar informed the House that efforts are being made for the release of Pakistani prisoners detained in Saudi Arabia. She said that Consular access is being provided to the detainees and during her recent visit to the Kingdom she also took up the matter with the concerned authorities for their early release.

Minister for Narcotics Control Haji Khuda Bakhsh Rajar informed the House that a five-year Drug Control Master Plan has been prepared and will be implemented after approval from the Executive Committee of National Economic Council (ECNEC).

Gwadar Port to be connected through rail link: Bilour

Gwadar Port to be connected through rail link: Bilour

ISLAMABAD: Minister for Railways Ghulam Ahmed Bilour Friday said a proposal was under consideration to connect the Gwadar Deep Sea Port through a rail link of Pakistan Railways.

He said feasibility study had been completed under which the Gwadar Port was proposed to link with main railway network at Mastung located on Quetta-Taftan section, while the length of proposed railway link would be 901 kilometres. At National Assembly session, he said negotiations were underway with China to lay the railway track, adding that a Chinese company had conducted a survey in this regard while further terms and conditions were yet to be finalised.

He said Pakistan Railways was in dire need to get new locomotives and overhaul the old ones besides improving infrastructure. This deficiency was causing hours-delay in trains arrival and departure, he added.

Bilour had informed the House the Pakistan Railways had not received the Rs 11.6 billion grant approved by the Federal Cabinet even after passage of four months, which was essential to improve its efficiency. "We are in dire need of funds to purchase new locomotives and repair old-ones for improving its countrywide

operations,” he said.

He said the Ministry was considering a proposal of life insurance for those people who lost their lives in rail related incidents. He said the entire railway network was being equipped with modern signaling system, adding that Walkie-Talkie Radio sets had been provided to train guards and relief trains.

He said installation of VHF radio set at each station on main line from Peshawar to Karachi had been completed. “Installation of VHF Radio on 280 locomotives running with Mail, Express, Passenger and Goods trains has also been completed,” he said.

During last four years around 644 accidents took place over the railway network. Out of these, 45 percent accidents took place at un-manned and manned level crossings, he added. He said the train service on Sahiwal to Raiwind track would hopefully start by end of this year.

Bilour said Pakistan Railways was granting 50 percent concession in economy class and 25 percent concession in all AC classes to senior citizens who attained the age of 65 years. “They can avail the concession in all trains except five non-stop trains including Millat Express, Karakoram Express, Karachi Express, Islamabad Express and Margala Express,” he said. app

Parliament approves TAPI gas agreement

Parliament approves TAPI gas agreement

Kabul—Afghan lawmakers HAVE approved Turkmenistan- Afghanistan-Pakistan-India (TAPI) gas agreement, TOLO News reported.

International Liaison Commission of the Afghan parliament viewed the agreement as an economy booster in the country and said Turkmenistan's gas flow through Afghanistan would help to strengthen business relations between the members of the projects.

A member of international liaison commission of the Afghan House of Representatives Mohammad Anwar Akbari while expressing happiness about the move of the house said about 7,000 people will be assigned to ensure security to the project in the country. After the completion of the project Afghanistan would receive 1,200,000,000 cubic meters of gas and it would peak at more than 5 billion cubic meters of gas within five years, Mr Akbari said.

"We will have support of a US company and estimations put the cost of the project at around \$7.8 billion. And construction work will begin by 2012 and it's expected to be completed by 2014," Mr Akbari said.

Naheed Ahmadi Farid, an Afghan lawmaker who represents Herat province, said "cooperation in improvement of gas and fuel industry is on top of our agenda.

Meanwhile, parliamentarians also ratified the agreement of Convention on Cluster Munitions, which is an international treaty that bans the use of cluster bombs, signed by the Afghan government.

Lawmakers said Afghanistan is the 24th member of Convention on Cluster Munitions.—NNI

Trade Facilitation Programme for Pakistan

Trade Facilitation Programme for Pakistan

EFIC, ADB ink agreement

Staff Report

KARACHI: Australia's Export Finance and Insurance Corporation (EFIC) will share the risk that Asian Development Bank (ADB), through its Trade Finance Programme, takes in guaranteeing letters of credit for exports of Australian goods to Pakistan, Bangladesh and Sri Lanka in order to make it easier to import crucial Australian goods.

An agreement was signed in this regard on Tuesday.

Australia's High Commissioner to Pakistan Tim George has welcomed the signing of a trade facilitation agreement between the ADB and EFIC, which will help the Pakistan economy.

This will help companies that struggle to get the trade finance they need to buy key inputs for export production or end products from overseas, including from Australia. A lack of trade finance holds back business and means less job creation, ultimately restraining economic growth for regional economies.

"I am pleased to see this innovative agreement take place," George said. "It will greatly assist Pakistani and Australian companies to do business, which in turn is good for the economy. Trade creates jobs, raises the standard of living and promotes sustainable economy growth," he said.

Australia is a major exporter to Pakistan. In 2009-10, oil seeds, fertilizers and coal were among Australia's biggest exports to Pakistan, which totalled to more than 610 million Australian dollars. Australia and Pakistan have a Joint Trade Committee (JTC) mechanism to discuss opportunities to expand bilateral trade and investment, and Australia is due to host the JTC in 2011. The Australian High Commission in Islamabad is also helping to promote business-to-business links, including through the revival of the Pakistan Australia Business Forum.

ADB, based in Manila, is dedicated to reducing poverty in Asia and the Pacific through inclusive economic growth, environmentally sustainable growth, and regional integration. Established in 1966, it is owned by 67 members - 48 from the region.

EFIC provides finance and insurance solutions to help Australian exporters overcome the financial barriers they face when growing their business overseas. As the Australian government's export credit agency, it helps successful businesses to win, finance and protect export trade or overseas investments where their bank is unable to provide all the support they need. It works directly with exporters or with their banks to provide loans, guarantees, bonds and insurance products to meet the needs of both large and small exporters.

Pakistan, France ink declarations on security, economic partnership

Pakistan, France ink declarations on security, economic partnership

By Shafek E Koreshe & Shumaila Andleeb

PARIS, May 5 (APP): Pakistan and France on Thursday agreed on cooperation in security, trade and economic partnership in a bid to further broaden their bilateral relationship. Prime Minister Syed Yusuf Raza Gilani concluded his three-day official visit with the signing of a Declaration on Security Cooperation along with his French counterpart Francois Fillon. Minister of State for Foreign and Economic Affairs Hina Rabbani Khar inked the agreement on Trade and Economic Partnership.

The two declarations were signed after the meeting of Prime Minister Gilani with the French Prime Minister at his official residence.

A Joint Statement issued simultaneously from Islamabad and Paris stated that during the talks the leaders of the two countries agreed on enhancing security cooperation, intelligence sharing, defence cooperation, economic assistance, trade and cooperation against terrorism.

Prime Minister Gilani told APP that his talks with the French leadership were "very positive" and said his visit helped dispel the negative impression, created by the Western media against Pakistan.

He said now it was the duty of the Pakistani media to tell the world that Pakistan was a peace loving country and desired stability in the region.

Gilani stressed that the negative perceptions about Pakistan need to be corrected and the world must realize the sacrifices of the people and security forces of the country and help build its capacity to counter extremism and terrorism.

Prime Minister Fillon seconded the statement of President Nicholas Sarkozy who yesterday in his talks with Prime Minister Gilani appreciated his political acumen and described him as "an anchor of democracy". He assured Pakistan of his country's full support in this regard.

The Prime Minister in his talks with the French leadership and its business community urged them to invest in Pakistan and initiate joint ventures between their private sectors so that economic activity is generated.

Prime Minister Gilani who was here at the invitation of the French leadership met President Nicholas Sarkozy, Prime Minister Francois Fillon, and President of the Senate Gerard Larcher, besides meeting Foreign Minister Alain Juppe and Defence Minister Gerard Longuet.

The Joint Declaration said the two countries had in-depth discussions with the French leadership on bilateral, regional and global issues.

The two sides also announced setting up of an administrating committee to facilitate the establishment of Pakistan-France Joint Business Council and facilitate and strengthen bilateral economic and commercial partnership.

The Joint Business Council was set up following Prime Minister Gilani's address to the French Business Confederation (MEDEF).

Pakistan and France value their partnership, which is characterized by close coordination not only at the bilateral level but also in the context of the European Union. France is the second largest trading partner of Pakistan.

Pakistan and Kuwait will sign a Memorandum of Understanding (MoU) on energy cooperation, -- APP

ISLAMABAD:

Pakistan and Kuwait will sign a Memorandum of Understanding (MoU) on energy cooperation, under which Kuwait will extend financial and technical assistance for two major gas import initiatives – Iran-Pakistan (IP) and Turkmenistan-Afghanistan-Pakistan-India (TAPI) gas pipeline projects.

The MoU will be signed during the official visit of President Asif Ali Zardari to Kuwait beginning May 7. Pakistan is currently importing oil from Kuwait on 60-day deferred payments. Pakistan had earlier required extension in oil import on the deferred payment facility from 60 to 90 days but Kuwait declined the request.

Sources said the petroleum ministry had no proposal during the president's visit to seek extension in oil imports on deferred payment and that it had already discussed with the Kuwaiti government financing for IP and TAPI gas pipeline projects.

Under the MoU, Kuwait will also extend cooperation with the Geological Survey of Pakistan (GSP) and will invest in oil and gas sectors to increase output to meet domestic requirements of Pakistan.

Pakistan has signed Gas Sales Purchase Agreement (GSPA) with Iran for the IP pipeline and awarded a consultancy contract to Germany-based firm ILF, which would work with the National Engineering Services of Pakistan (Nespak). The consultancy contract has been divided into two phases, costing \$55 million.

Iran has laid a 900-kilometre pipeline and has completed a survey to lay pipeline on the remaining 250 km to connect with Pakistan's border. Pakistan will lay a 785km pipeline that would cost \$1.24 billion. Under the IP project, 750 million cubic feet per day (mmcf) of gas will be imported from Iran to generate power.

Under the TAPI gas pipeline, 3.2 billion cubic feet per day (bcfd) of gas will be imported from Turkmenistan – which will be shared by Afghanistan, Pakistan and India. The project is estimated to cost \$7.6 billion.

All participating countries are scheduled to meet in Afghanistan on May 13-14 to resolve the issue of gas pricing and finalise GSPA which will be signed by July 31.

Pak-China friendship anchor of peace, stability: Gilani -- Jang

Pak-China friendship anchor of peace, stability: Gilani

* PM says relationship between countries unique example of abiding friendship, mutual respect based on immeasurable trust

ISLAMABAD: The friendship between Pakistan and China is an anchor of peace and stability and both countries will further strengthen their relations to promote regional prosperity, Prime Minister Yousaf Raza Gilani said on Sunday.

Speaking at an event to celebrate the 60th anniversary of Pak-China diplomatic relations at the Pakistan-China Friendship Centre, he said that a sincere friendship and deep affection marked the relationship between the people of the two countries.

"We are proud to have China as our best and most trusted friend, and China will always find Pakistan standing by its side at all times," Gilani added.

The prime minister said that the relationship between Pakistan and China was a unique example of abiding friendship, immense mutual respect and close partnership based on immeasurable trust.

"When we speak of this friendship as being taller than the Himalayas and deeper than the oceans it truly captures the essence of our relationship," he said.

Prime Minister Gilani said that Chinese Premier Wen Jiabao's visit last year was a demonstration of the unique relationship. "The visit further strengthened the existing cooperation between the two countries."

He expressed confidence that the relationship between the two countries would strengthen in the days to come.

"President Asif Ali Zardari has visited China six times, and each visit has been beneficial and rewarding in one way or the other," he said. "I am eagerly looking forward to my forthcoming visit to China later this month. We have and continue to greatly benefit from the support of the Chinese leadership. China's unique development experience is a model for developing countries like ours to learn from," Gilani added.

The prime minister said that China's success in various fields was a matter of great pride for the people and the government of Pakistan. "Today China is the world's second largest economy. It has achieved this success through hard work, ingenuity, and above all through the wisdom and vision of its leadership," he said.

Gilani said that Pakistan was fortunate to learn from the experience of a successful friend and a great neighbour. "We are grateful to China for its commitment to share its development experience with us," he added.

Gilani said successive generations of leaders in Pakistan and China had nurtured the Pak-China relationship with a common vision.

He recalled that Premier Zhou En Lai had once said, "Our relationship began with the advent of mankind".

"The experience of our friendship in the last 60 years is a proof to this statement. The Silk Route of yester years has been replaced by the Karakoram Highway, which was built with the joint efforts and sacrifices of our people. It stands out as a testimony of our commitment to stand by each other," Gilani said. app

Zardari invites Russia to invest in Pakistan's trans-regional projects**-- APP**

Zardari invites Russia to invest in Pakistan's trans-regional projects

By Mohammad Ilyas Khan

MOSCOW, May 11 (APP): President Asif Ali Zardari on Wednesday said that Russia can invest in regional and trans-regional projects while benefitting from Pakistan's strategic location and investment friendly policies. Speaking at Skolkovo Moscow School of Management here, he said both Pakistan and Russia share the common objectives of peace and development and therefore it will be natural for the two countries to cooperate for these goals. President Zardari said, "Our two countries need to expand and diversify their economic cooperation by engaging the corporate sectors. People to people contacts have their own dynamics to promote relations between countries."

The President said involving private entrepreneurs of the two countries is the key to enhancing cooperation. He said that trade and investment are the key in today's international relations and Russia should take benefits from the investment friendly policies of the government.

President Zardari sought Russian cooperation in developing and exploiting energy resources in Pakistan since it has special expertise in mining and heavy industries. He said Pakistan is facing energy shortage and Russia can facilitate the proposed CASA 1000 and TAPI projects.

He said Moscow School of Management is a symbol of Russia's drive for modernization under its dynamic leadership.

This School has made great contribution to bringing stability to the global financial and economic order, he added.

Later, the Chairman Board of Investment Salim H Mandviwala and the Head of Russian National Investment Agency signed a Memorandum of Understanding on behalf of their respective governments to promote and increase investment in each other's countries.

MoU signed with Malaysia for meat exports -- Online

MoU signed with Malaysia for meat exports

LAHORE – A memorandum of understanding has been signed between the Punjab government and Penang State Government Malaysia regarding cooperation in halal industry at Chief Minister's Secretariat here on Saturday.

Chief Executive Officer Lahore Meat Company Dr Hamid Jalil on behalf of Punjab government and Minister for Religious Affairs and Chairman Halal Industry Development Penang State Government, Haji Abdul Maalik Qaseem on behalf of Malaysian government signed the MoU. Punjab Chief Minister Muhammad Shahbaz Sharif, Minister Agriculture Ahmad Ali Aulakh, Members Provincial Assembly, Chairman Planning & Development, Commissioner Lahore, Chairman Special Initiatives, Vice Chairman Punjab Investment Board and officers concerned were present on the occasion. According to the agreement, Penang State Government Malaysia will work jointly with Punjab Meat Company for setting up of Halal Industrial park in Punjab, training programme, international certification and export of halal products from Pakistan.

Speaking on this occasion, the CM said Malaysia was a brotherly Islamic country and the agreement between Penang State Government Malaysia and Punjab government with regard to promotion of halal industry was a good omen. He said there was a big scope of exporting halal meat from Punjab to international market and Punjab government was taking solid steps in that regard. He said a state-of-the-art slaughter house was also being established in Lahore with the cooperation of Iran whereas for the first time in the history of the country, halal meat had been exported to Malaysia. "The Punjab government is also working on the project of certification of halal meat so that it could be exported to Middle East, Malaysia and other countries from Punjab as per international standard," he said, adding that the government would work for the uplift of halal meat industry with the cooperation of Penang State Government, Malaysia, and directed Dr. Hamid Jalil to take further steps in that regard.

UAE allocates \$100 million for projects in Pak -- (SANA)

UAE allocates \$100 million for projects in Pak

South Asian News Agency (SANA) · May 16, 2011 ·

ISLAMABAD, (SANA): The UAE has allocated \$100 million dollars to Pakistan for the construction of more than 51 schools (primary & secondary), technical institutions, several healthcare centers, building roads and bridges, infrastructure and supply of safe drinking water schemes, the UAE embassy has said.

The money has been allocated on the special instructions of President of the United Arab Emirates Sheikh Khalifa bin Zayed Al Nahyan to the people of Swat, South Waziristan, other North Western districts and the tribal area. The construction of such projects is in progress.

During the devastating floods in Pakistan last year, UAE Armed Forces successfully carried out grand operations of rescue, distribution of relief goods, and logistics to different parts of Pakistan.

Chinooks rigorously participated in the humanitarian assistance activities in the most flood affected regions of Punjab, Sindh, Khyber Pakhtunkhwa and Balochistan.

UAE Military Field Hospitals in many remote areas of the country treated thousands of affectees and launched effective vaccination campaigns to save children, women and elderly people from different diseases. Water purification plants were also set up to provide clean drinking water in the hard-hit areas.

The Ambassador of the United Arab Emirates in Islamabad Saif Al Awani said that UAE will continue its support to the people and government of Pakistan as the UAE rulers have deep-rooted ties with Pakistani brethren.

Chairman Three Gorges Corporation calls on Gilani -- Observer

Chairman Three Gorges Corporation calls on Gilani
Beijing—Chairman Three Gorges Corporation (TGC) Cao Guangjing called on Prime Minister Syed Yusuf Raza Gilani here on Friday and discussed the prospects of increased Pak-China cooperation in water conservation and hydro power generation.

The Prime Minister sought the cooperation and investment of TGC, which has one of the biggest hydro-power projects in the world, for the establishment of water conservation and hydro-power projects in Pakistan to meet its energy and water requirements.

Gilani said Pakistan will welcome Chinese investment in Bhasha and Bunji dams as well as in small dams, adding, since Pakistan is facing energy shortage, the cooperation of TGC would be welcomed.

The Chairman TGC expressed his willingness to invest in hydro- power projects in Pakistan and said their investment would bring about enhanced economic development in Pakistan. China Yangtze Three Gorges Project is one of the biggest hydropower-complex projects in the world and ranks as a key project for improvement and development of the Yangtze River.

The dam is located in the areas of Xilingxia gorge, one of the three gorges of the river, which will control a drainage area of one million square kilometers, with an average annual runoff of 451 billion cubic million.—APP

Al-Sharq -- وزیراعظم برادر ملک چین کے چار روزہ دورے پر روانہ ہوئے

وزیراعظم برادر ملک چین کے چار روزہ دورے پر روانہ ہوئے

Tuesday, 17 May 2011 15:15

پاک چین دوستی ہر دور میں عالمی برادری کے لیے ایک مثال رہی ہے یہی وجہ ہے کہ دونوں ملکوں کے درمیان حکومتی اور عوامی سطح کے رابطوں میں جوش و خروش پایا جاتا ہے چین نے ہر مشکل وقت میں پاکستان کی بھرپور مدد کی ہے یہی وجہ ہے کہ دونوں ملکوں کی دوستی کو پہاڑوں سے زیادہ بلند اور سمندر سے زیادہ گہری ہے۔ منگل سے شروع ہونے والے وزیراعظم سید یوسف رضا گیلانی کے چار روزہ دورے سے پاک چین دوستی میں ایک نئے باب کا اضافہ ہوگا۔ حالیہ دورے میں وزیراعظم چین کی اعلیٰ قیادت کے ساتھ ملاقات میں دوطرفہ تعلقات اور باہمی دلچسپی کے امور پر تبادلہ خیال کریں گے۔ سید یوسف رضا گیلانی چین میں منعقدہ ایک بڑے ثقافتی فورم کا افتتاح، تاجروں، صنعتکاروں، مالیاتی نمائندوں سے ملاقات، بیجنگ میں چین کی پیکنگ یونیورسٹی کے طلباء سے اور چینی سرمایہ کاروں کو پاکستان میں سرمایہ کاری پر راغب کریں گے۔ چین امریکہ کے بعد دنیا کی دوسری بڑی معاشی طاقت ہے جس کی اقتصادی ترقی عالمی برادری کے لیے ایک مثال ہے۔ چین کی حکومت اپنے سب سے بڑے بینک انٹرنیشنل کمرشل بینک آف چین کی دو شاخیں پاکستان میں قائم کر رہی ہے، اسلام آباد اور کراچی میں قائم ہونے والی ان برانچوں کے پاکستانی معیشت پر مثبت اثرات مرتب ہوں گے۔

Dubai businessmen looking for investment in marble and granite sector -- APP

Dubai businessmen looking for investment in marble and granite sector

ISLAMABAD, May 18 (APP): A delegation of businessman from Dubai visited Islamabad Chamber of Commerce and Industry (ICCI) on Wednesday and held meetings with entrepreneurs having common interest in various fields. Muhammad Azam, Chairman of PURE PZE RAK Free Trade Zone Dubai said that the aim of their visit to ICCI was to explore the possibilities of investment potential in Pakistan's marble, limestone, granite and construction markets. Dubai is considered a hub of the entire region, said Nabil Akiki, Patner and General Manager, Free Ray Dubai. He said that it was the right time to invest in Pakistan, especially in the concrete, marble, limestone and granite sectors.

ICCI President Mahfooz Elahi said that Pakistan was the land of opportunities, as it offered profitable investment opportunities to both local and foreign investors while private investment was being encouraged in major sectors of the economy.

The ICCI president said that marble and granite sector was fast growing sector in the country with huge investment potential adding foreign business community should come forward and invest in marble and granite industry.

He said marble and granite were among the major minerals extracted in Pakistan after coal, rock salt, limestone and China clay, but there was still lot more potential to develop this sector.

He said that ICCI was constructing an Export Display Centre and marble industry would be given proper opportunity to display its products in that centre for further enhancing its sale and exports.

He said that Pakistan has processing units with complete range of machinery and equipment capable of processing stones in accordance with International Standards, adding that there was no problem of quantity.

A leading Chinese bank on Thursday agreed to finance multi-billion dollar Karachi-Faisalabad-Gwadar motorway project. -- Dawn News
Islamabad, May 19: A leading Chinese bank on Thursday agreed to finance multi-billion dollar Karachi-Faisalabad-Gwadar motorway project.

Chairman of the EXIM Bank Li Ruogu during a meeting with Prime Minister Yousuf Raza Gilani said the bank will shortly send a team to Pakistan to carry out feasibility study for the project.

Appreciating the financial contribution of the EXIM Bank in major projects in Pakistan, including Chashma Nuclear Power Plant, Karakoram Highway and Saindak Gold and Copper Mining Project, the prime minister said the financing of Karachi-Gwadar motorway would be another shining example of Pak-China friendship.

The prime minister held separate meetings with different Chinese banks and groups. The head of Hudian group told Gilani that his group will invest \$400 million for setting up 350MW thermal power unit near Lahore.

He said that his company had expertise in hydro and coal-fired power projects and was working on various projects in East and South Asia.

The prime minister invited the group to invest in Thar coal power project and Bhasha Dam.

The Hudian group chief said that a delegation will be sent to Pakistan to conduct feasibility studies.

Mr Gilani briefed the Chinese business leaders about the investment-friendly policies of the government and huge potential of investment and financing in various sectors.

Closer Pak-China economic integration strategic imperative: PM -- APP

Closer Pak-China economic integration strategic imperative: PM
By Shahid Saleem Khan

BEIJING, China, May 19 (APP): Prime Minister Syed Yusuf Raza Gilani highlighting the importance of closer Pak-China economic integration as 'strategic imperative' on Thursday urged the Chinese corporate sector and entrepreneurs to focus on Pakistan in their business plans. "The idea is not only to develop mutually-beneficial bilateral economic cooperation but also to jointly promote intra-regional and trans-regional development partnerships", Gilani told the corporate leaders and CEOs of the large business and industrial houses in China while speaking at the China-Pakistan Entrepreneurs Forum here.

The Forum was co-hosted by China Council for the Promotion of International Trade (CCPIT) and the Embassy of Pakistan in Beijing.

The Prime Minister, who is in China on a four-day official visit during which he also held talks with Premier Wen Jiabao Wednesday, welcomed the establishment of China-Pakistan Entrepreneurs Forum and said this will further strengthen and facilitate exchanges between both countries business communities.

He said closer economic integration between Pakistan and China was not only "a strategic imperative but accords fully with the dictates of geography; the concept of shared prosperity; and, above all, the ethos of our peoples." The Prime Minister said Pakistan and China are good friends and close neighbours, adding, "our all-weather friendship is deeply imprinted on the hearts and minds of our people."

He said celebrating the "Pakistan-China Friendship Year" and the 60th anniversary of the establishment of our diplomatic relations depicted the spirit of brotherhood and renewed resolve to taking our friendship and strategic cooperative partnership to ever new heights.

"The bonds that tie our two peoples together have withstood the test of time. While strong winds of political change have swept across our region and beyond,

Pakistan-China friendship has stood steady as a rock", he remarked.

Gilani said Pakistan-China friendship continues to strengthen with every passing day, adding, "Our partnership has assumed a regional and international dimension. We consult, cooperate and coordinate our respective endeavours for the cause of global peace and prosperity."

He said Pakistan and China rightly take pride in how far they have come together. "The enthusiasm on display in both countries, as we celebrate the 60th anniversary of the establishment of diplomatic relations, is genuinely felt and expressed by our two peoples", he added.

The Prime Minister said Pakistan takes inspiration from China's economic transformation that is unparalleled in human history. It has been brought about by the genius and hard work of the talented Chinese people under their wise and sagacious leadership, he added.

He said it is a matter of great satisfaction that economy, technology and trade cooperation between Pakistan and China has witnessed new dynamism, adding, "These are the three most important drivers in the robust growth of our friendship and all-dimensional cooperative partnership."

Gilani recalled and termed Premier Wen Jiabao's visit to Pakistan in December last as another landmark in the long and glorious history of Pakistan-China friendship during which the two sides took important decisions and set out a shared economic and trade agenda.

"It was agreed that corporate sector must play a leading role and the two governments must provide a facilitative framework for the flourishing of a mutually - beneficial economic partnership", he added.

The Prime Minister said Pakistan and China have touched several important landmarks in the development of bilateral economic and trade relationship.

He termed Pakistan-China Free Trade Agreement as a comprehensive arrangement that covered goods, services and investments.

"Our bilateral trade touched dollars 9 billion last year. However, the scope of further growth is immense. Our two countries have set a target of attaining dollars 15 billion trade in the coming years", he added.

Gilani said the establishment of Pakistan-China Trans-border Economic Zone; upgrading avenues for trade, overland across shared mountains and rivers; steps being taken towards integrated border management; and other related measures, including customs harmonization would enable both Pakistan and China to bring to play and optimally utilize the natural economic complementarities of the two countries.

In the domain of finance and banking, he mentioned the establishment of Pakistan-China Investment Company.

The Industrial and Commercial Bank of China is beginning its operations in Pakistan and has opened branches in Islamabad and Karachi, he said and added the Central Banks of Pakistan and China are now discussing concepts such as the Currency Swap Arrangement.

"This and other related measures will not only facilitate economic interaction but also provide the requisite incentives for the corporate leaders to enter into mutually-beneficial joint ventures", he added.

Prime Minister Gilani said as China diversifies its economy, with special emphasis on the development of its Western regions as well as shifts to high technology, the economic factors would make it attractive for the Chinese industry to relocate and establish their manufacturing base in Pakistan.

He said Pakistan is a developing country and its strategic priority is development, adding, Pakistan is developing its infrastructure that includes not only upgrading our rail and road links but also building new cities, airports and expressways.

"We are rich in natural resources, which we ought to explore and develop for our economic growth. Our economic fundamentals and growth potential are enormous", he remarked.

Gilani said hundreds of Chinese corporations and thousands of Chinese friends are already working in Pakistan, adding, "We highly appreciate their endeavours and hard work that is contributing immensely to Pakistan's economic development."

The Prime Minister said there is great potential for the participation of Chinese corporations in the development of the energy sector in Pakistan, which includes hydel, thermal and renewable.

"Joint ventures, with equity participation of Chinese corporations and financial institutions, can transform Pakistan's economic landscape and would certainly

prove to be a win-win scenario", he remarked.

Gilani said Pakistan and China have renewed the joint Five Year Economic and Trade Programme, adding, projects, which are commercially feasible, would qualify for easy credits and such facilitation, as may be required, by both governments.

"I would strongly urge that the whole range of facilitative frameworks already agreed between our two governments, may be studied closely by the Chinese and Pakistani entrepreneurs so that they could avail themselves of the immense possibilities of cooperation that is mutually advantageous", he added.

The Prime Minister said for China doing business in Pakistan should be easy, adding, the sentiments of friendship that so deeply exist between our two peoples, make living and working in Pakistan, both comfortable and rewarding.

"I am sure that the corporate sectors of the two countries will join hands and work closely together to impart a new dynamism to our partnership and thus lead the process for taking our friendship to ever greater heights", he added.

Chinese Minister for Science and Technology Wang Gung in his remarks on the occasion said that his country intends to give strong boost to its ties in all fields especially in trade and economy.

He said that political stability and improved law and order situation in Pakistan will help create more Chinese investment there. He said both the countries will move forward towards more free and hassle-free trade to achieve the set targets.

The Minister said that both the countries are also working in the field of Science and Technology hoping that this cooperation will also increase in joint production of Chinese herbal medicines and solar, wind and other alternative energy generation in Pakistan.

Pakistan's Ambassador in China Masood Khan, Chairman Tr

ISLAMABAD: Ukraine-Pakistan relations started long before Pakistan officially recognized new independent Ukraine in December 31, 1991. -- Online

ISLAMABAD: Ukraine-Pakistan relations started long before Pakistan officially recognized new independent Ukraine in December 31, 1991.

In a Media Briefing by H.E. Ihor Pasko Ambassador of Ukraine to Pakistan history of bilateral relations goes back to the former Soviet Union times, when Soviet experts, the vast majority of whom were Ukrainian, assisted to develop the key industries and national economy of Pakistan in 1960-70's.

The Karachi Steel Meal, which remains largest in Pakistan, a number of powerful hydro stations in Tarbella, Kalabakh were built in this period, as well as the large park of Ukraine agricultural machinery, trucks was formed here in Pakistan. The current stage of relations between Ukraine and Pakistan can be characterized as a "dynamic process", which bases on the traditionally high level understanding in political, military, trade, economic areas and effective cooperation within

international organizations. Both countries wish to expand and deepen mutually beneficial relations perspective.

The first significant economic contract between Pakistan and independent Ukraine was concluded in the military-technical sphere in 1996. Cooperation in defense and military-technical spheres developing in different directions, including joint training of officers, technical experts and pilots, through the supply and joint development of high-tech weaponry and equipment for the Army, Navy, Air Force of Pakistan.

Pakistani military-industrial complex will continue cooperation with Ukraine in developing technologies and manufacturing military products (especially in the joint assembly and subsequent maintenance of the main battle tank "Al Khalid", which supplies in the Pakistani Army and has big export potential).

The relations between Pakistan and Ukraine are likely to get more dynamics with approval of various agreements, conventions and setting up of commissions. These efforts would not only bring both the countries closer but would also assist in making them close partners to achieve economic prosperity and stability of the central Asian and South Asian regions. With the help of Central Asian republics Ukraine, Pakistan could meet economic difficulties and other challenges.

Ukraine is ready to play its part in the development of Pakistan and would welcome any efforts to search new avenues for- cooperation and expanding ties with Pakistan in various sectors. Pakistan could learn from the experiences and expertise of Ukraine in various sectors specially economy as the world recognizes the speedy economic growth of Ukraine.

The need of time is to join hands, to share expertise and to learn from the experiences of each other to counter the present economic challenges being faced by both the friendly countries.

At Present the draft Agreement on the Establishment of Intergovernmental Ukraine-Pakistani Commission on Trade and Economic Cooperation is being considered and reviewed by Pakistani authorities concerned and we are hopeful that the proposal would soon be a reality.

After the establishment of Intergovernmental Ukraine-Pakistani Commission on Trade and Economic Cooperation the trade relations, economic ties between both the countries would grow further.

The particular commission which we hope would soon be established to promote the development of various forms of cooperation, including the creation of joint ventures and other prospective directions of bilateral relations.

It would also elaborate proposals and would assist in taking measures aimed extending and intensifying trade, cooperation in the fields of mutual interest, as well as making up proposals on exchange of specialist.

Pakistan and Ukraine are also in process of inking the Convention for avoidance of double taxation. We expect that Pakistani Authorities concerned would speed up the process for completing the internal procedures. This convention would result in rise in trade volume between both the countries.

Ukraine, being a large European economy, has a well-developed industrial base, the rich farmlands, highly trained labour and a good education system. It is relatively rich in natural resources, particularly mineral deposits.

Although oil reserves in the country are largely exhausted, it has other important energy sources, such as coal, hydroelectricity and nuclear fuel raw materials. Ukraine has a major ferrous metal industry, producing cast iron, steel and a wide range of metalware, including pipes.

As of 2007, Ukraine was the world's eighth largest steel producer. Another important branch is country's chemical and petrochemical industry producing coke,

mineral fertilizers, acids, soda etc. Manufactured goods include metallurgical equipment, diesel locomotives, tractors, automobiles. The country possesses a massive high-tech industrial base, including electronics, arms industry, space program and is a major producer of grain, sugar, meat and milk products.

Pakistan could enjoy the benefits in these areas by rising the trade volume between the two countries as it would contribute on both the ends and mutual benefits would be achieved facilitating the people of both countries.

The total trade turnover between both the countries in 2009 was \$ 267 314 with Exports from Ukraine to Pakistan \$242753 and Imports from Pakistan to Ukraine \$ 24564. In 2010 the ratio of total trade turnover between Pakistan and Ukraine was \$ 168 225 among which the total exports from Ukraine to Pakistan was \$113006 and import from Pakistan to Ukraine was \$55219.

It is considerable fact that in the time period of just two months (Jan 2011 to Feb 2011) the total trade turnover between Pakistan and Ukraine was \$57 144 with Imports from Pakistan to Ukraine worth \$22652 and exports from Ukraine to Pakistan worth \$34522.

On April 19, 2011, upon an initiative of President of Ukraine Mr. Victor Yanukovich, Ukraine hosted a high-level meeting "Kyiv Summit on safe and innovative use of nuclear energy" which indicates its desire to use the nuclear energy for the protective and save purposes of human welfare.

The Chernobyl catastrophe and an accident on the Japanese nuclear power plant Fukushima have proved the necessity to enhance the nuclear energy facilities' capabilities to counter emergency situations, and have illustrated that mitigation of nuclear incidents requires the international community to gather scientific, technical and resource capabilities.

Ukraine believes on positive and productive utilization of the nuclear power as the nuclear technologies are considered as one of the most effective ways to meet the growing needs in energy supplies, to cut down the discharge of greenhouse gasses, to mitigate the climate change, and to act as counterbalance to fluctuation of prices of fossil fuels.

Pakistan, China likely to ink agreement on JF-17 Thunder -- Daily Times
Pakistan, China likely to ink agreement on JF-17 Thunder

BEIJING: Pakistan and China are expected to sign an agreement today (Thursday) for the provision of 50 JF-17 thunder aircraft to Pakistan on emergency basis, it has been learnt by Daily Times. According to official sources, these aircraft will be equipped with sophisticated avionics. Not only will the aircraft be handed over within weeks, China will also foot the bill initially. Although Pakistan and China have been jointly developed this multirole combat aircraft in the past, in the aftermath of the US operation in Abbottabad, serious questions have been raised about Pakistan's defence capabilities. According to a strategic expert, the speedy delivery of 50 pieces of this aircraft, originally to be done over two years, is expected to allay apprehensions of not only the Pakistani public but will also send a message to the world that Pakistan's defence is not weak. It might be remembered that not only has the Indian military chief speculated on the possibility of a US-style strike from the Indian side to take out jihadi outfits in Pakistan, there has been escalation on the Pakistan-India border near Sialkot recently. Also, observers believe that in a situation when the speculations are rife that Pakistan may not be able to resist another US attack inside its territory if it so decides, this agreement will send a clear message to the world on which side China stands. ishrat saleem

RKS OF THE PRIME MINISTER - DIPLOMATIC PAKISTAN AND CHINA RELATIONS -- THE 60TH ANNIVERSARY OF THE ESTABLISHMENT
REMARKS OF THE PRIME MINISTER

TO COMMEMORATE THE 60TH ANNIVERSARY OF THE ESTABLISHMENT
OF DIPLOMATIC RELATIONS BETWEEN
PAKISTAN AND CHINA

Your Excellency Jia Qingling,
Chairman of the Chinese People's Political Consultative Conference,

Your Excellency Chen Kuiyuan, Vice Chairperson, CPPCC

Excellencies,
Ladies and Gentlemen,

We are gathered here today to commemorate the 60th anniversary of the establishment of diplomatic relations between the Islamic Republic of Pakistan and the People's Republic of China.

This is a momentous occasion; a moment to rejoice on our shared accomplishments; to celebrate the true friendship between our two peoples; to take inspiration and draw strength from our common ideals and goals and the great talent and genius of our peoples.

It is also a moment to renew our common resolve to impart a new dynamism to take our all-weather friendship and strategic cooperative partnership to ever new heights.

This is also an occasion to pay tribute to the wisdom and foresight of the architects of Pakistan-China friendship. Shaheed Zulfikar Ali Bhutto the founder of the Pakistan People's Party and Chairman Mao Zedong and Premier Zhou Enlai were the ones who visualized the essence of threads of history, spanning several millenniums of interaction between our peoples, gave a brilliant new context to the relations between Pakistan and the People's Republic of China.

Successive generations of leaders of both countries and millions of men, women and young people have shaped the discourse and the reality of this abiding friendship between our peoples, which is manifested in abundant goodwill, spontaneous affinity, inestimable love and affection, an enduring romance that transcends all other considerations.

Premier Wen Jiabao, in his address to the joint sitting of the Parliament in Islamabad in December 2010, speaking of China-Pakistan friendship, stated that "this friendship is in our blood." The people of Pakistan feel the same.

China is, indeed, our true and most reliable friend and partner. We are like one nation and two countries.

We share common mountains and rivers. We share each other's joys and sorrows. We have a common dream and both China and Pakistan are together engaged in transforming their dreams and visions for shared peace and prosperity into a living reality.

On this historic occasion, I would like to convey the warm greetings of the people of Pakistan for their Chinese brothers and sisters. I would like to assure the great Chinese Nation that you will always find Pakistan by your side under all circumstances.

We will together march forward hand-in-hand to take our friendship and partnership to new heights and to ensure for our succeeding generations a glorious future of peace and prosperity.

I would also like to convey to you our sincere sentiments of deeply-felt admiration of the people of Pakistan on the national accomplishments of the Chinese people, under wise leadership. China's economic and technological

transformation is unprecedented in history.

China's economic advancement, in a very short timeframe, evokes admiration. A new awakening of the glorious Chinese civilization is being manifested in the realm of thought, philosophy, intellect, arts and crafts as well as in scientific and technological disciplines.

As your closest friend, we in Pakistan truly share the sense of pride on these achievements.

We are convinced that China's economic rise; technological prowess; ancient wisdom; philosophy and thought will have a profound and most beneficial impact for humanity and mankind at large.

Our two peoples have, since times immemorial, stood together and, from the same vantage point, witnessed the transformations in the global and regional landscape. We have stood together, sure-footed, with full confidence in defending what is just and in upholding the noble values of humanity.

We have not only stood and watched but have marched hand-in-hand together to resist and defeat the designs of those who wish to transgress against the values of humanity.

We have worked together steadfastly for safeguarding our sovereignty, independence and territorial integrity and for promoting peace and stability in the world and in our region.

Once again, in these troubled times, we collectively face new challenges with the firm conviction in our belief that truth and justice will prevail.

In these turbulent times, the only voice of reason in international affairs is that of China. China is making a splendid contribution towards the making of the twenty-first century.

Today, China is not only respected but emulated by developing countries. The people of Pakistan salute the Chinese Nation for holding high the banner of peace and justice in the world.

Pakistan will always and, under all circumstances, support and defend the just cause and core interests of the Chinese Nation.

I would also like to avail myself of this opportunity to express, on behalf of the people of Pakistan, our gratitude to our Chinese friends for their solid and unstinted support to Pakistan at all times.

We can never forget that when natural catastrophe struck as it did in the 2005 earthquake and the devastating floods of 2010, China was the first to offer help and support.

Pictures of Chinese rescue and medical teams, working day and night in region of the mighty Indus in full fury, helping their Pakistani brothers and sisters, have become indelible in the minds and hearts of our people.

In other domains – be it economic, or trade; science and technology; defence; culture; arts; and education, we have enjoyed tremendous cooperation.

From the friendship highway, called the Karakoram Highway in the North to the Gwadar deep seaport in the South, all major economic projects in Pakistan were built with Chinese assistance. Even today, hundreds of Chinese corporations and thousands of Chinese men and women are working tirelessly together with the Pakistani brother and sisters on major economic and development projects. For all this, we are truly grateful.

Friendship with China is the cornerstone of Pakistan's foreign policy. In

recent times, the leadership of our two countries has taken the decision to enhance our cooperation, especially in the domains of economy and technology, trade and defence.

We are giving special importance to enhancing connectivity and have already established frameworks of cooperation in economy, trade, energy, minerals as well as defence and defence production.

The Free Trade Agreement; the Joint Five Year Economic and Trade Programme; the Joint Investment Company; our ongoing cooperation in the financial and banking sectors; greater interaction between our capital markets; robust defence and defence production cooperation are but a few examples of the direction that our strategic cooperative partnership has taken.

We are determined to take all necessary measures for closer economic integration. In this context, establishment of the Trans-border Economic Zones; instituting Integrated Border Management System; working together the intra-regional and trans-regional economic and development agenda; corporate sector interaction in joint projects; opening of the ICBC bank branches in Pakistan; finalization of the Currency Swap Arrangement; cooperation in earth, space and marine sciences; and expanding educational contacts will undoubtedly contribute to further cementing our mutually beneficial all dimensional partnership.

We also acknowledge, with gratitude, the support that China has extended to Pakistan in our efforts to safeguard national sovereignty and Pakistan's core national interests.

Pakistan is a resilient nation. Our people are proud and confident of a bright future. We have, with courage and fortitude, overcome many challenges. We see in every challenge new opportunities, which we are determined to avail for not only promoting Pakistan's national inte

پاکستانی تاجروں کو روس میں نئی مارکیٹ دستیاب ہوگی، سرگئی پلشکور

کراچی (اسٹاف رپورٹر) روس کی مارکیٹوں کا جائزہ لینے کے لیے پاکستانی تاجروں کو روس کے دورہ کی پیشکش، دوطرفہ تجارت کے فروغ کے لیے پاکستانی تاجروں کے ساتھ روابط میں مزید اضافہ کیا جائے۔ روس کے ٹریڈ کمیشن کراچی برانچ کے سربراہ سرگئی پلشکور نے رشین ٹریڈ مشن کے چیف ایکسپریٹ روسلان علیوف کے ہمراہ پاکستان کیمیکلز اینڈ ڈائز مرچنٹس ایسوسی ایشن کے اراکین کے ساتھ اجلاس منعقد کیا۔ منگل

کو جاری کردہ اعلامیہ کے مطابق روس کے ٹریڈ کمیشن کو اجلاس کی دعوت چیئرمین پاکستان کیمیکلز اینڈ ڈائز مرچنٹس ایسوسی ایشن محمد ہارون اگر نے دی تھی۔ اجلاس میں پاکستان کے ساتھ تجارتی تعلقات کو مزید مستحکم کرنے کی خواہش ظاہر کرتے ہوئے سرجے پلشکور نے کہا کہ جب تک دونوں ممالک کے تاجر ایک دوسرے کے قریب نہیں آئیں گے، دوطرفہ تجارت کو بڑھانا دشوار ہوگا۔ انہوں نے ایسوسی ایشن کے ممبران کو روس میں اکتوبر 2011ء میں منعقد ہونے والی کیمیکلز اینڈ ڈائز کی نمائش میں شرکت کی دعوت دیتے ہوئے کہا کہ نمائش میں پاکستانی تاجروں کی شرکت سے انہیں یقینی طور پر نئی مارکیٹ دستیاب ہو سکے گی۔ نمائش میں 34 ممالک کے پروفیشنلز شرکت کریں گے۔ اس موقع پر ایسوسی ایشن کے چیئرمین محمد ہارون اگر نے روس کے ٹریڈ کمیشن کراچی برانچ کے سربراہ سرجے پلشکور کی دعوت کا خیر مقدم کرتے ہوئے کہا کہ ایسوسی ایشن کا وفد روس میں منعقد ہونے والی نمائش میں شرکت کرے گا، جہاں روسی تاجروں کے ساتھ ون ٹو ون بزنس میٹنگز کا بھی اہتمام کیا جائے گا۔ انہوں نے کہا کہ روس میں بینکنگ سیکٹر میں پاکستانی تاجروں کو مشکلات کا سامنا ہے جس کی اہم وجہ روسی زبان میں ہونے والی بینکنگ سروسز ہیں۔ انہوں نے روس کے بینکنگ سیکٹر کو عالمی ضرورتوں کے مطابق بنانے کی ضرورت پر زور دیا تاکہ ایشین ممالک کو تجارت کے حوالے سے درپیش مشکلات کا خاتمہ کیا جاسکے۔

Today Pakistani Prime Minister Yousuf Raza Gilani, left, is welcomed by Chinese President Hu Jintao for a meeting at the Great Hall of the People in Beijing Friday, May 20, 2011. – Photo by AP

ISLAMABAD: Defence Minister Chaudhry Ahmed Mukhtar said on Saturday that China had "acceded to Pakistan's request to take over operations" of the Gwadar port

The minister, who had accompanied the prime minister during his visit to China, issued a statement to press about the development.

Mr Mukhtar said Pakistan was grateful to the Chinese government for building the Gwadar port. "However, we shall be more grateful to the Chinese if they agree to build naval base at Gwadar."

Gwadar, the country's third port after Karachi and Port Qasim, lies on the Arabian Sea. It is 533kms from Karachi and 120kms from the maritime frontier with Iran.

According to Mr Mukhtar, the prime minister also asked his counterpart, Wen Jiabao, to consider inducting the JF-17 Thunder aircraft into the PLA (Peoples Liberation Army) fleet as it would enable Pakistan to sell a large number of the planes to other countries.

The Chinese government had agreed to "our request to equip our air force with FC-20 aircraft", the minister added.

The Chinese government "assured us of help in removing hurdles in the way of Pakistan's progress", the defence minister said.

Pak, Afghanistan set to operationalise APTTA from Jun 12

Pak, Afghanistan set to operationalise APTTA from Jun 12

* Issue of financial guarantee on goods resolved

* Financial guarantee on vehicles to be discussed in APTTCA meeting

By Sajid Chaudhry

ISLAMABAD: Pakistan and Afghanistan are set to operationalise Afghan-Pakistan Transit Trade Agreement (APTTA) from June 12, 2011—as both sides have amicably resolved the issue of financial guarantee and its approval would be sought from the Afghan Pakistan Transit Trade Coordination Authority (APTTCA) in its meeting scheduled on June 2, 2011 at Kabul.

Official sources told that against the bank guarantee equivalent to the amount of customs duty applicable on the goods imported under APTTA for Afghanistan through Pakistani land route, an insurance guarantee equivalent to the amount of customs duty from Pakistani or foreign insurance company would be accepted by

Pakistani authorities.

The sources added that sub-committee of the APTTCA that met at Kabul on May 7, 2011, has resolved the issue of financial guarantees for goods—however bank guarantee on transporters is still unresolved—which will be discussed in APTTCA meeting.

According to presentation of the Ministry of Commerce, APTTCA in its first meeting held on February 11-12 at Islamabad had agreed that traffic in transit would not be hampered due to insufficient number of tracking devices. On the other hand, Afghan-Pakistan Transit Trade Rules, 2011 have been finalised by the Federal Board of Revenue (FBR) but held back due to the Afghan reservations regarding definition of customs security for goods and bank guarantee for vehicles. These two issues will be discussed in next meeting of the APTTCA scheduled on June 2, 2011 at Kabul.

Customs security for goods explained in the agreement means en-cashable financial guarantee acceptable to customs, submitted by the trader or through authorised broker, on transit goods, for an amount equivalent to the import levies of contracting parties.

Bank guarantee for vehicles explained in the agreement means a bank guarantee or revolving bank guarantee or Cornet-de-Passage (when operational) as a pre-requisite for temporary admission document on convenience, acceptable to host country.

It was mutually agreed to extend the date of operationalisation of the APTTA agreement up to four months and this deadline will expire in second week of June and with the holding of APTTCA meeting and resolution of the pending issues of APTTA would be operationalised by June 12, 2011.

Pakistan's position on customs security for goods is that financial guarantee shall be negotiable instrument issued by a scheduled bank and en-cashable in Pakistan. While position on customs security for vehicles is that bank guarantee or revolving bank guarantee shall be issued by scheduled bank.

On the other hand Afghan side considers Pakistan's interpretation of these guarantees as unilateral and says that Article 28, sub-clause F states that "To establish a customs transit system including customs guarantee coverage for cargo as mutually agreed".

According to the commerce ministry's presentation, Afghan side has agreed to allow 13 land routes for bilateral trade and these routes will be operationalised on a later date to be agreed mutually.

Pakistani side will facilitate Afghan exports to India through Wagha. Afghan trucks will be allowed access on the designated routes up to Wagha. Afghan cargo will be off-loaded on Indian trucks back to back at Wagha and the trucks on return from Wagha will not carry Indian exports to Afghanistan.

Pakistan has also gained a transit facility for Central Asian Republics (CARs) markets and entry and exist points for Pakistan's exports have been secured on permanent basis and legal cover have been secured.

These routes include Torkham to Hairtam with Uzbekistan, Torkham to Torghundi with Uzbekistan, Torkham to Sher Khan Bandar with Tajikistan, Torkham to Aqina with Turkmenistan, Torkham to Torghundi with Turkmenistan, Chaman to Islam Qila with Iran and Chaman to Zaranji with Iran.

Pakistan's Prime Minister Yousef Raza Gilani wrapped up his visit to China Friday, with the two countries praising each other and pledging to continue building their relationship. -- VOA news

Pakistan's Prime Minister Yousef Raza Gilani wrapped up his visit to China Friday, with the two countries praising each other and pledging to continue building their relationship.

Pakistan's defense minister, Ahmad Mukhtar told journalists the two countries sealed an agreement for China to sell Pakistan 50 JF-17 fighter jets. Pakistan says it eventually wants to buy 250 of the jets.

Mr. Gilani spent four days in China, aiming to build economic and strategic ties. He referred to China as his country's "best and most trusted friend."

China has invested heavily in Pakistan, and recently Pakistan opened a nuclear power plant built with Chinese help.

Pakistani PM: Pak-China trade to hit US\$15 billion in 2 years -- Xinhua News Agency

BEIJING, May 20 (Xinhuanet) -- Pakistan and China should put more emphasis on economic cooperation while maintaining the all-dimensional relationship, Pakistani Prime Minister Yousuf Raza Gilani said here Friday.

During an exclusive interview with Xinhuanet, Gilani expressed that in light of the all-dimensional relationship, economic cooperation should be further enhanced. He proposed to target for a bilateral trade volume of 15 billion U.S. dollars within two years.

"Our trade at the moment is nine billion U.S. dollars, we want to enhance it to 15 billion U.S. dollars with the expansion of two years, and this is doable. We are moving in the right direction," said Gilani, who is on a four-day official visit to China at the invitation of Chinese Premier Wen Jiabao. This is also his fourth visit.

This year 2011 marks the 60th anniversary of the establishment of diplomatic relations between the two nations and was declared China-Pakistan Friendship Year by Wen and Gilani during Wen's visit to Pakistan in December 2010.

Gilani said that during the past 60 years, China and Pakistan have had multi-dimensional cooperation in many fields, whether it is in national defense, economics, intelligence, agriculture, culture, infrastructure, and energy.

Recalling the Pakistan-China Entrepreneurs Forum held the previous day, Gilani expressed again there is still great potential to explore in bilateral economic cooperation.

"China and Pakistan enjoyed a solid friendship of six decades. The economic ties between the two countries have seen strong growth in the past, however, the two sides believe there is still unexplored potential, and hope to further expand cooperation in trade, investment and financial services," he said.

At the forum, he also said though China-Pakistan all-weather friendship has "beat the test of time," their corporate sectors should work together to "inject new dynamics into their partnership and lead the process to take the friendship to new heights."

Bilateral trade between China and Pakistan has increased from 3 billion dollars in 2005 to 8.7 billion dollars in 2010 under the Free Trade Agreement and other favorable policy frameworks.

By the end of 2010, Chinese enterprises had signed contracts with Pakistan worth a total of 19.87 billion dollars. China's direct investment in Pakistan hit 1.36 billion dollars, while Pakistan's investment in China, 57.38 million dollars, according to the Chinese Commerce Ministry.

BEIJING: Pakistan and China would jointly launch a communication satellite on August 14 to replace the SAT-1 which is on the verge of expiry, officials said.

BEIJING: Pakistan and China would jointly launch a communication satellite on August 14 to replace the SAT-1 which is on the verge of expiry, officials said.

The satellite would be sent into the orbit on the Independence Day of Pakistan as a mark of the Sino-Pak friendship, an official said after Prime Minister Syed Yousuf Raza Gilani's visit to China's Academy of Space Technology (CAST) here on Friday.

The prime minister went around several sections of the academy and observed the activities and research being carried out there.

He was briefed about the space workshop and vacuum chamber of the academy where Pakistan's satellite PAKSAT-1R is being manufactured.

An agreement for manufacturing of the satellite by CAST was signed in 2008 during President Asif Ali Zardari's visit to China.

EXIM Bank of China has provided a soft-term credit of 86.5 million RMB (Chinese currency) for the manufacturing of PAKSAT-1R, carrying a maturity period of 20 years.

Pakistan had launched its first satellite Badar with the Chinese cooperation in 1990. The communication satellite will have 30 years' transponders "12 in C-Band and 18 in Ku-Band" each of 36 MHz bandwidth. The programme is in line with Pakistan's Medium Term Development Framework objectives and may provide better satellite communications for Pakistan.

The Pakistan Space and Upper Atmospheric Research Commission and China Great Wall Industry Corporation are jointly developing the new satellite.

EXIM Bank to finance Karachi-Faisalabad-Gwadar Motorway --

BEIJING (China):

EXIM Bank to finance Karachi-Faisalabad-Gwadar Motorway
'Pakistan Times' Business & Commerce Desk

BEIJING (China): The EXIM Bank of China on Thursday expressed its readiness to finance Karachi-Faisalabad-Gwadar Motorway and will soon send a team of experts to Pakistan for feasibility study of the proposed project.

The assurance came during a meeting between Chairman EXIM Bank Li Ruogu and Prime Minister Syed Yusuf Raza Gilani here. Gilani said the financing of Karachi-Faisalabad-Gwadar Motorway project by EXIM Bank will be another shining example of the deep rooted Pak-China friendship and cooperation. The Prime Minister appreciated the financial contribution of the EXIM Bank in major communication, energy and other projects in Pakistan like the Karakoram Highway, Chashma Nuclear Power Project and Saindak Copper and Gold mines.

Li Ruogu told the Prime Minister said that the EXIM Bank has a sizeable programme for Pakistan both for the buyers and sellers credit. He assured the Exim Bank's all out support for Pakistan's socio-economic development. And, during separate meetings with heads of China Development Bank, Bank of China, Huadian Group and Administrator SASTIND, the Prime Minister asked the Chinese banks and financial institutions to help Pakistan build its infrastructure in communication, energy, banking and other major sectors through enhanced investment and financing for mutual benefit.

Gilani apprised them of the investment-friendly policies of the present government as well as the huge potential of investment and financing in various sectors of the country. The Prime Minister and the heads of Chinese banks and financial institutions discussed at length the avenues and possibilities of increased financing in various development projects. During the meeting with the President of China Development Bank (CDB) Jiang Chaoliang, the Prime Minister appreciated the contribution of CDB in the development of Pakistan.

He recalled that during the visit of Premier Wen Jiabao to Pakistan in December last, the CDB had announced \$ 7.67 billion financing for development projects in Pakistan. The Prime Minister said Pakistan will welcome the investment and financing by China Development in major energy related projects including Bhasha and Bunji dams. During the meeting with President of the Bank of China (BOC) Xiao Wang, the Prime Minister said since the banks and financial institutions have a major role in development of any country, Pakistan was looking forward for opening of more BOC branches in the country.

He said there are vast opportunities of investment in various fields including in the energy and telecom sectors, adding, Pakistan will welcome the financing and investment in the Bhasha Dam and Thar Coal projects. The President of BOC said the Bank intends to expand its operations in Pakistan and will facilitate and encourage the Chinese entrepreneurs to invest in Pakistan's energy and telecom sectors.

During his meeting with the Chairman of Huadian Group, that has special expertise in hydro power generation and coal mining and working in various parts of the world including Far East Asia and Central Asia, the Prime Minister invited the Group to

invest in Thar Coal and Bhasha Dam projects.

The Chairman Huadian Group briefed the Prime Minister on their expertise in hydro and coal mining projects and said the Group has already signed a Memorandum of Understanding with Pakistan's Ruba Group for a 350 MW thermal power project in Lahore, with the financing of \$ 400 million.

He assured the Prime Minister the Huadian Group will also consider investment in Thar Coal project and in this respect a delegation of the group will soon visit Pakistan for study of the project. Chen Qiu Fa, Administrator SASTIND - a Chinese company that deals in defence production, also called on Prime Minister Gilani and discussed the matters relating to bilateral cooperation in various sectors particularly in the area of defence. He congratulated the Prime Minister on the successful visit to China and the signing of significant agreements in various fields.

The Administrator SASTIND said since China desires to see a strong Pakistan, its needs in the defence sector would be given due importance. The Prime Minister said China's support in meeting Pakistan's defence needs is a contribution towards the security and stability of the region. He expressed the confidence that existing cooperation between Pakistan and China in the field of defence would be further strengthened.

Chinese government had agreed to take operational control of Gwadar port, -- Pakistan News

Chinese government had agreed to take operational control of Gwadar port,

Pakistan News

Pakistan said on Saturday it wanted China to build it a naval base, in the latest sign of moves to strengthen ties with Beijing.

The announcement from Pakistan's defence minister came a day after Pakistan's Prime Minister Yusuf Raza Gilani returned from a four-day visit to China, Islamabad's biggest arms supplier.

"We would be ... grateful to the Chinese government if a naval base is ... constructed at the site of Gwadar for Pakistan," Defence Minister Ahmad Mukhtar said in a statement, referring to a deep-water port in Pakistan's southwest.

The statement did not say whether Pakistan had asked China to build the base at the port in Baluchistan province.

China invested \$200 million in the first phase of the construction of the port, which was inaugurated in 2007.

The development, 70 km (45 miles) east of the Iranian border and on the doorstep of Gulf shipping lanes, was designed to handle transshipment traffic for the Gulf.

During Gilani's visit, Mukhtar said China had agreed to speed up the delivery of 50 multi-role combat JF-17 "Thunder" aircraft, each worth up to \$25 million.

Pak-China power generation agreement to give relief to people'

Sunday, May 22, 2011

Karachi

Pakistan People's Party Women Wing Sindh Information Secretary Sharmila Farooqi has said that the government is making all-out efforts to overcome load shedding and shortage of electricity in Karachi and other parts of the country and the recent Pak-China agreement to generate 2,300 MW of electricity through wind and solar systems in Sindh and Punjab is a move to give relief to the public. She said this in a statement issued on Saturday.

She also said that the government was working on various electricity generation projects based on coal and hydel.

Electricity is inevitably needed to lead a comfortable life besides; it is a major component of socio-economic development in the country. Power sector in Pakistan, particularly in Sindh, needs to be developed as the country is facing a tough challenge of power load-shedding, said Sharmila.

She said that in view of the president's recent visit to Moscow, leading Russian companies had shown keen interest to develop energy sector and to contribute to the building of power generating facilities in Pakistan.

Pakistan asks China to build naval base -- APP

Pakistan asks China to build naval base

Sun May 22, 2011 6:12AM

Pakistani Defense Minister Ahmad MukhtarPakistan has asked China to build a naval base south of the country -- the latest move by Islamabad to strengthen defense relations with Beijing.

"We would be... grateful to the Chinese government if a naval base is... constructed at the site of Gwadar for Pakistan," Reuters quoted Pakistani Defense Minister Ahmad Mukhtar as saying in a statement on Saturday.

China invested USD 200 million in the first phase of the construction of the port, which was inaugurated in 2007.

The Pakistani defense minister also pointed out that China has agreed to accelerate the delivery of 50 multi-role JF-17 Thunder combat aircraft to Pakistan.

The light-weight, single-engine fighter jet is being developed jointly by the Chengdu Aircraft Industries Corporation of China, the Pakistan Air Force and the Pakistan Aeronautical Complex.

The remarks come four days after Pakistan's Prime Minister Yusuf Raza Gilani hailed China as his country's best friend.

Pakistan Says China to Operate Key Port -- Beijing

MAY 22, 2011, Pakistan Says China to Operate Key Port

BEIJING—Pakistan's defense minister said China has agreed to take over operation of the strategically positioned but underused port of Gwadar, and that Islamabad would like the Chinese to build a base there for the Pakistani navy.

Ahmad Mukhtar gave no clear timetable on the possible change at Gwadar, on Pakistan's western coast, which is currently managed by a Singaporean government company.

Mr. Mukhtar made the announcement after accompanying Prime Minister Yusuf Raza Gilani on a visit to China last week. During that visit, Pakistani officials say, Beijing agreed to expedite delivery of a second batch of 50 jointly developed JF-17

fighter jets to Pakistan, possibly within six months.

China—Pakistan's biggest arms supplier—provided 80% of the initial \$248 million funding for the construction of Gwadar, a former fishing village in the southwestern province of Baluchistan whose 14.5-meter-deep port is the only one in Pakistan capable of handling the biggest cargo ships.

Pakistani officials say Gwadar will be a trade hub for Central Asia and a transit point for Chinese oil imports, most of which are now shipped via the Malacca Strait, making them vulnerable to piracy or naval blockades.

China and Pakistan also have discussed plans to build an oil pipeline from Gwadar to northwestern China, and two new stretches of railway extending the Pakistani network to Gwadar at one end, and to the Chinese border at the other.

"We are grateful to the Chinese government for constructing Gwadar Port. However, we will be more grateful to the Chinese government if a naval base is being constructed at the site of Gwadar for Pakistan," Mr. Mukhtar was quoted as saying.

He also asked China to induct the JF-17 into the Chinese air force in order to encourage overseas sales of the relatively cheap, multipurpose fighter jet. He said that China "subscribed" to Pakistan's request to buy a more advanced Chinese fighter jet called the FC-20, also known as the J10.

Fast NU -- چین پاکستان کو 50 جدید لڑاکا طیارے فراہم کرے گا

چین پاکستان کو 50 جدید لڑاکا طیارے فراہم کرے گا وزیراعظم یوسف رضا گیلانی کے دورہ چین کے دوران دونوں ممالک کے درمیان دفاعی شعبے میں تعاون بڑھانے کا فیصلہ کیا گیا ہے اور اس ضمن میں چین نے پاکستان کو 50 جے ایف 17 تھنٹر لڑاکا طیارے فراہم کرنے پر اتفاق کیا ہے۔

وزیراعظم گیلانی کے دورہ چین کے دوران ان کے وفد میں شامل وزیر دفاع احمد مختار نے صحافیوں سے گفتگو کرتے ہوئے کہا ہے کہ پاکستان آئندہ چھ ماہ کے دوران ان طیاروں کے حصول کے لیے کوشاں ہے۔ ان کے بقول ایک جہاز کی قیمت تقریباً اڑھائی کروڑ ڈالر بنتی ہے تاہم انہوں نے یہ بتانے سے گریز کیا کہ پاکستان یہ جہاز خریدنے کے لیے مالی وسائل کہاں سے فراہم کرے گا۔

یہ طیارے پاکستان اور چین کے مشترکہ تعاون سے تیار کیے جارہے ہیں۔

پاکستانی فضائیہ کے سابق ایئر مارشل مسعود اختر نے وائس آف امریکہ سے گفتگو میں ان لڑاکا طیاروں کی یہ طیارہ بہت تیزی کے ساتھ اپنا رخ موڑنے کی صلاحیت رکھتا ہے اور چین نے "خوبیاں بیان کرتے ہوئے کہا - "اس میں جو ریڈار لگایا ہے وہ بہت دور تک دشمن کے طیاروں کو دیکھ سکتا ہے۔"

Pakistan to ask US for two more Orion planes -- APP

Pakistan to ask US for two more Orion planes

ISLAMABAD: Pakistan will ask the United States to supply it two additional PC-3 Orion planes for its Navy to make up.

Pakistan being an ally of the US reserves the right for making such demand. The Defence Committee of the Cabinet (DCC) that will discuss various aspects of the matter in its meeting on Wednesday could take a position about the demand.

Pakistan Naval Aviation is an important arm of the Pakistan Navy and assists in the surface and submarine flights to guarantee the safety of Pakistan sea borders. The US is supposed to provide two such planes by the end of the year according to earlier agreed schedule.

Well placed sources told The News here that Prime Minister Gilani has asked Defence Secretary Lt Gen (r) Syed Athar Ali to proceed to Karachi to make an assessment on ground at the Mehran Base so that he should put up detailed preliminary report about the gory incident at the DCC.

The sources pointed out that Pakistan Navy's aviation force currently consists of three Westland Lynx - anti-ship/anti-submarine/transport helicopters, six Westland Sea King Mk45 - Anti Submarine/ Anti Surface Warfare helicopters (Based at Karachi), eight Aerospatiale SA-319B Alouette III - transport/anti-ship helicopters, seven Lockheed P-3C Orion - maritime surveillance/ anti-submarine warfare aircraft/airborne early warning. Future supply of seven more under an agreement with Lockheed Martin signed in 2006; two upgraded P-3C Orion delivered on 7th Jan 2010 while one was delivered in Nov 2009. Seven Fokker F27-200 Friendship - maritime surveillance aircraft, four Hawker 850 - VIP transport aircraft, two Breguet Atlantique, one maritime surveillance/anti-submarine warfare aircraft, thirty two Dassault Mirage V - anti-ship attack aircraft flown by PAF which are based at PAF base Masroor in Karachi, (operated by the PAF), Unmanned Aerial Vehicles, twelve Harbin Z-9EC anti-submarine warfare helicopters equipped with a surface-search radar, low frequency dipping sonar, radar warning receiver, Doppler navigation system and armed with torpedoes.

Japanese Ambassador calls on state minister for foreign affairs -- APP

Japanese Ambassador calls on state minister for foreign affairs
ISLAMABAD, May 25 (APP): Minister of State for Foreign Affairs Ms. Hina Rabbani Khar received Ambassador of Japan Hiroshi Oe at the Ministry of Foreign Affairs on Wednesday. The Minister of State congratulated the Ambassador on the assumption of his new assignment in Pakistan. Views were exchanged on ways and means to further strengthen and deepen the friendly and cooperative relations between Pakistan and Japan, especially in the light of the Joint Statement issued during President Asif Ali Zardari's visit to Japan. Matters related to enhanced market access for Pakistani products and increased Japanese investment in Pakistan also came under discussion.

The Japanese Ambassador referred to the recent visit of Japan's Special Representative and the planned visit of Japan's Deputy Minister for Foreign Affairs, Koro Bessho, for political consultations.

The Minister underscored that Japan was Pakistan's major development partner and had always supported Pakistan in testing times. Japan has played an important role in the socio-economic development of the country.

Japan actively participated in the Friends of Democratic Pakistan forum, and hosted the FoDP Donors Conference in Tokyo in April 2009. Japan pledged US \$ 1 billion at the FoDP Conference in Tokyo and extended US \$ 500 million assistance, at the

Pakistan Development Forum.

Pakistan may set \$11 billion oil import bill target for next financial year 2011-12. -- The Nation

ISLAMABAD - To cope with the unpredictable fluctuations in the global oil prices coupled with country's soaring energy crisis and insufficient oil reserves, Pakistan may set \$11 billion oil import bill target for next financial year 2011-12.

Gearing up efforts to amicably deal with dramatic fluctuating trends in global oil prices and country's soaring energy crisis through establishing a strategic oil reserve probably at Gwadar, Pakistan may set \$ 11 billion oil import bill target in next budget for financial year 2011-12.

'Government is to set \$11 billion oil import bill target in next financial year 2011-12 budget but market sources believed that bill would surge to \$14 billion if crude oil prices remained stable at \$100 per barrel. Further, Pakistan is set to import 5 million tonnes diesel, 7 million tonnes crude oil, 7 million tonnes furnace oil, 1 million tonnes petrol and 1 million tonnes jet fuel in next financial year 2011-12 to meet domestic requirements', sources informed, adding, Saudi Arabia provides 110,000 barrels per day crude oil and UAE 62,000 barrels per day and Pakistan spends around \$ 2 billion on import of 3 million tonnes diesel and 1 million tonnes furnace oil per annum from Kuwait to meet domestic requirements.

Minister for Petroleum and Natural Resources Dr Asim Hussain while talking to The Nation on Tuesday confirmed: 'we are thinking to establish a strategic oil reserve probably at Gwadar (Balochistan) viewing the dramatic fluctuating trends of oil prices in global oil market and also to amicably deal with country's soaring fuel demands'.

Switzerland to strengthen trade relations with Pakistan -- APP

Switzerland to strengthen trade relations with Pakistan

ISLAMABAD, May 24 (APP): Deputy Head of Switzerland Mission in Pakistan Nicolas Plattner said on Tuesday that economic ties between Switzerland and Pakistan were built on solid grounds and measures would be taken to further strengthen the same. "A large number of Swiss multinational companies are

operating in Pakistan. They do not only market their world class products and services, but also creating thousands of attractive jobs in the country", Nicolas said in a meeting at Islamabad Chamber of Commerce and Industries (ICCI).

He said that for the fiscal year 2009-2010, Switzerland was ranked the 5th largest Foreign Direct Investor into Pakistan by investing 170.6 million US dollars.

He said that companies like ABB, Clariant, Sika, Gate Gourmet, Nestle, Novartis, Roche, SICPA, SGS, Syngenta or Nexus were well-known Swiss companies presently operating in Pakistan and doing a successful business.

This is a proof that Pakistan has the potential to be an attractive location for Foreign Direct Investment, he added.

Plattner said that establishment of Swiss Business Council (SBC) has bridged business-to-business relations between the two countries and provided strong linkage for the exchange of business related information.

He said that Switzerland has also been contributing towards the development of Pakistan through its development and humanitarian aid programmes.

Switzerland contributed US \$10.7 million to flood-related humanitarian projects in the Pakistan, he added.

In his welcome address, Mahfooz Elahi President, ICCI

said that Pakistan was a peaceful nation and overall business environment was very good. The presence of a large number of foreign companies showed confidence in the business environment, as they were doing profitable business.

The ICCI President said, "We should concentrate on the existing opportunities" and suggested that cooperation could be enhanced in agriculture, transfer of technology, textile and pharmaceutical sectors. He

thanked the people of Switzerland for all their support to Pakistan at the time of floods that hit Pakistan in 2010.

He said that Pakistan offered profitable investment opportunities to both local and foreign investors. He said that marble sector was a fast growing sector in the country with huge investment potential. Foreign businessmen should come forward and invest in the marble industry, he stressed.

He suggested that for increasing bilateral trade people-to-people contacts should be enhanced. The visit of business delegations should also be encouraged to explore markets, he added.

Pak-China defence collaboration -- Observer

Pak-China defence collaboration

Sultan M Hali

Six decades of friendship is more than enough for two friends to prove the mettle of their relationship, however, true friendship does not require tests; it is there through thick and thin. Pakistan and China's relations have withstood the test of time and on numerous occasions both countries have reiterated the depth and solidarity they feel for each other. Diplomatic relations between the two came about on May 21, 1951 but the first test for the military came about when India provoked war with China in the Ladakh region. Pakistan, though itself a fledgling, stood by China. In 1965, China returned the favour by ensuring that India restrains itself from any adventurism in East Pakistan during the Pak-India war. Following the war and US imposition of an arms' embargo, left war ravaged Pakistan in a quandary, the Chinese, whose own military weapons' system production was in the stages of infancy, provided arms ammunition, fighter aircraft and whatever was available. In 1971, when India declared war again and severed East Pakistan, the western wing was able to defend itself through the Chinese military hardware.

The depth of Chinese defence collaboration with Pakistan can be gauged from the fact that they are willing to transfer technology with no strings attached. They provided weapons manufacturing factories, tanks and heavy weapons as well as aircraft and radar rebuild factories, fast patrol boat missiles and gunboats as well as Frigates building capability to Pakistan. The JF-17 Thunder, The Karakoram-8 advanced training aircraft, the Al-Khalid Main Battle Tank and F-22P Frigates are some examples of the joint collaboration. The Deep sea port of Gawadar, with its strategic location has been constructed with Chinese assistance and investment. At a time when the west accused Pakistan of nuclear proliferation, imposed sanctions but embraced India, it was China that helped Pakistan establish civil nuclear facilities.

Terrorism is a malaise, which has plagued both countries. Pakistan has been heavily embroiled in the war on terror following 9/11 but China has suffered heavily through organizations like the East Turkestan Islamic Movement (ETIM), who have been instigating the Uyghur in Xinjiang province. Some of the ETIM leaders had sought refuge in the tribal belt between Pakistan and Afghanistan and joined forces with the Taliban and Al-Qaeda. In 2003, Pakistan Army killed ETIM leader Hasan Mahsum in a raid on Al-Qaeda hideout. In 2007, ETIM militants in cars shot Chinese engineers in Balochistan and sent a videotape of the attack to Beijing, in retaliation for an execution of an ETIM official earlier that July. ETIM also took credit for a spate of attacks before the 2008 Summer Olympics, including a series of bus bombings in Kunming, an attempted plane hijacking in Urumqi, and an attack on paramilitary troops in Kashgar that killed 17 officers. Pakistan and China have joined forces to combat the scourge of terrorism. Joint military exercises, exchange of intelligence, provision of anti-terror equipment are part of the cooperation.

The May 02, 2011 US Navy Seals attack on a house in Abbotabad, which was allegedly housing Osama bin Laden, has made Pakistan the butt of ridicule as well as insinuations by the west. The US is claiming that Osama bin Laden was killed in the attack and his body has been dumped in the sea, despite the fact that there are credible reports that Osama had died of renal failure many years earlier. Whatever

the truth, Pakistan's sovereignty was breached, while Pakistan Army and the ISI are being targeted as being complicit in providing sanctuary to Osama bin Laden. At this moment, when Pakistan stood isolated as there were threats by belligerent and irate US parliamentarians to stop financial and military aid to Pakistan as well as take punitive action against it, China has come out loud and clear to declare its solidarity with Pakistan. It has asked the world to take cognizance of Pakistan's sacrifices in the war against terror, to "respect Pakistan's sovereignty and solidarity", and has "warned in unequivocal terms that any attack on Pakistan would be construed as an attack on China", formally conveyed by the Chinese foreign minister at last week's China-US strategic dialogue and economic talks in Washington. The Chinese government has agreed to expedite the delivery of 50 additional JF-17 Thunder aircraft to beef up Pakistan's Air Defence.

The bloody attack on PNS Mehran has crippled Pakistan's maritime surveillance capability and brought more ignominy to Pakistan's armed forces. China is standing by Pakistan and has held its hand to encourage it overcome the trauma of the attack. Its acceptance of Pakistan's offer to administer and regulate shipping in the strategic Gawadar sea port will go a long way in comforting Pakistan and deter India from further adventurism against Pakistan.

This is reminiscent of the time China had stood isolated and unrecognized by the world body and Pakistan endeavoured to get it its rightful place in the comity of Nations in 1971. Once again China has proved that its defence collaboration and unequivocal stand for Pakistan is unflinching. It is for the government and people of Pakistan to take cognizance of the rock solid ties between Pakistan and China and follow the advice King Claudius of Denmark had given to his son Hamlet in the epic play of the same name by the renowned playwright William Shakespeare: "The friends thou hast, and their adoption tried, grapple them to thy soul With hoops of steel, but do not dull thy palm with entertainment of each new-hatched unfledged comrade."

XVI NAM Ministerial Conference of the Non Aligned Movement, Bali, Indonesia, 25-27 May 2011 -- <http://www.mofa.gov.pk/>
XVI NAM Ministerial Conference of the Non Aligned Movement, Bali, Indonesia, 25-27 May 2011

Pakistan today reiterated its eight point action programme for revitalizing the Non Aligned Movement to effectively address the new and emerging global challenges in the areas of peace, security and development in the 21st Century.

This vision of a new and reinvigorated NAM was originally outlined by Prime Minister Yousaf Raza Gilani at the XV NAM Summit in Sharm el Sheikh Egypt in

2009 and was reaffirmed by Federal Minister of Textile Industry Makhdoom Shahabuddin, Head of Pakistan delegation, in his statement at the XVI Ministerial Conference of the Non-Aligned Movement (NAM) held at Bali, Indonesia on May 25-27, 2011.

The Ministerial meeting was inaugurated by the President of Indonesia and attended by Ministerial and other senior level representatives from the 120 NAM member states as well as observers and guest countries especially invited for the occasion.

The Ministerial Conference was convened to mark the 50th anniversary of the establishment of NAM and to reflect on the contributions that NAM can make over the next fifty years. To this end, the NAM Ministers adopted a comprehensive outcome document outlining a shared vision of NAM for the next 50 years and a commemorative declaration marking the 50th Anniversary of the Establishment of the Non Aligned Movement.

Makhdoom Shahabuddin also reiterated Pakistan's proposal for the establishment of a NAM Ad Hoc Working Group for discussing and forging a draft common vision statement on New Multilateralism and the role of the Movement in the 21st Century.

"Today, in this increasingly divided and fragmented world where foreign occupation, unilateral use of force, terrorism in all its forms and manifestations and non-fulfillment of nuclear disarmament obligations are still living realities, the principles and ideals of NAM are ever more relevant and critical," he stressed.

He also emphasized that NAM should reenergize its efforts to uphold and strengthen the timeless principles of respect for sovereignty and territorial integrity, non-aggression, non-intervention, and peaceful co-existence.

‘Pak-China Business Forum to open new opportunities’ -- APP
‘Pak-China Business Forum to open new opportunities’

ISLAMABAD: Pakistan-China Business Forum being jointly organised by TDAP and CCPIT in China on 8th June 2011 will open new avenues for promotion of bilateral trade and economic relations between the two countries, said Tariq Sayeed Patron-in-Chief of Pakistan China Business Council and Vice President of Confederation Asia Pacific Chambers of Commerce & Industry (CACCI).

During a meeting with Tairq Iqbal Puri Chief Executive of TDAP, Tariq Sayeed appreciated the initiative of TDAP for organising the Pakistan China Forum, which is considered an immediate follow-up of the decision taken during the visit of Prime Minister to China to enhance Pak-China bilateral trade. Tariq Sayeed also discussed forthcoming Trade and Investment Forum being organised by CCPIT on 5-7 June 2011 in Kunming, Yunnan Province and other matters of mutual interest for promotion of Pak-China economic relations.

In the meeting it was also decided that FPCCI and TDAP would make a combined movement in exploring the emerging Chinese market particularly by increasing Pakistan's participation in the Chinese exhibitions, which is the modern tool to penetrate the potential markets. Tariq Sayeed having a long association with China stated that due to his dialogue with CCPIT in Sichuan and Yunnan Province has resulted in vast opportunities for Pakistani exporters and manufacturers of various sectors for participation in International Commodities Fair, Kunming (6-10 June 2011) and Chengdu Western Fair 2011.

Consequently the share of FPCCI representation in fairs and forums has increased manifold. Complimenting the offer made by Sichuan and Yunnan provinces to Pakistan China Business Council, Sayeed said that the economic relationship particularly with these two provinces of China has increased significantly. Tariq Sayeed who had also the privilege of being the Founder and President of SAARC CCI said that China and South Asian Countries are emerging markets with immeasurable potential and this is the right time that Pakistan should make the maximum use of these markets to make foothold and maximum share by aggressive marketing of its products.

Tariq Sayeed was assured by Mr Puri that TDAP would continue extending support to FPCCI for measures which will promote business activities in China. Mr. Sayeed also held a detail discussion with Chairman, Board of Investments Mr. Saleem Mandviwala and discussed the investment possibilities in Pakistan and assured that at the forthcoming Forums China he would highlight investment opportunities in the potential sectors of Pakistan to Chinese Companies. He said that the profile of the potential areas will be distributed in the forums.

Tariq Sayeed further said that based on the success of 2nd South Asia – Sichuan Business promotion seminar organised by CCPIT and Sichuan Provincial People's government of which he is the Advisor turned out a new success story of economic cooperation. He further informed the Chairman that Pakistan China Business Council of FPCCI has succeeded in motivating 65 business houses to participate with 120 representatives in the Kunming Commodities Fair 2011 (6-10 June 2011). On the sidelines of this fair FPCCI will also actively participate in Trade and Investment Forums to be held on 5th to 7th June 2011 with a strong delegation consisting of businessmen from diversified sectors. He further added that on the invitation of Tariq Puri, all the delegates will be persuaded to stay back and attend the First Pakistan China Forum being organised by TDAP and CCPIT on 8th June 2011, which will give further impetus in strengthening cooperation, promoting trade and investment. staff report

ADB to support Pakistan for Diamir Bhasha Dam construction -- The News

ADB to support Pakistan for Diamir Bhasha Dam construction

ISLAMABAD: The Asian Development Bank's mission led by Mr. Juan Miranda, Director General, Central West Asia Development, which is currently visiting Pakistan, has called on the Federal Minister for Finance and Economic Affairs, Dr. Abdul Hafeez Shaikh, here Wednesday.

During the meeting, the delegation of ADB has supported Pakistan for the construction of Diamir Bhasha Dam and agreed to take onward steps in this regard. The Dam will have the capacity to reserve the water storage of 8.1 million acre feet and will generate 4500 MW electricity. It may be added that USAID has already indicated to co-finance this project. This project will facilitate not only in changing the energy mix in the country but will also help in storing water. The Mission has agreed in principle to finance the Tube wells Refurbishment project that will help in saving 1147 MW of electricity in the country.

ADB has also agreed to disburse \$ 200 million for Second Generation Capital Reform before the close of the financial year as soon as necessary formalities are completed. The Mission also discussed ways and means to accelerate the process of project implementation and expressed their satisfaction with their dialogue with Pakistani authorities.

The mission had very constructive discussions on macroeconomic policies, current portfolio funded by the Asian Development Bank and proposed projects in pipeline with the Finance Minister and Pakistani authorities. During the course of these meetings, Finance Minister Dr. Shaikh briefed the Mission about revenue as well as budgetary measures that have already been implemented, strong resolve of the Government to continue pursuing prudent policies, expenditure rationalization and fiscal adjustment, fiscal sustainability and protecting the external position.

He also updated the Mission on efforts of the Government to broaden the tax base including steps to increase revenues. The Finance Minister also thanked the ADB for being supportive during flood reconstruction. ADB has been one of the major development partners in development of the country's infrastructure.

The Mission during their meetings were intensely engaged to explore the ways and means to extend support to Pakistan in enhancing Pakistan's medium-term growth prospects. The Mission reassured that the ADB remains committed to Pakistan in supporting water, energy, urban services and communication sectors in Pakistan.

The meeting with the Finance Minister of ADB DG is in continuation of the dialogue in Hanoi during the Ministers' visit there. Among others who attended this meeting were Federal Minister for Water and Power, MOS Finance and other senior officials of the government of Pakistan.

All set to finalise TAPI gas price -- THE NATION

"During Kabul meeting, the Pakistani side proposed that other buyer countries including Afghanistan and India pay cost of gas including profit to Turkmenistan that has been endorsed," a spokesperson from the Ministry of Petroleum said. He while confirming the agenda items informed that this formula would be nominated in the upcoming meeting. "In a meeting to be held in Manila, gas pricing, transit fee and gas specification will be discussed with the seller, Turkmenistan," Qadir maintained.

It is pertinent to mention that the buyers and seller countries earlier discussed the amount of transit fee and agreed that it should be fixed on transmission of gas from Turkmenistan. The second suggested linking transit fee with per kilometer length of gas pipeline, and the third considered linking transit fee with volume of gas to be consumed by each country. Under this formula, these countries would pay greater amounts, on account of transit fee over using more gas.

Additionally, during talks held in February in Islamabad, Pakistan had proposed keeping 'uniform' prices of imported gas, excluding transportation charges and

transit fee for all countries, including Afghanistan and India. However, Turkmenistan wanted to link gas price with Liquefied Petroleum Gas (LPG), Liquefied Natural Gas (LNG) or crude oil.

It proposed to link base price of gas equal to LNG landed in Pakistan, to be adjusted after every three months at the Turkmenistan border meeting in April 2007. Pakistan and India had not agreed to the proposed formula.

Chinese investors have expressed interest in construction of a road linking the Gwadar Port to Faisalabad -- The Express Tribune

KARACHI:

Chinese investors have expressed interest in construction of a road linking the Gwadar Port to Faisalabad which is expected to give a boost to economic ties between the two countries, a top trade official said.

The idea was floated by Prime Minister Yousaf Raza Gilani during a recent visit to China where financial institutions and investor groups looked keen on financing the development of infrastructure, energy and trade projects in Pakistan.

Trade Development Authority Chief Executive Tariq Iqbal Puri told The Express Tribune the prime minister invited the Chinese government and investors to invest in the development of small dams in Pakistan.

He said that during meetings with heads of Chinese financial institutions, the prime minister put the proposal of constructing a link road between Gwadar and Ratodero and a motorway between Ratodero and Faisalabad on build, operate and transfer (BOT) basis. He said the implementation of the proposal would start a new era of economic cooperation between the two countries.

Puri said the Chinese government was interested in linking the trade of west China with Pakistan and an agreement had been reached for the construction of a trade corridor from Faisalabad to the Karakoram Highway. This project will facilitate access of Pakistani products to China, an important development in bilateral trade.

He said the Orient Group of China, which has purchased British Petroleum, had expressed interest in investing in port management, power and construction projects.

Indigenous wind energy potential stands at 350,000 MW -- Observer

Indigenous wind energy potential stands at 350,000 MW

Islamabad—Pakistan can generate over 350,000 MW electricity through only wind energy against the country's total demand of about 21,000 MW peak summer, necessitating solid steps to explore the potential. Official sources in Alternative Energy Development Board (AEDB) told APP that the country's has numerous resources to get energy and over 50,000 MW energy could be generated only in Gharo-Keti Bandar corridor where average wind speed is more than seven meter per second at only 60 meter height.

They said the corridor has potential twice of India and other sites in Balochistan, Punjab, and northern area, which are being identified for power generation.

The sources said Pakistan has amongst the world highest and fastest rising urbanization and electricity is available to only 61 percent of the population while natural gas to 21 per cent. Only 45 per cent of rural population has access to grid electricity and there is extreme shortage of electricity and gas leading to load-shedding.

The country's economic growth is also suffering due to load-shedding of gas and power, leading to closures of industries, they added. They said the total installed and dependable capacity of the country's power sector is 20,231 MW.

Giving breakup, they said 11,735 MW could be get from public sector while 8,496 MW from private sector. "By switching to alternative energy means, Pakistan can reduce dependence on imported oil, running into billions dollars and undermining economic development," they observed.

They said Mexico, Iran, India, USA, UK, China, Egypt, Morocco, Tunisia, Syria and Jordan have recently placed orders at the states/utility level for wind power. USA announced \$ 150 billion investment in renewable energy over 10 years, Japan \$ 12.2 billion in five years, China \$ 15 billion in two years and South Korea \$ 36 billion over four years.

It is pertinent to mention that USA has wind power installed capacity of 25,170 MW from wind, Japan 1,880 MW, India 9,645 MW, Greece 985 MW, Egypt 365 MW, Iran 85 and Pakistan 6 MW.—APP

ISLAMABAD - The countries buying gas under the Turkmenistan-Afghanistan-Pakistan-India (Tapi) gas pipeline project are set to finalise gas pricing, transit fee and gas specification with the seller (Turkmenistan) during upcoming four-day meeting to be hel -- THE NEWS

ISLAMABAD - The countries buying gas under the Turkmenistan-Afghanistan-Pakistan-India (Tapi) gas pipeline project are set to finalise gas pricing, transit fee and gas specification with the seller (Turkmenistan) during upcoming four-day meeting to be held in Manila on May 30.

"Pakistan, India and Afghanistan are all set to enter into an important negotiations regarding gas pricing, transit fee and gas specification in a four-day meeting scheduled to be held in Manila on May 30 this year, sources said, adding, "The countries that will be buying gas under TAPI project by putting the differences aside over gas pricing formula have already reached an understanding on paying cost of gas, including profit, as proposed by Pakistan during a two-day meeting held in Afghanistan from May 17 to 18 and finalised three options relating to transit fee". During this meeting held in Afghanistan, three options relating to transit fee of gas were discussed, sources added.

Five members Pakistani delegation would be headed by Rashid Bashir Mazari, Joint Secretary Ministry of Petroleum and Natural Resources (MoP&NR) is likely to participate in the upcoming meeting. Further, Pakistani delegation would include Afzal Chaudhry, Joint secretary (MoP&NR), Mubeen Solat Managing Director at Inter State Gas System (ISGS) and Kamran Bahadur GM (ISGS) to finalise the modalities relating with TAPI.

Under the estimated \$7.5 billion Tapi gas pipeline project, Pakistan's share will be 1.35 billion cubic feet per day (cbfd) out of total 3.2 (bcfd) gas imports. Inter-Governmental Agreement (IGA) and Gas Pipeline Framework Agreement (GSFA) have already been signed and four participating countries have targeted to sign Gas Sales Purchase Agreement (GSPA) by July 31 this year.

Gas specification is likely to be finalised rest of two issues including gas pricing and transit fee might take another meeting, Zafar Qadir, a spokesman of Ministry of Petroleum and Natural resources while talking to TheNation said, adding, "Buyer countries held a two-day meeting from May 17 to 18 in Afghanistan to finalise modalities on the gas pricing issue and transit fee to import gas from Turkmenistan, under the multi-billion dollar project". Pakistan is all set to get immediate finalisation on Tapi related issues only to meet the schedule in time as agreed among member countries, Zafar Qadir added.

All Day

ISLAMABAD: Pakistan has invited expressions of interests from foreign and domestic companies for the supply of 500 million cubic feet per day (cfd) of liquefied natural gas (LNG) for up to 10 years to feed its crumbling power sector, officials said on Thu -- The Dawn

ISLAMABAD: Pakistan has invited expressions of interests from foreign and domestic companies for the supply of 500 million cubic feet per day (cfd) of liquefied natural gas (LNG) for up to 10 years to feed its crumbling power sector, officials

said on Thursday.

The government has set a deadline of June 27 for the submission of expression of interests with an aim the supply must be started in the first or second quarter of 2012.

Pakistan's Supreme Court last year scrapped a government deal to buy LNG from French company GDF Suez because of suspected irregularities.

"Anybody can come. He can bring LNG. We will just put their gas into our system for their buyers," Secretary Ministry of Petroleum Mohammad Ejaz Chaudhry told Reuters.

"It is an open field for anyone who has buyers."

Chaudhry said a winning company would itself set up a terminal in Pakistan for re-gasification of LNG and the government would determine the price of the gas through its Oil and Gas Regulatory Authority.

"The government is not providing any guarantees. It is just facilitating," he said.

The government has assigned its subsidiary, Sui Southern Gas Company (SSGC), to pipe re-gasified LNG to domestic customers.

"All the finances will be arranged by the LNG developer. There won't be our investment. We would charge a transportation tariff for this service," SSGC spokesman, Zuhair Siddiqui, said.

Energy-starved Pakistan needs gas to feed its power sector as it faces a shortfall that often peaks at 5,000 megawatts per day in summer.

The country has been facing lengthy power outages for several years, which often trigger protests and add to the worries of the pro-US government that is fighting rising al Qaeda-linked militancy on its soil.

Pakistan relies on oil for most of its power needs and imports about 80 percent of its oil.

It spent about \$3.99 billion on the import of 6.9 million tonnes of petroleum products and \$2.45 billion on 4.3 million tonnes of crude oil in the first seven months of the July 2010 to June 2011 financial year.

Early this month, Pakistan's second Chinese-made 330 MW nuclear reactor started generating power. China is also building two more units with the same capacities at Chashma nuclear plant in Pakistan's eastern Punjab province. The projects are, however, not scheduled to be completed until 2017.

Analysts say import of LNG is the best possible short-term option for the government to cope with the growing energy crisis.

"Your options are evaporating very fast. You have to fill the gap urgently and I think it is a good, cheap option if we avail it," said Asif Qureshi, an analyst at Invisor Securities, a brokerage firm based in Karachi.

The quantity of the gas could be increased to 2 billion cubic feet per day depending on needs, Chaudhry added.

Naek invites Polish businessmen to explore investment opportunities in Pakistan -- APP

Naek invites Polish businessmen to explore investment opportunities in Pakistan ISLAMABAD, May 28 (APP): Chairman Senate, Farooq H.Naek has invited the business houses based in Krakow, Poland to explore investment opportunities in Pakistan. He encouraged Polish companies to set up an exclusive Polish economic zone in Pakistan and expand business and trade relations between the two countries. On the last leg of his visit to Poland, Farooq Naek met the Governor of Krakow, Stanislaw Kracik who hosted a banquet in the honour of Senate delegation in the evening, says a press release received here on Saturday. The bilateral meeting with the Governor focused on enhancing economic, cultural and educational linkages between the two countries, to expand the scope of bilateral relations.

He evinced great interest in Pakistan's investment friendly regime and expressed deep appreciation for Pakistan's leadership and society for their dedicated struggle against the menace of terrorism.

He welcomed Pakistan's joining the celebrations of European Football Championship next year.

Krakow being the economic, cultural and educational hub of Poland houses offices of international brands, business support associations and chambers of commerce of a number of countries.

Farooq Naek also held meeting with Deputy Governor of Krakow, Adrzej Haiezlak and briefed him about current situation in the South Asian region and the leading role being played by Pakistan in fight against terrorism.

He stressed that the government and people of Pakistan were committed to eliminate the scourge of terrorism to make the world a safer place.

He shared with the governor the sacrifices in men and material made by Pakistan in this regard, which surpassed the combined losses incurred by ISAF during the last ten years in Afghanistan.

He underlined that Pakistan was waging this war for its own security and for the entire humanity.

Farooq Naek also laid a wreath at the tombs of former Polish President Lech Kaczynski and his lady wife Maria

Kaczynska, who perished in a tragic air crash at Smolensk, Russia on April 10, 2010, along with 95 others on board, including Poland's top military and civilian leadership.

Farooq Naek expressed best wishes for Poland's forthcoming Presidency of the European Union in the latter half of the current year.

He also wished Poland success in hosting 2012 European Football Championship.

Chairman Senate paid a visit to the 640 years old Jagiellonian University.

He also visited Geofizyka Krakow, a geophysical and geological surveying company which is maintaining its presence in Pakistani market since 1998.

He was received by Leopold Sulkowski Chief Executive Officer of the company and Chairman of the Board, who is the Honorary Consul of Pakistan in Poland.

The Chairman Senate invited Geofizyka and Oil and Gas Exploration Company (OGEC) to expand their scope of work in Pakistan to create employment opportunities for Pakistani people and strengthen economic relations between the two countries.

ISLAMABAD: Chairman Investment Board Saleem H. Mandviwala said on Saturday that Pakistan is going to enhance bilateral trade and investment with Russia -- APP

ISLAMABAD: Chairman Investment Board Saleem H. Mandviwala said on Saturday that Pakistan is to enhance bilateral trade and investment with Russia.

This is a very big initiative of the present government which would help improve the relations between the two countries, he said.

“Russian government will invest in different sectors including steel and banking in the next coming months,” Chairman Investment Board said this while talking to Pakistan Television (PTV).

He said Russian investment in banking sector of Pakistan will start soon, while negotiation on Steel Mill is in progress.

Saleem Mandviwala said that Russia is a big investor of the region and its leadership is willing to invest in Pakistan’s top zones.

This is a positive gesture of Russian government for this region, he added.

To increase the activities at Gwadar Port, he said the railway and road communication is very important.

He said the Investment Board is going to launch online visa service next month for foreign investors.

Saleem Mandviwala said that a special protocol is being given to those who are willing to get Pakistani visas for investment and business purpose in the country.

Karachi—Sindh Investment Board and Korean Importers Association have signed an MoU to boost exports from the Sindh province. The MOU was signed by Secretary Investment of Sindh, Younus Dagha on behalf of Sindh government while the Koreans Importers Associ -- Observer

Karachi—Sindh Investment Board and Korean Importers Association have signed an MoU to boost exports from the Sindh province. The MOU was signed by Secretary Investment of Sindh, Younus Dagha on behalf of Sindh government while the Koreans Importers Association was represented by their chairman. The ceremony was witnessed by CM Sindh Syed Qaim Ali Shah, who is heading a high level delegation to Korea for attracting Korean investment in various sectors of Sindh economy.

Leading businessmen from Pakistan accompanying the chief minister had fruitful B2B meetings with their Korean counterparts who showed great interest in Pakistani goods and agreed to come to Karachi towards the end of this year.

Speaking on the occasion, Advisor to CM Sindh on Investment Zubair Motiwala said that Pakistan produces abundant raw material but due to lack of modern technology, it has not been able to achieve efficiency in its production stage. He invited Korean companies to transfer technology and share their advancement with Pakistan. The ambassador of Pakistan thanked the MD of KOIMA for organizing successful B2B meetings with Pakistani businessmen.

Pakistan, Norway agree to strengthen bilateral ties, trade and economic cooperation -- APP

Pakistan, Norway agree to strengthen bilateral ties, trade and economic cooperation

ISLAMABAD, May 30 (APP): Pakistan and Norway on Monday agreed to further strengthen their bilateral ties including the trade and economic cooperation, for which there existed enormous potential. The two sides agreed that over two billion US dollars investment in Pakistan by Telenor, a Norwegian company, could serve as a trail blazer for other Norwegian companies to invest in Pakistan. This agreement reached during the 7th Round of Annual Bilateral Political and Economic Consultations between Pakistan and Norway held in Oslo on Monday, according to a message received here from the Embassy of Pakistan in Oslo.

The Pakistani side was led by Additional Secretary (Europe) Ministry of Foreign Affairs, Abdul Basit, while Norwegian side was led by Deputy Secretary General of the Norwegian Ministry of Foreign Affairs, Atle Leikvoll.

The two sides discussed a whole range of bilateral, regional and international issues.

The Pakistan side emphasized that the country, though facing multiple challenges, offered lucrative investment opportunities. Norway as a member of the FoDP was best placed to invest in Pakistan to create a win-win situation.

The Norwegian delegation, stressed upon the need of expanding bilateral economic and commercial relations between Norway and Pakistan. They assured that the Norwegian government would work for strengthening these ties and would assist the Norwegian companies for investment in Pakistan.

Belgium is the fifth major EU buyer of Pakistani products and the Pakistani exporters should avail this opportunity. -- Dawn

Belgium is the fifth major EU buyer of Pakistani products and the Pakistani exporters should avail this opportunity.

This was stated by Belgian Ambassador Hans Christian KINT while speaking in a meeting at the Faisalabad Chamber of Commerce and Industry.

He stressed upon the need that the Pakistani High Commission in Brussels should take measures to promote the Pakistani products.

He said that in the past Belgium contributed about 10 million euros for flood rehabilitation activities in Pakistan.

Belgium assisted the Punjab government for the development of educational institutions and more than 100 schools have been upgraded till now with Belgium support, he added.

Responding to a question about the GSP plus status to Pakistan, he said that there was a certain criteria prescribed by the EU and it is mandatory to fulfill the required conditions. However, the Belgium government will support the Pakistan's case in this respect, he added.

He said that Pakistan was a business conducive country and expressed the need for checking terrorist acts to encourage the foreign investors, including the Belgians.

Briefing about bilateral trade, he said for the last many years the Balance of Trade was in favor of Pakistan, however, during current year the balance of trade was in favour of Belgium.

He said that Belgium exported 70 per cent chemical products, about 60 per cent machinery and parts etc last year.

Pakistan exported about 72 per cent of textile products and about nine per cent of food products.

In his welcome address, Chairman Adhoc Management Committee FCCI Muhammad Naseer said that FCCI was a keen supporter of strengthening economic relations with other countries.

Economic Daily to play role in Pak-China trade, investment: Rujun -- APP

Economic Daily to play role in Pak-China trade, investment: Rujun
KARACHI, May 31 (APP): The Chinese leading state-owned newspaper "Economic Daily" can play a vital role in promoting trade and investment relations between Pakistan and China. This was stated by the head of Chinese delegation and president of "Economic Daily", Xu Rujun in a meeting with Managing Director of Associated Press of Pakistan Corporation (APP) Mohammad Riaz here on Tuesday. Chief Correspondent Zhu Jing, Senior Foreign Correspondent Sun Jian and Bureau Chief APP Karachi Rashid Ali Khan were also present on the occasion. Xu Rujun said that the Economic Daily can highlight Pakistan's economic potentials, investment needs and available raw materials among leading Chinese conglomerates.

"We can also organize seminars and international conferences in China and Pakistan to attract Chinese investment in Pakistan and also encourage joint ventures," he added.

In this regard, holding of a seminar on Pakistan in China can be organized by the Economic Daily in near future, he noted.

He said his newspaper can also arrange meetings between leading Chinese and Pakistani industrialists for attracting investment.

Responding to a question, he said that Pakistan should emulate Chinese model of Special Economic Area Region (SAR) for developing Chinese economic zones in the country.

He said his newspaper can also highlight and propagate the tourist attractions in Pakistan among Chinese tourists.

To a question, he said that the contribution and stake of private sector in the Chinese economy has grown to 50 percent, playing a key role in the second biggest economic power on the globe.

He said that the Chinese government is encouraging private sector to assume a leading role in the country's gross domestic products, exports and market.

They are allowed to enter all sectors of the economy except industries in the national security business, he added.

He said that the Chinese government has asked private sector to use modern technology and efficient management in the production to save wastage of national resources and cut cost to become more competitive.

Rujun pointed out that the government has made a paradigm shift in its economic growth model of the country. The producers of exports goods make very little profit and therefore, they cater to domestic market now.

He said private sector is very energetic and they are transforming from small and medium enterprises (SMEs) to large business houses, adopting high technology and advance management in production and marketing.

The President of the Economic Daily said that private sector has emerged as a leading player in the Chinese economy during the last three decades.

To a question, he said that the Chinese conglomerates are making off-shore investment and utilizing computers and internet and high technology for cost effective production. These investments can be made in Pakistan, he noted.

Xu Rujun invited APP delegation led by the Managing Director to visit China as guest of the Economic Daily.

Earlier, the APP Managing Director sought the role of Economic Daily in the promotion of bilateral trade and investment. He urged Rujun to highlight Pakistan's potential in gems and precious stones abundantly available in Gilgit-Baltistan.

Pakistan, China friendship a lush tree: Ambassador Khan -- APP

Pakistan, China friendship a lush tree: Ambassador Khan

BEIJING, MAY 31 (APP): Premier Wen Jiabao has wisely described the friendship between Pakistan and China as a "lush tree with deep roots and thick foliage, full of vigour and vitality," said Pakistan's Ambassador to China, Masood Khan. The Chinese Premier made these remarks on the morning of December 19, while addressing a packed session of Pakistani parliament during his official visit to Pakistan. "The sentimental bond between our peoples is thus a constant image. An aura of warmth and affection permeates our relations. Diplomats in Beijing and around the world hear with some amusement the poetic expressions suggesting that Pakistan-China friendship is all-weather and time-tested; and that this relationship is taller than the Himalayas and deeper than oceans; and that it is stronger than steel, and sweeter than honey," wrote Ambassador Khan in an article published in Beijing Review's special supplement on the 60th anniversary of Pakistan-China friendship.

He said that "Some do offer envious compliments and ask about the secret of the longevity and depth of this relationship. The people of Pakistan and China evoke these poetic images with sincerity of conviction and feel that they still do not fully capture the depth of their feelings towards each other."

To make an attempt to figure out the secret of this unique bond, Ambassador Khan said, "the first crucible of our friendship has been history. Scholars and students are familiar with recent history of Pakistan-China relations. But our relations go far back. It is obvious that the territories of Pakistan and China are joined by mountains and rivers so-called geographical fault lines. Pakistan and China also share civilizational fault lines. Monks and envoys traversed the daunting heights of the Karakorum, the Hindukush and the Himalayas to connect the Gandhara and the Indus Valley civilizations with the Chinese civilization".

He said that Fa Xian and Xuan Zang, in the fourth and seventh centuries respectively, were not deterred by the inaccessible altitudes of these mountain ranges. Many scholars from the territory that is now Pakistan traveled to China to understand and imbibe the glorious civilization of China. So, cross-fertilization of our

civilizations took place much before the modern era.

The founding of the People's Republic of China in 1949 was a truly historic event. And so was the independence of Pakistan in 1947. Pakistan recognized China on January 4, 1950, and established diplomatic relations on May 21, 1951 following negotiations with Pakistan's first Charge d' Affaires who had arrived in Beijing in April 1951. The first Chinese Ambassador to Pakistan went to Karachi in September 1951 and Pakistan's first Ambassador to China arrived in Peking on November 1, 1951.

"These are the beginnings that we shall celebrate this year after six decades. The year 2011 has been designated the Year of China-Pakistan Friendship. We have decided to hold a series of activities in the political, economic, trade, military, cultural, sporting and educational fields to commemorate the strength of our bilateral relations and to show the resolve to take it to new heights" Khan wrote in the article.

He said "we can identify three periods in our relations. Because of the Cold War, the 1950s was a period of uncertainty in Pakistan-China relations, though efforts started right in the beginning for engagement. During the Bandung Conference in 1955, Premier Zhou Enlai and Prime Minister Mohammad Ali Bogra agreed to strengthen exchanges and cooperation between the two countries. On May 23, 1955 Chairman Mao Zedong, while talking to our Ambassador in Beijing, Mr. Sultanuddin Ahmed, expressed the hope that, given goodwill between the two countries, relations would grow stronger and friendlier".

In the late 1950s and early 1960s, the leadership of the two countries steered Pakistan-China relations towards closer understanding and solidarity. In 1961, Pakistan voted for the restoration of China's seat in the United Nations. In 1963, China and Pakistan signed a boundary agreement. This was a very significant milestone as it underlined and displayed the emerging trust between the two neighbours.

The agreement was signed in February 1963 in Beijing by Pakistan's Foreign Minister Zulfikar Ali Bhutto. This also showed Pakistan's independence in its foreign policy and its growing faith in Sino-Pakistan friendship.

From this point onward, Ambassador Khan said, "the third phase of relations between our two nations began which was characterized by mutual confidence, deep trust, and growing cooperation. This period can be called a period of consolidation and expansion and it has continued up to this point.

In May 1964, Premier Zhou Enlai, while recalling his visit to Pakistan, said: "we found ourselves at all times living in an atmosphere of profound friendship, which the Pakistani people cherished for the Chinese people, and (we) were greatly moved by that.

"In the succeeding decades, China and Pakistan have not only deepened their ties but stood by each other in difficult times. China helped us during the 1965 and 1971 wars. We advocated China's entry into the United Nations. We also facilitated rapprochement between the US and China through quiet diplomacy. We have coordinated our policies during the turbulent period of the Afghan resistance against the Soviet Union in 1980s; and are now cooperating in the fight against terrorism.

"As we come to the recent history of Pakistan-China relations, we express satisfaction from the fact that the two sides have fashioned a very effective, practical, and flexible architecture for engagement and cooperation in strategic, defense, economic, commercial, and cultural fields. This architecture is responsive to the changing times," Ambassador Khan said.

Pak-China Joint Statement, issued in Islamabad on December 19, 2010 on the conclusion of Premier Wen Jiabao's historic visit to Pakistan, highlighted the following points: (1) It is important to deepen the China-Pakistan all-weather strategic partnership; (2) China-Pakistan relations have gone beyond bilateral dimensions and acquired broader regional and international ramifications; (3) Friendship and cooperation between Pakistan and China serve the fundamental interests of the two countries, and contribute to peace, stability and development in the region and beyond; and (4) The two sides will enhance their strategic coordination, advance pragmatic cooperation, and work together to meet the challenges in pursuit of common development.

Pursuing friendship with China has become the bedrock of Pakistan's foreign policy which enjoys consensus across the political spectrum. Pakistan deeply appreciates the support and assistance China has given for our economic and social development. We fully support China's principled stand on Taiwan, Tibet, Xinjiang,

and other human rights issues.

Chinese Government and people reciprocate these sentiments and consider Pakistan to be their most reliable friend and partner. Developing relations with Pakistan is high on China's diplomatic agenda. China supports Pakistan's efforts in safeguarding its sovereignty, independence and territorial integrity.

The fuel for this relationship comes from the hearts and minds of the people. The prudent, farsighted policies of their governments buttress it through multiple frameworks.

The 2005 Pakistan-China Treaty for Friendship and Cooperation and Good Neighbourly Relations is a key instrument which enables us to strengthen our strategic, economic and cultural relations. High-level visits play a crucial role in this regard.

In December last year, Pakistan and China decided to establish an annual meeting mechanism between leaders, set up foreign ministers' dialogue mechanism and reinforce contact and dialogue between the foreign ministries.

Since 2008, President Asif Ali Zardari has visited China six times and Prime Minister Syed Yusuf Raza Gilani three times. Last year, Premier Wen Jiabao and Vice Premier Zhang Dejiang visited Pakistan.

Ambassador Khan pointed out that "this year we will make special

All Day

Pak-Malaysia trade could double in five years -- Express Tribune

KARACHI:

Trade volume between Pakistan and Malaysia can double from \$2.3 billion to \$4.6 billion in the next five years by stepping up dealings in agricultural products and sharing of technological advancements, according to Malaysia-Pakistan Business Council assessments.

The newly established Malaysia-Pakistan Business Council is currently in the midst of charting its agenda and direction in this regard, said Council President Mohammad Saleem in a statement on Monday.

Initial studies revealed that exports to Malaysia could increase by developing new ways in which Malaysian importers, government-sponsored agencies and institutions can get more products like wheat, rice, beef and fruits from Pakistan.

Saleem said the authorities in both countries should design a trade assistance programme, similar to the one between Japan and China. He said that it would be in Pakistan's interest to take advantage of Malaysia's expertise in fields such as cold chain maintenance techniques, concentrate and pulp processing and canning fruits.

In order to help Pakistan realise its full agricultural potential, the council believed that Malaysia can bring latest technology.

The council advised the Malaysian government to lobby for reducing import taxes on mangoes, allow import of milk, provide guidance to investors and traders from both countries and organise food and cultural events.

The frozen food sector is another area that Malaysia is interested in. To capitalise on this opportunity, the council believed that Pakistan should encourage companies such as Engro, Nestle, K&N and Shezan to process ready-to-cook or ready-to-eat food items for export.

According to the council members, Malaysia can offer Pakistan, and Karachi in particular, with expertise in construction, building material manufacturing and electrical appliance manufacturing.

Pakistan China Forum to be jointly organised by Trade Development Authority of Pakistan (TDAP) and China Council for the Promotion of International Trade (CCPIT) in China -- The News

KARACHI - Pakistan China Forum to be jointly organised by Trade Development Authority of Pakistan (TDAP) and China Council for the Promotion of International Trade (CCPIT) in China on June 8, 2011 will open new avenues for promotion of bilateral trade and economic relations between the two nations.

This was stated by China Business Council Patron-in-Chief of Pakistan Tariq Sayeed, in a meeting with TDAP Chief Executive Tairq Iqbal Puri, in his office. He appreciated the initiative taken by TDAP for organizing the Pakistan China Forum which is considered as an immediate follow-up of the decision taken to enhance Sino-Pak bilateral trade during the visit of Prime Minister Gillani to China.

Sayeed also discussed the forthcoming Trade and Investment Forum being organized by CCPIT on June 5-7, 2011 in Kunming, Yunnan province, China and other mutually beneficial areas for promotion of Pak-China economic relations.

It was also decided that Federation of Pakistan Chambers of Commerce and Industry (FPCCI) and TDAP will make a combined effort in exploring the emerging Chinese market, particularly by increasing Pakistan's participation in Chinese exhibitions, which serves as a useful tool for delving into potential markets. Having had a long association with China, Sayeed stated that his dialogue with CCPIT in the Sichuan and Yunnan province has resulted in vast opportunities for Pakistani exporters and manufacturers of various sectors in terms of participation in the International Commodities Fair, such as the Kunming (June 6-10, 2011) and Chengdu Western Fair 2011. Consequently, the share of FPCCI representation in fairs and forums has increased manifold as well. Complimenting the offer made by Sichuan and Yunnan provinces to Pakistan China Business Council of FPCCI, Sayeed expressed the strengthening of economic ties with China, particularly with these two provinces. Sayeed, who had also the privilege of being the Founder and President of SAARC CCI said that China and South Asian Countries are emerging markets with immeasurable potential and that it is the right time for Pakistan to maximise its use of these markets, develop a strong foothold and a large share by aggressive promotion of its products.

He was assured by Puri that TDAP would continue extending its support to FPCCI for measures, promoting business activities in China. Sayeed also held a detailed discussion with Board of Investments Chairman Saleem Mandviwala and discussed the investment possibilities in Pakistan, while assuring an emphasis on the investment opportunities in potential sectors of Pakistan to Chinese firms at the forthcoming forums. For this purpose, a profile of the potential areas will be distributed during the forums.

Sayeed further said that the success of the 2nd South Asia-Sichuan Business promotion seminar organized by CCPIT and Sichuan Provincial People's government of which he is the Advisor, turned out to be a success story of economic cooperation.

He further informed the Chairman that Pakistan China Business Council of FPCCI has succeeded in motivating 65 business houses to participate with 120 representatives in the Kunming Commodities Fair 2011.

A large delegation consisting of businessmen from diversified sectors will also signify the active participation of FPCCI in the Trade and Investment Forums to be held on June 5-7, 2011.

Development projects in Balochistan to generate jobs:Jamali -- APP

Development projects in Balochistan to generate jobs:Jamali

ISLAMABAD, Jun 6 (APP): Minister for Science and Technology Mir Chengez Khan Jamali said on Monday that development projects in Balochistan would generate jobs for unemployed youths in the province. The minister said in order to achieve this objective, it was necessary to utilize the natural resources of the province in a proper manner. Talking to Pakistan Television, he said that Balochistan is rich in natural resources and it was fair that these should be properly used in order to benefit the local people. He emphasized that royalty thus earned should be paid to the Balochistan Government. Replying to a question, the minister said that democratic elements can help resolve various issues being faced by Balochistan.

He said that all stakeholders should jointly strive to improve law and order as this was essential for maintenance of peace in the area.

He stressed the need for enhancing literacy rate through quality education so that people of this less developed part of the region could avail themselves of better job opportunities in the country.

In order to achieve long term trade benefits from the Gwadar Port, there must be a special focus on construction of roads and fast railway network links with rest of the world, he observed.

**Pak-China manufactured: Pakistan Navy inducts Naval ship Aslat --
Express**

KARACHI: Naval ship Aslat, jointly manufactured by Pakistani and Chinese engineers in Karachi, was handed over to the Pakistan Navy on Thursday.

PNS Aslat is the fourth F22-P Frigate inducted into the Pakistan Navy.

This is the last ship of four 'Sword' or 'Zulfiqar Class' frigates jointly manufactured with China.

Speaking at the launch ceremony, Naval Admiral Nauman Bashir said the manufacturing experience will improve the Karachi Ship Yard's building capacity.

He also said the manufacturing of frigates highlights the government's priority towards defence.

BEIJING: The next five-year (2012-1216) Pak-China Development Programme on Trade and Economic Cooperation (FYDP) will be launched next year. Ambassador Masood Khan said this in an interview with China Textile News, a Chinese language daily which focuses on textile related matters. He said this programme includes collaboration on an Institute of Textile and Clothing. He said Pakistan welcomes Chinese producers setting up factories in Pakistan.

"Pakistan has one of the most liberal investment regimes. Pakistan's investment environment is especially hospitable for Chinese entrepreneurs. Chinese corporate sector has worked in Pakistan for several decades with success," he noted.

Ambassador Khan said that most of the Chinese companies are familiar with Pakistan's manufacturing landscape.

China has excess capital and expertise in textiles industry. The textile industries' competencies can be easily transferred to Pakistan. In fact, the best option would be to start exclusive textile zones which could be managed by the Chinese enterprises. "We could also experiment with joint ventures. An interface of sorts already exists," he said.

Balochistan govt to get further Rs 11 billion from Divisible Pool -- Daily Times

Balochistan govt to get further Rs 11 billion from Divisible Pool

By Mohammad Zafar

QUETTA: The government of Balochistan is expected to get at least Rs 11 billion more from the Divisible Pool in the next fiscal year, comparing to the revenue receipts in the last budget. It is besides Rs 16 billion as subvention from the federal government.

The main increase in the revenue receipts for Balochistan is on taxes on income and Balochistan provincial government will get Rs 3 billion more than the current fiscal year and Sales Tax on Service which registers an increase of around Rs 8 billion. In all, Balochistan will receive Rs 11 billion more in the next budget. It is excluding the Subvention and foreign assistance, mainly from Oman and International Fund for Agriculture Development.

The provincial government will get Rs 40 million less on account of gas development surcharge, once the biggest source of revenue in the recent past. Similarly, there is fall in revenue from royalty on natural gas and it is around Rs 173 million comparing last year.

However, there is an increase in revenue receipts on account for Central Excise on natural gas and the amount of increase is calculated at Rs 600 million in the current fiscal year. Balochistan received nominal revenue of Rs 263 million on account of Capital Value Tax and during the next it will be zero.

The share of Balochistan government is 9.09 percent as per the National Finance Commission Award signed the implementation during the current fiscal year.

It may be mentioned that the government had paid back all the cash development loans, the most costly loans of the federal government, during the current year, the provincial government will not make a payment of interest on Cash Development Loan. Earlier, the Pakistan People's Party government had picked up the State Bank overdraft saving a sizable amount of money on principal amount and heavy interest. At one stage, it jumped to Rs 20 billion during the Q-League government, as rulers resorted to lavish spending.

Years ago, the Asian Development Bank (ADB) provided a soft loan under the Resource Management Programme to relieve the provincial government of the costly federal loans. With the soft loan from the ADB, Balochistan repaid all the costly loan under the head of Cash Development Loans.

However, the provincial government will have to pay Rs 634 million as interest on foreign loan as against of Rs 1,836 million as interest during the current fiscal year. The provincial government will have to pay back the principal amount of Rs 3352 million on foreign loans as compared to Rs 3,922 million during the current fiscal year.

According to the budget documents, the provincial government will get foreign loan of Rs 1,631 million and a cash grant of Rs 500 million during the next fiscal year. The grant is provided by the Sultanate of Muscat and Oman and it will be spent on the development of Gwadar and its surrounding communities. The grant to the province was merely Rs 33 million during the current fiscal year.

Similarly, the foreign loans were Rs 1,472.580 million during the current fiscal year. The president of Pakistan laid the foundation stone of Vindar Dam project in Lasbela district and made a speech explaining the policies of the government that he would personally monitor the pace of work and accordingly the funds would be released. In the current budget, Rs 41.155 million was allocated. At the end of the fiscal year, the federal government did not release a single penny for the prestigious project inaugurated by the president of Pakistan.

Now in the next fiscal year, the government had Rs 100 million for the project. For two more water dam projects, the government had allocated Rs 10 million for Pelar Dam and Rs 50 million for Hingol Dam. Hingol is the only perennial river of Balochistan and it is considered to be the biggest river. No resources were allocated for the construction of Gwadar Grid Station and installation of 220KV transmission line for import of electricity from Iran for Gwadar. The government wanted to import 100MW electricity from Iran to cater the need of local people in

Mekran. The demand for electricity multiplied and load shedding duration also increased.

There had been no allocation of resources in the Federal Budget for Balochistan Road Development Project, Community Development and Poverty Reduction, restructuring Technical Education, HIV/AIDS project and Middle School Project. Previously, these projects were funded by the federal government. It is the effects of devolution of powers from the central government to the provinces.

**Pakistan seeks Chinese expertise to boost oil, gas production --
Singapore (Platts)**

Pakistan seeks Chinese expertise to boost oil, gas production
Singapore (Platts)--21Jun2011/628 am EDT/1028 GMT

Pakistani President Asif Ali Zardari has invited China's Orient Group to assist Pakistan in drilling for oil and gas, and reactivating depleted and abandoned fields across the country amid an acute energy shortage, the Associated Press of Pakistan reported Friday.

Speaking to a delegation headed by Zhang Hongwei, chairman of Orient Group, Zardari said Friday that Pakistan is in an "energy emergency," according to the report.

In an Express Tribune report June 18, Zhang expressed interest in conducting feasibility studies on laying oil and gas pipelines from the Gwadar Port to China, following a request from Pakistan's Federal Minister for Petroleum and Natural Resources, Asim Hussain.

Zhang added that the group was investing more into the recently acquired BP projects in Pakistan to increase the output of oil products.

Islamabad, Baku enjoy excellent ties -- Observer

Islamabad, Baku enjoy excellent ties
Dr Jassim Taqui Deputy Editor IR

Islamabad—Pakistan is proud to recognize Azerbaijan in 1991 immediately after gaining its independence (the second country after Turkey). The two countries established diplomatic relations in 1992. Pakistan was one of the first countries to open its Embassy in Baku, capital of Azerbaijan.

Pakistan and Azerbaijan enjoy close and cordial relations, characterized by shared perceptions on major global and regional issues. A unique feature of the relations is strong support extended to each other on major issues. Pakistan fully supports the principal policy of Azerbaijan over Nagorno Karabakh. Azerbaijan responded by supporting Pakistan's effort for early resolution of Kashmir dispute, in accordance with the relevant UN resolutions.

The two countries have been cooperating in international forums on almost all strategic issues.

They signed many agreements to provide a framework for bilateral cooperation in all spheres, especially in the economic sector. They established a Joint Ministerial Commission.

The objective is to bring the two peoples closer to each other due to strong affinity and goodwill between them.

Pakistan offered assistance in financial sector, particularly banking, development of textiles and micro-financing. Similarly, Pakistan has shown interests to benefit from Azerbaijan's experience in energy and development of petroleum sector. As agreed, Pakistan established a subsidiary branch of National Bank of Pakistan in Baku. This step would help promote trade transactions between the two countries

During the visit of the Defense Minister of Azerbaijan to Pakistan in May 2001, the two countries had signed a Joint Statement in Islamabad agreeing to develop military partnership by initiating institutionalized defense cooperation. The Defence Minister of Pakistan responded with similar visit. This visit by defense delegation to Azerbaijan is expected to further widen the scope of defense cooperation between the two friendly countries.

With this excellent background, the Ambassador of the Republic of Azerbaijan Mr. Dashgin Shikarov and the Defence Attaché Colonel Dashdamir Mammadov hosted a grand reception in the Marriot Hotel to celebrate the Armed Forces Day of Azerbaijan.

A large number of defence attaches and their spouses along with the elite of the civil society were present. The Chief Guest was Vice Chief of Air Staff Air Marshal Asim Suleiman along with DG Foreign Military cooperation Maj .Gen. Inaum ul Haque. Many senior military officials were also in attendance.

The two countries are focusing on military cooperation between their defence ministries.

Azerbaijan is working hard since its independence on developing its armed forces. It is sanctioning about 2.5 billion dollars annually for military expenditure.

This rising nation has been able to build its own defence industry. Within a short time, Baku is manufacturing small arms. It has started an ambitious programme of building tanks, armoured vehicles, military planes and military helicopters.

The atmosphere was festive. The main discussion and questions of the guests were the post- Geronimo Operation era in Pakistan, the withdrawal of the US troops from Afghanistan and the secret talks between Taliban and CIA.

Islamabad lives in a sea of rumours, speculations and conspiracy theories. The diplomats naturally get lost and confused.

Thus the diplomatic focus has always been: how to differentiate solid facts on the ground from the factory of rumours? Well that is the Mother of All Questions!

GPA board meeting held -- Observer

GPA board meeting held
Staff Reporter

Islamabad—The 25th meeting of Gwadar Port Authority (GPA) Board was held here today in the Ministry of Port & Shipping. The meeting was presided over by Chairman, Mr. Muhammad Aslam Hayat of the Authority.

In the meeting general administrative matters pertaining to Gwadar Port Authority were discussed.

It was decided in the meeting that in accordance with the Aghaz-e-Haqooq Balochistan package, all the employees of Grade 1 to 16 of GPA will be hired from amongst the locals. It was further decided that pay and allowances of the GPA Employees will be increased.

The Chairman also announced that for the 24 hours operation and to facilitate 70,000 metric tons mother ships on the port, latest navigation system has been installed at the Port, which will also be functional during night time.

The Chairman further said that the work of dragging has been completed to ensure 14 ½ meters depth before the monsoon season for the smooth functioning of the port.

The government is set to sign an agreement with Iran for importing 100 megawatts (MW) of electricity for Gwadar port within six months, Mir Lashkari Raisani informed the Senate. -- Express

The government is set to sign an agreement with Iran for importing 100 megawatts (MW) of electricity for Gwadar port within six months, Mir Lashkari Raisani informed the Senate.

"The agreement is a breakthrough (enabling us) to import electricity on low tariff," he said. "With our efforts, Iran has agreed to provide electricity (at just) Rs7 per unit. In another agreement of 1,000MW, electricity import can materialise by 2013 as Islamabad and Tehran are negotiating the matter," he explained. JUI-F's Ismail Buledi informed the upper house of parliament that they have also signed an agreement for importing electricity from Iran for the Makran division as well. Initially, Iran would provide 35.7MW to the division from next month, he added. Earlier, there was a dispute on tariff rates as Tehran was offering electricity at Rs13 per unit but Islamabad kept requesting for a reduction in tariff, he explained.

ANP's Ilyas Bilour said army and security agencies are responsible and respectable departments and everyone should give them due regard. "The only way to pay tribute to our motherland is by showing loyalty and devotion," he said.

PCSIR to establish incubation centers soon

ISLAMABAD, Jun 25 (APP): Pakistan Council for Scientific and Industrial Research (PCSIR) will soon establish Technology Business Incubation Centers (TBICs) at Karachi, Lahore and Peshawar for commercialization of production activities. It will also pursue establishment of technical training centers of Gwadar, Balochistan to produce skilled manpower for public and private sectors, organizations and industries. It is pertinent to mention here that an amount of Rs 2 billion has been allocated in Public Sector Development Programme (PSDP) 2011-12, for the projects of Ministry of Science and Technology.

According to official data available, this allocation is almost three times of the last years' revised allocation. Spokesperson PCSIR Irfana Shafiq told APP that they have the aim to develop technologies for high quality black glass, nano particle, bio degradable polymer and Indole Acetic Acid to cater the needs of industrial sectors and leasing out the technologies, developed during 2010-11.

PCSIR has the objective to increase the number of patents, papers, analytical, testing, calibration and consultancy services, she maintained.

The major target of PCSIR involves the utilization of the huge reserves of Thar coal to overcome the energy crisis in Pakistan by converting the coal into liquid fuel in an effective manner to support the economy of the country, she

TCP to import another 50,000 MT urea

Published: June 26, 2011

[Print](#)[Facebook](#)[Digg](#)[StumbleUpon](#)[Text Size](#)

LAHORE (PPI) – The TCP will import another 50,000 metric tons of urea to be used for the coming kharif crop and the Corporation has also awarded tender in this regard.

The Corporation said that the federal government decided to import more urea to ensure its sufficient availability at the right time for the Kharif-2011 amid domestic shortage caused mainly due to gas shortage in the country.

The TCP said that the additional 50,000 MT have been purchased at the lowest price of \$544.73 PMT (C&F) quoted in the tender opened on the 17th June, 2011 and within the validity-period of the bid offered from the second lowest bidder, namely M/s Transammonia Ag, who agreed to match the lowest bid, as allowed by the government in view of the urgency involved. The two lots of 50,000 MT each i.e. 100,000 MT, will be imported through Karachi and Gwadar. Letters of Credit will be established by the TCP early this week to expedite the arrival of 100,000 MT of urea against the two contracts to arrive by the first half of July. Added by the 50,000 MT to be supplied by SABIC during second half of July, 2011, under the Saudi Fund for Development's credit facility, a total of 150,000 MT of imported urea will be added to the national inventory in July.

Iran to Increase Power Supply to Pakistan -- TEHRAN (FNA)

Iran to Increase Power Supply to Pakistan

TEHRAN (FNA)- Iran plans to increase supply of electricity to Pakistan, Iranian Minister of Energy Majid Namjou said.

"Due to Pakistan's dire need to electricity, Iran can supply part of its power surplus to Pakistan," Namjou stated, adding that Iran has 10,000MW electricity surplus during season.

He underlined Iran's preparedness to export electricity to Pakistan once the needed financial resources and the necessary transmission lines are prepared.

The minister said that Iran is constructing a transmission line along its borders with Pakistan to supply 230kw of electricity to the neighboring state, and called on the Pakistani side to take the necessary measures to import Iran's power supply.

In 2008, Iran agreed to export 1,100 megawatt of electricity to Pakistan to help it overcome shortages in areas bordering Iran, especially in Gwadar.

Tehran has suggested establishment of joint venture companies in water and electricity sectors between Iran and Pakistan, and expressed its desire to have a sizable investment in hydroelectric plants in Pakistan.

LONDON, June 30 (APP)- President Asif Ali Zardari Thursday said Britain and Pakistan need to work closely to further enhance their partnership in diverse areas mainly in trade, investment with a view to eliminate militancy and terrorism from his country a -- APP

LONDON, June 30 (APP)- President Asif Ali Zardari Thursday said Britain and Pakistan need to work closely to further enhance their partnership in diverse areas mainly in trade, investment with a view to eliminate militancy and terrorism from his country and promote peace and security of the region and the world. He was speaking to a delegation of British businessmen headed by Mr. Martin Donnelly, Permanent Secretary, UK Department of Business Innovation and Skills (BIS), who called on him this afternoon. Those who attended among others included representatives and CEOs of well known companies and business groups including Standard Chartered, Mott MacDonald, JCB, Shell, Lagan, Mabey Bridge and Bestway.

Briefing the media, spokesperson to the President, Farhatullah Babar said that during the meeting President invited British businessmen to invest in Pakistan's infrastructure projects on build-own-and-operate (BOO) basis, offering to set up special industrial zone in the country where the foreign investors will be provided with tax incentives, captive power and the facilities to export their products.

The President emphasized on trade not aid to create job opportunities for the youth of the country and said that 65 percent of the country's population comprised of young population who looked for jobs and opportunities which had been destroyed by the war on militancy.

A jobless and idle youth is likely to join the ranks of extremists unless he is provided with opportunities that gave him hope for the future, he said.

The President said that he was asking the world community for helping Pakistan recover its shattered economy through opportunities for greater trade and market access and not just aid.

President Zardari gave a futuristic concept of investment during the meeting with British financial and investment giants to help Pakistan overcome its energy shortages through financing and investments in major energy and infrastructure projects.

The President who held wide ranging talks with the delegation to further strengthen the bilateral ties, invited the business and investment houses of United Kingdom to take advantage of the liberal investment regime as well as the investment-friendly environment in Pakistan, with no restrictions on equity and repatriation of capital gains.

President Zardari said Pakistan, with its geo-strategic location and a deep seaport at Gwadar, offers tremendous opportunities of trade and investment.

The President said Pakistan will also welcome British investments in other sectors such as establishment of cold storage as well as grain storage facilities, setting up of agro based industries. Energy sector, Infrastructure development, Agriculture and agro-based industry, Construction technologies, and Health and education.

The Permanent Secretary UK Department of Business Innovation and Skills thanked the President for sharing his vision on business and trade opportunities.

He said that British companies are interested in Pakistan and he would soon be visiting Pakistan with a delegation of businessmen from United Kingdom.

British High Commissioner to Pakistan Sir Adam Thomson, Secretary General Salman Farouqi, High Commissioner Wajid Sahamsul Hassan, Spokesperson Farhatullah Babar and other senior officials were also present in the meeting.

KASHGAR: The Pakistan-China Business Forum was held here aimed at to further enhancing economic integration with emphasis on broadening border trade between the two countries. -- Business Recorder

KASHGAR: The Pakistan-China Business Forum was held here aimed at to further enhancing economic integration with emphasis on broadening border trade between the two countries.

The Forum was largely attended including Commissioner Kashgar Prefecture former Senator and Pakistan Ambassador to China Akram Zaki, Chief Executive Trade Development Authority of Pakistan (TDPA) Tariq Puri and Vice Commissioner Kashghar Prefecture Wang Yongzhi.

"We are so grateful to the Trade Development Authority of Pakistan and the Kashgar Prefecture for organizing this Pakistan-China Business Forum in Kashgar. This city has a special place for Pakistanis", said Ambassador Masood Khan in his opening remarks at the Business Forum on the sidelines of the 5-day Kashgar, Central and South Asia Commodity Fair kicked off on Tuesday.

He said "Today, in this seminar key departments of the Kashgar Prefecture Administration dealing with port management, foreign trade, customs, transit traffic, taxation, banking, and foreign affairs are present.

"So are CCPIT and Chambers of Commerce. There is enthusiastic participation from Pakistan as well. As we see delegations of TDAP, FPCCI, Pakistan-China Business and Investment Council, Institute of Policy Studies, Islamabad Stock Exchange and Pakistani businessmen attending this forum".

He said although the trade between the two countries is growing, however the border trade between Pakistan and China is a small fraction of the overall volume.

He said that even before the formation of the Attabad Lake, the Karakorum Highway was not in a good shape and that is why it was being repaired and upgraded.

"The Attabad Lake disaster has further reduced this trade. We should therefore continue to take remedial measures. Our border trade consists of basic commodities.

"We have a grand vision for creating multiple, trade-transport-energy corridors between Pakistan and China so that this region can be connected to South, West and Central Asia. But, first thing first. We must drain the lake and realign the road", he noted.

He said "We welcome the Chinese Government's policy of Western development under which Kashgar is being built as the Shenzhen of this region. Kashgar is so near the border of Pakistan; in an hour's time, one can fly from Islamabad to Kashgar. Therefore, Pakistan is the most natural and willing participant in this enterprise".

Pakistan, he said too has its own vision of bilateral and regional connectivity which fits into Chinese plans.

"We believe that enhanced road and air links between Pakistan and China, construction of a railroad and fibre optic link, and establishment of oil and gas pipelines will lead to the revival of the Silk Road," the Ambassador noted.

A prefeasibility for a 411 mile rail link between Pakistan's town of Havelian and Khunjerab at a cost of US \$ 10 billion has already been done. In December last year, Rayyan Air, a Pakistani charter airline, inaugurated the first Islamabad-Kashgar 90 minute cargo flight. This sets a new trend for shipment of cargo between Pakistan and China through this region. The commodities shipped by air are also available to Central Asia, he added.

"We are of the view that transit trade of goods and services through Pakistan would greatly reduce logistic costs for its neighbors trading with the Gulf, Africa, Europe

and South Asia. The location of Gwadar, which is 240 miles from the state of Hormuz is important for China and Pakistan. The port is ideally situated for receipts, dispatch, processing of crude oil, gas, and LNG for shipment to Southeast Asia and far East," he said.

He pointed out that Chinese trade from Urumqi, through Gwadar and destined for Dubai and London, can save more than 4,300 miles and several days of transit time. The distance from Dubai to Khunjerab is 3,300 miles and from Dubai to Shanghai via the Indian Ocean is 9,000 miles.

While we talk about the grand vision, we have to work on issues that are businessmen from both sides face on day to day basis.

Right now, he said that the Khunjerab Port does not have adequate screening mechanism and customs officers have to check every truck manually.

"We should also set up integrated border management mechanisms. A first step in this direction could be the establishment of passport and visa offices in Kashgar or near the border towns so that businessmen do not have to travel long distances. We should also proactively provide visa facilitation" Ambassador Khan noted.

Again coming back to the broader vision, he said we must work on the concepts of trans-border and trans-regional economic zones so that China's Western Development Strategy benefits its immediate neighbours particularly Pakistan.

The Forum, he said, therefore, is an excellent initiative to create an interface between the traders, investors, and entrepreneurs of China and Pakistan, Kashgar and Pakistan.

Ambassador Khan said, "Pakistan and China enjoy all-weather and time-tested friendship. The sincerity and depth of this relationship can be captured only by poets or poetic imagery because we say that this relationship is higher than mountains, deeper than oceans, stronger than steel, sweeter than honey, and dearer than eyesight.

"Yes, the Karakorum, the Pamir and the Himalayas bind a knot to join us. Rivers also connect us. But our most lasting bond is based on the mutual trust that we have between our two countries".

He said that we have a good architecture and good instruments for economic and trade cooperation.

The Free Trade Agreements (FTAs) have been signed that cover goods, services and investment.

The macro-economic indicators are improving but they lagged behind strategic cooperation, he added.

He, however said that since 2002, the bilateral trade has quadrupled to US \$ 8.7 billion last year.

He said that the overall year on year growth was 28%, with Pakistani exports increasing by 30% and Chinese exports by 25%. Still Pakistan has a trade deficit of US \$ 6 billion, however a series of measures are being taken to rectify the situation.

These measures, Ambassador Khan said include dispatch of Chinese purchase missions to Pakistan, encouragement of Pakistani traders and trade officials to participate in Chinese fairs and exhibitions, consideration of unilateral trade concessions by China for Pakistan, second phase negotiations for further trade liberalization, establishment of trans-border economic zones, and increase in the number of entry points in China for Pakistan's agriculture produce.

"We have also requested China for assistance in vocational and technical education in the areas of value added textiles, gems and jewelry, surgical instruments, leather

and light engineering" he said adding to promote Chinese private sector in Pakistan, "we have also proposed that the Chinese banks, particularly the China EXIM Bank may accept normal commercial guarantees instead of sovereign guarantees.

Under the next five year plan, we have identified 36 projects which cover education, health care, water conservancy, agriculture, transport, energy, and environment".

He further said that all top corporate Chinese brands have gained experience and exposure in Pakistani market. Pakistan is familiar with the names of China Mobile, Huawei, ZTE, China Harbour, China Construction, Three Gorges, Gezhouba, and Sinohydro.

But there are scores of others who are there in Pakistani market or are keen to enter into it. Today, there are 13,000 Chinese working in 120 enterprises, he noted.

These are good news, he said "but we need to work much, much harder to realize the full potential of Pakistan-China economic cooperation, which is immense by any standard".

Pakistan-China Business Forum to help expanding land trade

Ambassador Khan -- APP

Pakistan-China Business Forum to help expanding land trade Ambassador Khan KASHGAR, July 1 (APP)

The Pakistan-China Business Forum was held here aimed at to further enhancing economic integration with emphasis on broadening border trade between the two countries. The Forum was largely attended including Commissioner Kashgar Prefecture former Senator and Pakistan Ambassador to China Akram Zaki, Chief Executive Trade Development Authority of Pakistan (TDPA) Tariq Puri and Vice Commissioner Kashghar Prefecture Wang Yongzhi. "We are so grateful to the Trade Development Authority of Pakistan and the Kashgar Prefecture for organizing this Pakistan-China Business Forum in Kashgar. This city has a special place for Pakistanis", said Ambassador Masood Khan in his opening remarks at the Business Forum on the sidelines of the 5-day Kashgar, Central and South Asia Commodity Fair kicked off on Tuesday.

He said "Today, in this seminar key departments of the Kashgar Prefecture Administration dealing with port management, foreign trade, customs, transit traffic, taxation, banking, and foreign affairs are present.

"So are CCPIT and Chambers of Commerce. There is enthusiastic participation from Pakistan as well. As we see delegations of TDAP, FPCCI, Pakistan-China Business and Investment Council, Institute of Policy Studies, Islamabad Stock Exchange and Pakistani businessmen attending this forum".

He said although the trade between the two countries is growing, however the border trade between Pakistan and China is a small fraction of the overall volume. He said that even before the formation of the Attabad Lake, the Karakorum Highway was not in a good shape and that is why it was being repaired and upgraded.

"The Attabad Lake disaster has further reduced this trade. We should therefore continue to take remedial measures. Our border trade consists of basic commodities.

"We have a grand vision for creating multiple, trade-transport -energy corridors between Pakistan and China so that this region can be connected to South, West and Central Asia. But, first thing first. We must drain the lake and realign the road", he noted.

He said "We welcome the Chinese Government's policy of Western development under which Kashgar is being built as the Shenzhen of this region. Kashgar is so near the border of Pakistan; in an hour's time, one can fly from Islamabad to Kashgar. Therefore, Pakistan is the most natural and willing participant in this enterprise".

Pakistan, he said too has its own vision of bilateral and regional connectivity which fits into Chinese plans.

"We believe that enhanced road and air links between Pakistan and China, construction of a railroad and fibre optic link, and establishment of oil and gas pipelines will lead to the revival of the Silk Road," the Ambassador noted. A prefeasibility for a 411 mile rail link between Pakistan's town of Havelian and Khunjerab at a cost of US \$ 10 billion has already been done. In December last year, Rayyan Air, a Pakistani charter airline, inaugurated the first Islamabad-Kashgar 90 minute cargo flight. This sets a new trend for shipment of cargo between Pakistan and China through this region. The commodities shipped by air are also available to Central Asia, he added.

"We are of the view that transit trade of goods and services through Pakistan would greatly reduce logistic costs for its neighbors trading with the Gulf, Africa, Europe and South Asia. The location of Gwadar, which is 240 miles from the state of Hormuz is important for China and Pakistan. The port is ideally situated for receipts, dispatch, processing of crude oil, gas, and LNG for shipment to Southeast Asia and far East," he said.

He pointed out that Chinese trade from Urumqi, through Gwadar and destined for Dubai and London, can save more than 4,300 miles and several days of transit time. The distance from Dubai to Khunjerab is 3,300 miles and from Dubai to Shanghai via the Indian Ocean is 9,000 miles.

While we talk about the grand vision, we have to work on issues that are businessmen from both sides face on day to day basis.

Right now, he said that the Khunjerab Port does not have adequate screening mechanism and customs officers have to check every truck manually.

"We should also set up integrated border management mechanisms. A first step in this direction could be the establishment of passport and visa offices in Kashgar or near the border towns so that businessmen do not have to travel long distances. We should also proactively provide visa facilitation" Ambassador Khan noted. Again coming back to the broader vision, he said we must work on the concepts of trans-border and trans-regional economic zones so that China's Western Development Strategy benefits its immediate neighbours particularly Pakistan.

The Forum, he said, therefore, is an excellent initiative to create an interface between the traders, investors, and entrepreneurs of China and Pakistan, Kashgar and Pakistan.

Ambassador Khan said, "Pakistan and China enjoy all-weather and time-tested friendship. The sincerity and depth of this relationship can be captured only by poets or poetic imagery because we say that this relationship is higher than mountains, deeper than oceans, stronger than steel, sweeter than honey, and dearer than eyesight.

"Yes, the Karakorum, the Pamir and the Himalayas bind a knot to join us. Rivers also connect us. But our most lasting bond is based on the mutual trust that we have between our two countries".

He said that we have a good architecture and good instruments for economic and trade cooperation. The Free Trade Agreements (FTAs) have been signed that cover goods, services and investment. The macro-economic indicators are improving but they lagged behind strategic cooperation, he added. He, however said that since 2002, the bilateral trade has quadrupled to US \$ 8.7 billion last year.

He said that the overall year on year growth was 28%, with Pakistani exports

increasing by 30% and Chinese exports by 25%. Still Pakistan has a trade deficit of US \$ 6 billion, however a series of measures are being taken to rectify the situation. These measures, Ambassador Khan said include dispatch of Chinese purchase missions to Pakistan, encouragement of Pakistani traders and trade officials to participate in Chinese fairs and exhibitions, consideration of unilateral trade concessions by China for Pakistan, second phase negotiations for further trade liberalization, establishment of trans-border economic zones, and increase in the number of entry points in China for Pakistan's agriculture produce.

"We have also requested China for assistance in vocational and technical education in the areas of value added textiles, gems and jewelry, surgical instruments, leather and light engineering" he said adding to promote Chinese private sector in Pakistan, "we have also proposed that the Chinese banks, particularly the China EXIM Bank may accept normal commercial guarantees instead of sovereign guarantees.

NHA completes two Asian Bank-funded projects -- The News

NHA completes two Asian Bank-funded projects

our correspondent

Saturday, July 09, 2011

Share ISLAMABAD: Asian Development Bank is funding highway projects costing \$1.834 billion, out of which Hub-Uthal project and Muslim Bagh-Qila Saifullah project in Balochistan have been completed at a cost of Rs3.032 billion and Rs1.647 billion, respectively.

Presiding over a high-level meeting in which matters related to National Trade Corridor (NTC) and ADB-funded projects were reviewed, Chairman NHA Syed Muhammad Ali Gardezi said that all available resources need to be utilised in an efficient manner to ensure timely and quality completion of the projects.

Pakistan's location can turn it into a regional trade hub, he added.

The chairman was told that work on 231-km Qalat-Quetta-Chaman Road, Qila Saifullah-Zhob Road, Waigum Rud-Khajuri Road, DI Khan-Sarai Gambella Road, Alpuri-Besham Road and Sukhur-Jacobabad Road projects is in progress.

The chairman was told that Asian Development Bank has also shown interest to provide further funds for upcoming NHA projects including Zhob-Mughal Kot, Qila Saifullah-Loralai-Waigum Rud, Lakpass-Noshki, Quetta Dhader and Tarnol-Fateh Jang projects, said an official statement of the NHA.

The chairman was told that in order to promote domestic commercial activity and facilitate regional transit trade, NHA has undertaken gigantic project of National Trade Corridor, which will connect NHA network with ports of Karachi and Gwadar.

This project comprises 18 components with total length of 3800 km and will cost Rs366 billion, said the statement.

National Trade Corridor, once completed, will reduce 50 percent travel time, 10 percent transportation cost and will also result in decreasing the road fatalities by 50 percent.

He was told that work on 241-km Multan-Faisalabad Motorway and 109-km Hassanabdal-Havelian Road, which are part of National Trade Corridor, will soon start. The estimated cost of the projects is Rs33 billion and Rs55 billion, respectively, it added.

Korean companies to invest in Pak power sector -- Observer

Korean companies to invest in Pak power sector

Salim Ahmed

Share

Lahore—South Korean Ambassador in Pakistan Choongjoo Choi has said that Korean companies is all set to make investment in Pakistan's power sector.

He said this while speaking at the Lahore Chamber of Commerce and Industry on Wednesday. LCCI President Shahzad Ali Malik, Senior Vice President Sheikh Mohammad Arshad, Vice President Sohail Azhar, former Presidents Shahzada Alam Monoo, Iftikhar Ali Malik, Executive committee members Mian Zahid Javaid, Khwaja Khawar Rashid, Tahir M Sheikh, Fahimur Rehman Sehgal, Chaudhry Wajid Ali and Chairman Skill Development Council Rehmatullah Javed also spoke on the occasion.

The Ambassador said that more and more Korean companies are showing their interest for investment in energy sector to help Pakistan overcome the acute energy shortage it has been facing for long. He said that Korea's trade with India stands at \$16 billion which will be doubled in a few years; it is \$1 billion a day with China while bilateral trade with Pakistan is mere \$1.1 billion. He, However, expressed the optimism that the volume of trade between Pakistan and South Korea was bound to increase as both the governments and the private sector, in the two countries, are taking measures to get the desired results.

He said that the non-availability of required trade-related information was the biggest hurdle in the way of South Korean investment in Pakistan.

The diplomat while identifying a number of areas for mutual cooperation said that there was a need for expertise-sharing as both the countries have a lot to learn from each other. He said that there is a big potential in SME sector therefore Pakistani business community could avail opportunities in this particular area.

While calling for measures to jack-up bilateral trade and increase in Korean investment in Pakistan, the LCCI President Shahzad Ali Malik said that Pakistan is a large market, its strategic location as principal gateway to the Central Asian States and other regional countries offer lot of opportunities for relocation of Korean Industries in Pakistan.

"We take pride in the fact that Korea has been an important trading country for Pakistan in Eastern Asian region followed by Japan in terms of size of bilateral trade. We are glad to have Korea as a Friend of Democratic Pakistan too."

Shahzad Ali Malik said that both the countries have decades old economic relations and experienced good results of joint ventures in various fields like telecommunication, electronics chemical industry and automobiles industry. Korean companies are also actively participating in infrastructure projects like highway construction, power generation etc.

It is really great to achieve a landmark by expanding the two way trade to over one billion dollars in 2010 which was precisely recorded to the tune of USD 1,018.5 million. It showed great improvement from USD 865.2 million in the corresponding year courtesy to significant increase both in imports and exports between the two countries.

Trade balance has traditionally not been in favour of Pakistan and currently it stands at US\$-459.7 million. But the good thing is that Pakistan's exports to Korea are showing continuous upturn from the last few years like it grew from USD 208 million to USD 279 million from 2008 to 2010.

The LCCI President said that it is the high time that we should shift our emphasis to attract Foreign Direct Investment from European to Asian countries. At present, Korean companies are well settled in Pakistan and it provides good grounds to other Korean investors to venture in Pakistan as it offers a lot of potential areas. With the consultation and involvement of public and private sector organizations, further items for trading purposes can be identified which can be traded between two countries at much competitive prices.

He suggested that to create a win-win situation for both the countries, Koreans need to increase their imports of cotton, raw hides & skins, fish, medical apparatus,

toys & games, leather products, articles of apparels and textile articles from Pakistan. Most of the Korean demand for these commodities is being met by Korea from sources other than Pakistan and only a small fragment is being imported from Pakistan. A little attention by the Korean Government and businessmen can increase Pakistan's exports to Korea considerably.

Iran to Start Pumping Gas to Pakistan Next Year -- TEHRAN (FNA)-
Iran to Start Pumping Gas to Pakistan Next Year

TEHRAN (FNA)- Tehran's Envoy to Islamabad Mashallah Shakeri announced that Iran would start pumping gas to Pakistan as early as next year.

"If desired, Pakistan can connect with the pipeline next year," the ambassador added.

He said the Iranian government has constructed the pipeline on war footing just to facilitate Pakistan.

Shakeri, who is in his fifth year as Tehran's envoy to Islamabad, said that his country is earnestly and sincerely desirous of providing gas to Pakistan.

Islamabad has also announced earlier this year that it has intensified work on the multi-billion-dollar pipeline project which is due to bring Iran's gas to Pakistan, Pakistani media reports said on Sunday.

Work on Iran-Pak Gas Pipeline is quickly progressing and the National Engineering Services Pakistan (Nespak) signed an agreement with a German Company to place the pipeline, the reports said in April.

Speaking at a conference on "Challenges Faced by Industries in the country: Remedies and Future Prospects for Industrialization", Sui Southern Gas Company (SSGC) Managing Director Dr Faizullah Abbasi stated in April that approximately 1750mn cubic feet (mcf) of gas will be brought through this pipeline.

In a major breakthrough on March 20, 2009, the Pakistani government approved Iran's proposed pricing formula for gas supplies to the South Asian nation.

Subsequently, Tehran and Islamabad signed a final agreement to launch implementation of the project.

Tehran and Islamabad also sealed a final contract for the start of Iran's gas exports to Pakistan through the multi-billion-dollar pipeline in spring 2014.

The last annex of the agreement for export of Iran's gas to Pakistan was signed on June 13 by Iranian Oil Minister Massoud Mir-Kazsemi and Managing Director of Pakistan's Inter-State Gas Company Naeem Sharafat in a meeting also attended by the Iranian oil ministry's representative in gas talks with Pakistan Seyed Reza Kassayeezadeh.

The 2700-kilometer long pipeline was to supply gas for Pakistan and India which are suffering a lack of energy sources, but India has evaded talks. Last year Iran and Pakistan declared they would finalize the agreement bilaterally if India continued to be absent in the meetings.

According to the project proposal, the pipeline will begin from Iran's Assalouyeh Energy Zone in the south and stretch over 1,100 km through Iran. In Pakistan, it will pass through Baluchistan and Sindh but officials now say the route may be changed if China agrees to the project.

The gas will be supplied from the South Pars field. The initial capacity of the pipeline will be 22 billion cubic meters of natural gas per annum, which is expected to be later raised to 55 billion cubic meters. It is expected to cost \$7.4 billion.

10,000MW Pakistan, China friendshipBy Shoaib Ahmed | From the Newspaper -- Daily Dawn

10,000MW Pakistan, China friendshipBy Shoaib Ahmed | From the Newspaper July 11, 2011 (4 weeks ago)China will help Pakistan generate 10,000 megawatt (MW) through different projects, said Wang Shaofeng, the director general of Three Gorges Project Corporation. The corporation has built the world's biggest hydropower-complex project 'Three Gorges'.

At a briefing to Pakistani reporters visiting China on the invitation of Radio China International on Sunday, Mr Shaofeng said under China-Pakistan collaboration, a number of Chinese experts were working in Pakistan on scores of power projects.

He said solar energy projects had also been initiated in Pakistan by China and a 720MW Kohala project would be completed at the cost of \$2 billion. The director said the Kohala project should have been approved in May 2009 by the Economic Coordination Committee but "We were told that due to negative propaganda by the media it got delayed for two years".

He said the Three Gorges Project now belonged to the world but Pakistan being the close friend of China would be given priority to resolve its energy crisis.

"If the Pak-Chinese friendship does not turn into an economic friendship, I think it is of no good," said Mr Shaofeng.

He said China was interested in investing Pakistan and a number of agreements had been signed between the two sides.

Sha Xianhua, vice president of the corporation, said China would always encourage investment in Pakistan in projects.

The delegation visited the site of Three Gorges. The project covers 3,800 kilometres on the River Yangtze. Its power generation capacity is 22,500 MW and transmits power to 11 provinces. One of the major purposes of the project was to safe China from floods. The other purposes of the project were to protect environment, agriculture and horticulture sectors.

[Translations Email to a friend](#)

[Print this page](#)

Zip-Pak, the global leader in brand-enhancing resealable packaging, showcases its innovative Zip360™ Resealable Technology and Package Realization Team™ at ProPak China 2011.

Zip360™ features a wide-mouth opening that allows consumers of snack mixes, frozen chicken, cookies and crackers, and pet food and treats to easily access and scoop contents. Zip360™ also enables pour-spout functionality, a benefit ideal for cereal, frozen food and vegetable applications.

The package style also enables graphics to be printed around the entire surface area of the pouch to maximize point-of-purchase impact whilst maintaining product freshness. Like other Zip-Pak resealable solutions, Zip360™ eliminates the need to transfer contents into a separate container, keeping marketing messages in front of the consumer from initial purchase to last use.

"Zip360™ has been well received in the North American and European markets," said Tracy Wang, Business Development Manager, Zip-Pak China, "With increasing demand for convenience by Chinese consumers, Zip360™ will prove to be a great solution for Chinese brand owners who wish to enhance or promote their brand and differentiate their products."

In May 2011, Zip-Pak introduced the Package Realization Team™, a new approach that will help brand-owners transition from existing package styles to consumer-preferred resealable flexible formats. For each unique project, a team is assembled to consult with consumer product goods (CPG) companies and retailers on how to implement cost-effective and efficient resealable closure solutions. Team configurations vary according to project needs, but may include representatives from sales, marketing, product development, operations, machinery and technical service.

Chinese manufacturers are also expected to benefit from the lower costs brought about by Zip-Pak's recently established Guangzhou factory.

At this year's ProPak China, Zip-Pak will also showcase a simple and economical resealable solution: Reseal 360 Series Crossweb Zip Applicator. This well-designed and easy-to-use applicator adds resealable functionality to a range of machines including horizontal flow wrappers, vertical form fill seal machines and bag making machines.

Zip-Pak also carries a range of time- and market-proven resealable technologies, including the ZIP-PAK® SLIDER™, which is ergonomically designed for the easy opening and closing of packages for consumers of any age.

**China-Punjab MTT project to benefit both sides: Shahbaz --
PAK-CHINA MAGAZINE**

China-Punjab MTT project to benefit both sides: Shahbaz

Lahore, 16: Mian Muhammad Shahbaz Sharif, Chief Minister Punjab has said that Mass Transit Trade Project between China and Punjab government would not only benefit the two sides but would also further strengthen the ties between the two countries.

Talking to media persons on the occasion of signing of Memorandum of Understanding (MoU) between China and Punjab government Mian Shahbaz Sharif said that China has played a role of real and time tested friend and it always extended help to Pakistan in hard and difficult times.

He said that he has no words to express thanks to the Chinese leadership for their cooperation with Pakistan especially Punjab government in different sectors.

The Chief Minister said that throughout sixty three year history of Pak-China friendship, Beijing has played a leading role in development of Pakistan in various sectors including communication and energy generation.

Shahbaz Sharif said that agreement between Pakistan and China on Mass Transit Project has been finalized and a team of Chinese experts was already in Pakistan to survey the different aspects of the project.

He said that the said project would be initiated on August 14, and would be completed in cooperation with Chinese company.

The Chief Minister said that Mass Transit Project is gift from Chinese government for countrymen in general and people of Punjab in particular as Chinese company would complete the project on no profit, no loss basis.

Talking about the steps taken for the welfare of the people of the province, Shahbaz Sharif said that masses gave us mandate to serve them. We would let no stone unturned to facilitate them with basic necessities of life, he added.

Zardari proposes Islamabad-Tehran currency swap accord -- The News Zardari proposes Islamabad-Tehran currency swap accord

Sunday, July 17, 2011

TEHRAN: President Asif Ali Zardari on Saturday proposed a currency swap agreement between Pakistan and Iran to further strengthen bilateral trade and economic ties between the two brotherly countries.

He made this proposal in his meeting with Iranian President Mahmoud Ahmadinejad here. President Zardari said Pakistan was already in the dialogue process with Turkey, Sri Lanka and China for the currency swap arrangement.

President Zardari, who arrived in the Iranian capital on a daylong visit on the invitation of the Iranian leadership, held two rounds of talks with President Ahmadinejad - first the delegation level talks and then a one-to-one meeting.

The two leaders agreed on adopting a regional approach to address the growing challenge of extremism and militancy. They expressed the confidence that joint efforts would prove helpful in countering terrorism.

President Zardari mentioned the long drawn fight against militancy and stressed the need for long-term measures and joint efforts to eliminate this menace. Interior Minister Rehman Malik, Water and Power Minister Syed Naveed Qamar, Petroleum Minister Dr Asim Hussain and Presidential Spokesman Farhatullah Babar also accompanied the president.

Farhatullah Babar, while briefing the media, said President Zardari held wide-ranging talks with President Ahmadinejad with focus on establishing a comprehensive strategic and economic partnership between the two countries.

They expressed their resolve to upgrade and further intensify their existing bilateral ties, particularly in the fields of energy, trade and economy for the mutual benefit of two brotherly countries.

President Zardari lauded Iran's constructive engagement in the trilateral process and in this respect mentioned the last month's Pakistan-Iran-Afghanistan Trilateral Summit hosted by Tehran.

President Zardari proposed that the Iranian government consider creating an Integrated Border Management Regime between Pakistan and Iran. He said Pakistan and Iran had vital interests in the stability and peace of the region. President Zardari mentioned the growing problem of narcotics and human trafficking in the region, which he said, required mutual coordination among the governments.

Zardari and his Iranian counterpart also discussed cooperation in the energy sector with particular reference to the Iran-Pakistan (IP) gas pipeline project besides supply of power from Iran to Balochistan.

President Zardari said Pakistan and Iran had the potential to undertake joint economic projects in Afghanistan in order to enhance connectivity, build infrastructure, rail and road links as well as trilateral cooperation in other mega projects. The Iranian president also agreed on taking full advantage of geo-strategic locations for ushering in a new era of development in the two countries in particular, and in the whole region.

President Zardari said considerable work had been done on the Iran-Pakistan gas pipeline project and it was important now to move towards its implementation phase. He said there was a need to bring about a quantitative increase in Pak-Iran bilateral trade to at least four billion dollars in the next few years that at present was one billion dollars.

He called for working together to identify impediments to full implementation of Pak-Iran Preferential Trade Agreement concluded in 2006. About situation in Afghanistan, President Zardari said Pakistan supported the process initiated by President Hamid Karzai for national reconciliation and peace in Afghanistan.

He said Pakistan supported a reconciliation process, which must be Afghan-led and Afghan-owned, adding Pakistan was ready to provide all possible assistance in capacity building of Afghan institutions.

Iranian President Ahmadinejad appreciated the role Pakistan was playing in the promotion of regional stability and peace. Separately, President Asif Ali Zardari called on the Supreme Leader of Iran, Ayatollah Sayed Ali Khamenei, and discussed bilateral relations, stressing the need for further strengthening them in all areas.

President Zardari and the Iranian supreme leader exchanged views on bilateral, regional and global issues of concern, besides the fight against militancy. Ayatollah Khamenei and President Zardari discussed the situation in Afghanistan with particular reference to the gradual withdrawal of US forces.

President Zardari had earlier met the Iranian supreme leader in June, when he visited Tehran to attend the international conference on the fight against terrorism. Presidential Spokesman Farhatullah Babar, while briefing the media persons, said Iran's Supreme leader and President Zardari agreed on the need for further widening the scope of relations to encompass all spheres of interaction.

Openness in South Asia can reduce trust deficit: Prime Minister

Government's re-lending policy to be revised

ISLAMABAD: The federal government here on Tuesday decided to facilitate and implement the long awaiting liquefied natural gas (LNG) import project and announced to establish a task force under the convenorship of Petroleum Secretary Ejaz Chaudhry for implementation of project on fast track basis.

The decision was taken in a high-level meeting under the chairmanship of Federal Minister for Petroleum and Natural Resources Senator Dr Asim Hussain to review the current status of the LNG project.

The federal minister gave assurance in the meeting to facilitate and provide equal opportunities to LNG suppliers, adding that the Ministry of Petroleum and Natural Resources would ensure the provision of a level-playing field.

It was decided to establish a task force headed by the Chaudhry, as part of the government's incentive in the LNG Policy 2006 (Clause 7.4) and to facilitate the implementation of LNG import projects.

Other members of the task force would be additional secretary of finance, defence, industries, production, ports and shipping divisions, a representative of Oil and Gas Regulatory Authority, member customs Federal Board of Revenue, chairman of the concerned seaport authority, director generals of the concerned EPA, Coast Guards and Maritime Security Agency and Commander Karachi or COMCOAST Gwadar. This task force will act as a 'one-stop-shop' to address all issues concerning LNG import projects, including the interpretation of policies and regulations.

Another decision was taken in the meeting to facilitate LNG importers under one window operation and comprehensive facilities would be provided. First come first serve principle will be adopted and bidders be allowed to participate in partnerships.

Successful bidders would have to find LNG buyers by themselves, however, the government will provide facilitation in this regard and the bidders would have exclusivity.

Issues relating to pipeline system, pricing and minimisation of wastage were also discussed in the meeting.

It may be recalled that Sui Southern Gas Company (SSGC) has received tremendous interest from local and international suppliers in response to its invitation for the import of LNG under third party access, having received 17 Expressions of Interest for the allocation of capacity under its transmission system from leading companies interested in developing their own LNG floating storage

July 20, 2011 Continued

Wed

and re-gasification unit, arrange their own supply of LNG and having their own buyers of re-gasified LNG, which also may include the sui companies.

45,550 MT urea arrives at Gwadar -- The Nation

45,550 MT urea arrives at Gwadar

Published: July 25, 2011

Our Staff Reporter

KARACHI - Ship MV Pu Tou Hai carrying 45,550 metric tons of imported Urea has arrived and berthed at Gwadar Port on Sunday. The discharge of the cargo has also commenced.

Two more vessels MV Apostolos-II carrying 25,000 MT and MV Hai Yu carrying 26,200 MT urea are scheduled to arrive Gwadar Port and Port Qasim on 26th and 28th July, 2011, respectively, said a press release in TCP.

The Shipment arrived by MV Pu Tou Hai and the urea carrying by MV Hai Yu is in response to Trading Corporation of Pakistan (TCP) tender awarded to M/s. Transammonia AG, Switzer and M/s. Multicommerce LLC, USA. Whereas, the third vessel MV Apostolos-II is carrying the balance quantity of imported urea committed by M/s. Sabic to be supplied during July, 2011 under the Saudi Fund for Development credit facility.

In nutshell, a quantity of 125,000 MT would arrive against the total import of Urea lined-up by TCP. The transportation of imported Urea from the ports and its subsequent marketing will be handled by M/s. National Fertilizer Marketing Limited (NFML).

Rs 59bn allocated for transport & communication sector -- Daily Times

Rs 59bn allocated for transport & communication sector

By Ijaz Kakakhel

ISLAMABAD: To put transport sector on modern line and improve regional connectivity links to the Central Asian States, Iran, Afghanistan and India, the government—under a development programme—has allocated Rs 59.7 billion for transport and communications sector.

The allocated amount includes Rs 23.7 billion for the budgetary programme and Rs 36 billion for NHA under the budgetary corporations programme. Most of sub sectoral allocations for 2011-12 are for ongoing works.

Transport and communications strategy: The Transport Development Programme 2011-12 would be based on a broad strategy that will include establishment of a multi-modal transport system.

An integrated and holistic approach would be adopted for making transport system more productive, efficient and reliable, which may lower the transport costs and enhance the productivity of the economy. Strategic emphasis will be made to improve transport planning, prioritisation and rationalising public sector expenditure, mobilise resources from users and the private sector and explore institutional governance reforms.

The government also aims to revitalise the railways system by transforming it into a commercially-oriented entity, while retaining the railways network in public ownership, develop port infrastructure and rationalisation of port charges to cater to transshipment through the landlord port concept with enhanced private sector participation.

A policy and regulatory framework for private sector participation in National Highways would be adopted in consultation with different stakeholders to facilitate investment and increase efficiency.

An allocation of Rs 39 billion has been proposed for the National Highways Authority. Among the ongoing projects, works will continue on the projects for acquisition of land and property compensation for construction of 184 km Faisalabad-Khanewal Expressway E-4 & 103 km Khanewal-Lodhran Expressway E-5 and construction of Ratodero-Daddu-Sehwan ACW (E-6B) (200 km), Peshawar Northern Bypass (34 km), Khuzdar-Shahdadt-Kot-Ratodero (Khor-Quba Saeed Khan 143 km) (M-8), Hoshab-NagBasima-Surab Road (N-85) [459], Hassanabdal-Havelian-Manshera Expressway (Land Acquisition, and many others.

Pakistan Railways: A major step under the NTC initiative is the restructuring of Pakistan Railways (PR) on commercial lines. The PR would be eventually converted into a corporation. The PR corporatisation would aim to run railway as state-owned corporation on a commercial basis and fully meet its statutory commitment.

The corporatisation would also allow PR to implement organisational and financial restructuring. It would be run by professionals; have a restructured board and Public Private Partnership (PPP) would bring both efficiency and investment.

Freight Business Units (FBU) already established would be made more autonomous eventually leading to formation of a freight company. The PR shall adopt track access policy.

Under the policy: PR shall manage the track and allow commercial operators / freight companies in private sector. Freight trains will run on PR's network with their own rolling stock under a contract with PR to purchase track access.

Other areas involving private sector would include dry ports, locomotive

maintenance and passenger ticketing and provision of services through management contracts, e.g. door to door service through cargo express train operations by private freight forwarders on main trunk routes. An allocation of Rs 15 billion has been proposed for 2011-12. Works on track rehabilitation of PR network, procurement / manufacture of 114 DE locomotives, procurement/ manufacture of 625 passenger coaches, procurement of 2130 bogie high capacity wagons, 202 passenger coaches, rehabilitation of 450 passenger coaches, doubling of track on Lodhran-Raiwind sections,

Ports and Shipping: Under this sector, work on Ports Master Plan for Pakistan's three ports would continue which, after completion would establish the role / basis for the responsibilities of each port with a view to optimal / efficient use of port infrastructure either through competition among ports or by way of specialisation of the port. Both KPT and PQA Acts will be reviewed to acquire more operational and financial autonomy.

The Business Plans of each of the three ports would be completed. A project monitoring unit which has been established within the Ministry of Ports and Shipping will undertake a study to identify the existing bottlenecks in efficient operation of ports and recommend phase-wise improvements required at the ports. Outsourcing of container and other terminals at the ports is also planned. Land acquisition process for free zone at Gwadar will also be initiated.

Ship begins discharging urea at Gwadar Port -- The News

Ship begins discharging urea at Gwadar Port

By our correspondent

KARACHI: The ship MV Pu Tou Hai berthed at Gwadar Port has started discharging the imported urea, said Trading Corporation of Pakistan on Monday. "The ship carrying 45,550 tons of urea arrived at the port on Sunday," said TCP in a statement. It said that two more vessels, carrying urea for the current Kharif season, are expected to arrive at the country's ports this week. "MV Apostolos-II, carrying 25,000 tons urea, will reach Gwadar Port on Tuesday. And MV Hai Yu, carrying 26,200 ton urea, is scheduled to arrive at Port Qasim on July 28." The urea brought by MV Pu Tou Hai and the urea being brought by MV Hai Yu is in response to TCP's tenders awarded to Transammonia AG, Switzer and Multicommerce LLC, USA.

Prime Minister Yousaf Raza Gilani has approved funds of \$90 million for the reconstruction of a portion of Karakoram Highway (KKH) --

Published in The Express Tribune,

ISLAMABAD:

Prime Minister Yousaf Raza Gilani has approved funds of \$90 million for the reconstruction of a portion of Karakoram Highway (KKH) that was submerged by massive landslides in Gilgit-Baltistan (G-B) early last year. The credit to repair the strategic highway has been provided by the Chinese government as part of a larger grant for flood reconstruction activities in communication, energy and transport sectors.

According to a handout statement issued by the premier's media office here on Thursday, Gilani has ordered the authorities in the communication ministry to complete the project as soon as possible. Reconstruction of KKH has been a major priority of the government with the route being of immense strategic significance as well as serving as a historic trade link between the two countries.

Several kilometres of the highway that links Pakistan's northwest with neighboring China were totally submerged when flooding, triggered by massive landslides in Attabad area of Gilgit-Baltistan, created an artificial lake. Thousands of people were rendered homeless and the only road leading to the Sust border region of China was completely devastated.

Since then, Pakistani authorities have been struggling to settle displaced people and reconstruct the highway through their own financial resources. As a consequence, the Chinese government has come forward with technical and financial facilities to repair the road – the most viable land route for the country, through which its industrial products reach the global market via sea ports in Pakistan. Pakistani leadership has asserted that reconstruction of the road would benefit both countries enabling resumption of vital trade links which had been suspended for more than a year. However, it cannot be confirmed as yet whether the National Highway Authority (NHA) alone would be executing the project or some foreign company would be included in the reconstruction effort too.

China to give squadron of J10-B fighters to Pak -- Zee News

China to give squadron of J10-B fighters to Pak

Pakistan Islamabad: China will give Pakistan a squadron of the advanced J-10B multi-role, all-weather fighter aircraft in a bid to boost the strategic reach of its close ally, a media report has said.

China has made the offer to Pakistan Army's Chief of General Staff, Lt Gen Waheed Arshad, who has just concluded a week long visit to China, the Pakistani Urdu daily Jang said.

Pakistan will be the first country, after China, to have such advanced aircraft which are equipped with the latest weapons, it said.

During Arshad's visit, China reiterated its defence and economic support to Pakistan and assured him that the relationship between the two countries will reach new heights and Beijing's efforts for the safety and security of "all weather" ally will be never-ending.

Lt Gen Arshad visited many sensitive places in China and called on General Ma Xiaotian, deputy chief of general staff of People's Liberation Army and other officials including Lt General Ren Haiquan, the vice president of the National Defence University.

Though China has earlier supplied Pakistan with fighter jets, this is the first time that it is supplying advanced jets to Pakistan.

China and Pakistan have also jointly built an advanced fighter jet, JF-17, commonly known as 'Thunder'

Pak-China Joint Energy Working Group (JEWG) -- The Nation

ISLAMABAD - Pak-China Joint Energy Working Group (JEWG) will discuss nineteen energy projects in order to enhance cooperation in energy sector between the two countries and to meet Pakistan's future energy, water and power requirements.

The first meeting of JEWG will be held in Beijing (China) on 1-2 August, 2011. Federal Minister for Water and Power Syed Naveed Qamar, who is chairman of the JEWG from Pakistan side, will lead the Pakistani delegation for this important inaugural session. The Pakistani delegation, out of 19 projects, will discuss four power generation projects of about 2297MW, one coal power project of 405MW, one project for development of infrastructure and mining and power generation of Thar coal, four projects of small and medium dams and five projects of transmission lines and power distribution. One project of alternative energy and two projects of geological survey of Pakistan seeking technical assistance, financing and Engineering Procurement Contract would also be discussed. All the power generation projects will be completed within three to five years. Pakistan will also take up Iran-Pakistan gas pipeline project.

Naveed Qamar has said that through the JEWG, Chinese government, companies, investors and entrepreneurs will be invited and encouraged to participate in various initiatives of the Government of Pakistan undertaken for the development of power sector. The government will facilitate and provide incentives to the Chinese for investment in the water, power, and other energy sector projects. The government has always encouraged and welcomed participation of Chinese entrepreneurs, business houses and investors to participate in the development of all sectors of our economy including the power sector.

The government is fully committed to resolving the prevalent energy shortages in the country and achieving energy security objectives on sustainable basis, he added. He expressed with hope that his visit to Beijing to lead JEWG will be fruitful and the country will get more cooperation from China in the energy sector. Qamar will reach Beijing on Sunday to attend JEWG to be held on 1-2 August.

An Energy Working Group was constituted pursuant to an MoU between Pakistan and China to promote cooperation in the field of energy. Under the MoU, which was proposed by National Energy Administration of China to establish bilateral energy cooperation mechanism, the Energy Working Group was assigned the task of carrying out cooperation in the areas including oil and gas, coal, conventional power, nuclear and renewable energy etc.

Moreover, during the visit of the Chinese Premier Wen Jiabao in December 2010, under Energy Cooperation mechanism, it was decided that China will provide financing and cooperation for conventional, renewable and civil nuclear energy projects, to be identified by Pakistan.

China likely to get Iran-Pakistan pipeline contract Monday, 01 August 2011 00:50 -- The Peninsula

China likely to get Iran-Pakistan pipeline contract Monday, 01 August 2011 00:50

ISLAMABAD: As Russia and China vie with each other to win the construction contract for the Iran-Pakistan gas pipeline project, Pakistan is expected to finalise an engineering and procurement deal with Beijing, which may also provide financing in line with the growing energy cooperation between the two sides.

Domestic gas utilities - Sui Southern Gas Company (SSGC) and Sui Northern Gas Pipelines Limited (SNGPL) - are also lobbying to grab the engineering, procurement and construction contract for the pipeline, which will bring in much-needed gas from Iran's South Pars gas field.

Germany-based consultancy firm ILF is conducting a route survey for the \$1.25bn Pakistani portion of the pipeline and will soon be completing its work, after which the engineering contract will be awarded. SSGC and SNGPL had also wanted a share in the consultancy contract with ILF, which resulted in a delay in completing the survey, sources said.

ILF, which got the contract for \$55 million, is working in collaboration with National Engineering Services of Pakistan (Nespak).

"A major part of the survey for laying the pipeline from Iranian border to Nawabshah has been completed and the remaining part will be finished by August 2," an official said.

During Musharraf's rule, the government had floated a proposal, asking China to import Indian share of the gas pipeline after Delhi pulled out of the project. However, the proposal did not go through.

Sources told that a Pakistani delegation, led by Federal Water and Power Minister Naveed Qamar, would seek investment and offer the engineering and equipment procurement contract for the gas pipeline to China.

The delegation will raise the issue in a meeting of the Pak China joint energy working group scheduled to be held on August 1-2 in Beijing.

Sources said security agencies had given clearance to the route of the pipeline.

"The Bugti area is a sensitive location for oil and gas exploration activities, but other areas are safe for the transport of Iranian gas through the pipeline," a source said.

Earlier, Pakistan had also made a formal offer to Russian energy giant Gazprom, the largest extractor of natural gas in the world, to participate in the Iran-Pakistan pipeline project in a meeting of the Pak-Russia Intergovernmental Commission held on September 22, 2010 in Russia.

Pakistan and Iran have already signed an agreement on sovereign guarantee for the project. They have also inked a gas sale and purchase agreement for import of 750 million cubic feet per day (mmcf) of natural gas with a provision to increase the volume to one billion cubic feet per day.

The project will be funded through public-private partnership, which will cost Pakistan an estimated \$1.25bn for its side of the pipeline.

Under the agreement, gas supply will start in 2014 and Pakistan will have to pay a penalty equal to the cost of 750 mmcf if it fails to receive gas by the stipulated time.

China's help in power production -- The Frontier Post

China's help in power production

Posted on August 1, 2011

Washington committed to itself a \$1.25 billion programme to help Pakistan augment its energy output in partnership with the government, the private sector and other donors as part of its aid to Pakistan under the Kerry and Lugar enactment in 2009. Major component of the programme included supporting Pakistan's Planning Commission in developing energy projects for the next five-year development plan, supporting Alternative Energy Development Board in developing its medium term renewable energy policy, helping the Environmental Protection Agency develop environmental impact assessment guidelines for renewable energy resources and lending technical support flood damage needs assessment of power and hydro-carbons sectors led by the Asian Development Bank. Rehabilitation of the Tarbela Dam hydroelectric power station, restoring the Jamshoro, Muzaffargarh, and Guddu thermal power stations and improving the efficiency of tubewells to boost irrigation and consequent agricultural activity. In January 2011 the USAID also concluded and agreement to finance Satpara Dam project in Gilgit-Baltistan. The programme was launched with a fanfare and secretary of state Hillary Clinton visited Pakistan to herself initiate tubewells efficiency project. But almost no further progress in implementation of the programme is reported since then and the project seems in a major jeopardy in the aftermath of May 2 US mariners Abbotabad operation in which Osama bin Laden was killed. Subsequent developments saw the Washington administration completely stopping Pakistan's military aid and dallying allying on the civil aid that covered a whole spectrum of socio-economic activity in the country. This is the background that Pakistan approached China for help to ease the energy crisis in the country and Pak-China Joint Energy Working Group was established. The group is to hold its first meeting in Beijing on Aug 1-2. At least 18 projects will be discussed at the meeting. including four electricity generation projects of about 2,297MW, one coal power project of 405MW, one project for development of infrastructure and mining of Thar coal, four small and medium dams, five projects for distribution of electricity, one alternative energy project, and two projects of Geological Survey of Pakistan seeking technical assistance and financing, etc. An engineering procurement contract will also be taken up. All the power projects are proposed to be completed in three to five years. Water and Power Minister Syed Naveed Qamar would lead the Pakistani delegation during the talks that will also focus the supply of gas to Pakistan through international pipelines, including Iran and Turkmenistan. The group was formed under a Memorandum of Understanding, proposed by the National Energy Administration of China to establish bilateral energy cooperation mechanisms, to boost cooperation Pakistan and China to promote cooperation in the field of energy. The group has been the task of promoting cooperation in areas of oil and gas, coal, conventional power, and nuclear and renewable energy. Pakistan requires about 18,000MW of electricity to keep the wheel of industry and agricultural activity moving. The production ranges between 12,000 and 14,000MW. Approaching China, an all-weather and trusted friend in need, is a positive step because Beijing, in a sharp contrast with Washington, will not show back and leave Islamabad high and dry. Whereas the United States time and again betrayed Pakistan even in the most crucial time, Chinese leadership has always stood solidly behind Pakistan in difficult times.

All Day

Chinese, Turkish and Korean businesses have shown keen interest in investing in Pakistan's "textile city" of Karachi, Prime Minister Yousuf Raza Gilani has said. -- APP

Chinese, Turkish and Korean businesses have shown keen interest in investing in Pakistan's "textile city" of Karachi, Prime Minister Yousuf Raza Gilani has said.

Gilani said the textile sector plays a significant role in Pakistan's economy. It constitutes 60 percent of the country's total exports and provides jobs to 40 percent of the working population.

The prime minister said Pakistan must take full advantage of the opportunities that are globally available in the textile sector, the Associated Press of Pakistan (APP)

reported.

Gilani underlined the need for improving skills of the labour force to enhance their productivity and improve the quality of products.

He said that while the government has responded to the demands of the textile industry by providing relief packages, the industry in turn should assure the implementation of quality standards and good business practices.

Gilani said it was the duty of both the government and the entrepreneurs to be part of Pakistan's march towards becoming the hub of quality textile products.

He, however, lamented that while countries like China, India and Bangladesh have significantly increased their textile market share, Pakistan was yet to capitalise on such opportunities.

Though Pakistan was blessed with natural resources like cotton crop, unique geo-political location and a rich history of quality textile products, there were many problems facing the industry, like low-skilled labour, power shortage and inadequate infrastructure.

The Pakistan Textile City in the Port Qasim area, once fully operational, will provide employment to over 80,000 people at its full capacity.

It will attract an investment of \$250 million and increase exports by over \$3 billion per annum, he said.

Other benefits will include additional demand for cotton - yarn and crop - and increased demand for cement, steel and construction material.

This will in turn increase revenue for movement of goods and transport activities and creation of indirect jobs, Gilani said.

All Day

Pakistan, Poland agree to increase relations in all fields -- APP

Pakistan, Poland agree to increase relations in all fields

ISLAMABAD, Aug 1 (APP): Pakistan and Poland on Monday agreed to enhance their bilateral relations in all areas, especially to promote trade and economic ties, people to people contacts and decided to have next round of political bilateral consultations in Warsaw next year. Foreign Minister of Poland Radoslaw Sikorski and Pakistan's Foreign Minister Ms. Hina Rabbani Khar held extensive talks here at Foreign Office on Monday and had detailed discussions on important issues relating to bilateral, Pak-EU and regional development. Foreign Minister Hina Rabbani Khar while addressing a joint press conference here with Polish Foreign Minister said, "We discussed ways and means to enhance parliamentary contacts as well as economic and commercial cooperation."

She said, "It is encouraging that our two parliaments have established Pakistan Polish Friendship Groups recently. This will help promote our bilateral cooperation in strengthening democratic institutions in the two countries."

The volume of trade between the two countries is slightly over dollars 200 million which is far less than the potential and the two foreign ministers discussed several measures to expand the bilateral trade and investment.

Hina said, "Poland has evinced keen interest in increasing the investment in the development of energy sector in Pakistan."

Poland has assumed the 6th monthly EU Presidency from this July, therefore, Pak-EU relations were also discussed during the meeting and it was decided that Pakistan will get Generalized System of Preferences (GSP) Plus with effective from 2014 which will give boost to Pakistan's exports to EU countries.

Hina Rabbani Khar said both the foreign ministers agreed to step up efforts in order to finalize the 5-year engagement plan to launch Pak-EU strategic dialogue this year.

Pakistan has extended an invitation to Lady Catherine Ashton EU High Representative for Foreign Affairs to visit Pakistan in near future for Pak-EU strategic dialogue.

Both the foreign ministers also agreed to convene the third meeting of Pak-EU Joint Commission in November this year while dates for the 3rd Pak-EU summit are being finalized.

Hina said, "We very much appreciate the greater market access by the EU to Pakistan and hope that Pakistan specific package under consideration by the World Trade Organization will sail through.

She said the issue of Free Trade Agreement with EU was also discussed during the meeting.

Regarding the issue of ban on Pakistan's fisheries products, Hina Rabbani Khar said the export which was discontinued in 2008 on sanitary and phyto-sanitary reasons is likely to resume in the near future as it was discussed during the meeting today.

"Our two sides are working to finalize details in this regard," she added.

The Polish Foreign Minister Radoslaw Sikorshi, who was the first Foreign Minister of his country to visit Pakistan said it is not his first visit as he visited Pakistan as journalist to cover the situation in Afghanistan following the invasion of Russian forces in 1980.

He appreciated role of Pakistan during that period to support the international community to defeat Russian forces in Afghanistan.

He said Pakistan also paid much in 1979 after the invasion of Russian forces in Afghanistan that forced Pakistan to accept millions of Afghan refugees.

The democratic process in Pakistan was also suffered after this incident, he said.

The Polish Foreign Minister said, "We feel grateful to Pakistan even today when it has been an important country in the fight against terrorism.

He also acknowledged the loss in the war against terrorism by the civilians and even by Pakistan Army. "We appreciate your sacrifices," he added.

The Polish Foreign Minister said, there is need to have cooperation adding "what we can do jointly better to fight extremism and terrorism."

He said international community should not repeat the mistakes of 1990 and extend full help and cooperation to Pakistan to fight the menace of extremism and terrorism.

Referring to Afghanistan issue, the Polish Foreign Minister said, "Pakistan needs to be part of the solution and should not be ignored as failure is not the option."

He said Pakistan is the central and a key country in the region and playing important role in promoting peace and security in the region.

He also appreciated Pakistan's good relations with its neighbours adding that it is very difficult to keep such good relations with the neighbours when there are hostile countries living as neighbours.

The two countries have also signed an instrument for cooperating in the investigation of murder of Polish geologist in Pakistan as it will provide a chance to Polish investigative agencies to investigate the murder in Pakistan.

Foreign Minister Hina Rabbani Khar while replying to a question about the delay in investigation said, due to lack of solid proof the investigation process was delayed.

She said four persons involved in this murder are still absconders, that was hampering to proceed with investigation.

She however assured that Pakistan is taking all measures to arrest the culprits involved in the murder of Polish geologist and give them strict punishment.

Replying to a question, the Polish Foreign Minister said even after the withdrawal of NATO and ISAF troops from Afghanistan, the EU and other countries will continue to extend full moral and diplomatic support to Afghanistan and Pakistan to ensure peace in the region.

The Polish Minister while acknowledging the sacrifices of Pakistan in war against terrorism said this aspect should be considered strictly and there is need to project such sacrifices more effectively.

Answering the question about approval of EU package of concessions being given to Pakistan following 2010 floods for increasing its exports to EU, the Polish Foreign Minister said the neighbouring country of Pakistan has raised objections to this package. He however said GSP plus in 2014 could be an alternative to this package.

The Polish Foreign Minister also condemned the murder of a journalist in Pakistan and said that he was shocked to hear this news.

Replying to a question about restrictions on the movement of foreign diplomats in Pakistan, Foreign Minister Hina Rabbani Khar said there are no country specific restriction for the movement for any foreign diplomats within Pakistan. She said

there are general rules regarding the movement of diplomats on the basis of security and these are being applicable to all the diplomats.

Answering an other questions about the allegations from China that terrorists trained some other countries are involved in terrorism inside China, she said, Pakistan has not received any such allegation in writing.

Replying to another question, Khar said, Pakistan is more worried about cross border infiltration and cross border attacks on Pakistan side from Afghanistan adding that NATO and ISAF troops should take these concerns of Pakistan seriously.

China offered engineering pact for Iran pipeline -- The Nation: By: Ahmad Ahmadani

China offered engineering pact for Iran pipeline

By: Ahmad Ahmadani | Published: August 03, 2011

ISLAMABAD – Pakistan, which is likely to award engineering and equipment procurement contract for much awaited Iran-Pakistan gas pipeline soon, is expecting to get Chinese nod for the project to meet ever-growing energy needs of the country, TheNation has learnt.

“Pakistani delegation, led by Federal Water and Power Minister Naveed Qamar, has also sought investment and offered the engineering and equipment procurement contract for the Iran-Pakistan gas pipeline to China, sources privy to the development shared while talking to this scribe, adding that Pakistan is likely to finalize an engineering and procurement deal with China for the Iran-Pakistan gas pipeline project, which may also provide financing in line with the growing energy cooperation between the two sides.

According to sources in the Ministry of Water and Power, Naveed Qamar, who is leading the Pakistani delegation in the 1st meeting of China-Pakistan Joint Energy Working Group (JEWG) said Tuesday that the growing energy demand in Pakistan is a challenge for the government, yet it provides immense opportunities to the Chinese investors to contribute towards reducing energy shortages in the country while sharing the benefits.

Pakistan, the minister said, is currently faced with energy demand-supply gap, saying that the government is fully committed to resolve the prevalent energy shortages and achieving energy security objectives on sustainable basis with active support of friendly countries, especially China.

Earlier, Pakistan had also made a formal offer to Russian energy giant Gazprom, the largest extractor of natural gas in the world, to participate in the Iran-Pakistan pipeline project in a meeting of the Pak-Russia Inter-governmental Commission held on September 22, 2010 in Russia. Again, as Russia and China are in vie with each other to win the construction contract, and a consortium of Sui Northern Gas Pipeline Limited (SNGPL), Sui Southern Gas Company Limited (SSGCL) and an Italian company Eni are also lobbying to grab the engineering, procurement and construction contract for the pipeline, which will bring Iranian gas to Pakistan to meet its ever-soaring energy needs.

Currently, a Germany based consultancy firm ILF is conducting a route survey on the Pakistani side of the pipeline and will shortly be completing the assigned task. Then, the engineering and equipment procurement contract will be granted.

According to sources, SSGC and SNGPL had also sought a share with ILF in the consultancy contract, which caused a delay in completing the survey. It might be worth mentioning here that ILF got this contract for \$55 million and is currently working in collaboration with National Engineering Services of Pakistan (Nespak). Reportedly, a major part of the survey for laying the pipeline from Iranian border to Nawabshah has been completed and the remaining part is expected to be finished soon.

The deal is part of the long-delayed \$7.5 billion Iran-Pakistan-India gas pipeline project. The capacity of Iran-Pakistan gas pipeline was 110 million cubic meters. Around 1,100 kilometers of the pipeline is reportedly installed in Iran, while the remaining 1,000 kilometers are planned to be set up in Pakistan. The 2,775-km pipeline was proposed to start from Asalouyeh (from the South Pars field) and stretch over 1,100 km through Iran while in Pakistan, it was proposed to pass through Balochistan and Sindh. In Khuzdar, a branch would spur-off to Karachi, while the main pipeline would continue towards Multan. The project will be funded through public-private partnership, which will cost Pakistan an estimated \$1.25 billion for its side of the pipeline.

It is worth mentioning here that after receiving final nod from Iran Pakistan has geared up its efforts to ensure smooth supply of imported gas to the country till 2012 under the proposed multi-billion dollar Iran-Pakistan-India gas pipeline project (IPI). Minister for Petroleum and Natural Resources Dr Asim last month announced that Pakistan would start the work for building the pipeline within the next six months. Similarly, Ejaz Chaudry, Secretary Ministry of Petroleum and Natural Resources, earlier while talking to TheNation confirmed that the incumbent government viewing the outages of gas has intensified work on the multi-billion dollar pipeline project to ensure gas supply from Iran to Pakistan in 2012.

It is relevant to mention that Pakistan is in dire need of gas and electricity and had been in talks with various countries to import to meet the crunching national needs as the energy shortages have worsened over the recent years. However, sources were upbeat that IP has emerged as a glimmer of hope to overcome the energy shortage due to gap in demand and supply by utilizing regional resources. Additionally, Pakistan and Iran have already signed an agreement on sovereign guarantee. They have also inked a gas sale and purchase deal for import of 750 million cubic feet per day of natural gas.

Chinese firm to ply 800 CNG buses in city -- The News

Chinese firm to ply 800 CNG buses in city

A Chinese firm will ply around 2,000 CNG buses in Sindh, while 800 of the buses will run in Karachi.

A Memorandum of Understanding (MoU) to this effect was signed at the Chief Minister House between Foton Motors (Buses) of China, Pak-Transport services and the Government of Sindh under a joint venture.

The MoU was signed by Joseph Verghese, Managing Director Foton Pak, Perey T, Blackerby President Foton, Secretary BOI Sindh Muhammad Younis Dagha, Commissioner Karachi Division Muhammad Hussain Syed and Secretary Finance Naveed Kamran Baloch.

Those who were present at the ceremony included Chief Minister Sindh Syed Qaim Ali Shah, Local Government Minister Agha Siraj Durrani, Law Minister Muhammad Ayaz Soomro, Chairman BOI Saleem Mandviwala, Chief Secretary Raja Muhammad Abbas, and Secretary Transport Gul Hasan Channa.

Joseph Verghese presented details of the MoU and Ye Zhaouyon, vice-president of Foton Group, highlighted the services being rendered by his group.

Minister for Local Government Agha Siraj Durrani also addressed the ceremony and welcomed the Chinese Foton group for making an investment in Sindh.

He said that Chinese and Pakistani people would work together in various sectors. He added that President Asif Ali Zardari was very keen on strengthening relations between the two countries in different fields.

Chief Minister Shah also welcomed cooperation from the government and people of China, and hoped that their relations would further improve day by day.

It was informed that the Chinese Bus Mass Transit would operate the buses in Karachi, Hyderabad and the rest of the province with environment-friendly fuel. It was stated that Foton Motors would provide and operate 2,000 CNG buses in the province, as the company had designed modern buses for Pakistan to meet specific culture and demographic needs of the country.

Meanwhile, Commissioner Mohammed Husain Syed told The News that initially 90 buses would be brought onto the city roads whose number would be increased up to 800. He said that the rest of the buses would be brought to Hyderabad, Sukkur and later to Larkana and other cities of the province.

ICBC entrance into Pak to develop banking sector -- Observer

ICBC entrance into Pak to develop banking sector

Staff Reporter

Share

Islamabad—July 19th marked the day that Bank Alfalah opened the doors of its banking experience of 13 years to the most recent entrants in the Pakistani banking sector – ICBC. The Industrial and Commercial Bank of China (ICBC) is not only the leading bank of China, but is also one of the largest banks of the world. Its entrance into the Pakistani financial sector, with its significant international banking experience, heralds promise for further development of the landscape of the banking industry.

Bank Alfalah, one of the leading commercial banks in the host market, designed a customized knowledge sharing program - "ICBC: Local Market Orientation Program"- in line with ICBC's aims and objectives to operate in the local market. The focus of the program was to transfuse experience and knowledge of local regulations and practices of the Pakistani banking industry. Bank Alfalah's senior

management and field experts from across its 378 local branches and 8 international branches/units, came together on this forum, to welcome the ICBC executives and contribute towards aligning ICBC's Pakistani banking operations with local regulations and guidelines.

The 3 day program commenced on 19th July, 2011 with inaugural addresses by Mr. Sirajuddin Aziz, CEO of Bank Alfalah Limited and Mr. Chen Peichen, Deputy CEO of ICBC Operations in Pakistan. Mr. Aziz welcomed the ICBC participants and introduced the platform of mutual learning hosted by Bank Alfalah, which was formulated to better suit the requirements of ICBC's Pakistani banking operations' commencement according to local regulatory guidelines. Mr. Aziz also emphasized the importance of the presence of a Chinese commercial bank in Pakistan, to further strengthen the bilateral ties of Pakistan and China. Moreover, he expressed hope of the seminar delivering upon its slogan and 'building affiliations that last', so that the enduring bond between ICBC and Bank Alfalah could be fortified for furthering the professional growth of both organizations.

Mr. Chen Peichen expressed his gratitude to Bank Alfalah for arranging the comprehensive curriculum for ICBC, and expressed hope for organizing more such platforms in the future, in order to take the alliance of Bank Alfalah and ICBC to a more advanced level.

Over the three days, the ICBC: Local Market Orientation Program successfully explored the Pakistani nuances and variations in the arenas of General Banking Operations, Trade Finance, Credits and Treasury. The senior management and field experts of Bank Alfalah felt honored to be a part of the prestigious platform that promulgated mutual learning and look forward to such alliances in the future; they also hoped that their endeavors proved successful in enriching ICBC's local banking enterprise.

PakSat-IR symbol of Pak-China cooperation in space science & technology: Masood Khan -- The Nation

PakSat-IR symbol of Pak-China cooperation in space science & technology:
Masood Khan

Pakistan's Ambassador to China, Masood Khan has said that Pakistan's new communication satellite -- PakSat-1R, is a symbol of Pakistan-China cooperation in the area of space science and technology.

"It is a symbol of Pakistan-China cooperation in the area of space science and technology. It is the first of the kind to be launched by China and Pakistan. Therefore it establishes a new platform, and it marks a new beginning" said Ambassador Khan in an interview with China News Agency on the occasion of launch of PakSat-1R from China.

The use of satellite will bring direct benefits to Pakistan's economy, Khan said adding that it will refine and expand our capabilities for the use of broadband Internet, digital broadcasting, mobile telephony, and disaster prevention and management. All these capabilities will enable us to focus more sharply on social development, especially on education and health sectors, he added.

The Pakistan Communication Satellite -- PakSat-1R is due to be launched in space from Chinese satellite launching site located at Xichang city during the second week of current month, depending on weather conditions. It will replace Paksat-1.

Ambassador Khan said that as we accomplished this goal of launching PakSat-1R, we will swiftly move on to expand our collaboration with China in related fields of space science and technology.

The launching of the satellite, he said coincides with the celebrations of 60th anniversary of diplomatic relations between Pakistan and China.

Masood Khan said Pakistan and China "are moving into the higher stages of aerospace cooperation. Remote sensing satellite is one such area. This satellite will cover crop monitoring, weather forecasting, urban planning, disaster preparedness and response, earth observation, and oceanography. These applications will have a direct impact on our agriculture, industry and services -- three vital sectors for Pakistan's economy."

Last year, Ambassador Khan said that Pakistan was hit by massive floods which caused large scale devastation across the country. It was at that time that we fully realized the importance of a remote sensing satellite.

In the long term, he said we also want to cooperate with China on satellite designs to develop Pakistan's indigenous capability.

He expressed Pakistan's desire to participate in China's Manned Space as well Deep Space Exploration programmes.

He, however regarded it as something for the future. It is our desire that the first non-Chinese astronaut to travel on board a Chinese spaceflight is a Pakistani. Referring to the advancement made by China in space technology, Ambassador Khan said that China is constantly forging ahead at a brisk pace. It has made extraordinary strides into space science and technology as well as aerospace industry.

Ambassador Khan said China's space technology industrial base is expanding. Shenzhou 7, the third manned spaceflight has established a new threshold for China.

He, however said that "China is not sitting on its laurels. It is constantly moving forward. It has already planned Shenzhou 8 which will be docked with Tiangong 1 space module. Tiangong-1 will place the first portion of China's planned space laboratory in orbit. This will be a breakthrough. The docking of Shenzhou 8 and Tiangong 1 is expected to be followed by Shenzhou 9. The Beidou is yet another technological achievement as China can launch and operate complex systems in space. These are all new frontiers that China is conquering" he remarked.

The people of Pakistan, Ambassador Khan said, are proud of these scientific achievements of China.

China to cooperate in livestock, energy sectors -- The Nation

China to cooperate in livestock, energy sectors

LAHORE – The Punjab government and China's state company Sinotec have decided to cooperate in livestock and energy sectors and agreements in this regard will soon be given a final shape.

This was decided in a meeting between Punjab Chief Minister Muhammad Shahbaz Sharif and Chinese delegation led by President of Sinotec at a meeting here on Monday.

The CM welcomed the Chinese cooperation in livestock and energy sectors and said it would add a new chapter to Pak-China friendship. He mentioned that transparency in the execution of development projects was the hallmark of Punjab government and the projects to be executed with the collaboration of the Chinese company in energy and livestock sectors would also be completed expeditiously and in a transparent manner. He added that these sectors were of vital importance in the provincial economy and the government was implementing a comprehensive strategy for the uplift of these sectors. He further said cooperation of the Chinese company would bring about further improvement in these sectors and Punjab would benefit from the Chinese technology and expertise.

He also mentioned that there were vast opportunities of launching of hydle power projects in Punjab and sites had been identified at a number of places for this purpose. He said it was a matter of pleasure that Sinotec had decided to work on hydle power project at two places, and the Punjab government would welcome joint ventures in this regard. He also said there was also a vast scope of investment in livestock and dairy farming sectors, and Punjab and China could also launch joint ventures in these sectors. "The Punjab government is promoting public-private partnership for the development of various sectors and the decision of Sinotec to cooperate in livestock and dairy farming sectors is a matter of satisfaction," he added.

Shahbaz Sharif said China was a trusted friend of Pakistan and had played a commendable role in its progress, while Pak-China friendship was unswerving and China was such a sincere friend of Pakistan that it would be a matter of honour for the Punjab government to launch joint ventures with China. He mentioned that an agreement had been reached with the Chinese company for generation of power from Taunsa Barrage while another agreement has been signed with China's international company NORINCO for mass transit project. He also said an agreement had been signed with Sinotec during his visit to China regarding investment in agriculture, livestock and other sectors which was being given the final shape with the arrival of Sinotec delegation in Punjab. While asserting that joint ventures in livestock and energy sectors would be executed expeditiously and he would personally supervise these projects, he said he would always cherish the hospitality extended to him and his delegation during his visit to China. "The Chinese progress is a worthy example for Pakistan and Punjab government is interested in benefiting from Chinese expertise in various sectors. Working with Chinese companies is resulting in strengthening of bilateral relations between China and Pakistan as well as promotion of bilateral cooperation," he said. He also issued instructions for appointing Chairman Punjab Investment Board Rizwan Ullah Khan as the focal person for giving a final shape to the agreements with Sinotec at the earliest.

President of Sinotec Jin Guang Ming said the company had decided to cooperate in energy sectors due to transparent policies of the Punjab government and the favourable atmosphere for investment in the province and this cooperation was not on commercial basis but a symbol of Pak-China friendship. He added that the company would utilise the profit earned from these projects on further promoting bilateral cooperation with Punjab in various sectors. "Pakistan is an agrarian country and has vast fertile lands and there is a wide scope of investment in energy, livestock, agriculture and other sectors. The company will fully benefit from investment opportunities in the province, and has held fruitful discussions with the authorities concerned regarding investment in hydle power projects and livestock sectors in the light of which joint ventures will be launched," he said, adding Lahore was a historical city and the delegation was pleased to see the greenery of the city. Minister Education Mian Mujtaba Shuja-ur-Rehman, Chairman Lahore Transport Company Kh. Ahmed Hasaan, Vice Chairman Punjab Investment Board, Chairman

Planning and Development, Secretaries of Finance, Agriculture, Transport, Livestock and Energy departments and concerned officers were present on the occasion. The Chinese delegation also included Project Manager Chen Ji Xuan and Song Shuang Ping.

Pakistan,Tajikistan express willingness to build railway link to Gwadar port -- APP

Pakistan,Tajikistan express willingness to build railway link to Gwadar port ISLAMABAD, Aug 9 (APP): Pakistan and Tajikistan on Tuesday expressed willingness to build railway link from China to Gwadar Port through Tajikistan and Afghanistan for proper utilization of the facilities already available at Gwadar Port. They agreed to work together towards this end in a quadrilateral format including China and Afghanistan,said a message received from Dushanbe. These views were shared by Federal Minister for Communications Dr. Arbab Alamgir Khan with Prime Minister of Tajikistan Oqil Oqilov and Foreign Minister of Tajikistan Hamrakhon Zarifi during his meetings with the Tajik dignitaries. The Minister briefed Prime Minister Oqilov and Foreign Minister Zarifi on the fruitful discussions he had yesterday with his Tajik counterpart, Hakimov Nizom, regarding confluence of ideas and plans on air and surface connectivity between Pakistan and Tajikistan and regional road and rail corridors. Minister Arbab Alamgir congratulated both Tajik leaders on the forthcoming 20th Independence Anniversary of Tajikistan and conveyed the best wishes of the President, the Prime Minister and the people of Pakistan to the Tajik nation. Tajik Prime Minister and Foreign Minister said that the Tajik Government highly valued its existing relations with Pakistan and was keen to further enhance people-to-people contacts, trade and tourism between the two countries. The Minister for Communications will visit the Ishkashim city in the Gorno-Badakhshan Province of Tajikistan tomorrow to see the area from where road link may be established between the two countries through Wakhan corridor to Chitral.

Beijing: For the first time, China will be launching a communication satellite for close ally Pakistan, a move that will mark “a new beginning” in bilateral space collaboration. -- FIRST POST

Beijing: For the first time, China will be launching a communication satellite for close ally Pakistan, a move that will mark “a new beginning” in bilateral space collaboration.

The satellite named PAKSAT-1R will be launched at an “appropriate time” in the coming days, state-run Xinhua news agency quoted an unnamed official as saying.

The satellite coincides with the celebrations of 60th anniversary of diplomatic relations between Pakistan and China. Reuters

The satellite, which was made in China, would provide a variety of benefits, including high-power communication and weather monitoring facilities, besides strategic defence applications.

The satellite would be launched from Xichang Satellite Launch Centre in southwest Sichuan Province by China’s space work horse, the Long March-3B carrier rocket, he said.

The new satellite is expected to replace PAKSAT-1, which was acquired by Pakistan in 2002 from the US-based Hughes Space and Communications Company after Indonesia had given it up due to power problems.

Appreciating China’s gesture, Pakistan’s Ambassador to Beijing, Masood Khan, said PAKSAT-1R is a symbol of Pak-China cooperation in the area of space science and technology.

“It is the first of the kind to be launched by China and Pakistan. Therefore, it establishes a new platform, and it marks a new beginning,” Pakistan’s state-run APP quoted Khan as telling the Chinese media.

In the long term, he said, “we also want to cooperate with China on satellite designs to develop Pakistan’s indigenous capability.”

Expressing desire to participate in China’s Manned Space as well Deep Space Exploration programmes in future, Khan said, “it is our desire that the first non-Chinese astronaut to travel on board a Chinese spaceflight is a Pakistani.”

The satellite would bring direct benefits to Pakistan’s economy, Khan said, adding that it would refine and enhance country’s capabilities for the use of broadband Internet, digital broadcasting, mobile telephony and disaster prevention and management.

Defence analysts claim that the remote sensing satellite with its high power cameras could provide a variety of applications in the defence field, including a peek into the troop movements on the Indian side.

Khan said the launching of the satellite coincides with the celebrations of 60th anniversary of diplomatic relations between Pakistan and China, moving their aerospace cooperation to a higher stage.

The satellite will cover crop monitoring, weather forecasting, urban planning, disaster preparedness and response, earth observation and oceanography.

Pakistan felt the need for such a satellite when it was hit by massive floods last year which caused large scale devastation across the country, he said.

Pakistan's 'first' advanced communications satellite PAKSAT-1R, as a part of Pakistan's Space Programme 2040 -- The Express Tribune
KARACHI:

Billed as Pakistan's 'first' advanced communications satellite PAKSAT-1R, as a part of Pakistan's Space Programme 2040, was launched on Thursday at 9:17 pm on board China's Satellite Launch Vehicle from the Xichang Satellite Launch Centre in Sichuan province.

The geostationary satellite would orbit at 23,000 miles above the surface of the earth and is expected to enhance the broadcast and broadband capabilities of the country. However, some scientists say that what Pakistan Space and Upper Atmosphere Research Commission (Suparco) has achieved today could have been done 30 years ago. They question whether our so-called space programme is on the right track.

Expected clients

PAKSAT-1R has a design life of 15 years and will provide TV broadcasting, Internet and data communication services across South and Central Asia, Eastern Europe, East Africa and the Far East. The satellite will now enable the extending of communication services to all areas of Pakistan.

Apart from Pakistan Army, there are more than 45 clients of PAKSAT-1R, including leading telecom companies such as Mobilink, and broadcasters such as Geo and ARY.

Technical details

The PAKSAT-1R weighs 5,115kg and is based on the DongFangHong-4 platform with 18 Ku-band and 12 C-band transponders onboard. The China Great Wall Industry Corporation (CGWIC) had been nominated as PAKSAT-1R's chief contractor after President Asif Ali Zardari and Chinese President Hu Jintao signed an agreement in October 2008. The company was made responsible for the design, manufacturing, final assembly, testing and launch of the satellite.

Cost

Suparco has kept mum about the cost of the multi-million dollar project. Sources within PAKSAT say that at the moment the entire cost has been borne by China which has to be paid back.

According to a press release, Defence Secretary Lt Gen Syed Athar Ali (R), Secretary Foreign Affairs Salman Bashir, Director General, Strategic Plans Division Lt Gen Khalid Ahmed Kidwai (R) and Ambassador of Pakistan to China Muhammad Masood Khan were present on the occasion. Suparco chairman Major General Ahmed Bilal was also reportedly present.

.President for maximum utilization of Pak-China trade -- APP

President for maximum utilization of Pak-China trade

President Asif Ali Zardari on Tuesday urged for maximum utilization of the real trade and investment potential existing between Pakistan and China to the mutual benefit of the people of two countries.

The current volume of Pak-China bilateral trade was far below the real trade potential existing between the two countries.

The President said that there existed a win-win situation for the two countries to strengthen the existing equation with more investment and more economic cooperation as "our Chinese brothers have the expertise and we offer the opportunities and liberal incentive packages for investment in Pakistan in a variety of fields".

He said this while talking to a delegation of Chinese telecom conglomerate ZTE here at the Aiwan-e-Sadr.

The delegation included Fan Qingfeng, Li Honghui, Peng Alguang and Najeeb Sadiq.

Secretary General to the President M. Salman Faruqi, Ambassador at Large Khalil Ahmad, Secretary Finance Dr. Waqar Masood Khan, Secretary IT & Telecom Saeed A. Khan and Spokesperson to the President Farhatullah Babar were also present during the meeting.

The President while recalling his previous visits to China said that Pakistan was keen to learn from the Chinese economic and development miracle and benefit from its expertise in diverse areas of defence, energy, industry, agriculture, communications and commerce and trade.

He said that his frequent visits were in line with the vision of PPP leadership and a government policy to jack up Pak-China bilateral cooperation to new heights and explore some new initiatives to further promote the economic ties between the two countries.

The President appreciated the ZTE's role in the development of Pakistan's telecommunication sector and said that Chinese companies had made significant contributions to Pakistan's economy through direct investment.

The President called upon ZTE to develop technical skills of the local labour force.

The President said that Pak-China cooperation and low cost Pakistan labour force could help develop the region as a manufacturing hub for the benefit of both countries.

He reiterated that ZTE may consider developing a research and development centre in telecommunication and a plant for manufacture of mobile handsets in Pakistan.

The President said that he was awaiting his next visit to China later this month to further consolidate the relations between the two countries which was 'an important factor for peace and stability in the region and the world'.

Govt to import 1m tonnes urea for Rabi season -- DAILY TIMES

Govt to import 1m tonnes urea for Rabi season

LAHORE: The federal government should take solid steps to import at least one million tonnes urea for the Rabi season besides ensuring the provision of

uninterrupted gas supply to fertilizer factories.

Punjab Agriculture Minister Malik Ahmad Ali Aulakh said it was the responsibility of the federal government to ensure provision of agriculture inputs because in the absence of inputs production could not be increased.

He said during the last three months the cost of a bag of urea had surged to Rs 500, which was beyond the reach of poor farmers.

He said the fertilizer industry believed it could reduce the price if full gas supply was ensured to them. He said according to the schedule of National Fertilizer Marketing Limited (NFML) 153,750 tonnes urea had to be imported but only 124,000 tonnes arrived at Gwadar and Karachi out of which 39,000 tonnes was despatched to Punjab.

To avoid panic among farmers, the government should ensure timely availability of required fertilizer to them.

He said that urea should be made available to farmers at controlled rates to facilitate them for enhancing their per acre yield.

He said steps should be taken to check the smuggling of fertilizers besides ensuring stability in their prices through district administration. Punjab required 2.4 million tonnes urea and wheat was being sown on an area of 16 million acres and the sowing process would complete in one month. staff report

China Building Alternative Transport RoutesBEIJING (Nikkei)--China has started building alternative routes to import energy resources without passing through the Strait of Malacca. Roads, railways and pipelines are being built to connect three key ports i -- Nikkei

China Building Alternative Transport RoutesBEIJING (Nikkei)--China has started building alternative routes to import energy resources without passing through the Strait of Malacca. Roads, railways and pipelines are being built to connect three key ports in the Indian Ocean via land.

Pakistani Ambassador to China Masood Khan told The Nikkei in an interview that feasibility studies have started on a railroad to connect the port of Gwadar, Pakistan to Xinjiang Uighur Autonomous Region in western China.

There are also plans for pipelines. China is expected to finance a large portion of the projects through grants and loans.

Gwadar is just 500km off the Strait of Hormuz, the gateway to the Persian Gulf. If China can transport oil by land from Gwadar, it will be a significantly shorter route than passing through the Strait of Malacca, and thus will increase energy security.

A railway is being built between the port of Kyauk Phyu, Myanmar and Ruili, China's Yunnan Province. The railway is valued at roughly 70 billion yuan (approximately 845 billion yen) and will be operational by 2016, while an oil pipeline along a similar route will open by 2013. China is also developing the port of Chittagong, Bangladesh, one of the leading deep-water ports in Asia.

While China is increasing its naval capabilities, it is also aware that its dependence on sea lanes is a vulnerability. For instance, a naval blockade or pirate attack in the Strait of Malacca could harm China's energy supplies.

In the first five months of this year, China's dependence on overseas energy sources reached 55.2%, surpassing that of the U.S., at 53.5%, for the first time.

China's development has always been driven by its coastal cities, but once the new land routes are operational, the flow of goods could shift inland.

China is also thinking about strengthening its rail connections to Europe. In a visit to Europe in June, Prime Minister Wen Jiabao said, "China is willing to accelerate the construction of the Eurasia railway."

Gilani seeks ADB financing for Bhasha -- APP

Gilani seeks ADB financing for Bhasha

ISLAMABAD - Prime Minister Syed Yusuf Raza Gilani Thursday called upon the Asian Development Bank (ADB) to finance Pakistan's mega project of Basha Dam construction, which would solve the country's chronic energy crisis and also provide sufficient water to the agriculture sector that holds the key to food security of the country.

He expressed these views during a meeting with ADB Vice President Xiaoyu Zhao and Director General ADB Juan Marinda, who called on him here at the PM house. On the occasion, Gilani emphasised ADB's support for construction of Motorway from Karachi to Fasilabad. The connectivity of Gwadar with Ratodaro will link Karachi, Gwadar and Fasilabad, which is the hub of textile industry of Pakistan. He said priority areas of Pakistan were energy, water, roads and the overall development of infrastructure, an engine of growth in any economy.

Lauding the role of the ADB in undertaking projects in various sectors in Pakistan, he said that Pakistan expected that this partnership would continue, especially since it is critical for improving the quality of life of its people. He said that his government had constituted a high powered committee led by the finance minister to seek solutions to unscheduled load shedding in the country. The prime minister underlined the government's commitment to financial discipline, reducing the fiscal deficit, mobilising domestic resources and pursuing high growth strategy. On this occasion, the vice president of ADB said that he had a very useful meeting with government officials and addressed many issues. He assured the prime minister that ADP was committed to working with the government of Pakistan.

The prime minister sought ADB's support for construction of roads through Central Asia Regional Cooperation (CAREC) Funds for integrating Pakistan with Central Asia. It may be mentioned here that Pakistan has become 10th member of this organisation. The connectivity as planned under its umbrella will revolutionise trade among these countries by providing a trade corridor including enhancement of people-to-people contact.

In the meeting the Finance Minister, Dr Abdul Hafeez Shaikh, Minister for Water and Power, Syed Nveed Qamar, and senior officials of relevant ministries were also present in the meeting.

US considering to assist in Diamer-Bhasha dam -- APP

US considering to assist in Diamer-Bhasha dam

WASHINGTON - The United States is considering a Pakistani request to the international community to support the construction of Diamer-Bhasha Dam.

Replying to a question, a state department spokesperson said that the US recognizes that such a hydroelectric project would help meet many of Pakistan's long term energy and water needs, and advance social and economic development in the country.

"We are considering how we can best support Pakistan's request, as are other bilateral donors and multilateral financial institutions. No final decisions have been made. We will continue to work with the Government of Pakistan to determine how best to use U.S. civilian assistance" the spokesperson said.

She said that the United States has long supported development projects that enhance the daily lives of people throughout the region. In doing so, the US always take into account a project's potential regional impact.

The spokesperson pointed out that as part of a broader signature energy program announced in 2009, the United States has provided support to complete the final phases of two hydroelectric dams in Pakistan: the Satpara Dam in Gilgit-Baltistan and the Gomal Zam Dam in South Waziristan.

"We are considering doing more in the sector", the spokesperson added.

Zardari urges Central Asian states to organise joint -- Pakistan Today
Zardari urges Central Asian states to organise joint

•President says peace in Afghanistan 'vital for the region'

ISLAMABAD - President Asif Ali Zardari, on Tuesday, called upon the central Asian states to focus on improving bilateral economic and commercial relations by organising business forums and launching joint ventures in various areas of mutual interest.

"We need to gear up the implantation of decisions taken on the platform of Joint Economic Forum," said the president while talking to the members of a delegation comprising of ambassadors from central Asian countries who called on him at the Aiwan-e-Sadr.

The delegation included Afghan Ambassador Mohammad Umer Daudzai, Ambassador of Azerbaijan Dashgin Mazi Oglu Shikarv, Kazakh Ambassador Bakhitbek Shabarbayed, Kyrgyz Ambassador Orozov Alik Karybaevich, Tajik Ambassador Zbaydullo Zubaydov, Turkmen Ambassador Berdiniyazov Sapar and Uzbek Ambassador Oybek A Usmanov.

Defence Minister Ahmed Mukhtar, Water and Power Minister Syed Naveed Qamar, Petroleum Minister Dr Asim Hussain, Senator Babar Awan, Spokesperson to the President Farhatullah Babar and other senior officials were also present.

Briefing the reporters, Babar said matters concerning mutual relations, peace and stability of the region, need for evolving regional solutions for the regional problems, promoting connectivity in the region and encouraging trade and economic activities were discussed during the meeting.

Babar said the president emphasised upon the need of taking advantage of the geographical proximity and forging a mutual partnership that could provide solution to the present issues confronting the states of the region. He said all countries in the region have a rich cultural heritage needed to be shared and passed on to the next generation.

He said peace and stability in Afghanistan was important and that Pakistan supported every effort intended towards peace and stability of Afghanistan. For economic development, he said, regional integration and utilising all available trade avenues including the transit trade agreements to promote mutual trade and boost business activities should be focused.

He said by improving connectivity and modes of communications, the countries of the region could enhance their trade and economic activities significantly.

He said that Pakistan, due to its geo-strategic location, offers shortest access to Afghanistan and Central Asian countries at Gwadar and Karachi seaports. Matters concerning further extending mutual cooperation in training programs for bankers, diplomats, business professionals, armed forces and law enforcing personnel were also discussed during the meeting.

Later the ambassadors attended Iftar-Dinner hosted by the president.

Central Asian countries: President calls for enhanced cooperation -- APP

ISLAMABAD: In a meeting with the ambassadors of the Central Asian countries at Aiwan-e-Sadr on Tuesday, President Zardari underscored the need to focus on economic development and regional integration.

Talking to the ambassadors, the president said that Pakistan and the Central Asian countries should utilise the available trade avenues to promote mutual trade and boost business activities.

He said that economic and commercial relations between Pakistan and the Central Asian countries should be promoted by organising business forums and launching joint ventures in the areas of mutual interest. "We need to implement the decisions taken on the platform of the Joint Economic Forum," he said.

The president said that by improving connectivity and modes of communications, the countries of the region could enhance their trade and economic activities significantly. He said that due to its geo-strategic location, Pakistan offered the shortest access to Afghanistan and Central Asian countries through Gwadar and Karachi seaports.

President Zardari called for the early implementation of the projects that focused on meeting the energy requirements of the countries. He said that the early implementation of such projects, which included electricity transmission lines and gas pipelines, would boost production levels in these countries, promoting economic activities and creating more jobs.

Ways to extend mutual cooperation in training programmes for bankers, diplomats, business professionals, armed forces and law-enforcement personnel were also discussed during the meeting.

Pakistan, China ties are unique: Hina Rabbani Khar -- APP

Pakistan, China ties are unique: Hina Rabbani Khar

Islamabad: Foreign Minister Hina Rabbani Khar, who is on a visit to Beijing, has said Pakistan and China enjoy a unique relationship and dialogue was an ongoing process between the two countries.

Talking to media persons on arrival in Beijing, Khar said the leadership of both the countries had invested immensely on the enhancement of existing strong bonds of friendship.

Khar arrived late on Tuesday evening for a two-day visit at the invitation of her Chinese counterpart Yang Jiechi.

She said President Asif Ali Zardari was carrying forward the ties to new heights by frequently visiting China.

Prime Minister Yousuf Raza Gilani also paid several visits, she added.

She pointed out that Chinese Premier Wen Jiabao's visit to Pakistan in December last year was historic as it helped in further enhancing the bilateral relations.

The foreign minister said the visit of Premier Wen played an important role in further deepening the strong relationship.

Khar said, "The relationship strongly exists among people and governments of two countries and now we want to commensurate these ties with trade, economic and investment cooperation."

The foreign minister said China is one of the countries with which Pakistan has signed Free Trade Agreement (FTA).

She said the existing strong bonds of friendship between Pakistan and China was

multi-faceted and covered all areas including defence, economic and trade ties.

"We have strategic and robust relations with China," she said.

At the Beijing Capital International Airport, Khar was received by Ambassador Masood Khan, senior diplomats from Pakistan Embassy and officials from the Chinese Foreign Ministry.

Earlier Ambassador Masood Khan said that 'this is a very important visit coming at a time when Pakistan and China enjoy enviable solidarity in all areas'.

Khan pointed out that 'the foreign minister's visit will help us consolidate our strong ties and steer them towards even deeper strategic and political engagement and more productive economic cooperation'.

"It will be a meeting between time-tested and trusted friends and partners," Khan said, adding "Naturally, regional and international situation will be reviewed by the two sides."

Symbolically too, Khan said, the visit is important because this will be Khar's first visit to China after assuming office.

President directs expediting Guddu, Uch transmission line projects

-- APP

President directs expediting Guddu, Uch transmission line projects

ISLAMABAD, Aug 24 (APP): President Asif Ali Zardari on Wednesday directed that procedural formalities concerning Guddu and Uch transmission line projects should be completed in time so that the signing agreement could take place in September this year. The President said this while talking to a leading Chinese company dealing in power transmission projects that called on him at the Aiwan-e-Sadr. President Zardari said Pakistan was facing difficulties in meeting its energy requirements. To improve energy resources, the President said that the government was focused on building mega hydropower projects in Diamer Bhasha and Bunji. The President said developing Thar coal fields and electricity generation through gasification of coal was also on the cards to meet energy requirements. He appreciated TBEA's interest in Pakistan and its \$3.5 billion agreement with Pakistan's NTDC (National Transmission and Despatch Company) and China Development Bank to supply transmission equipment to Pakistan.

He also welcomed company's interest in acquiring Heavy Electrical Complex, saying that the greater business ventures of the company in the country would contribute towards further strengthening Pak-China relationship.

He said Pakistan welcomed Chinese companies and businessmen to take advantage of the investment and business-friendly policies offered by the country. The President said the energy sector was one of the most important sectors where Pakistan needed assistance and cooperation of Chinese friends.

The President said, "we need to revamp existing transmission lines and build new ones for efficient transmission on one hand and to reduce line losses on the other." The contributions of TBEA, the President noted, would contribute significantly towards this end.

He reiterated the government's full support and facilitation to the incoming investors and businessmen, especially the Chinese and said the government would take care of their security requirements.

Ye Jun thanked the President for meeting and assured that TBEA would continue to make its contributions in assisting Pakistan in the energy sector.

It may be recalled that the President has been focusing on the strengthening of energy sector with the Chinese assistance and had also met the Chairman of the Board of TBEA during his previous visit to China.

The delegation was headed by Ye Jun, the head of the company called TBEA. He was accompanied by country representative of TBEA in Pakistan Zhou Liliang and Chen Qinliang.

The Pakistani side included Syed Naveed Qamar, Federal Minister for Water and Power, Secretary General M. Salman Faruqi, Secretaries Finance and Economic Affairs divisions, Chairman WAPDA Shakeel Durrani, and other senior officials.

TCP awards tender for import of 150,000 MT of urea

KARACHI: The Trading Corporation of Pakistan (TCP) has awarded tender for the import of 150,000 metric tonnes urea to meet the urgent requirement of fertilizers for Kharif 2011 crop.

Nine bidders participated in the tender and the prices quoted by them ranged between \$534.50 to \$544.50 per metric tonne.

A tender for 65,000 metric tonnes was awarded to Key Trade Switzerland which had offered the lowest bid of \$534.50 per metric tonne. The remaining 85,000 metric tonnes was awarded to Transammonia AG, which had agreed to match the lowest bid. The federal government had given necessary permission to the TCP to offer price matching in case the lowest bidder did not offer the total tendered quantity.

The shipments against the tender are scheduled to arrive at Gwadar Port by September 30, 2011. staff report

4th Pak-China business forum -- PAKISTAN TODAY

4th Pak-China business forum on September

KARACHI - A high powered business delegation led by Federal Commerce Minister Makhdoom Amin Fahim, is expected to attend the 4th Pak-China Business Forum to be held on September 2, 2011.

Expo aimed to boost regional cooperation

According a statement issued by Trade Development Authority of Pakistan (TDAP) Pakistani exporters would attend the 1st China-Eurasia Expo at Urumqi. A Pakistan pavilion for displaying a wide range of export quality products has also been arranged to highlight the industrial progress achieved by Pakistan. This Expo is aimed to boost regional economic cooperation among Central, West, South Asian and European countries and to further expand the collaboration in multilateral fields. Highlight of this Expo will be the "1+9" forums and the "China Eurasia Forum on Economic Development and Cooperation". Chinese Government will also hold 9 ministerial high-level forums during the event: News Ministers Forum; Overseas Chinese Businessmen & Xinjiang Development Forum; Agricultural Cooperation and Development Forum; Technical Exchange and Cooperation Forum; Financial Cooperation Forum; China-Eurasia Travel Cooperation and Development Forum; The Forum of Regional Cooperation in Shanghai Cooperation Organization Business Series Activity and Foreign Entrepreneur Conference.

30 distinguished dignitaries participating in the forum

The Chinese cultural exhibition will also be displayed during the Expo. The event is likely to be visited by dignitaries from various South Asian and European countries as well as many distinguished dignitaries from Pakistan. TDAP in collaboration with Pakistan Embassy at Beijing is also organising 4th Pak-China Business Forum on 2nd September, 2011 at Urumqi on the sidelines of the event. B2B meetings of Pakistani businessmen will be arranged with their Chinese and other European counterparts in this Forum. Thirty high profile businessmen are participating in this Business Forum representing different business sectors of Pakistan. Commerce Minister Makhdoom M. Amin Fahim, will deliver the keynote speech during the Business Forum and lead the delegation of Pakistani businessmen. Mr. Tariq Iqbal Puri, Chief Executive TDAP will officially represent Pakistan on the forum of "Shanghai Cooperation Organization (SCO) Business Day".

China can help with Pak-Iran gas pipeline project

ISLAMABAD: The Pakistan Economy Watch (PEW) on Saturday said Chinese companies should help Pakistan complete \$1.3 billion Iran gas pipeline project. Government is desperately looking for foreign funds to complete gas pipeline project but American opposition is keeping major donors away, it said. "Gas shortages have not only halted economic growth and can only be resolved through proper financing, said PEW President Dr. Murtaza Mughal. "Pakistan should also raise part of the finances through domestic funding for which banks can make a consortium," he said. American continue to stick to their stance despite the severe crisis in Pakistan which proves that they are not concerned about our economy but their own geopolitical interests, said Dr. Murtaza Mughal. The US is publically offering alternatives to Pakistan to hit Iran's energy sector but such offers are not applicable, he said. He said that US is ignoring the fact that gas contributes around 53 per cent in Pakistan energy mix which cannot be changed. Mughal said that fuel shortages have forced the government to ration supplies, resort to gas load shedding in summer for the very first time and face protests from industry. NNI

China would continue supporting Pakistan's socio-economic development -- APP

BEIJING, Aug 26 (APP):Federal Minister and Chairperson Benazir Income Support Programme (BISP), Farzana Raja met here Chinese Vice-Foreign Minister Liu Zhenmin and discussed avenues of bilateral cooperation in social sector.Pakistan Ambassador's to China Masood Khan was also present on the occasion.Chinese Vice-Minister appreciated the efforts of BISP regarding poverty alleviation in Pakistan. The BISP has achieved tremendous success in a short span of time, said Chinese Foreign Minister.

He assured that China would continue supporting Pakistan's socio-economic

development as Pak-China friendship is everlasting.

He was of the opinion that existence and success of BISP is an indicative of the seriousness of the present government of Pakistan towards socio-economic development of its people.

He said that Chinese government would encourage business and corporate sector to invest in Pakistan.

He said that he has discussed the poverty issue of Pakistan with the World Food Programme.

The Chinese Vice-Foreign Minister lauded the efforts and sacrifices of Pakistan in the war against terrorism.

He said that Pakistan is a frontline state in the international war on terror and has suffered a lot because of this.

He said that China is ready to offer assistance to Pakistan and would also call the world to pay attention to Pakistan's vital role in international war against terrorism.

Farzana Raja thanked the Chinese Government and people for supporting Pakistan during floods and said China has been an all-weather friend of Pakistan.

He briefed the Chinese Minister about various initiatives of BISP which are bringing in positive socio-economic changes in the lives of millions of poor families.

President Asif Ali Zardari's forthcoming visit to China was also discussed between Farzana Raja and the Chinese Vice-foreign Minister

China is developing a new Euro-Asian rail continental bridge -- THE ECONOMIC TIMES

China, In the west, it has planned strategic linkages to Pakistan, Iran and across central Asia, incorporating the Gilgit-Baltistan tract into Xinjiang's logistics grid, particularly through a 900-km rail line from Gwadar port in Balochistan on Pakistan's south-west coast close to the Straits of Hormuz to join the line along Koh-I-Taftan (on Iranian border)-Spezand-Quetta-Chaman (on Afghan border) onwards through Khunjerab Pass in the Karakoram to Kashgar (Kashi) in China.

Among the eight rail lines aggregating 5,300 route kilometres that China plans to construct in Iran, the \$2-billion, 580-km line from Tehran through Hamadan, Malayer and Kermanshah to Khosravi on the border with Iraq, along with a branch between Arak and Malayer, will provide a new corridor linking it to the Mediterranean Sea through central Asia, Afghanistan, Pakistan and Iran.

The line will offer onward linkages via Iraq to the Mediterranean port of Latakia in Syria, thereby facilitating a southern route to Europe. Following the Tedzen (Turkmenistan)-Mashhad (Iran) rail tracks at Sarakhs, a through line will enable China to connect through central Asia with Europe via Turkey.

China's galloping economic and strategic footprints are reflected in its annual trade with five central Asian countries, worth \$27 billion, up from \$0.5 billion 20 years ago. China lent \$10 billion to the Shanghai Cooperation Organisation countries, 'to shore up the struggling economies'.

In the east, China extends significant concessional development assistance to Bangladesh for infrastructure, including the second Padma bridge and a 130-km rail line from Chittagong to Gundum on the Myanmar-Bangladesh border.

Myanmar is a vital link between the land bridge connecting south Asia and south-west China, onwards to Europe through central Asia, for which it plans to link up with the Bay of Bengal port of Sittwe (Akyab) through the Mandalay and Irrawady rivers. The 232-km Lashio-Muse/Ruili rail line that China builds will complete the rail network across Myanmar.

In the north, China is busy extending the world's highest 1,142-km Golmud-Lhasa rail line, which was opened in July 2006, to Xigatse, Tibet's second-largest city. The 253-km extension through geothermal fields at a height of 4,000 m could cost \$2 billion and was launched in September 2010. Further extensions could go all the way up to Kathmandu and to Dromo, close to Bhutan and Sikkim, and possibly to Nyingchi near Arunachal Pradesh.

In the south, China is now Sri Lanka's biggest investor as well as aid donor. China is financing nearly all of Sri Lanka's big infrastructure projects, including ports, oil storage, airports, power plants, roads and an SEZ at Mirigama near Colombo.

Although there is no rail linkage between China and Myanmar, China and Laos, Myanmar and Thailand, Thailand and Cambodia, Cambodia and Vietnam, and Vietnam and Laos, China has pursued the ambitious 5,380-km Asean Kunming-Singapore rail venture, a corridor critical to the Trans Asian Railway project. Besides promoting rail links from Kunming in Yunnan province to Yangon in Myanmar, it contemplates helping Thailand with a 240-km Bangkok-Rayong high-speed rail.

Pak-China agree to look into the possibilities of launching joint Social Sector Projects -- SANA NEWS

Pak-China agree to look into the possibilities of launching joint Social Sector Projects

South Asian News Agency (SANA) · August 27, 2011 · Share/SaveISLAMABAD : Pakistan and China agreed to look into the possibilities of launching joint Social Sector Projects (SSP) to learn from each other's experiences.

Federal Minister and Chairperson Benazir Income Support Programme (BISP) Farzana Raja during her current visit to China met Chairperson China Women Federation (CWF), Ms. Meng Xiaosi in Beijing and discussed matters of mutual interest especially the common goal of women empowerment said a press release issued here on Saturday.

Both agreed that cooperation would add a new chapter to Sino-Pak bilateral relations and will enhance people to people contacts.

Ms. Meng Xiaosi appreciated the proposal forwarded by Farzana Raja to launch various joint projects so that both the countries could learn from each other's experiences. Federal Minister and Chairperson BISP thanked the CWF for its support

during the last year's floods in Pakistan. She said that in the time of need CWF had sent goods worth more than \$ 70,000 to flood affected BISP beneficiaries which underlines the strong bonding between the people of China and Pakistan.

Chairperson briefed the chairman CWF about the various interventions of BISP aiming at women empowerment in Pakistan. She told that BISP is trying to achieve the Millennium Development Goal of poverty alleviation through women empowerment. Also, by virtue of BISP, 10 million women in Pakistan have got CNICs and thus got recognition in the society, she further added. During the meeting, common initiatives were discussed, which have been started by both the organization in their respective countries for enhancing the socio-economic status of women.

Chairperson BISP also invited Chairperson CWF to visit Pakistan so that the later can have an on hand knowledge of BISP's interventions in the social sector.

Chairperson China Women Federation appreciated the efforts of BISP and said that the programme is doing a great job of women in Pakistan. She lauded the efforts of Farzana Raja for socio-economic empowerment of women raising their status in society and given them self respect and dignity. Chairman China Women Federation said that Pak-China friendship goes back to ancient times and this common heritage has been passed from generation to generation. Presently Pakistan and china have high quality strategic partnership.

China-Euroasia Expo 2011 a major event: Masood Khan -- APP

China-Euroasia Expo 2011 a major event: Masood Khan

BEIJING, Aug 29 (APP): Ambassador Masood Khan on Monday said that China-Eurasia Expo 2011 was a major event which would cover trade and economic relations not only between China and Central and South Asia, but also between China and the entire Asian Continent and Europe. President Asif Ali Zardari will be the chief guest at the inaugural cultural performance as well as a key speaker at the main forum on 'China-Eurasia Forum on Economic Development and Cooperation', Ambassador Khan said in an interview with APP.

He said that President Zardari's visit would be a good occasion to take stock of the situation and strategize to steer the entire region towards the economic development, generation of livelihoods, and enhancing economic connectivity. He further said that nine ministerial forums would take up subjects such as agriculture, tourism, media, culture and finance.

President Zardari, Ambassador Khan said, would use this opportunity to share his vision about enhanced connectivity between Pakistan and China to shorten trade and travel distances between the Gulf and Western regions of China by establishing corridors passing through the territory of Pakistan.

President Zardari will have a meeting with Executive Vice Premier Li Keqiang, who is a fifth generation leader, said the Ambassador.

"Naturally, when the two leaders will meet, they will discuss strengthening of strategic partnership, economic cooperation, and trade ties," added the Ambassador.

He said that the two sides would review the entire gamut of bilateral relations, with the sharp focus on the dividends of Expo 2011 for Pakistan and China. The President will also be hosted by the top provincial leadership.

Pakistan and China, the Ambassador said, had recently established a Joint Energy Working Group which had identified joint projects covering conventional and renewable energy to deal with the power shortages in Pakistan as well as to generate abundant energy to meet long-term consumer and industrial needs of Pakistan.

The President will explore with the Chinese leadership ways to put these projects on fast track and resolve financial, technical and procedural issues, he added.

"The President's focus will also be on finance and banking. ICBC has recently opened branches in Islamabad and Karachi. We hope that the Bank will expand its operations in Pakistan and provide credit for mega projects. State Bank of Pakistan has also been discussing a Currency Swap Arrangement with the People's Bank of China," Khan noted.

Ambassador Khan said that this time CEOs heading corporations specializing in alternate energy (wind power), oil and gas exploration, electric transformation and transmission, vehicle manufacturing, and shipping would be calling on the President. Some have existing businesses; others want to explore new avenues. A major emphasis, however will be on finance and banking links.

The President has advocated road-rail-air networks connecting Pakistan's northern areas with Xinjiang and energy (oil and gas pipelines) and communication (fiber optic) corridors between Pakistan and China that would connect Shanghai to Urumqi to Gwadar to the Strait of Hormuz.

"These new economic arteries will transform the destiny of the region and usher in a new period of peace and stability", he noted.

This Expo, Ambassador Khan said, "replaces an economic relations and trade fair that China used to organize since 1992. The scale of the Expo is bigger and it fits into China's Grand Western Development Strategy".

Khan pointed out that as China develops its Western region, especially Xinjiang, it wants to invite neighbouring countries, such as Pakistan to participate in this development process and reinforce cross-border economic complementarities.

Ambassador Masood Khan said that the Expo will have 321 booths which will display the investment environment of Central, West, and South Asian, as well as European countries, he said adding the Expo will be used for introducing investment policies; matching investment; exploring cooperative projects; and demonstrating future commodities.

"Pakistan has also established its own pavilion under the aegis of the Trade

Development Authority of Pakistan (TDAP). It will be located in the Eurasia (international) section", Khan noted.

Ambassador Masood Khan said Pakistan's relations with Xinjiang province are already strong. The trade between the two sides has been increasing. Pakistan looks forward to participating in the Kashgar Special Economic Zone (SEZ), which will turn this region into a gateway to Central and South Asia.

He said businessmen and entrepreneurs from Gilgit-Baltistan, Khyber-Pakhtunkhwa, Punjab and Karachi have already gained exposure in the Xinjiang markets. The time is ripe for expanding these links. The Kashgar SEZ will be a catalyst in this regard.

In the realm of counter-terrorism, Pakistan and China enjoy full solidarity and trust, Khan said and added that for years, Pakistan and China have been working productively to counter terrorism and to frustrate the designs of ETIM, he said adding that this cooperation has been intensified.

"China has always recognized Pakistan's contribution in the war against terrorism and noted Pakistan's resolve that it would never allow its soil to be used for terrorist acts. China has also supported Pakistan's efforts to uphold its sovereignty, independence, and territorial integrity", Khan remarked.

3rd Pak-China Business Forum held in Shanghai

KARACHI - The Chinese Government has assured that its traders and businessmen will participate in the 6th Expo Pakistan being held in Karachi from October 2011 20-23. As the Pakistani side has attended various exhibitions and business forums held in China during the last eight months, the Chinese delegation would also explore further trade and business opportunities in Pakistan. According to sources, this was affirmed by Chinese Council for Promotion of International Trade (CCPIT) Vice Chairman Zhao Jianding, and of Shanghai Municipal Commission Commerce Director General Yu Jian Ming, on the occasion of 3rd Pakistan-China Business Forum held in Shanghai on August 30, 2011. They further stated that there is need to increase the trade and business relations of Pakistani businessmen with region located at Eastern Coast of China and at the Yangtze River Delta. Speaking on the occasion, Tariq Puri, Chief Executive Trade Development Authority of Pakistan (TDAP) that stated that the TDAP is extending all necessary support to the CCPIT in organising a "China Pavilion" at the Expo Pakistan 2011, in order to facilitate the participation of Chinese companies in this upcoming event, which also celebrates the 60th year of friendship between the two countries.

Puri stated that Pakistan has already declared China as the focus country for its trade initiatives in 2011-2012 and plans to participate in more than 20 fairs in China. Through this outreach programme, TDAP is accessing different regions of China to introduce and establish the brand "Pakistan" which can be relied for its quality and competitive offerings in various sectors like textile, leather, fisheries, food products, marble, gemstones and minerals.

TDAP and Pakistan's Consulate General of Shanghai has clubbed the third forum with inter-textile exhibition of home textiles held in Shanghai from August 29-31, 2011. TDAP CE Tariq Puri delivered a keynote speech apprising participants about the flourishing textile sector of Pakistan. He said that it is a good opportunity for Pakistani businessmen to introduce and display their products. This event has helped in boosting bilateral trade between China and Pakistan and to ensure exposure of home textiles of Pakistan in the Chinese market.

President Zardari arrives in Urumqi to attend China-Eurasia Expo -- By APP

President Zardari arrives in Urumqi to attend China-Eurasia Expo
URUMQI - 30th August 2011

President Asif Ali Zardari was given a warm red-carpet welcome when he arrived here Tuesday on a three-day visit to China to participate in the first ever China-Eurasia Expo being held in the historic city of Urumqi, the capital of Xingjian Uygur Autonomous Region and the largest province of China.

During the visit, which is aimed at strengthening business to business linkages between the two countries, the President besides attending the Expo will meet Chinese Vice Premier Li Kequang.

President Zardari will also hold meetings with the Chinese corporate leaders during which he is expected to discuss the prospects of enhanced Pak-China trade and investment cooperation in diverse fields.

The President besides attending the opening ceremony of China-Eurasia Expo will also address the main event 'China-Eurasia Forum on Economic Development and Cooperation' on September 1 (Thursday).

He will also visit the Pakistani pavilion being set up at the China-Eurasia Expo.

President Asif Ali Zardari received a red-carpet welcome when he arrived here on Tuesday -- URUMQI:

URUMQI:

President Asif Ali Zardari received a red-carpet welcome when he arrived here on Tuesday on a three-day visit to China to participate in the first China-Eurasia Expo being held in Urumqi.

Upon arrival at the Urumqi airport, the president was received by the vice governor of Xinjiang province. Pakistan's Ambassador to China Masood Khan and other officials from the Pakistan embassy were also present at the airport to receive the president.

The president, besides attending the expo, will meet the Chinese Vice Premier Li Kequang during the visit. He will also hold meetings with Chinese corporate leaders to discuss the prospects of enhanced Pakistan-China trade and investment cooperation in diverse fields.

Besides attending the opening ceremony of China-Eurasia Expo 2011, the president will address the China-Eurasia Forum on Economic Development and Cooperation on Thursday.

He will also visit the Pakistani pavilion being set up at the expo.

The first China-Eurasia expo, which will replace the former Urumqi Foreign Economic Relations and Trade Fair, is expected to be a platform for diplomacy between China and the Eurasian states.

Ambassador Masood Khan said that Pakistan, owing to its territorial and historic linkages with Xinjiang, could benefit from the fast development of the region.

He said that President Zardari had a vision for regional economic development through enhanced connectivity. He said that the president's participation in the expo and the key-note address during the China-Eurasia Forum on Economic Development and Cooperation would provide him with a good opportunity to share his thoughts on regional economic integration.

China “appreciates Zardari’s gesture of bringing with him CM Gilgit – Baltistan” -- Posted by Pamir Times

China “appreciates Zardari’s gesture of bringing with him CM Gilgit – Baltistan”

“Re-linking of KKH one of the important issues discussed at high level meeting”
URUMQI, Aug 31 (APP): President Asif Ali Zardari and Chinese Executive Vice Premier Li Keqiang on Wednesday agreed to further bolster the existing close and multi-faceted strategic ties between the two countries through enhanced cooperation in diverse fields, with particular focus on trade, energy, communication, infrastructure development and agriculture sectors. President Zardari and China’s Executive Vice Premier, who met here on the eve of first China-Eurasia Expo, besides discussing in detail the whole range of bilateral relations as well as ways and means to further strengthen these ties, also exchanged views on regional and international issues of mutual interest.

During the meeting, the President was assisted by Foreign Minister Hina Rabbani Khar, Commerce Minister Makhdoom Amin Fahim, Defence Minister Ch Ahmed Mukhtar, Petroleum and Natural Resources Minister Dr. Asim Hussain, Chief Minister of Gilgit-Baltistan Syed Mehdi Shah, Prime Minister of Azad Jammu and Kashmir Chaudhary Abdul Majeed, Chairman of Board of Investment Salim H. Mandviwala, President of Federation of Pakistan Chambers of Commerce and Industry (FPCCI) Senator Haji Ghulam Ali, Pakistan’s Ambassador to China Masood Khan and Spokesperson Farhatullah Babar.

Farhatullah Babar told mediapersons that the Chinese Executive Vice Premier appreciated President Zardari’s gesture of bringing with him the Chief Minister of Gilgit Baltistan and welcomed him to the meeting.

The President expressed his satisfaction over the growing Pak-China strategic and defence cooperation. He also appreciated the Chinese help in launching PAK-SAT 1R satellite on Aug 12 this year and termed it another milestone in Pak-China relations.

He said that the two sides needed to expand existing maritime cooperation into a more comprehensive strategic maritime partnership. Pakistan would welcome Chinese investment in trans-regional cooperation projects, involving economic project cooperation between Pakistan, Afghanistan and China, he added.

Welcomed the opening of ICBC’s branches in Pakistan, the President said, “we would welcome further Chinese investment in our banking sector.” He hoped that the People’s Bank of China would speed up conclusion of a currency swap agreement.

He also lauded China for its substantial, timely and targeted assistance for the recovery of flood victims as well as help and support to overcome Attaabad lake problem in Gilgit-Baltistan.

The President said since it was important to re-establish the strategic road link of Karakoram Highway (KKH), the Government of Pakistan had accepted the proposal of China Reconstruction Bridge Corporation (CRBC) for the construction of 13 kms of new route and rehabilitation of 22 kilometers of existing sections of KKH by lowering water level of the lake.

The widening and up-gradation of Karakoram Highway would further facilitate and enhance the trade and people-to-people contacts, he added. The President also sought Chinese investment in the proposed new city of Zulfikarabad in Sindh. Apprising the Chinese Vice Premier about Pakistan’s plan to float infrastructure bonds backed by the natural resources in oil and gas, he invited the Chinese investment in the Infrastructure Bonds.

The President also apprised the Chinese Executive Vice Premier about the challenges facing Pakistan and appreciated China’s support for Pakistan’s stability and social development in the challenging times.

He also appreciated China’s principled stand in support of Pakistan in the aftermath of killing of Osama Bin Laden and for standing by it at every critical juncture. Pakistan will continue to seek guidance and assistance in the common pursuit of rooting out terrorism from the region, he added.

The President thanked China for its continued support for Pakistan’s stability and sovereignty as well as for standing by it at every international forum.

About Pak-India relations, the President said Pakistan wished to have good neighbourly relations with India and was committed to a constructive, sustained and result-oriented engagement.

He said Pakistan and India had taken some positive steps in this respect and hoped that the peace process would gain momentum in the days to come.

Pakistan would like to continue to work with India to resolve all outstanding issues peacefully and in a just manner, he added.

Discussing the situation in Afghanistan, President Zardari said that stability and peace in Afghanistan was critical for peace in the region. He added that Pakistan was supportive of an Afghan-led and Afghan-owned process of reconciliation.

The President also welcomed the Chinese development projects in Afghanistan and said that the economic development of Afghanistan was vital for its political stability and peace.

About militancy, the President said, "although militants were created by the international community as a war weapon to fight a rival ideology, it is now our responsibility to deal with them."

"It is a long-drawn battle and we are fully capable and poised to fight this menace", he said and highlighted the importance of international unity as well as support to Pakistan.

China, Pakistan vow to boost ties -- URUMQI (NNI):

China, Pakistan vow to boost ties

Posted on September 3, 2011

URUMQI (NNI): The leaders of China and Pakistan have vowed to strengthen strategic ties between decades old close friend countries. President Asif Ali Zardari during his visit to China on an official tour, met with the Deputy Prime Minister of China Li Keqiang on delegation level in Urumqi. During the meeting both leaders have agreed to expand Sino-Pak strategic ties. The Sino-Pak delegations also exchanged views on enhancement of cooperation in various fields including trade, energy, communication and agriculture. Both the leaders met here on the eve of first China-Eurasia Expo, besides discussing in detail the whole range of bilateral relations as well as ways and means to further strengthen these ties. They also exchanged views on regional and international issues of mutual interests. During Sino-Pak dialogue in Urumqi day, various prominent ministers of both countries including foreign affairs, defense and trade were also present in the meeting. Spokesperson Farhatullah Babar told media persons that the Chinese Executive Vice Premier appreciated President Zardari's gesture of bringing with him the Chief Minister of Gilgit Baltistan and welcomed him to the meeting. President Zardari described China as Pakistan's closest friend and a strategic partner as high level of trust existed between the leadership and people of the two countries. He said that the political parties, state institutions and people of Pakistan considered China as the lifeline for their country. The President recalled the visit of Premier Wen Jiabao to Pakistan in December 2010 as a heart warming event and expressed satisfaction over the progress in Pakistan-China political, defence, security and economic co-operation, with determination to take it to 'new heights'. The President appreciated Ambassador Masood Khan for his role in further strengthening the Pak-China ties and described him as Pakistan's most important ambassador in the world. President Zardari said that Pakistan greatly valued China's economic support and assistance and wanted to enhance economic and trade links, with an ultimate goal of closer economic integration. He stressed the need for closer Pak-China collaboration in agriculture, irrigation, energy, infrastructure development and railways etc. The President sought Chinese investment in Pakistan's water and energy related mega projects, including Thar coal gasification for electricity generation and hydro-power projects. He expressed his confidence that the Pak-China Joint Energy Working Group, the first meeting of which was held recently, would find new ways to make and implement long-term plans for conventional, renewable and nuclear energy cooperation between the two countries. The President in this respect also proposed setting up of an umbrella corporation under energy cooperation mechanism called 'Pakistan China Power Corporation'. The corporation would include specialists and entities from all fields – conventional and alternate. The President noted with satisfaction the increase in bilateral trade volume by \$ 2 billion to \$ 8.7 billion, which depicted the overall growth of 28 per cent and added that since the current trade did not commensurate with the close and strategic ties there was a need to take steps to meet the target of \$ 15 billion in the next three to four years and achieve even more. President Zardari during the meeting also reiterated Pakistan's full support to China's core issues, including its position on Taiwan and Tibet.

Fast work likely on Balochistan communication projects -- THE NATION

Fast work likely on Balochistan communication projects

Published: September 04, 2011

ISLAMABAD - In order to complete the delayed road projects of comparatively deprived province, the government is likely to speed up work on Balochistan's communication projects soon.

In this prioritising policy, work on Gwadar Link Road and other delayed projects would be sped up, as some of the projects could not be completed in stipulated time due to certain reasons, sources in Communication Ministry told TheNation. They said over 40 per cent was still remaining on Sorab-Basima-Naag-Panjgur-Hoshab (454-km) Road even after passage of three years, as this project was considered to be one of the important projects of this province.

Another important project - the Gwadar Port road - is yet to be completed. The delayed payment and various other factors remained the reasons behind its delay. Work on this project would be carried out on priority basis, said the sources.

Other projects including (N-25) Widening of Kalat-Quetta-Chaman, Kalat-Quetta(60 km), Quetta-Chaman(57 Km), Lakpass Tunnel (180M), Musli Bagh-Qila Saifulla (50km), Ormara-Pasni section and others are still not completed even after passage of their completion dates. Work on these projects would be started with pace to complete them as early as possible, said the sources.

It is relevant to mention here that a couple of weeks back, the Federal Minister for Finance Dr Abdul Hafeez Sheikh had held a meeting discussing the progress of different sections of Gwadar Link Road to Rattodaro and other projects.

Considering the importance of these projects, the meeting decided a mechanism to prioritize comparatively deprived province Balochistan extra ordinary delayed projects for early completion.

Abdul Hafeez Sheikh had said that Gwadar Port Project was vital for the uplifting desert areas and coastal lines of Balochistan.

It is relevant to mention here that M-8 (GWADAR-TURBAT-HOSHAB (193-km) that has 75 per cent completed and there were much chances to complete it by December 2012 on its completion date. Likewise, work on N-85 (Hosbad-Panjgur-Naag-Basima-Sorab) (454 KM) is underway and its completion date is in June 2014.

Pak-China discuss PoK-Xinjiang rail line -- APP

China have started discussion on building a cross-border railway linking northern areas of Pakistan-occupied Kashmir [Images] with Kashgar, an old Chinese Silk road town in the restive northwestern Xinjiang province.

Masood Khan, Pakistan's Ambassador to China, said that a feasibility study of the railway had been conducted but there was still no time-table for starting the construction.

"By using this option, you can shorten China's trading routes from the Gulf to Shanghai by about 5,000 miles. It is very short," Pakistan state-run APP news agency quoted Khan as telling the Chinese media.

He said talks about a cross border pipeline that can carry oil and gas to China via inland Eurasia have also begun.

Pakistan President Asif Ali Zardari [Images], who concluded his three day visit to the troubled Chinese province last week, said the region plays a strategic role in firming up the relationship between China and Pakistan.

China has blamed militants of the East Turkistan Islamic Movement (ETIM) trained in Pakistan based terror camps for creating unrest in Muslim Uygur majority in Xinjiang.

Pakistan's Information Minister Firdous Ashiq Awan, who is in Beijing [Images] on an official visit, underlined the need to change strategy to counter ETIM militants.

"They (terrorists outfits) keep on changing their strategies and actions. So we must work in close collaboration and also change our actions, and that can only be done through close coordination and mutual understanding," Awan told the Chinese media.

With better coordinated efforts, we can curtail terrorism, she said, condemning the recent attacks by the banned ETIM militants in Kashgar, close to PoK. China is already helping Pakistan and has always supported its efforts to eliminate the menace, she was quoted as saying by APP.

Pakistan's Information Minister Firdous Ashiq Awan, who is here on an official visit, underlined the need to change strategy to counter ETIM militants.

"They (terrorists outfits) keep on changing their strategies and actions. So we must work in close collaboration and also change our actions, and that can only be done through close coordination and mutual understanding," Awan told the Chinese media.

With better coordinated efforts, we can curtail terrorism, she said, condemning the recent attacks by the banned ETIM militants in Kashgar, close to PoK. China is already helping Pakistan and has always supported its efforts to eliminate the menace, she was quoted as saying by APP.

Pakistan Information Minister underlined that Pakistan is committed to fight terrorism and has always supported steps to ensure peace and stability in the region.

Awan said China and Pakistan are working in close coordination for peace in the region and both the countries have mechanism in place for intelligence sharing to stamp out scourge of terrorism and extremism. Awan said APP was planning to formulate specific segment of news sharing in Chinese language.

She said Pakistan was in 'talks to give landing rights' to Chinese state-run TV channel CCTV as given to international electronic media outlets. The minister said that we are also examining how the Chinese language programmes in Pakistan vis-

a-vis Pakistani programmes, including drama, documentaries, arts and culture and youth programmes can be telecast in each other countries.

"We want deep interaction between Radio Pakistan and China Radio International (CRI)," she noted.

"Most importantly, we are seeking the help of Chinese government in establishing Media University where we can impart trainings to media professionals in various fields as this would help better orientations for them," Awan said.

An important four-power summit concluded in Tajikistan on September 2 where Pakistan, Tajikistan, Russia and Afghanistan -- THE NEWS
An important four-power summit concluded in Tajikistan on September 2 where Pakistan, Tajikistan, Russia and Afghanistan agreed to work closely to combat terrorism, drug trafficking and organised crime, and stressed the importance of linking their countries through modern highways and railroads. Significantly, Russia lamented the lack of progress in Pakistan-Afghanistan energy projects that could help bring stability to the volatile region. "There's a whole range of projects that have been on the table for a long time which have seen no movement forward and which should be implemented," the Russian president said, referring to the transnational gas pipeline and the CASA-1000 through which power will be sent from Tajikistan to Afghanistan and Pakistan. Indeed, like previous years, this year too there was talk of Central Asian electricity, and like previous years, the transport infrastructure needed to be able to achieve this continues to be missing. Given that Pakistan has been consistently looking to Tajikistan to strengthen its national power grid and Tajikistan has been eyeing Gwadar for an outlet to the sea through Pakistan, it is important to correct this infrastructure deficit and aim for the early establishment of air, road and rail links from Central Asia to Pakistan. In this regard, the road link from Dushanbe to Chitral in Pakistan and through Iskatul Gulkhana in Afghanistan is a welcome idea. It will also link the ports in Gwadar and Karachi to Dushanbe and onwards to Russia.

In Tajikistan, the leaders also stressed cooperation to fight and eradicate terrorism and extremism. Most important in this regard was the Russian and Pakistani suggestion that the Nato-led coalition in Afghanistan step up training of local security forces as it completes its phased withdrawal so that the new Afghan force is able to independently provide for the defence capabilities of the state, and combat extremist groups and drug traffickers. Russia is most keen to demonstrate it is playing a constructive role in improving security in a region where it has had a major influence historically and where it now wants to expand its footprint, especially as relations between Islamabad and Washington plummet. The thrust of the Tajikistan summit, as of the Shanghai Cooperation Organisation, is to replace terrorism with trade as the mode of communication between states. Indeed, if Pakistan wants to become a player in the Central Asian region, it is essential to establish trade and trade routes and stand firmly against the export of extremism from non-state actors. For decades, Pakistan has been quietly supplying the food markets of Central Asia through smuggling. The Pakistani potential for growing food crops can only be realised if it becomes a permanent source of supply to the region through secure and formal trade routes.

Zardari, Li Keqiang agree to bolster Pak-China strategic Ties -- 'Pakistan Times' Foreign Desk

URUMQI (China): President Asif Ali Zardari and Chinese Executive Vice Premier Li Keqiang on Wednesday agreed to further bolster the existing close and multi-faceted strategic ties between the two countries through enhanced cooperation in diverse fields, with particular focus on trade, energy, communication, infrastructure development and agriculture sectors.

President Zardari and China's Executive Vice Premier, who met here on the eve of first China-Eurasia Expo, besides discussing in detail the whole range of bilateral relations as well as ways and means to further strengthen these ties, also exchanged views on regional and international issues of mutual interest.

The President was assisted by Foreign Minister Hina Rabbani Khar, Commerce Minister Makhdoom Amin Fahim, Defence Minister Ch Ahmed Mukhtar, Petroleum and Natural Resources Minister Dr. Asim Hussain, Chief Minister of Gilgit-Baltistan Syed Mehdi Shah, Prime Minister of Azad Jammu and Kashmir Chaudhary Abdul Majeed, Chairman of Board of Investment Salim H. Mandviwala, President of Federation of Pakistan Chambers of Commerce and Industry (FPCCI) Senator Haji Ghulam Ali, Pakistan's Ambassador to China Masood Khan and Spokesperson Farhatullah Babar.

Babar told mediapersons that the Chinese Executive Vice Premier appreciated President Zardari's gesture of bringing with him the Chief Minister of Gilgit Baltistan and welcomed him to the meeting.

President Zardari described China as Pakistan's closest friend and a strategic partner as high level of trust existed between the leadership and people of the two countries. He said that the political parties, state institutions and people of Pakistan considered China as the lifeline for their country. The President recalled the visit of Premier Wen Jiabao to Pakistan in December 2010 as a heart warming event and expressed satisfaction over the progress in Pakistan-China political, defence, security and economic co-operation, with determination to take it to 'new heights'.

The President appreciated Ambassador Masood Khan for his role in further strengthening the Pak-China ties and described him as Pakistan's most important ambassador in the world. President Zardari said that Pakistan greatly valued China's economic support and assistance and wanted to enhance economic and trade links, with an ultimate goal of closer economic integration. He stressed the need for closer Pak-China collaboration in agriculture, irrigation, energy, infrastructure development and railways etc.

The President sought Chinese investment in Pakistan's water and energy related mega projects, including Thar coal gasification for electricity generation and hydro-power projects. He expressed his confidence that the Pak-China Joint Energy Working Group, the first meeting of which was held recently, would find new ways to make and implement long-term plans for conventional, renewable and nuclear energy cooperation between the two countries. The President in this respect also proposed setting up of an umbrella corporation under energy cooperation mechanism called 'Pakistan China Power Corporation'. The corporation would include specialists and entities from all fields - conventional and alternate.

The President noted with satisfaction the increase in bilateral trade volume by \$ 2 billion to \$ 8.7 billion, which depicted the overall growth of 28 per cent and added that since the current trade did not commensurate with the close and strategic ties there was a need to take steps to meet the target of \$ 15 billion in the next three to four years and achieve even more. President Zardari during the meeting also reiterated Pakistan's full support to China's core issues, including its position on Taiwan and Tibet. Pakistan is firmly opposed to any attempts to undermine China's sovereignty and territorial integrity, he added.

The President expressed his confidence that the government and the patriotic people of China would succeed in frustrating designs of the evil forces of terrorism, extremism and any attempt to undermine territorial integrity. He said that Pakistan was committed to fighting terrorism in all its forms and manifestations. The President expressed his satisfaction over the growing Pak-China strategic and defence cooperation. He also appreciated the Chinese help in launching PAK-SAT 1R satellite on Aug 12 this year and termed it another milestone in Pak-China relations.

He said that the two sides needed to expand existing maritime cooperation into a more comprehensive strategic maritime partnership. Pakistan would welcome Chinese investment in trans-regional cooperation projects, involving economic project cooperation between Pakistan, Afghanistan and China, he added. Welcoming the opening of ICBC's branches in Pakistan, the President said, "we would welcome further Chinese investment in our banking sector." He hoped that the People's Bank of China would speed up conclusion of a currency swap agreement. He also lauded China for its substantial, timely and targeted assistance for the recovery of flood victims as well as help and support to overcome Attabad lake problem in Gilgit-Baltistan.

The President said since it was important to re-establish the strategic road link of Karakoram Highway (KKH), the Government of Pakistan had accepted the proposal of China Reconstruction Bridge Corporation (CRBC) for the construction of 13 kms of new route and rehabilitation of 22 kilometers of existing sections of KKH by lowering water level of the lake. The widening and up-gradation of Karakoram Highway would further facilitate and enhance the trade and people-to-people

contacts, he added. The President also sought Chinese investment in the proposed new city of Zulfikarabad in Sindh.

Apprising the Chinese Vice Premier about Pakistan's plan to float infrastructure bonds backed by the natural resources in oil and gas, he invited the Chinese investment in the Infrastructure Bonds. The President also apprised the Chinese Executive Vice Premier about the challenges facing Pakistan and appreciated China's support for Pakistan's stability and social development in the challenging times. He also appreciated China's principled stand in support of Pakistan in the aftermath of killing of Osama Bin Laden and for standing by it at every critical juncture. Pakistan will continue to seek guidance and assistance in the common pursuit of rooting out terrorism from the region, he added.

The President thanked China for its continued support for Pakistan's stability and sovereignty as well as for standing by it at every international forum. About Pak-India relations, the President said Pakistan wished to have good neighbourly relations with India and was committed to a constructive, sustained and result-oriented engagement. He said Pakistan and India had taken some positive steps in this respect and hoped that the peace process would gain momentum in the days to come. Pakistan would like to continue to work with India to resolve all outstanding issues peacefully and in a just manner, he added.

Discussing the situation in Afghanistan, President Zardari said that stability and peace in Afghanistan was critical for peace in the region. He added that Pakistan was supportive of an Afghan-led and Afghan-owned process of reconciliation. The President also welcomed the Chinese development projects in Afghanistan and said that the economic development of Afghanistan was vital for its political stability and peace. About militancy, the President said, "although militants were created by the international community as a war weapon to fight a rival ideology, it is now our responsibility to deal with them." "It is a long-drawn battle and we are fully capable and poised to fight this menace", he said and highlighted the importance of international unity as well as support to Pakistan.

A ship MV Hyderabad carrying 35,000 metric tons (MT) of urea has arrived and berthed at Gwadar Port -- DAWN

KARACHI: A ship MV Hyderabad carrying 35,000 metric tons (MT) of urea has arrived and berthed at Gwadar Port on Monday, said a Trading Corporation of Pakistan (TCP) official.

He said two more vessels MV Siam Topaz and MV Warnow Merker, each carrying 25,000 MT urea are scheduled to arrive at Gwadar Port on Wednesday and Thursday respectively.

The shipment arrived via MV Hyderabad comprises urea imported from M/s Saudi Basic Industries Corporation (SABIC) under the Saudi Fund for Development.

This shipment is in addition to the 50,000 MT urea, already supplied by them in July this year, under the same arrangements, said the official.

The urea being carried by MV Siam Topaz and MV Warnow Merker is in accordance to TCP's second tender awarded to M/s Transammonia AG Switzerland and M/s Key Trade Ag. Switzerland.

The TCP official said M/s National Fertilizer Marketing Limited (NFML) will transport the imported urea from the port to subsequent sales points established for the farmers.

Gilani arrives in Astana on two-day visit -- APP

Gilani arrives in Astana on two-day visit

ASTANA (Kazakhstan), Sept 6 (APP): Prime Minister Syed Yusuf Raza Gilani arrived here Tuesday on a two-day official visit to hold talks with the Kazakh leadership on diverse issues particularly trade and energy. The Prime Minister was received at the Astana International Airport by Kairat Sarybai, Deputy Foreign Minister and Co-chairman of Pak-Kazakh Commission Pakistan's Ambassador to Kazakhstan Muhammad Akhtar Tufail and Kazakh Ambassador in Pakistan Bakhitbek Shabarbaev were also present. The Prime Minister was given a salute by a smartly turned out contingent of Kazakh armed forces as he alighted from his aircraft.

Two youngsters clad in traditional outfits presented bouquets to the visiting dignitary. The Prime Minister's entourage included Governor of Punjab Latif Khosa, Minister for Production Anwar Ali Cheema, member of the National Assembly Qamar Zaman Kaira, Senator Ghulam Ali and Faisal Ahmad, a businessman. Prime Minister Gilani is visiting Kazakhstan for the first time on the invitation of his counterpart Karim Massimov.

This is also the first bilateral visit by a Pakistani leader to Kazakhstan after Prime Minister Mohtarma Benazir Bhutto visited this Central Asian state in 1995.

Ambassador Akhtar Tufail told APP that the Prime Minister's visit was significant in resuming relations with Kazakhstan after 16 years on bilateral basis. However, the two countries have been supporting each other at international fora, including SCO and OIC (Organization of Islamic Countries), he said.

He said the talks between Pakistani and Kazakh leadership would focus on trade, energy, science and technology, terrorism and intelligence sharing. He said the two sides would also discuss the importance of regional stability with specific reference to Afghan peace.

He mentioned the recent interest shown by Kazakh government to join the TAPI - the proposed gas line between Turkmenistan, Afghanistan, Pakistan and India.

He said that the landlocked Kazakhstan was also interested in exploring the potential of Gwadar seaport, that offered it the shortest route to the Arabian Sea. Ambassador Tufail said that the Prime Minister's visit was part of Pakistan's policy of regional outreach and strengthening relations with all its important neighbours, including the Central Asian states.

He said that the Prime Minister would also witness the signing of an agreement between Pakistan and Kazakhstan's chambers of commerce and industries.

During his stay, Prime Minister Gilani will hold talks with his Kazakh counterpart Karim Massimov and President Nursultan Nazarbayev to seek potential in areas of trade and commerce.

Pakistan wants to expand relations with the Central Asian state, which is rich in natural resources.

Gilani will also hold a joint interaction with media along with Prime Minister Massimov besides giving interviews to the leading Kazakh dailies.

The Prime Minister will visit the Monument of the Motherland Defenders and will also lay a wreath at the Eternal Flame.

Earlier, President Asif Ali Zardari visited Kazakhstan this June to attend the summit of Shanghai Cooperation Organization (SCO).

China to give \$4.7 mn emergency aid to Pakistan -- APP

China to give \$4.7 mn emergency aid to Pakistan

Aid of 30 million yuan (around \$4.7 million) to help the flood-affected people in the country's south, the Chinese ambassador to Pakistan said Sunday.

Liu Jian called on Pakistani Foreign Minister Hina Rabbani Khar Sunday to express the sympathy and solidarity of the Chinese people with Pakistan, Xinhua reported.

Diplomats and staff at the Chinese embassy in Islamabad recently voluntarily donated Rs.600,000 (about \$6,860) for people affected by the floods.

Chinese Foreign Minister Yang Jiechi has also sent a message to his Pakistani counterpart expressing condolences for the victims and sympathy for the affected people.

Pakistan Prime Minister Yousuf Raza Gilani has said at least 141 people have died and four million have been left homeless in the floods that hit the southern regions of the country.

Pakistani PM Gillani in Tehran Political Desk -- APP

Pakistani PM Gillani in Tehran Political Desk

Iranian Interior Minister Mostafa Mohammad-Najjar received Pakistani Prime Minister Syed Yousaf Raza Gillani on Sunday in Tehran. (IRNA photo)
TEHRAN – Pakistani Prime Minister Syed Yousaf Raza Gillani, accompanied with Foreign Minister Hina Rabbani Khar, arrived in Tehran on Sunday to hold talks with the Iranian leadership to enhance bilateral cooperation in diverse fields especially economy and trade.

The Pakistani prime minister was received at the airport by Iranian Interior Minister Mostafa Mohammad-Najjar and officials from Pakistan's embassy in Tehran.

According to Pakistan's embassy officials, Gillani and his delegation was given a red carpet welcome at the airport.

The Pakistani prime minister also has in its delegation minister for professional and technical training, Riaz Hussain Pirzada, Federal Minister Mir Israr Ullah Khan Zehri, and Senator Syeda Sughra Hussain Imam.

Since Gillani took office in March 2008, this is his first visit to Iran.

The prime minister will call on the Supreme Leader Ayatollah Seyyed Ali Khamenei, President Mahmoud Ahmadinejad, and First Vice-President Mohammad Reza Rahimi as well as meet Speaker of the Majlis Ali Larijani.

The two sides will discuss the entire gamut of Pakistan-Iran bilateral relations including the Iran-Pakistan gas pipeline project, opening of a new border post, and construction of an oil pipeline between the two countries and an oil refinery at Gwadar as well as regional and international issues.

The two sides will also focus on areas of security, industry, banking, trade, agriculture, oil and gas, transportation, communication, information and broadcasting, culture, science and education.

The Iran-Pakistan gas pipeline is being built between Asaloooyeh in southern Iran and Iranshahr near the border with Pakistan to carry gas from Iran's South Pars field to Punjab and Sindh provinces of Pakistan.

Iran is expected to begin supplying gas to Pakistan by middle of 2014 with daily sales of 750 million cubic feet reaching one billion cubic feet per day by mid 2015.

This week, the two neighbors signed an Economic and Technical Cooperation Agreement covering a vast range of bilateral commercial activities, the Associated Press of Pakistan reported.

The agreement was signed at the conclusion of the 18th session of their Joint Economic Commission (JEC) held in Islamabad on September 7-8.

At JEC session, they also signed two memorandums of understanding for setting up of a jointly owned Pakistan-Iran Investment Company and on cooperation between Pakistan Television Corporation and Islamic Republic of Iran Broadcasting.

The two countries have formed joint working groups to facilitate cooperation in agriculture and energy sector with Iran offering to sell 1100 megawatts of electricity to Pakistan, which is facing energy shortages.

Prime Minister Gilani in his talks with the Iranian leadership will fine tune the projects discussed at the Joint Economic Commission meetings.

Pakistan hopes to expand volume of trade with Iran from the current \$1 billion to \$5 billion within the next three years.

Both countries will look into impediments obstructing full implementation of Pakistan-Iran Preferential Trade Agreement (PTA) concluded in 2004. Already both sides have given bilateral trade concessions under PTA on more than 600 items.

Pakistan has proposed a bilateral Free Trade Agreement besides measures for economic integration and reduction in business transaction costs. Iran has expressed its keenness for opening of bank branches in each other's countries and negotiations are continuing on these issues.

Tehran has given its nod to review all tariff and non-tariff barriers on exports of Pakistan to Iran.

Both countries also plan to sign a memorandum of understanding to stop money laundering with cooperation between their Financial Intelligence Units.

The two countries are also considering building of Quetta-Taftan railway track, establishment of border markets and linking through optic fiber to boost commercial activities.

True friends: China first country to offer flood aid -- By PPI

True friends: China first country to offer flood aid

By PPI

Published: September 11, 2011

Chinese Government to dispatch relief goods worth 30 million RMB (US \$4.7million) for Pakistan flood affectees. PHOTO: REUTERS

ISLAMABAD: The Chinese Ambassador, HE Liu Jian called on Foreign Minister Hina Rabbani Khar Sunday to convey the decision of the Chinese Government to dispatch relief goods worth 30 million RMB (US \$4.7million) for the flood affectees.

He also conveyed sympathies of the Chinese Government regarding the devastation caused by the widespread monsoon rains.

The Foreign Minister thanked the Ambassador for the prompt response to the appeal for relief assistance.

She stated that as true friend of Pakistan, China was the first country to announce assistance for flood affected people in 2011.

The Foreign Minister underlined the magnitude of devastation caused by the floods. She apprised the Ambassador that the priority at this stage of relief and rescue was waterproof tents.

In the aftermath of the 2010 floods, China was one of the major international aid donors to Pakistan, providing over \$200 million in emergency flood aid.

While the Pakistan government has called for foreign aid to help with the devastating floods, PML-N chief Nawaz Sharif has spoken against foreign aid, saying that government resources were adequate and there was no need for seeking help from foreign countries.

Current flooding has reportedly taken 199 lives and destroyed or damaged nearly one million houses, and flooded 4.2 million acres of land.

China hands over US\$ 50,000 cheque to NDMA for flood -- PAKISTAN TODAY

ISLAMABAD - To assist Pakistan in relieving flood affectees, the Ambassador China to Pakistan Liu Jieng presented a cheque of US\$ 50,000 to the Chairman National Disaster Management Authority (NDMA), Dr. Zafar Qadir.

The Chinese ambassador also promised to extend further aid of US\$ 4.7 Million for the flood ravaged areas. China will also provide tents for the flood affectees, he added.

On this occasion Qadir said that this aid contribution from China will go a long way in strengthening the long standing bilateral ties between the neighborly countries. The recent floods have disrupted life and destroyed vital infrastructure in Sindh. The health, education and communication infrastructure has sustained substantial damage. A considerable part of land including cropped land has been inundated which has caused damage to 80% of cash crops. The fiscal scale of flood incurred damages range into Billions.

Senator Talha discusses Pak, China trade cooperation with Kashgar leadership -- BUSINESS RECORDER

Commissioner Cheng Zhen Shan and Akbar Ghafoor Deputy Commissioner of Kashgar Prefecture called on Senator Talha Mehmood and his delegation at the Kashgar Hotel Monday.

During the meeting Senator Talha said "Pakistan is passing through a difficult time, but we are confident that we will overcome our problems".

Senator Talha is leading a parliamentary delegation comprising of representatives from various political parties including JUI (F), PPP, ANP and United Party.

The delegation comprised of Naeem Hussain Chattha (Senator, PML-Q), Haji Muhammad Adeel (Senator, ANP), Abdul Haque alias Mian Mitha (MNA, PPP), Syed Ghulam Shah Bokhari (United Party) and Asim Kakakhel (JUI-F).

The parliamentary delegation has been invited to China by CPPCC and after visiting Beijing, the delegation is on visit to Kashgar followed by Urumqi in their ten-day stay.

Their visit is part of the 60th anniversary celebrations of the establishment of diplomatic relations between Pakistan and China. The governments of Pakistan and China have declared 2011 as the Year of Friendship.

He assured that his Committee is taking special measures to ensure the security of the Chinese working in Pakistan.

He pointed out that the President of the Federation of Commerce is from his party and he will ask him to send a delegation of leading businessmen to explore investment opportunities in Kashgar Special Economic Zone.

Yesterday the delegation visited Kashgar Special Economic Zone and were briefed about the plans for the SEZ.

In the afternoon the delegation had a luncheon meeting with Pakistani businessmen in Kashgar.

Upon reaching Urumqi on Monday Night, the delegation would visit Xinjiang Medical university and interact with Pakistani students.

Later the delegation would meet Governor Nur Bekri and Aisihati Kelimubai, Chairman CPPCC of Xinjiang. Followed by a banquet hosted by the Chairman.

Central Asia and trade expansion -- APP

Central Asia and trade expansion

The project to import energy and gas from the central Asian republics is in the pipeline and is a very important development for economic expansion of trade and bilateral relations. The recent visits of the top leaderships to the central Asian republics are significant in the context of expansion of Pakistan's trade in the future. With regard to this region, two great discoveries were made in the nineteenth and the twentieth centuries. This is the period when socio-economic and other history of the world was being compiled and written. One was the finding of the origins of the Gandhara heritage and the other was the discovery of the Indus valley or the Harappa civilisation. It gave a great perspective to the diversity of a cultural richness and economic history of development of a mercantile community in the region.

The trade routes through the north and north-west of the country have always been significant part of economic development of this region. From the days of the rise of the Indus valley civilisation to this day, these routes have been the conduit of trading in a vast variety of goods. Chronicles available from the times of Alexander's visit to Taxila and other parts of this region speak of thriving and prospering trading towns. As Buddhism spread to the Ghandara area, the monasteries had become the trading centres of repute. The coming of Buddhism had resulted in bringing great social and revolutionary reforms. In socio-political and economic terms, it produced thinking somewhat equivalent to liberal democratic thought today. It brought significant developments in social equality and harmony, thus challenging the orthodoxy that resisted any change. Buddha chose the popular language Magadhi for his teachings, instead of the classical language of the day which was not understood by the ordinary folks. From fifth to the seventh century, travelogues of at least three important Chinese visitors to these regions speak volumes of the potential these present day opportunities have in store for developing these trade openings.

A very timely and recent opening of an exhibition in New York on the Gandhara heritage of Pakistan, with artifacts borrowed from the Lahore and Karachi museums, speaks greatly of the rich history of the Pakistan area. This region has been home to not only one of the three significant and ancient civilisations but has been a repository of many later developments in different eras, spreading through the two millenniums to this day, that thrived in trade, commerce, art and architecture. Alexander entered South Asia through the Chitral region and visited Udayana, the present day valley of Swat, before crossing the Indus and heading south. The valley, along with other important towns of the Gandhara region, was home to many Buddhist monasteries that were also operating as centers of trade and commerce. The projection of an image of Pakistan as a country that can be genuinely portrayed as a country with a vast and important heritage of some of the great civilisations in world history, is sure to go a long way in helping to bring this country in the forefront of economic activity and trade.

The rail link from Pakistan to Europe has recently been completed and is sure to enhance trade through land to the Middle East and beyond. Along with the land routes, the building of railway passage through the northern routes is a sine qua non for the great expansion of trade through southern ports of Karachi and Gwadar. The Afghan-Pak trade is doing well but the great potential is to open access to the farther regions. We missed the opportunity back in the eighties when the developed countries had generously offered to upgrade the north-south road and rail links. The concerns of the world community are still the same and all help can be forthcoming if we can put up a transparent and efficient system to seriously implement the projects. The Motorway between Peshawar and Lahore/Faislabad needs to be extended all the way south down to the two important ports. Its natural access and expansion in to the central Asian region must be expedited through better diplomatic skills and projecting the rightful image of this country.

Minister reviews Chinese financing -- FRONTIER POST

Minister reviews Chinese financing

Posted on September 13, 2011

ISLAMABAD (INP): The Federal Minister for Finance and Economic Affairs Dr. Abdul Hafeez Shaikh has asked the concerned officials of Economic Affairs Division and Ministry of Commerce to prepare a full list of the memorandums of understanding (MOUs) so far signed with different countries and particularly with China. The list must contain the financial implications of these MOUs, their present stage and their magnitude after these projects are materialized. He also asked to include five-year game plan, its magnitude and to draw a clear picture indicating the feasibilities and bottlenecks in their way of materializing. This is he said while chairing the Pak China Portfolio Review Meeting. The minister also remarked that private to private sector business cooperation be also encouraged so that the people to people contact between the two countries may progress in trade and other socio economic fields. Currently China provides financing to Pakistan in form of grants, concessional loans, preferential buyer's credit and export/buyer's credit at different rates in which US\$ 1748 Million and RMB 270 million has already been provided to Pakistan on different portfolios in the recent past. The meeting at length discussed the projects namely "KKH Improvement projects" "KKH re-alignment Project" "\$ 200 million grant for flood affected areas" "Neelum Jhelum Hydropower project" "Construction of Small and Medium size dams" and "RMB 200 million grant to Ministry of Science and Technology" and negotiations with China Exim Bank with concerned federal ministries/ departments. for the completion of these projects It may be added that the Economic affairs division had a detailed meeting on 25/08/2011 with ministry of science and technology in which two weeks time was sought for the determination of the status of the Pakistan Agricultural Research Council (PARC) projects after the devolution process.

Pak takes part in Int'l Investment, Trade Fair, Arab Economic Forum in North West China -- APP

Pak takes part in Int'l Investment, Trade Fair, Arab Economic Forum in North West China

Date : 22-09-2011

YICHUAN, SEPT 21 (app): The opening ceremony of China (Ningxia) International Investment and Trade Fair and the Second China-Arab States Economic and Trade Forum kicked off in the Muslim dominated Ningxia Hu Autonomous Region's capital, Yinchuan here on Wednesday. The Chairman, CPPCC, Jia Qinglin was Chief Guest on the occasion. Pakistan has also established a pavilion at the fair which displays country's cultural heritage, food products and handicraft items. More than 76 countries and international organizations including 22 Arab countries are represented at the fair. During his speech, President of Mauritania, Muhammad Ould Abdel Aziz said that multilateral cooperation between China and Arab countries has grown from strength to strength with the passage of time.

He pointed out that China is the first choice for Arab investors.

The economies of China and Arab countries are highly complementary, he said adding that there is immense scope of sustainable mutual growth.

Later, in his keynote address at the Summit meeting of the second China-Arab States Economic and Trade Forum, Jia Qinglin said that China and Arab countries have a time-honored history of friendship dating back to two thousand years when the ancient Silk Road integrated the two regions together.

He said the friendly relations between the two have been deepening and broadening in the last few decades making their relations a good example of South-South cooperation.

"China and Arab countries are good brothers, partners and friends", Jia Qinglin remarked.

He mentioned that Arab countries are the 7th largest trading partner of China. He said Chinese investment in Arab countries has exceeded US\$ 15 billion while their investment in China is around US\$ 2.6 billion.

Ambassadors and officials from various countries were present on the occasion.

China sign agreements worth \$250 mn -- APP

China sign agreements worth \$250 mn

Pakistan and China have signed a number of agreements worth about \$250 million.

The agreements were in economic and technical cooperation, relief goods, emergency humanitarian assistance and rehabilitation of some damaged parts of the national highways networks, reported Associated Press of Pakistan.

The agreements were signed at a special ceremony here that was witnessed by President Asif Ali Zardari.

Agreements signed involved about \$ 250 million of Chinese assistance.

The signing took place Monday, a day when Chinese Vice Premier Meng Jianzhu arrived here on a two-day official visit to hold talks with the Pakistani leadership.

The visit by the Chinese leader, who holds charge of the public security portfolio, comes at a time of intense strain between Islamabad and Washington with the US pressurising Pakistan to launch an offensive against suspected militant elements in North Waziristan tribal agency.

US officials have accused Pakistan and its intelligence agency of supporting Taliban's Haqqani network. Pakistan has denied the accusations.

Zardari thanked China for its support to Pakistan on all issues of major concern to the country and its people.

He said that Pakistan was at present passing through a critical phase as it was battling terrorism as well as trying to reconstruct infrastructure that was damaged in floods.

China is best to handle Gwadar, says Brig Mir -- THE NATION

China is best to handle Gwadar, says Brig Mir

LAHORE - Pakistan can earn up to \$60 billion a year by properly using the Gwadar Port, a former military official says. Brig Nadir Mir said in an interview to Family magazine that former president Pervez Musharraf and Prime Minister Shaukat Aziz had taken a very wrong decision by signing an agreement with Singapore for the control of Gwadar Port. The step, he alleged, had been taken to please the US and India.

In his opinion China was the best country to handle the port.

Brig Mir said up to \$3 billion could be earned only by exporting fish from this port.

This was a better option than seeking assistance from the US, he emphasized. He proposed that the people of Balochistan should be made shareholders in the Gwadar Port. Also, he said, the reservations about settlement of people from other areas should be addressed. The non-locals should not have the right to vote for 20 years.

The brigadier said the construction of a defence base at Gwadar would bolster Pakistan's defence. Answering a question, Brig Mir said there was no secessionist movement in Balochistan till the assassination of Nawab Akbar Bugti. However, he said the tragedy provided the enemies of Pakistan an opportunity to start disturbances there.

Information ministry seeking control of Pak-China Friendship Centre -- APP

Information ministry seeking control of Pak-China Friendship Centre
GIFT: 2.5b rupees is the cost of the Pak China Friendship Centre which was sponsored by the Chinese government.

ISLAMABAD:

Ministry of Information and Broadcasting is making efforts to take control of Pakistan-China Friendship Centre, presently under the supervision of Capital Development of Authority (CDA), it has been learnt.

"There is no logic in giving a cultural centre to a civic body," said a senior official of the information ministry. He said that cultural activities do not fall under the purview of CDA, which serves to provide civic facilities to residents of Islamabad.

He said that the centre could be used generate revenues to fund the various cultural activities conducted by the information ministry.

The official said that the information minister will soon write to the prime minister to bring the Pak-China Friendship Centre under supervision of the information ministry, as an allied department of Pakistan National Council of the Arts (PNCA).

Sources said that some senior officials of CDA are reluctant to give up control of the centre, which includes a fully equipped auditorium with 800 seats, an exhibition centre, a conference room for 250 people and a multipurpose hall.

In the last meeting of the National Assembly Standing Committee on Information and Broadcasting, Information Minister Dr Firdous Ashiq Awan also expressed her reservation over giving cultural departments to different ministries. She said that since PNCA has been given to the information ministry then the Pak-China Friendship Centre should also be given to the same ministry as it is a cultural centre and has nothing to do with CDA.

The Pak-China Friendship Centre, inaugurated early this year, was a gift from the Chinese government. The Rs2.5 billion project took two years to complete and was left under the control of the Ministry of Culture.

However, after the devolution of the ministry under the 18th Amendment, the centre was handed over to CDA, Islamabad's civic body, while other cultural department including Lok Virsa and PNCA were given to the Ministry of Information and Broadcasting.

BUSINESS PERISCOPE: Urea ship arrives, one more to come: TCP -- Dawn

BUSINESS PERISCOPE: Urea ship arrives, one more to come: TCP

KARACHI: A ship carrying 27,420 metric tonnes of urea imported by Trading Corporation of Pakistan (TCP) has berthed at Gwadar Port Wednesday and began discharge of cargo. According to TCP Thursday, one more vessel carrying 52,066 MT urea is scheduled to arrive at Gwadar Port on October 10. Both the shipments are in response to TCP's tender awarded to Transammonia AG, Switzerland. In pursuance of decisions of the ECC of the Cabinet, a total of 610,000 MT urea has been imported by the TCP during the current year to meet the domestic demand. National Fertilizer Marketing Limited (NFML) was handling its subsequent marketing/sale. staff report

China to give \$5million aid in cash to Pakistan

Published: October 7, 2011

Chinese Ambassador Liu Jain called upon Foreign Minister Hina Rabbani Khar in Islamabad on Friday. China announced a further \$5 million in aid. PHOTO: APP
ISLAMABAD: Chinese Ambassador to Pakistan Liu Jian in meeting with Foreign Minister Hina Rabbani Khar on Friday told her that the Chinese government would be providing \$5 million in cash to the flood-hit people in the country, Foreign Office said.

China has already donated \$4.7 million for the flood victims while supplying an additional 7000 tents recently, Foreign Office statement said.

Khar appreciated China's timely assistance and this bears testimony to the time-tested friendship enjoyed by the two countries.

China was the first to announce assistance for flood-hit Pakistanis days before President Asif Ali Zardari launched international appeal for aid.

MoU signing with Chinese chamber -- THE NEWS

MoU signing with Chinese chamber

LAHORE: The textile sector is upbeat on the prospects of trade enhancement and joint ventures after signing a memorandum of understanding with Shandong Chamber of Commerce as Shandong generates \$100 billion of Chinese textiles exports, accounting for 60 percent yarn and fabric consumed in China, an official said on Friday.

Pak-China Investment Company Limited (PCICL) after evaluating the high prospects of mutually beneficial trade in textile between Pakistan and China facilitated the signing of MoU between All Pakistan Textile Mills Association (APTMA) and Shandong Chamber of Commerce, he said.

PCICL Managing Director Cao Wen Jiang said that the situation is similar to the conditions that prevail between the United States and Mexico.

The wages of Chinese basic textile workers are now three times the average wage of Rs8,000 drawn by Pakistani textile worker, he said.

You Wei Li, Deputy Chairman, Shandong Chamber of Commerce, said that the Shandong province is close to the South Korea and has a population of eight million with annual exports of \$200 billion.

More than 50 percent of the exports are of textiles, he said.

APTMA Punjab Chairman Ahsan Bashir said that China is gradually opting out of low value-added textiles, including yarn, which is the basic raw material for its textile industry.

The Chinese are looking for joint ventures in yarn production in Pakistan to ensure sustained supplies of this raw material to their industry, he said, adding that the free trade agreement (FTA) that China signed with Pakistan provides it huge advantage over its global competitors.

High textile delegations would frequently visit Shandong to accelerate trade and joint ventures in spinning fabric and apparel sectors, he said. Adil Butt, a leading apparel exporter, said that the Chinese have agreed to establish an apparel manufacturing unit in Pakistan in collaboration with local investors.

The unit would be run and managed by the Chinese that would reflect the Chinese style of operation and working, he said, adding that this venture would help bring positive change in work ethics of local apparel units.

APTMA Former Chairman Gohar Ejaz said that realising the acute power shortage in Pakistan, the Chinese have agreed to identify and set up coal-based power projects for the energy requirements of the textile clusters in Pakistan.

Since the market access for textile and clothing is of significant interest for the two countries, it was decided that Pakistan and China would enhance their endeavours and develop joint strategies to serve their mutual interests, he said. Pak-China Investment Company would facilitate financial support for joint ventures between the two countries. Pakistan's Finance Minister Dr Hafeez Shaikh is the chairman of the company.

Chinese Battery-Powered Bikes should be promoted: Butt -- ONLINE

Chinese Battery-Powered Bikes should be promoted: Butt
ISLAMABAD: President Islamabad Chamber of Commerce & Industry (ICCI) on Saturday appreciated Chinese invention and technological advancement in manufacturing battery-powered bikes and urged for its promotion in Pakistan.

According to a press release, Chinese businessmen showed interest to support the private sector development by promoting economic co-operation between the business sectors of the two countries.

The Chinese delegates highlighted the incentives of these battery-powered bikes and said that these bikes were not only providing benefit to the people but would also help the Government in its efforts to cut oil import bill and stop further environmental degradation. They also hinted at the possibility of these batteries being replaced by Solar Recharge batteries in alternate models.

Speaking on the occasion, Yassar Sakhi Butt, President ICCI appreciated Chinese invention and technological advancement in manufacturing battery-powered bikes as these are promising extremely low-cost environment-friendly transportation.

He said that Pakistan is facing severe energy crisis and it was become difficult for a common man to bear transport expenditure, so the idea of battery-powered bikes would ease the transport burden on the common man, protecting the environment and relieving the oil import bill.

ICCI President said that we welcome Chinese support at all levels and at all times, needles to say that Chinese companies are already engaged in different fields such as defense, telecom, petroleum, but this cooperation should further goes in agriculture, tourism and renewable energy sectors.

Yassar Sakhi Butt said that the year 2011 was declared as 'Pak-China Friendship Year' and emphasized on the need for the exchange of business delegations by both sides.

Chinese may invest in Thar coal -- THE NEWS

Chinese may invest in Thar coal

BEIJING: Ambassador of Pakistan to China Masood Khan has said that he would contact the Chinese conglomerate King Hu Group to invest in coal mining and railway infrastructure in Pakistan.

Khan said the Pakistan Embassy in Beijing had arranged a visit of the company officials to Pakistan for initial study of investment in Thar Coal and Power Project.

He said that news were afloat that the company has backed out from a billion dollar deal.

It is not possible for a company to back out if it hasn't gone forward, Khan said. "King Hu group was in Pakistan for only an initial study."

More than five Chinese companies are working on the Thar coal project and they have no fear of security, the Pak envoy said. One of biggest coal mining company in china, China Coal is working on Thar coal project with Engro Pakistan and they are making huge investments in the area, Khan said.

China is also working in Pakistan on mega projects including the upgrading of dams, manufacturing plants and other infrastructure projects, Khan said.

Iranian, Azerbaijan ambassadors meet governor -- Dawn

Iranian, Azerbaijan ambassadors meet governor

Published: October 15, 2011

LAHORE - Ambassador of Azerbaijan in Pakistan DASHGIN SHIKAROV called on Governor Punjab Sardar Latif Khan Khosa at Governor House, here on Friday and discussed bilateral relations between two countries and matters of mutual interests. Governor said Pakistan was one of the first countries to recognize the independence of Azerbaijan. He said Pakistan valued close brotherly relation with Azerbaijan, which were based on historical, cultural and religion commonalities. Governor thanked Azerbaijan Government's support and donation for the flood affected people of Pakistan.

Latif Khosa further said bilateral trade and economic cooperation could be greatly enhanced.

He was of the opinion that the bilateral trade volume, which currently stood at USD 11.55 million per annum was not commensurate with the potential the two countries had for the purpose.

Speaking on the occasion, Ambassador of Azerbaijan said the two countries had deep rooted relations and Azerbaijan would extend its cooperation and expertise in energy sector to help overcome energy crises in Pakistan.

Later, the outgoing Iranian Ambassador MASHALLAH SHAKARI also called on Governor who appreciated the efforts of the Ambassador to strengthen bilateral relations. Khosa said Pakistan would welcome Iranian assistance and help in re-habitation efforts and Irani Companies could participate in the construction of infrastructure projects in the flood affected areas.

Latif Khosa said both the countries need to expedite Gas Pipeline project, 1000 MW Taftan-Quetta Power Transmission Line and 100 MW Gwadar Supply Projects.

Governor said cooperation between two countries was growing and we would further foster and strengthen relations between the two brotherly countries.

The outgoing Iranian Ambassador Mashallah Shakri said Pak-Iran relations were based on mutual understanding. He said Iran and Pakistan had similar traditions, culture and both countries would further cement their ties.

Pak-Iran gas pipeline to bring industrial revolution: envoy Economic Desk -- (Source: agencies)

Mashallah Shakeri, Ambassador of Iran in Pakistan, said that Pak-Iran gas pipeline project would bring industrial revolution in Pakistan.

Addressing a meeting at Lahore Chamber of Commerce and Industry (LCCI), on Friday, he said that after quitting India from gas pipeline project, despite severe pressure. Iran did not let Pakistan and kept engaged with Pakistan on gas pipeline project.

Mashallah Shakeri further added that till next month the gas pipeline would reach to Pakistani border and under this agreement Pakistan would get 16 cubic feet gas from Iran.

Pak-Iran gas pipeline would strengthen relations of both the countries while it will escalate opportunities of trade and investment, he maintained.

Moreover, dialogue is in progress under which Iran will provide 1,000 megawatt electricity to Pakistan while it would help Pakistan to cope with the ongoing energy crises of Pakistan, said the Ambassador.

Iran has signed an agreement with government of the Punjab to establish a slaughter house in Lahore, he said.

On the occasion, President of LCCI Irfan Qaiser Sheikh said that trade volume between Pakistan and Iran is \$ 1 billion which would reach till \$ 5 billion in 2015. He proposed for Islamabad-Tehran-Istanbul train service which will increase trade opportunities.

The senior vice president of LCCI, the vice president, former presidents and members of Executive Committee, Iranian Consul General in Lahore and others

were also present on the occasion.

He said there was no doubt about it that both the sides consistently managed to maintain a bilateral trade over one billion dollar mark. However, this is far below the true trade potential exists in both the sides, he added.

"I strongly believe we have a potential to increase our bilateral trade to S\$5 billions by 2015. staff reported.

Iran, Pakistan should launch joint ventures in various sectors'
Iran and Pakistan should launch joint ventures in coal energy, dairy farming and other sectors, Iran's Ambassador to Pakistan Mashallah Shakeri said.

Speaking at Lahore Chamber of Commerce & Industry, he said Pakistani businessmen should avail Iranian expertise as both countries have great potential for enhancing economic cooperation among business communities. "Exchange of business delegations could pave way to explore areas of common interest.

Iran would provide technical and other assistance to Pakistan to overcome energy crisis."

Shakeri hoped industrial exchange program would help promote trade relations. Iran is willing to import rice, meat, fruits and many other items from Pakistan. Iran and Punjab government were going to set up slaughterhouses in Lahore.

He said Iran made tremendous progress in various sectors and there is vast scope of cooperation in energy sector. "We could also help Pakistan in producing electricity from water, coal, air and solar options." Both countries should enhance further cooperation in trade, industry, other sectors.

LCCI President Irfan Qaiser felt both countries have yet to realize their full potential. Pakistan and Iran have large domestic markets and unique geo-strategic competitive advantage. He gave proposals as to how both brotherly countries could enhance bilateral trade and two-way business.

He said Iran, Pakistan gas pipeline project, supply of electricity, offer to help Pakistan tackle its growing energy crisis and in starting of Islamabad, Tehran, Istanbul train service would go a long way. There is no doubt that both sides consistently managed to maintain bilateral trade over \$1 billion mark. However, this is far below true trade potential existing in both sides, he observed.

"I strongly believe we have potential to increase annual bilateral trade to \$5 billion by 2015.

Facilitating bilateral trade in local currencies can be instrumental in seriously improving two-way trade. China and Russia already started trade in their local currencies. Barter trade should also be actively facilitated since it can be highly efficient mode of buying and selling. It is high time that we also put in place such mechanisms," Irfan Qaiser added.

Govt releases Rs46.6bn under PSDP in July-SeptFrom the Newspaper | Business | By Kalbe Ali -- DAWN

Govt releases Rs46.6bn under PSDP in July-SeptFrom the Newspaper | Business | By Kalbe Ali

October 16, 2011 (3 weeks ago)The Pakistan Railways received Rs770.053 million for procurement/ manufacture of 530 high capacity wagons. - File photo
ISLAMABAD: Despite financial constraints the federal government has been making fund releases on regular basis for its vital water and power initiatives under the Public Sector Development Programme (PSDP) 2011-12.

During the first quarter (July-September) of this fiscal year the government released

Rs46.6 billion, which forms 16 per cent of the Rs290 billion PSDP.

According to figures released by the Planning Commission (PC), the highest amount of Rs26.9 billion had been released for infrastructure projects, Rs19.4 billion for social sector development projects and Rs293 million for 'other projects category'.

However, the federal government had not released any amount for People's Works Programme-I and II, which have allocation of Rs5 billion and Rs28 billion, respectively, in 2011-12. The Planning Commission is currently managing 1,252 projects which have a total cost of Rs2.83 trillion, however the local allocations for this fiscal year amounts to Rs253.5 billion, whereas funding amounting to Rs36.5 billion would be provided from foreign aid.

Pakistan Atomic Energy Commission received Rs2.33 billion for Chashma Nuclear Power Project (C3 & C4) being constructed in collaboration with China. The total cost of these two new nuclear power projects is Rs189.91 billion.

PAEC also received Rs271 million for Chashma Nuclear Power Project CII, Mianwali, which has a total cost of Rs51.04 billion.

In the water and power sector, the Federal government released Rs3.6 billion for land acquisition to construct Diamer Basha Dam, the cost of land acquisition requires Rs60.05 billion, the Dam is expected to generate 4,500MW electricity after commissioning.

An amount of Rs3 billion had been released for raising of Mangla Dam including resettlement project during the July-September 2011-12. The total allocation for this project is Rs62.55 billion.

Mirani Dam project received Rs100 million, Sabakzai Dam Rs200 million, Satpara Multipurpose Dam Rs1 billion, Gomal Zam Dam project Rs250 million, Greater Thal Canal (Phase-I) Rs100 million Kachhi Canal (Phase-I) Rs750 million and Raineer Canal (Phase-I) Rs750 million.

The Lower Indus Right Bank Irrigation and Drainage project, Sindh received Rs500 million, Balochistan Effluent Disposal into RBOD. (RBOD-III) Rs500 million and Land and Water Monitoring/Evaluation of Indus Plains (SMO) Rs100 million.

Revamping/Rehabilitation of Irrigation & Drainage System of Sindh Rs180 million, Extension of Right Bank Outfall Drain from Sehwan to Sea, (RBODII), Dadu and Thatta District of Sindh Rs1.3 billion, Lining of Distributaries and Minors in Sindh Rs240 million, Construction of 100 Delay Action Dams, Balochistan Rs120 million, Construction of 20 small Dams in Khyber Pakhtunkhwa Rs100 million, Re-construction of Shadi Kour Dam, District Gwadar Rs100 million.

The Pakistan Railways received Rs770.053 million for procurement/ manufacture of 530 high capacity wagons. Track rehabilitation plan Rs100 million, doubling of track Khanewal-to-Raiwind Section (China) Rs415 million, Revival of Karachi Circular Railways Rs10 million, Procurement/ Manufacture of 202 New Design Passenger Carriages Rs100 million.

Out of the Rs8.2 billion block allocation for Azad Jammu and Kashmir government only Rs1.64 billion had been released during the first quarter of current fiscal year, for construction of Rathua Haryam Bridge across Reservoir Channel on Mirpur-Islamgarh Road Rs200 million.

China wishes Pakistan to be elected as non-permanent member of UNSC, Pak hails Beijing endorsement -- APP

China wishes Pakistan to be elected as non-permanent member of UNSC, Pak hails Beijing endorsement

BEIJING, OCT 19 (APP): China and Pakistan are all weather strategic partners to each and China wishes Pakistan to be elected as non-permanent member of the United Nations Security Council. China attaches great importance to Pakistan's wish to be elected said foreign ministry spokeswoman Jiang Yu here Wednesday while responding to a question on China's support to Pakistan for the election for the coveted slot. She further said that we wish Pakistan to play a greater role in upholding international peace and security. Welcoming China's announcement, Ambassador Masood Khan said that we are grateful to China for its public support and endorsement of Pakistan's candidacy for the Non-permanent seat of the UN Security Council. This is a rare and precious gesture. We value and cherish it. This shows the depth of our relationship and mutual trust between the two countries, Ambassador Khan remarked.

We thank China for its good wishes towards Pakistan. Upon election, as strategic partner, in collaboration with China, we look forward to working towards regional and international peace and security, Khan noted.

The UN General Assembly is set to meet on Friday to elect five non-permanent members of the Security Council, as candidates for a seat on the world's body's power centre stepped up their campaign.

Those elected will serve from January 1, 2012, through the end of 2013.

The new elected members will replace Lebanon, Bosnia & Herzegovina, Brazil, Gabon and Nigeria, whose terms end on December 31.

Pakistan, a six-term candidate for the Asian seat on the 15-member Council, faces a challenge from Kyrgyzstan, a Central Asian country, which is contesting the election for the first time.

The Asian seat is being vacated by Lebanon.

Pakistan's earlier terms on the Council were in 2003-04, 1993-94, 1983-84, 1976-77, 1968-69 and 1952-53.

The General Assembly, which is composed of 193 members, holds elections for non-permanent members by secret ballot.

Hatf-VII strengthens Pak defence -- Observer

Hatf-VII strengthens Pak defence

PAKISTAN successfully test fired the multi tube indigenously developed cruise missile Hatf-VII (Babur) having a range of 700 KM. The low flying, terrain-hugging missile with high manoeuvrability and stealth capabilities is a valuable addition which would certainly further strengthen the defence of the country.

Pakistan periodically test fires its missiles to validate and upgrade its missile system keeping in view its security needs and to counter the massive military build up in our neighbourhood. In view of limited resources and experience of the past, Pakistan cannot afford to depend on imported hi-tech equipment because in difficult times, sanctions are enforced and the country is left with no spare parts to keep its direly needed system functioning. At the same time India is on a massive arms buying spree by acquiring aircraft carrier, nuclear submarine and hi-tech aircraft in addition to indigenously developing a variety of nuclear capable missiles. Pakistan has been fast loosing the defence balance with India and it could seriously affect our security if urgent attention was not paid to it. The Naval Chief Admiral Mohammad Asif Sandila while speaking at the graduation ceremony of PAF at Risalpur was perfectly right in emphasising that indeed peace is dear but defence of Pakistan is the dearest and as the global atmosphere was rapidly changing, the Pakistan defence forces needed to advance according to new trends. In this situation, the country has to ensure its minimum deterrence capability, which is only possible if we try to stand on our own feet. Fortunately our scientists and engineers have proved that they can deliver if they were provided the required resources. It is encouraging that Pakistan Navy has placed orders with Karachi shipyard and engineering works for building a fast missile attack craft in collaboration with China. The project of missile carrier

craft will further bolster the strength of Pakistan navy and improve the defence capabilities of Pakistan. We are confident that the nuclear and missile deterrence, development and production of naval platforms and aircraft with the expertise of Pakistani scientists and engineers and the collaboration of China would help meet our defence needs because only a strong defence is guarantee to security and sovereignty of the country.

Pakistan-Tajikistan road to cost Rs.2 bn -- Muslim World News

Pakistan-Tajikistan road to cost Rs.2 bn

Submitted by admin4 on 19 October 2011 - 2:43pm

Muslim World News

By IANS,

Islamabad : A road that would connect Pakistan with Tajikistan is estimated to cost Rs.2 billion.

The proposed road between Gilgit-Baltistan and Tajikistan would open up new avenues of progress and prosperity in the region, reported Associated Press of Pakistan.

The estimated Rs.2 billion road would connect Pakistan to the land-locked Central Asian states.

Pakistan is the only country through which the Central Asian states could do business with the world either through Gwadar port in Balochistan province or the proposed Gilgit-Tajikistan road.

Pir Karam Ali Shah, Gilgit-Baltistan governor, had recently met both President Asif Ali Zardari and Prime Minister Yousuf Raza Gilani to apprise them of the importance of the 220-km-long road.

Display centre for Pakistani exports set up in Chengdu -- APP

Display centre for Pakistani exports set up in Chengdu

KARACHI: Sichuan sub-council of China Council for Promotion of International Trade (CCPIT) has established Sichuan International Commodity Display Centre at World Trade Office building adjacent to FPCCI Chengdu office, which aims at promoting Pakistani export products in China. This was informed by Tariq Sayeed, former President of FPCCI and patron-in-chief of Pak-China Business Council, who held a detailed meeting with officials of CCPIT Sichuan sub-council led by Chairman Li Gang on 19th October 2011 in Sichuan capital city Chengdu. The meeting was also attended by Zhao Jiang, Director International Relations and Director Exhibitions and Zhang Lixia, Business Manager of the Display Centre. The establishment of Display Centre is an important step forward towards promotion of Pakistani products in Sichuan province in particular and in China in general" said Sayeed and appreciated the vision of CCPIT for giving greater market access to Pakistan as well as South Asian countries. He also appreciated the Chairman Sichuan sub-council for allocating free space for display of Pakistan exports products. The Display Centre has special allocated area for business-to-business meetings wherein the businessmen from Pakistan would be able to meet their counterparts in China. FPCCI Chengdu Office established in 2010 is the first ever overseas establishment while the FPCCI Kunming office at International Liaison city has also become functional for last six months" said Sayeed and further added that these initiatives have already helped for further deepening Pak-China relations and growth in export to China from Pakistan is one of the dividends of such initiatives. staff report

Expo begins today Pakistan likely to secure \$100m ordersBy Parvaiz Ishfaq Rana | From the Newspaper

October 20, 2011 (2 weeks ago)

The TDAP will now concentrate on value addition in agriculture produce, minerals, stones, plastic and chemicals. - File photo

KARACHI: Over 600 foreign dignitaries from 52 countries representing different sectors will participate in the Expo Pakistan beginning today (Thursday) at the Karachi Expo Centre.

Briefing the media about the event TDAP chief executive Tariq Puri said that the 6th Expo Pakistan to be opened by Minister of Commerce Makhdoom Amin Fahim will have international flavor because the Chinese pavilion will be centre of attraction to mark the 60th anniversary of Pak China relations.

He said that there will also be a Japanese pavilion to celebrate Pak-Japan 60th anniversary of bilateral relations falling next year.

The TDAP chief said in total 300 stalls were booked, out of which 10 booths will be displaying Chinese goods, including electric bicycle and 15 stalls belong to Japanese products. The remaining 275 stalls are booked by local producers.

He further said that the TDAP expected that around \$100 million worth of export orders would be booked during the 4-day mega event. This will be improvement over last expo when the country got \$80 million business.

Tariq Puri said that on the sidelines of the Expo there will be investment conference being jointly organised by TDAP and Board of Investment (BoI).

He disclosed that the representatives of 13 bilateral business forums will be attending the conference and there is highly encouraging response from the international community.

Mr Puri said the focus of the expo this year is on non-textile sectors and commercial

councilors of Pakistan the world over were specifically advised to concentrate on non-traditional products.

Therefore, the stalls booked by local producers will have diversified products on display. The 4-day event will be equally divided for visits by foreign buyers and for general public. Spot sales will also be allowed.

When the Expo Pakistan was planned the city of Karachi was witnessing unrest but today there is a festive mood and the event has given impetus to allied trades and to hotel industry.

Responding to a question Tariq Puri said that the cost of the event had been cut from over Rs120 million to Rs100 million.

The income earned by the TDAP from space rent of stalls is Rs15 million and this year no complimentary stalls have been given to any organisation.

The TDAP will now concentrate on value addition in agriculture produce, minerals, stones, plastic and chemicals

However, he admitted that many foreign buyers were coming as state guests and their boarding and lodging and air fair cost is being met by TDAP.

Pakistan-Tajikistan road to cost Rs.2 bn -- By IANS,

Pakistan-Tajikistan road to cost Rs.2 bn

Submitted by admin4 on 19 October 2011 - 2:43pm

Muslim World News

By IANS,

Islamabad : A road that would connect Pakistan with Tajikistan is estimated to cost Rs.2 billion.

The proposed road between Gilgit-Baltistan and Tajikistan would open up new avenues of progress and prosperity in the region, reported Associated Press of Pakistan.

The estimated Rs.2 billion road would connect Pakistan to the land-locked Central Asian states.

Pakistan is the only country through which the Central Asian states could do business with the world either through Gwadar port in Balochistan province or the proposed Gilgit-Tajikistan road.

Pir Karam Ali Shah, Gilgit-Baltistan governor, had recently met both President Asif Ali Zardari and Prime Minister Yousuf Raza Gilani to apprise them of the importance of the 220-km-long road.

China seen investing \$11bn in energy sector -- APP

China seen investing \$11bn in energy sector

BEIJING: Ambassador to China Masood Khan has said that Pakistan envisions a Chinese investment of more than \$11 billion in the energy sector during the next five years.

The Ambassador expressed these views in his introductory remarks at a Road Show held here for the management, operation, maintenance and rehabilitations of the nine public sector thermal power complexes through private sector Operation and Maintenance contractors by Pakistan's Private Infrastructure Board (PPIB).

He said that a major part of Pak-China economic cooperation is focused on energy development.

He pointed out that PPIB is a prestigious organization. Since 1994, under its aegis, the energy generation capacity of the private sector has increased to more than 8000 megawatts. PPIB have even more ambitious plans for the future and expects to add an additional 8000 megawatts in the next 5-6 years.

The Government of Pakistan has now asked PPIB to outsource management, operation, maintenance (O&M) and up gradation of nine public sector thermal power plants, with an installed capacity of around 4500 megawatts, to the private sector. These plants are currently producing only 1,400 to 2,000 megawatts of electricity.

Chinese enterprises have undertaken numerous projects in Pakistan in hydropower, thermal, nuclear and alternate energy sectors, he said adding the 5-year development programme in particular encompasses the whole spectrum of economic cooperation but lays special emphasis on energy cooperation.

The Mangla dam raising, Kohala dam, Neelum Jhelum dam, the Nandipur and the Chichokimalian Thermal power projects are some of the important projects being undertaken by Chinese enterprises in Pakistan.

A number of big hydro, coal and alternate energy worth billions of dollars are in the pipeline, he noted.

Last year, our top leadership decided to set up a Pakistan China Joint Energy Working Group (JEWG).

The Group's first session held in August this year has identified a vast array of coal, hydro, thermal, and alternate energy projects. This Ministerial level working group will ensure that all projects undertaken between Pakistan and China have the full support of our governments.

He said that most economic analysts now believe that a major portion of future global growth is going to take place in developing countries, particularly in Asia.

In Pakistan, despite the adverse international economic situation due to weak demand in Europe and the recent financial crisis, the economy remains essentially robust with high demand for consumer goods and energy.

During recent years, Khan said that in tandem with our strong political and strategic ties, economic cooperation with China has grown substantially.

Last year our overall bilateral trade with China grew by 28 per cent and Pakistan exports to China increased by 37 per cent setting a good trend, he noted.

We also have Free Trade Agreements on goods, investment, and services, a Free Trade Commission, and a Five Year Economic and Trade Development Programme for structured and targeted economic cooperation, he added.

He said that we invite the Chinese corporations to consider participating in the management and operations of these projects because of five reasons: (1) Pakistan and China enjoy ideal relations; (2) Pakistan's environment is hospitable for Chinese investments; (3) Chinese corporations have proven competency to take on such portfolios because of their prolonged exposure and experience in Pakistani markets; (4) China is fast emerging as the biggest energy investor in Pakistan; and (5) investments in Pakistan are win-win partnerships.

Khan expressed the hope that private management of these enterprises will ensure timely investments, increased efficiency and enhanced productivity. The Government of Pakistan is offering generous incentives through taxation, tariffs and guarantees.

He concluded by saying that we in Pakistan are proud of our growing relations with cutting edge, world class Chinese energy corporations which have chosen Pakistan for their present and future investments. – APP

Pak seeks USD 11 bn investment from China

Pak seeks USD 11 bn investment from China

Amid strains in its ties with the US, Pakistan has asked its all-weather ally China to invest over USD 11 billion in its various energy projects.

Pakistan envisions a Chinese investment of more than USD 11 billion in the energy sector during the next five years, Islamabad's envoy, Masood Khan, said. He was speaking at a Road Show held here for management, operation, maintenance and rehabilitation of the nine public sector thermal power complexes through private sector Operation and Maintenance contractors by Pakistan's Private Infrastructure Board (PIB).

Khan said that a major part of Pak-China economic cooperation is focused on energy development to be routed through the privatisation of the PIB which generates 8000 mw of power through different sources.

The first Pakistan-China Joint Energy Working Group (JEWG) meeting held here two months ago has identified a vast array of coal, hydro, thermal and alternate energy projects. At the JEWG meeting, Pakistan's Water and Power Minister Syed Naveed Qamar had proposed 19 new energy projects to China to overcome power crisis, in addition to a host of hydro and nuclear energy projects currently being implemented.

The new proposed projects include four power generation plants of 2,297 megawatts and one coal power project of 405 megawatts. Besides constructing two nuclear power reactors of 350 mw each at Chashma, China has committed to build two more in addition to a one giga mw nuclear power project, which could only be possible after Beijing fully develops the mega reactors as it cannot export foreign technology which it currently uses.

Also, China is assisting in three major dams, including USD 13 billion Diamer-Basha dam in Gilgit-Baltistan in Pakistan-occupied Kashmir (PoK), which has a planned capacity of 4500 mw.

India has expressed its reservations to China over projects in the PoK region. Meanwhile, a Chinese expert has cautioned Beijing about investments in Pakistan, citing risks owing to political and economic uncertainties in that country despite close ties.

Hydro and nuclear projects all involve huge, long-term investments and Chinese firms should not underestimate risk factors like political and economic uncertainties, Wang Jianmao, an economics professor at China Europe International Business School in Shanghai told state-run Global Times daily recently.

"Due to political reasons, Chinese foreign-aid investments tended not to have high returns, but it should not continue to be so, as China is expected to keep diversifying investments for the next 10 to 20 years," Wang said. Khan said Pakistan invited the Chinese corporation because the two countries enjoy ideal relations.

He said Pakistan's environment is hospitable for Chinese investments and Beijing's corporations have proven competency to take on such portfolios because of their prolonged exposure and experience in Pakistani markets. China is fast emerging as the biggest energy investor in Pakistan and its investments in Pakistan are win-win partnerships, he added.

Hoping for timely investments, he said Pakistan is offering generous incentives through taxation, tariffs and guarantees.

Gwadar winter capital of Balochistan -- THE NATION

Gwadar winter capital of Balochistan

Published: October 27, 2011

QUETTA - Balochistan Chief Minister Nawab Muhammad Aslam Raisani

Wednesday announced Gwadar would be the winter capital of the province.

In an official handout, he said the winter capital would function from October 21 to March. The chief minister directed the departments concerned to make all measures for implementing his orders immediately.

Meanwhile, militants attacked a check post of Frontier Corps (FC) with rocket in Panjgour, a bordering town near Iran on Wednesday. According to reports reaching here, unidentified militants fired a rocket targeting a check post of FC located at Qalam Chowk. The rocket landed with a huge explosion near check post. However, no loss of life and damage to property was reported in the attack. Heavy firing was heard after the blast that created panic amongst the people of the locality.

Winter Provincial Capital Gwadar — Infrastructure ready

Winter Provincial Capital Gwadar — Infrastructure ready

Ghulam Tahir

Quetta—Chief Secretary Balochistan Ahmad Bakhsh Lehri says infrastructure is ready for making Gwadar winter provincial headquarters for releasing population pressure in Quetta city.

Addressing media conference here, he said five more urban cities in the province are being developed as the existing civic amenities are not enough to sustain over two million population in Quetta.

He said under the master plan Gwadar is upcoming coastal city with lot of economic and transport facilities. Three berths of the Gwadar seaport are functioning and there is provision of 80 berths which would start functioning with passage of time. The activities at the seaport are slow because the road linking Gwadar with Rathodaro is not complete for paucity of funds. The Chief Secretary said that federal government had been approached to release adequate funds to complete the project so that transport facilities should be available to carry goods to Punjab and Khyber Pakhtunkhwa which would reduce pressure on Karachi seaport.

Businessmen need training to explore trade potential of Pakistan, China -- APP

Businessmen need training to explore trade potential of Pakistan, China
ISLAMABAD, Oct 28 (APP): Chinese trade delegation stressed on Friday for holding of more cultural and trade related workshops and seminars in China and Pakistan, to educate and create awareness amongst stakeholders about the trade potential. The Chinese delegation headed by Mme. Geng Ying, Chairman of China Cultural Heritage Foundation visited Pak-China Friendship Centre and met with the delegation of Islamabad Chamber of Commerce and Industry (ICCI) led by its President Yassar Sakhi Butt. "The purpose of their visit was to strengthen friendship of the two countries through exchange of business delegations", said Mme. Geng Ying. The Chinese delegation was representing the sectors of oil and gas, construction, pottery, marble, gem and stones and solar energy.

Addressing the delegation Yassar Sakhi Butt said that China was a sincere friend of Pakistan and playing an important role in its progress. "We are all proud of friendship with China, which is long standing and has become even stronger as time goes by", he added.

He said people of the two countries had deep love and affection for each other and it was need of the hour that bilateral relations between the two countries should be strengthened.

He lauded that China has made unprecedented economic development over the last 30 years.

Pakistan's exports to China should be enhanced through governmental support to businessmen for participation in trade fairs, exhibitions and to explore Chinese market for expansion of trade, he maintained.

The ICCI President also stressed that Pakistan has enormous potential in coal mining and China could help us in overcoming the prevailing energy crisis and Pakistan could get expertise from China in energy sector.

Five-day festival reflects Pak-China ties -- THE NATION

Five-day festival reflects Pak-China ties

By: Zafar Bakhtawari | Published: October 28, 2011

ISLAMABAD – Pak-China friendship is deeper than the oceans higher than the Himalayas and sweeter than the honey. A close neighbour can be more helpful than a distant relative. We all know that Pakistan and China have maintained an everlasting friendship in which both the countries have supported each other in every front, weather it is economic, defence, international affairs and culture.

Weather the Karakorum Highway linking the two countries can be taken as the symbol of Pak-China friendship in the 20th century, the Gawadar port under construction in Balochistan province will be another mega-project symbolising the two countries friendship in the 21st century. They decided to make the year 2011 the year of friendship and a to mark the friendship between both the countries they have built a beautiful piece of architecture in the heart of Islamabad and named it Pak-China friendship centre, which has state of the art facilities in it.

A couple of days back, PNCAs, Ministry of Information & Broadcasting in collaboration with the Ministry of Foreign Affairs, the Embassy of the People's Republic of China and China Culture Heritage Foundation (CCHF) organised a Chinese Exhibition titled 'Oriental Charm' at Pak-China Friendship Centre marking the Pak-China Friendship year 2011.

The hall was well decorated for the occasion where banners were displayed in the main hall. People from all walks of life attended the inaugural program. Chinese Ambassador Liu Jian and Sajjad Kamran Additional Foreign Secretary inaugurated the 5-day cultural festival. Chairman China Cultural Heritage Foundation Madam Geng Ying was also present on the occasion. The Chief Guest on this prestigious occasion was Additional Foreign Secretary, Sajjad Kamran. Chinese Ambassador on the occasion said Art is the common language of all mankind. From these art works, you can gain much insight into Chinese people's way of life, tastes, values, national psyche and character, as well as factors leading to China's past glory and today's rejuvenation. By promoting the cultural exchange between our two countries, we can know each other better, and thus build our all-weather friendship on a more solid base. This year marks the 60th anniversary of the establishment of our diplomatic relations, and also a year of friendship agreed by leaders of both

countries.

It is a befitting time to pay tribute to forefathers of this legendary friendship. Souvenirs that included the details of the artists and their artwork were distributed among the guests, which gave them further insight into the Chinese culture and the contributions of renowned Chinese artists. This effort was done to enhance the cultural awareness between the countries. As this cultural awareness programs would increase the brotherhood between the two countries.

The Additional Foreign Secretary, Sajjad Kamran said on the occasion that it is an honour for him to join our Chinese friends and distinguished guests at the opening ceremony of the Chinese Cultural Exhibition, aptly named as "Oriental Lingering Charm".

True, the oriental charm is lasting. He added that Madam Geng's visit therefore marks an important event this year when we celebrate the 60th anniversary of establishment of diplomatic relations between our two countries. China's undeniable support for Pakistan in difficult times is deeply appreciated. Pakistan-China cooperation covers a number of areas of mutual interest.

An important segment of this cooperation is cultural and people to people interaction. Cultural exchanges between Pakistan and China are centuries old. The historical Silk Road now known as Karakoram Highway binds our cultural past and the present together. He further said that the richness and variety of the Chinese culture is only too well-known.

Madam Geng Ying is a renowned artist who has played a key role in promoting the Chinese culture at home and abroad.

This exhibition will certainly provide a unique opportunity to the visitors to experience what the Chinese culture has to offer at its best.

It would also renew our cultural linkages on which we can rightly pride ourselves.

Pak-China friendship: Fast attack missile craft keel laid in Karachi -- DAWN

Pak-China friendship: Fast attack missile craft keel laid in Karachi
By Fahim Patel - Oct 28th, 2011 (No Comment)

3Karachi: Keel laying ceremony of the first Fast Attack Craft (Missile) for Pakistan Navy was held at Karachi Shipyard today. Chief of Staff Vice Admiral Tayyab Ali Dogar was the chief guest on the occasion.

The construction of the state of the art Missile Craft is a Pak-China joint venture. Under the contract, one craft each would be constructed in Pakistan and China.

Speaking on the occasion, the chief guest said that execution of many projects and joint ventures is a reflection of ever increasing cooperation between Pakistan and China. Keel laying of the missile craft today is a step forward in this direction.

He apprised that the missile being built in China has already been launched on September 20, 2011 and is expected to be delivered to Pakistan in April 2012. He hoped that successful completion of this project will pave way for more projects to be undertaken in future.

Congratulating the construction team, the chief guest said that these missile crafts will bolster maritime defense of Pakistan.

He expressed his confidence that Karachi Shipyard along with Chinese technical assistance team will make relentless efforts for timely accomplishment of this project.

Apprising the audience about the characteristics of the craft, the Managing Director of KSEW Rear Admiral Hassan Nasir Shah said that the craft has a maximum speed of 30 knots and is propelled by 4 diesel engines. It would also be equipped with latest weapons and sensors.

The ceremony was attended by senior naval officers, engineers and technicians of Chinese and Karachi shipyard.

Karzai's challenge: Emerging Pakistan-Afghanistan Ties -- THE CANADIAN

Karzai's challenge: Emerging Pakistan-Afghanistan Ties

Date: 29 October 2011 Posted By : by Dr. Abdul Ruff

The entry of Pakistan into the notorious UNSC as a member without veto that would have made Islamabad powerful enough to dictate terms to all global criminal rogues led by NATO terror syndicate has now forced both USA and Afghanistan to change its atrociously arrogant postures against Pakistan, although a visible policy shift is not discernible from these anti-Islamic scoundrel nations.

The Obama regime now says Pentagon would not wage an open war with Pakistan, but would only continue the ongoing terror war inside Pakistan killing innocent Muslims as the birth right of US criminals. The CIA says the Pak-US dialogue process is going on with success. USA also asks its puppet regime in Kabul to accelerate Afghan-led reconciliation talks in which Pakistan should also play its role. Now US is realizing that launching new military operation in Pakistan doesn't suit Pakistan's situation and is also looking for other means for tackling the issue of "militancy" including the reconciliation process.

Every thing remains at instructions level from Washington. In stead of admitting the Pentagon-India manipulating the surcharged atmosphere in both Pakistan and Afghanistan, USA continues to bluff that Pakistani Taliban has established havens in Afghanistan posing threats of attacks against Pakistan.

Today, Afghanistan and Afghans are being seen as pro-US, pro-India and anti-Pakistan and anti-Islam. It is difficult to differentiate between US terrorism and private militancy. Afghanistan and Pakistan have served as graveyards for superpowers that are the fanciful myths that exalt the Pakistani identity as US servants and Afghan identity as heroic warriors.

Both Washington and Kabul have, possibly to fool the world, repeatedly said Pakistan is providing sanctuary to terrorist groups launching attacks in Afghanistan. Not long ago, Gilani said Pakistani agencies and the CIA were working together towards this end and had hit high-value targets. He said he could not declare that Pakistan had become powerful enough to stand against America but relations between the two countries were based on mutual interest.

Since the USA has not yet openly declared the true picture of Al-Qaeda, Taliban and Haqqani network as being the CIA creations, it is deadly impossible to comply with US claims on threat perceptions.

Recently Afghan Ambassador Muhammad Omar Daudzai said in an interview with Waqt TV that both Pakistan and Afghanistan were facing a common enemy. He rightly emphasized that both the countries would have to work together to tackle their common problems. He particularly stated that this common enemy was a master of stratagem trying to pit both the nation against each other.

The enemy is obviously the US, which on the one hand has literally crushed the Afghan nation under its brutal occupation, something that has led to deaths of millions of innocent Muslims and on the other, its drone attacks and unilateral operations inside Pakistan have thrown us in the eye of the storm..

Upon election of Pakistan to the notorious UNSC, Afghan puppet President Hamid Karzai said that if the USA and Pakistan ever went to war, his country would back Islamabad — a statement that contrasts with his harsh criticism of his eastern neighbor during US minister Hillary Rodham Clinton's recent visit to Kabul. He now says "his country" is indebted to Pakistan for taking in millions of Afghan refugees over the years and stressed that Kabul would not allow any nation — be it the USA, India, Russia, China or anyone else — to dictate its policies. Karzai even labelled Pakistan as Afghanistan's "twin brother". This change of Karzai mind is intriguing.

Such words in diplomatic talks mean that Afghanistan cannot turn enemy against

the state of Pakistan to please others. Such a scenario is exceedingly unlikely, and Karzai's remarks appeared to be less a serious statement of policy than an overture to Pakistan, whose cooperation is sorely needed if Afghanistan is to have a chance at stability after years of conflict and civil war.

Nonetheless, Karzai's comments contrasted sharply with his show of alliance with Washington during Clinton's visit last week, during which the American ramped up the pressure on Islamabad to crack down on militants using its territory for attacks into Afghanistan.

Karzai also vented his grievances against the US, asking it to stop entering Afghan homes especially when men are away on fictitious pretexts. The Obama forces are conducting the Soviet era night raids to attack Muslims, in reality not only causing not only civilian casualties, but also outrage among the population that regards the sanctity of homes as a matter of honour.

Afghan's puppet present Hamid Karzai, who is accustomed to blowing hot and cold in his attitude towards Pakistan, is apparently passing through a kindlier phase. His remark, "Afghanistan will stand by Pakistan, if attacked by the US," astonished the global audience. He declared that even in the case of an attack by India, or for that matter, by any other quarter, Afghans would side with Pakistan. Karzai administration feels that the remnants of the former Taliban government are being supported by factions within Pakistan for the same above reasons. Karzai naturally says and speaks what the CIA asks him to. In 2006 Karzai warned that "Iran and Pakistan and others are not fooling anyone" when it come to interfering in his country.

For the first time, Karzai acknowledged Pakistan's generous treatment of the five million Afghan refugees, who had fled the country during the Soviet invasion and provided shelter and taken care of by Pakistan, he argues that has strengthened the spirit of brotherhood among the people of Afghanistan for their Pakistani counterparts.

II

Many Pakistanis and Afghans see in each other's nation a common bond based on religion, history, culture, language and ethnic ties.

Afghanistan–Pakistan relations are relatively new that began in August 1947 when Pakistan came into existence as an independent nation. Since 1947 the ties had not been very encouraging, but since then, in order to advance its illegal hidden agendas in the region, America, on the pretext of Sept-11 hoax has very systematically divided Pakistan and Afghanistan almost on a permanent basis. Both have the US puppet regimes and CIA make both fight each other while promoting US illegal interests in the region.

Pakistan and Afghanistan are usually described as inseparable states due to their historical, religious, cultural, linguistic, and ethnic ties, as well as their multiple trade and economic ties. Both neighbouring states are Islamic republics and part of the South Asian Association for Regional Cooperation- SAARC. However, the relationship between the two countries has been affected by the Durand Line, the issues of Pashtunistan and Balochistan, the 1980s Soviet war, the rise of the Taliban, the 2001-present US terror war, and the growing influence of India in Afghanistan to control this increasingly destabilizing nation.

The Durand Line border was established after the 1893 Durand Line Agreement between Mortimer Durand of colonial British India and Amir Abdul R Khan of Afghanistan for fixing the limit of their respective spheres of influence. Pakistan inherited this agreement after its partition from India in 1947 but there has never been a formal agreement or ratification between Islamabad and Kabul. The Afghan government still refuses to recognize the poorly-marked Durand Line as the international border between the two states.

Southern and eastern Afghanistan is predominately a Pashto-speaking region, like

the adjacent Khyber-Pakhtunkhwa, federally administered Tribal Areas, and northern Balochistan in Pakistan. This entire area is inhabited by the indigenous Pashtuns who belong to different Pashtun tribes, now converted by the western terrocracies into terrorist zones. The Pashtuns have lived in this region for thousands of years, since at least the 1st millennium BC.

That the Afghans have always been supported by P

Chinese firm donates 1m Yuan to Pak flood victims -- THE NEWS

Chinese firm donates 1m Yuan to Pak flood victims

By Fareeha Khalid - Nov 2nd, 2011 (No Comment)

4Islamabad: China Road and Bridge Corporation (CRBC) Tuesday donated 1 million Chinese Yuan for the flood affected people of Pakistan, says a press release received from Beijing on Tuesday.

The Vice President of CRBC, Liu Hong while handing over the Cheque to Ambassador Masood Khan at the Pakistan Embassy in Beijing said that the Chinese people and government received the tragedy with sorrow that "caused great loss to Pakistani people and also broke our hearts."

The disaster would not stop the resilient and brave Pakistani people's march for pursuing economic prosperity.

He said that last year his organization donated US\$ 150,000 to Pakistan Prime Minister's Flood Relief Fund.

"Through years of co-operation in different projects, CRBC has already cultivated deep friendship with Pakistan,' Liu observed.

He said that we are very proud and honoured that CRBC could participate in the Karakorum Highway (KKH) improvement project that connects China and Pakistan with economic, political and strategic importance.

He further said that it is a happy augury to note that the supplemental commercial contract for the KKH Realignment Project has also been signed after mutual efforts by the two countries.

Earlier, Ambassador Masood Khan while expressing thanks to Liu Hong for CRBC's financial assistance on behalf of the people of Pakistan and the government for the flood affectees in southern Pakistan said that this gesture will bring smiles on the faces of the people facing this natural calamity.

He said that CRBC was working on the expansion of KKH, the main artery of road communication between Pakistan and China which on completion will bring prosperity to the region.

Terming Mr. Liu a "great friend of Pakistan", Ambassador Khan appreciated the gesture of relief assistance from CRBC.

He said that unfortunately this year's floods have also affected the southern part of Pakistan and caused widespread devastation there.

He praised CRBC for helping Pakistan to solve one of the most serious disasters in Pakistan which was the Ataabad Lake and the company's efforts towards reconstruction of KKH, the friendship highway between the two countries.

Ambassador Masood Khan said that when the project is completed, the KKH will become an all-weather road with no interruption of transportation between Pakistan and China.

Turkmenistan, Pakistan reach TAPI gas price agreement (IMP) -- By Robert M Cutler

Turkmenistan, Pakistan reach TAPI gas price agreement
By Robert M Cutler

MONTREAL - Pakistan and Turkmenistan have reportedly reached bilateral agreement over the price of gas through the planned Turkmenistan-Afghanistan-Pakistan-India (TAPI) natural gas pipeline. An editorial in the national Pakistani newspaper The Dawn treats the agreement as an accomplished fact, and a former director-general of the Associated Press of Pakistan writes in the UAE-based Khaleej Times that the two sides will sign the agreement on November 15 in Ashgabat.

According to this credible but unconfirmed published information, Pakistan's price to Turkmenistan will be 69% of Brent crude oil parity price (including transit fee) for between 13 and 14 billion cubic meters per year (bcm/y). This figure could exceed 20 bcm/y

Dilbert

if a facility is constructed for export of liquefied natural gas (LNG) from the Pakistani port city of Gwadar in the southwest of the country.

Just a few days earlier India's president Pratibha Devisingh Patil, in his congratulations on the 20th anniversary of Turkmenistan's independence, expressed his happiness over the TAPI natural gas pipeline's "successful promotion". India, which signed a bilateral price accord with Turkmenistan some time ago, will receive the same quantity of gas as Pakistan (not counting the Gwadar extension), and Afghanistan will get 5 bcm/y.

Nor is this necessarily the upper limit. Turkmenistan's Oil and Gas Ministry concluded from a survey last year that by the end of the decade the total demand for natural gas in Pakistan and India together might reach as much as 186 bcm/y, whereas their indigenous production could not exceed 100 bcm/y, according to the independent Trend News Agency in Azerbaijan.

Turkmenistan's Oil and Gas Minister Bayramgeldy Nediroy, at an international conference on energy security in Ashgabat sponsored by the Organization for Security and Cooperation in Europe (OSCE), also indirectly confirmed at the weekend the agreement with Pakistan, saying, "Preparations are under way for the imminent signing of an agreement on the sale and purchase of natural gas." Reuters quoted Nediroy as adding, "There are no doubts that this [TAPI] project will be realized."

The deal will have a lifespan of 30 years and require 1 trillion cubic meters of Turkmenistan's natural gas, according to Nediroy. President Gurbanguly Berdimuhamedow said last year that this gas would come from the South Yolotan field. The most recent iteration of the British firm Gaffney Kline's audit of South Yolotan's reserves increased the original estimate to a range of 13.1 to 21.2 trillion cubic meters. The pipeline is planned for a length of 1,700 kilometers, running to Herat in Pakistan, then along (perhaps underground) the Herat-Kandahar highway, passing through Quetta and Multan to the Indian border town of Fazilka.

There is no announced agreement between Afghanistan and Turkmenistan over the gas price, although the implicit calculation of transit costs in the Pakistani deal suggests that a figure has been estimated. That some agreement may appear on the horizon is suggested by the modest steps that Turkmenistan has been taking to promote economic development, and thus security, in Afghanistan.

Earlier this year, the two countries agreed to build a 120-kilometer railway line between Ashgabat and Kabul, with Turkmenistan constructing 85 kilometers internally from the Atamyrat district (Lebap province) to the border town of Ymamnazar, and the Afghan extension running to Akina also to be planned and constructed by the Turkmenistan side, in accordance with Kabul's suggestion. A

southward extension to the Afghan town of Andkhoy (Faryab province) would subsequently be added. Turkmenistan has also declared its intention to increase electricity exports to Afghanistan. Earlier this year, Berdimuhamedow authorized construction of a new supply line to quintuple this level to 300 megawatts per year.

At the OSCE-sponsored conference in Ashgabat, another Turkmen official speaking anonymously told Reuters that Berdimuhamedow would sign an agreement to increase the amount of natural gas being supplied to China. The government in Ashgabat has said that it expects to export 17 bcm to Beijing this year, and possibly as much as 20 bcm next year. Total exports to China could eventually ramp up to as much as 60 bcm/y.

Berdimuhamedow himself took the opportunity of the conference to underline his foreign ministry's rejection last week of Russia's assertion of veto power over the Trans-Caspian Gas Pipeline (TCGP) project for natural gas to Azerbaijan and, from there through Georgia and Turkey, to Europe. Putting his prestige publicly on the line, he declared to the assembled international diplomats and representatives of global energy companies, that exports to Europe were "an important vector of our new energy policy", indeed "the most important characteristic of Turkmenistan's foreign-policy strategy", while the "trans-Caspian pipeline system is correspondingly an important project testifying to Turkmenistan's readiness for mutually advantageous cooperation with all interested parties".

Two days after the conclusion of the conference, the Turkmen government announced the creation of a bilateral working group on energy cooperation with Romania. However, the gas that Turkmenistan would export to Azerbaijan for transit via Turkey (possibly through the proposed Nabucco pipeline) to Europe would not go through Romania. Turkmenistan is several thousand kilometers from Romania as the crow flies, across the Caspian Sea and the Black Sea basins.

The creation of this working group can therefore only mean that the White Stream project is now an active possibility on Ashgabat's radar. This project, the consortium for which did not put in a bid for Azerbaijan's Shah Deniz Two gas, proposes a subsequent pipeline for additional gas from Turkmenistan across the South Caucasus and under the Black Sea from Georgia to Romania.

Pakistan to seek Iran gas for key port's industries -- The Express Tribune
"Pakistan to seek Iran gas for key port's industries"

Islamabad – Pakistan has decided to seek gas to meet requirements of industrial estates at Gwadar Port in southwestern Balochistan province, a report said Tuesday.

Pakistan will approach Iran for additional supplies of 250 million cubic feet of gas per day (mmcf) for the port, The Express Tribune reported.

The government will negotiate with Iran to extend gas import volume from the existing 750 million cubic feet per day (mmcf) to one billion cubic feet per day (bcf) to meet the requirements of Balochistan at Gwadar Port for industrial estates.

Secretary of Petroleum Ijaz Chaudhry said that Iran has already expressed its desire to provide 250 mmcf of additional gas that could be used for industrial estates at Gwadar Port. He maintained that the Ministry of Petroleum had already moved a summary to the Economic Coordination Committee (ECC) of the Cabinet in 2010 seeking approval for import of this enhanced volume.

Balochistan Chief Minister Nawab Mohammad Aslam Raisani reiterated its demand of 250 mmcf gas allocation out of supplies under Iran-Pakistan (IP) gas pipeline project to meet requirements of industrial estates at Gwadar in a meeting held with Secretary of Petroleum and Natural Resources Muhammad Ejaz Chaudhry in Islamabad on Monday.

Sources said that Raisani said that Balochistan required 250 mmcf gas for industrial estates at Gwadar Port and therefore gas should be allocated under the IP gas pipeline project.

An energy expert said that the government should meet Balochistan's demand to allocate gas under the IP pipeline project that would boost economic activities in Gwader.

All Day

Turkmen gas reserves brighten hope for Pakistan -- Business Observer

Islamabad—As Pakistan moved ahead with sealing a gas-import accord with Turkmenistan the Turkmen Deputy Prime Minister Baimurad Khodzhamukhamedov reported that the estimated Turkmen oil and gas reserves have increased by more than 1.5-fold since 2006.

During Turkmen President Gurbanguly Berdimuhamedov's recent visit to Islamabad the two states signed a number of accords including that of oil and gas sales and purchase. Experts have appreciated Pakistani move as "well-timed".

Pakistan and Turkmenistan reached an accord on November 13, 2011 for delivery of 1.3 billion cubic feet a day of Turkmen gas at 69 per cent of crude oil parity price under the \$7.6 billion Turkmenistan-Afghanistan-Pakistan-India (Tapi) pipeline project.

Pakistan and Turkmenistan agreed to formally sign a sales and purchase agreement in Ashkabad on Nov 15. The pipeline is expected to bring gas to Pakistan by December 2016, depending on a credible security apparatus in Afghanistan where it will provide 500mmcf of gas.

It was reported that Turkmenistan also offered to increase gas throughput to about two billion cubic feet a day if the two sides agreed on transporting about 700 million cubic feet a day (mmcf) to Gwadar port for eventual sale or export as liquefied natural gas (LNG).

According to reports reaching here total hydrocarbon reserves in Turkmen as of October 1, 2011 measured 72.21 billion tonnes, compared to 45.44 billion tonnes on January 1, 2006. The latest figures were compiled by Turkmen officials after reviewed data from the British firm Gaffney, Cline & Associates.

British auditing firm Gaffney, Cline & Associates (GCA) has recently reported that Turkmenistan might have the world's second largest natural-gas field.

GCA early this year submitted a revised audit in mid-June to Turkmen President Gurbanguly Berdimukhamedov saying that South Yolotan is second only to Qatar's South Pars field.

President Gurbanguly Berdimuhamedov has stressed that "development of the oil and gas industry was one of the priorities of the ongoing reform in all spheres of the national economy." He also noted that "natural gas reserves in Turkmen fields amount to 26 trillion 200 billion cubic meters."

Turkmenistan plans to build third oil refinery in western part of the country.

Steps afoot to make Gwadar winter capital: CS Balochistan -- APP

Steps afoot to make Gwadar winter capital: CS Balochistan

QUETTA, Nov 16 (APP): Chief Secretary Balochistan Mir Ahmad Bakhsh Lehri has visited coastal town of Gwadar to review the arrangements to make it winter capital of Balochistan. According to a handout issued here on Wednesday, on the instructions of Chief Minister Balochistan Nawab Aslam Raisani, CS Balochistan Mir Lehri along with Principal Secretary to Chief Minister Balochistan Hafiz Abdul Basit visited Gwadar to review arrangements in connection with building of office premises for key government departments.

Speaking on the occasion, the CS Balochistan viewed that Gwadar has capacity to become one of best sea ports of the world due to its geographical position. "We are going to make Gwadar winter capital of Balochistan in order to boost trade activities and make this port functional," Mir Lehri said.

He said that ports used to play vital role in economic development of any country. He added that with turning Gwadar as trade center would help removing sense of deprivation amongst local people.

He said that serious measures were being taken to make Gwadar winter capital of Balochistan during period from October to March.

He along with Hafiz Abdul Basit inspected various official premises including District and Provincial Complex, Sangar Housing Scheme Rest House, Pearl Continental Hotel, BCDA Complex, College Complex, Fisheries Complex and others.

Commissioner Makran Division Muhammad Aslam Jamali, Deputy Commissioner Makran Abdul Rehman Dashti and Director General Gwadar Development Authority Shoaib Ahmed Gola were also present.

Meanwhile, official sources told APP that 32 percent construction work on Sarbandar Jetty project and 75 percent construction work on District and Provincial Complex project in Gwadar have been completed.

Conference to strengthen regional economic connectivity -- Pakistan Today

ISLAMABAD - Ministers from 10 countries spanning the Caucuses, and Central, East and South Asia will gather to mark a decade of achievement, including \$17 billion of investments in energy, trade and transportation under Central Asia Regional Economic Cooperation (CAREC) Programme. Finance minister Dr Abdul Hafeez Shaikh is likely to lead Pakistan in CAREC 10th Ministerial Conference at Baku, Azerbaijan, starting from 22nd November till 24th November. It's the first time that Pakistan is attending CAREC ministerial conference as a full member country. Established in 2001, CAREC brings together Afghanistan, Azerbaijan, People's Republic of China (PRC), Kazakhstan, Kyrgyz Republic, Mongolia, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan. It promotes implementation of regional projects in energy, transport, and trade facilitation from northern PRC to Caucasus and Europe, and from Kazakhstan to warm water ports of Karachi, Gwadar and beyond.

CAREC partnership accounts for more than 120 projects to date, including six extensive transport corridors and energy networks that are beginning to improve lives and livelihoods across the region.

Asian Development Bank (ADB) has contributed \$5.5 billion to total CAREC investment since 2001. Ring road, rail and electricity projects in Afghanistan, and East-West Corridor in Azerbaijan are flagship programmes that embody CAREC. About 4,000 km of road and 2,250 km of railway lines have been built or upgraded, opening up corridors of trade and opportunity. Streamlined customs procedures are moving people and their businesses across borders faster and at less cost. Electricity transmission lines and upgraded power plants are beginning to boost vital energy trade in the region that will bring prosperity and security.

Ministerial conference will also launch CAREC 2020 as the new roadmap for the next 10 years. This will provide a blueprint to help countries expand trade, spur competitiveness in broader global economy, and reposition Central Asia as pivot of regional trade. Six multilateral institutions support work of CAREC that includes ADB, European Bank for Reconstruction and Development, International Monetary Fund (IMF), Islamic Development Bank (IDB), United Nations Development Programme (UNDP), and World Bank. ADB has served as CAREC Secretariat since 2001.

Oman has given a grant of \$17 million to the Balochistan government for building an airport of international standard in Gwadar. -- Daily Dawn
Oman has given a grant of \$17 million to the Balochistan government for building an airport of international standard in Gwadar. According to official sources, 43,000 acres of land have been acquired for the airport that will have latest facilities.

The Civil Aviation Authority's Director General Air Marshal (retd) Khalid Chaudhry discussed the project with Balochistan Chief Secretary Mir Ahmed Bakhsh Lehri.

The airport will be designed for both passenger and cargo flights.

The sources said the provincial government was taking serious steps to make Gwadar the winter capital of Balochistan besides making the port functional.

"The chief secretary has issued directives to ensure reopening of a five-star hotel in the town that was closed a few months ago," they said, adding that the hotel's administration had been asked to take steps in this regard.

The chief secretary and the Chief Minister's Principal Secretary Hafiz Abdul Basit have held meetings in Gwadar to increase the pace of the implementation of the government's announcement that the town will be the provincial capital from October to March each year.

About 80 per cent construction work on a district and provincial complex and major portions of other official buildings have been completed and the government has asked contractor companies to accelerate the work. The government is also mulling over holding a session of the Balochistan Assembly in Gwadar and local officials have been asked to review arrangements in this regard.

The decision by Nawab Aslam Raisani's government to make Gwadar the winter capital has increased the importance of the coastal town.

"The move will have a deep impact on the economy and trade of the region and will also help remove the sense of deprivation among local people," provincial minister Mir Hamal Kalamati said.

ISGS to open branch offices in Gwadar and Sukkur -- APP

ISLAMABAD: In order to ensure fast tract implementation of the Iran Pakistan Gas pipeline project, a branch office of the Inter State Gas System (Private) Limited (ISGS) would be established in Gwadar and Sukkur to expedite work.

It was also proposed by the Ministry of Petroleum and Natural Resources that a separate Energy Department may be established in the Balochistan provincial government, for which the Ministry of Petroleum and Natural Resources will provide all possible assistance. This has been decided during a meeting between Chief Minister (CM) Balochistan, Nawab Mohammad Aslam Raisani Secretary, Petroleum and Natural Resources Mr Muhammad Ejaz Chaudhry, here in Islamabad on Monday. Secretary, Petroleum and Natural Resources apprised CM Balochistan regarding status of various oil and gas development projects being implemented by the Federal government in Balochistan province. Aghaz-e-Huqooqe Balochistan announced by the Prime Minister of Pakistan was also discussed and it was committed that Ministry of Petroleum and Natural Resources would facilitate the government of Balochistan in providing employment opportunities to the locals in various oil and gas projects. CM Balochistan was also updated on the progress made in the Iran-Pakistan (IP) Gas Pipeline Project and the CM assured that the government of Balochistan would facilitate in land acquisition for the project. Moreover, Turkmenistan, Afghanistan, Pakistan, India (TAPI) pipeline project was also discussed.

Raisani seeks Afghan transit trade via Gwadar -- RECORDER REPORT

Chief Minister Balochistan Nawab Aslam Raisani has emphasised the need to import Afghan Transit Trade goods through Gwadar port.

In a handout issued here on Monday, he said the provincial government wanted to see operation of Afghan Transit Trade through Gwadar port in order to make it operational.

"We decided to make Gwadar winter capital of Balochistan to boost economy and trade of the region," he said adding that arrival of large ships loaded with wheat and fertilisers was likely at Gwadar port.

He viewed that development of Gwadar port linked with bright future of Pakistan.

He said that making Gwadar port operational would decrease burden on Karachi and Bin Qasim ports.

He said that with efforts put by the Balochistan government, wheat was being imported through Gwadar port.

CAREC approves over 100 projects worth \$17 billion -- Business Recorder
 ISLAMABAD - Central Asia Regional Economic Cooperation (CAREC) has approved over 100 CAREC-related projects worth \$17 billion. The projects include six land transport corridors that cover 3,600 kilometers of roads and 2,000 kilometers of railways. They traverse the CAREC region north-south and east-west; linking Europe, East Asia, South Asia, Middle East, and beyond; connecting all member countries.

Secretary Economic Affairs Division Abdul Wajid Rana and officials from ministry of commerce and finance represented Pakistan at the 10th ministerial conference at Baku, Azerbaijan.

Asian Development Bank (ADB) has allocated \$4.7 billion over the next three years to support Central Asia Regional Economic Cooperation (CAREC), 2020's goals of trade expansion and improved competitiveness.

ADB President Haruhiko Kuroda, while announcing the allocation for CAREC 2020 goals at ministerial conference said we stand ready to assist in accelerating the development of physical infrastructure connectivity, the development of economic corridors, and the improvement of the knowledge base needed to support CAREC's priorities.

Established in 2001, CAREC brings together Afghanistan, Azerbaijan, China, Kazakhstan, Kyrgyz Republic, Mongolia, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan. It promotes the implementation of regional projects in energy, transport, and trade facilitation from northern China to Caucasus and Europe, and from Kazakhstan to the warm water ports of Karachi, Gwadar and beyond.

About 4,000 km of road and 2,250 km of railway lines have been built or upgraded, opening up corridors of trade and opportunity. Streamlined custom procedures are moving people and their businesses across borders, faster and at a less cost. The electricity transmission lines and upgraded power plants are beginning to boost the vital energy trade in the region that will bring prosperity and security.

The ministers and senior representatives of development agencies have discussed support for the new 10-year strategy for Central Asia Regional Economic Cooperation (CAREC) programme.

The six multilateral institutions support the work of CAREC that includes ADB, European Bank for Reconstruction and Development, International Monetary Fund (IMF), Islamic Development Bank (IDB), United Nations Development Programme (UNDP), and World Bank. ADB has served as the CAREC secretariat since 2001.

The multilateral institutions at the forum echoed their support for the work of CAREC and some also offered substantial financial assistance over the next decade. Senior representatives of bilateral agencies from France, Germany, Japan, United Kingdom, and United States also attended the forum and supported CAREC 2020. The three-day conference wrapped up with a ministerial retreat where participants discussed how CAREC countries could individually and collectively contribute to a prosperous Asia by mid-century.

Teaching Chinese in Pakistan to enhance people-to-people contacts: Dr. Firdous -- APP

Teaching Chinese in Pakistan to enhance people-to-people contacts: Dr. Firdous

ISLAMABAD, Nov 25 (APP): Minister for Information and Broadcasting Dr. Firdous Ashiq Awan has said Pakistan and China are not only very close friends but strategic partners and with breaking the language barrier by teaching Chinese in Pakistani schools, people to people contacts will get further boost. This she said while speaking as chief guest at launching ceremony of China Radio International-Roots School System Confucius Classroom at Pak-China Friendship Centre, on Friday. The Minister said that on a diplomatic level, the two countries have a lot in common and support each other; however there has been a significant cultural and language barrier that has inhibited the inhabitants of both countries in forming close ties across the border.

She appreciated the joint initiative of CRI and Roots School which will bridge the cultural divide and break the language barrier between the two nations.

This new initiative which has the complete support on political and social level, will bring about great change in the bilateral relationship, she added.

The Minister said in Pakistan education has become a provincial subject and the

Sindh government has taken the initiative to introduce Chinese language in its curriculum.

“To strengthen bilateral relations, it is vital to ensure that our upcoming generations learn Chinese language and consolidate these ties even further”, she added.

Dr. Firdous said that she has observed that China has changed during the past 15 years and empowerment of youth and women were the main reason for change in China.

She said “We should also replicate the same model here for development of the country”. The Minister said that China is great friend and has always supported and patronized Pakistan.

The Minister stressed for enhanced cooperation between the Pakistani and Chinese media. She said that “international media was depicting negative image of Pakistan and it would be beneficial for us to boost cooperation with Chinese media”.

She thanked the Chinese Ambassador to Pakistan for making announcement to donate the building of Chinese embassy in Islamabad for Media University.

Chinese Ambassador Liu Jian said Pakistan-China friendship is time-tested and both nations have the relationship of trust and sincerity.

He said the friendship between the two countries has a long history. “Over the past 60 years since the establishment of diplomatic ties, thanks to the care and support from successive leaders and men

of insight on both sides and the joint efforts of the governments and peoples of our two countries, we have established a high-quality strategic partnership of cooperation”, he added.

He said Chinese are proud to have such a great and sincere friend as Pakistan and people of China deeply cherish this friendship.

Balochistan gives land to lay Iran-Pakistan gas pipeline -- NIGC

Balochistan gives land to lay Iran-Pakistan gas pipeline

The government of Pakistan's Balochistan Province has agreed to give land for Iran-Pakistan Gas Pipeline project.

The Chief Minister of Balochistan Nawab Aslam Raisani has said that his government agreed to allocate land in Gwadar and Lasbella districts for lying of Iran-Pakistan Gas Pipeline through Balochistan, Iran's SHANA news agency reported.

It's worth mentioning that, the Iran-Pakistan Gas Pipeline will cater need of natural gas of the areas where it would pass besides creating chances to install new gas-run power plants in the province.

During the meeting, the two decided that Gwadar Inter-Estate Gas Company Limited would register the contractors in this regard while Gwadar Industrial area would also be provided natural gas from Iran-Pakistan gas pipeline.

The federal government will negotiate with Iran to extend gas import volume from the existing 750 million cubic feet gas per day to one billion cubic feet gas per day to meet the requirements of Balochistan at Gwadar Port for industrial estates.

Raisani reiterated its demand of 250 million cubic feet gas allocation out of supplies under IP gas pipeline project to meet requirements of industrial estates at Gwadar.

Pakistan will construct a 700km-long pipeline from its border while Iran would build a 300km long stretch of the pipeline from Iranshahr to the Pakistani border.

It's worth mentioning that by endorsement of the contract between two countries (Iran and Pakistan) Iran is responsible for natural gas export to Pakistan from 2014 in amount of 21/5 million cubic meters daily, and 7/8 billion cubic meters annually.

Arab Spring may impact bilateral trade with Pak -- Daily Times

Arab Spring may impact bilateral trade with Pak

* Egyptians invested around \$2.5bn in Pak telecom, construction and hoteling businesses

* Negotiations with Iran included supply of 1000MW electricity

By Zeeshan Javaid

ISLAMABAD: Recent hike in civil agitation against Egyptian government could affect bilateral trade between Pakistan and Egypt around \$249 million, well placed sources informed on Saturday.

Senior official of trade management on condition of anonymity informed that ongoing democratic move against the rulers of Arab and African continent could draw a dreadful impact over Pak-Gulf-African bilateral trade.

According to details provided by foreign department, Pakistan's bilateral trade with Egypt is around \$249 million, while Egyptians invested around \$2.5 billion in telecom, construction and hoteling businesses.

Pak-Egypt trade review conducted by foreign office maintained that Pakistani tycoons invested over \$50 million in Egypt mainly in the textile business, while both countries agreed during the Joint Ministerial Commission's (JMC) Session held in Cairo last year, to enhance cooperation in twenty one sectors including trade, food and beverages, investment, tourism, software technology parks, cement manufacturing, oil and gas exploration, power generation, agriculture, health and automotives.

Similarly another affected region by civil agitation, Yemen that are based on common faith, culture and values, interact in trade business with Pakistan, the bilateral trade between both countries is around \$100 million, which was increased in the past few years, while Yemen is among the top 10 rice importing countries from Pakistan.

In order to further boost the economic and commercial relations between Pakistan and Libya, both countries also signed seven Agreements, MoUs and both sides agreed to initiate a joint study for PTA leading to FTA. A Joint Investment Company with subsidiaries in oil, gas, agriculture, banking, finance and infrastructure development projects has also been established.

Under the Friends of Democratic Pakistan (FoDP) process Iran had committed \$ 320 million, while it would also be facilitated by an important source of energy following the Iran-Pakistan Gas Pipeline project.

Some other important projects under implementation, negotiations with Iran included supply of 1000 MW electricity (on Taftan-Quetta Transmission Line) was signed in April 2007 and both sides are working to negotiate its various aspects.

Import of 100 MW of Electricity (on Gwadar-Makran region Transmission Line), Road and Rail Network up-gradation projects including the Pak-Iran-Turkey, "Gul Train" are under ECO framework.

The leaders of the both countries in their September 2011 summit in Iran had raised the target for annual trade to \$ 10 billion. Quantum of current annual bilateral trade with Iran is \$ 1.5 billion.

Foreign Minister Hina Rabbani Khar had informed lower house of the parliament during last session ended on November 25 (Friday) that despite good political relations with Libya, our trade relations are much below the desired potential. She said that efforts are however, underway to enhance trade and economic relations to the mutual benefits of our two nations.

She claimed that country has been enjoying close friendly relations with all the North African and Middle Eastern countries including Egypt and Yemen and relations with these countries based on common faith, culture and similarity of views on a host of issues related to regional and international importance.

To describe the achievements gained by the Pakistan People's Party (PPP) regime during its ongoing three year tenure, federal minister ascertained that government structured mechanisms such as the Joint Ministerial Commission providing a useful platform for continued interaction and exchange of visits along with holding bilateral consultations with these countries from time to time and review our existing beneficial cooperation with them in various fields.

“The two countries attach importance to their relations and are working to strengthen their cooperation in various fields. We have signed over 30 agreements and MoUs with Egypt covering cooperation in commerce, trade, culture and education etc. With Yemen around 24 agreements and MoUs on cooperation in various sectors have been signed,” she added.

All Day

Pakistan, Turkey may sign PTA next year -- Business Recorder

Preferential Trade agreement (PTA) is likely to be signed between Pakistan and Turkey next year, Consul General of Turkey, Murat M Onart, informed business community on Monday evening.

Speaking at a meeting of Karachi Chamber of Commerce and Industry (KCCI), he expressed concern over meager trade between the two brotherly Muslim countries and expressed hope that after signing PTA two-way trade will be increased substantially.

Replying a question of Turkish expertise in mineral sectors, the Consul General said present prevailing conditions in Balochistan did not permit Turkey to send its experts to assist Pakistan in mineral sector.

He emphasised the need of developing transport infrastructure to boost two-way trade which need heavy investment.

The Consul General also expressed that without developing infrastructure two-way trade cannot be increased even if liberalised trade and visa, tax concession and other facilities.

Replying another question, he said last economic crisis shows that regional trade is essential.

Former President KCCI, Majid Aziz sought the Consul General's help to approach Turkish government and ask them to provide technical expertise to develop Pakistan's mineral sector.

President KCCI, Mian Abrar Ahmed, said that Turkey can take advantage while establishing production base in Pakistan and utilise the Gwadar Port and Pakistan railway and tap the huge regional market.

He said that the trade volume of two countries has an increasing trend with a regular surplus in favour of Pakistan since 2000.

It has been recorded 998 million dollars in 2010 of which 750 million dollars was Pakistan's exports.

Zardari offers Korea to set up economic zone in Pakistan -- APP

Zardari offers Korea to set up economic zone in Pakistan

ISLAMABAD: President Asif Ali Zardari on Wednesday offered Korea to establish its economic zone in Pakistan to boost trade ties between the two countries.

The President was chairing a meeting to discuss his forthcoming visit to Korea and to highlight investment opportunities for the Korean businessmen and investors in Pakistan.

Representatives of Korean companies were also present.

Briefing about the meeting Spokesperson to the President Farhatullah Babar said President Zardari invited Korean companies to take advantage of most attractive investment opportunities available in Pakistan in different sectors including oil and gas, mining, trading, energy, information technology and telecom, food and agriculture, Small and Medium Enterprises, infrastructure and tourism.

Zardari said he looked forward to his visit to Korea which would help boost economic and trade ties between the two countries.

He said with emerging market of 180 million people, Pakistan was a potential hub of the economic activities in the region as it was located at the crossroads of West Asia, South Asia, Central Asia and China and provided shortest access to North and South Asia through Gwadar Port.

He said Pakistan was a force multiplier for the economies of the countries in the region and held the key to economic development in the area.

The Spokesperson said the President appreciated managers and heads of Korean companies operating in Pakistan for their investment and their interest to further explore business opportunities here.

He assured the participants that Pakistan government would continue to extend maximum facilitation and provide them with every possible support in realizing their investment objectives.

He said the government was keen to transform the existing relationship with the Republic of Korea into economy-oriented equation for the benefit of the two countries.

"We need to translate our existing relations in economic terms," the spokesperson quoted the President, "so as to take advantage of each others' resources and opportunities."

Highlighting Pak-Korea relations, the President mentioned landmark infrastructure projects completed with the help of South Korean companies and said it testified

lasting relationships between Pakistan and the Republic of Korea.

The Korean companies represented Star Hydro Power, Lotte Pak PTA Co Ltd. Karachi, SAMBU Pak (Pvt) Ltd, Hyundai Engineering Co, Lotte Engineering and Construction Co, Deokjae Connecting Roads (Pvt) Ltd, Daewoo Pakistan Express Bus Service Ltd, Daewoo Pakistan Motorway Service Ltd. Karachi, LS Cable, Hyundai Corporation Karachi and Poonsan Corporation.

The meeting of the President with the heads and executives of leading Korean companies was also attended by Foreign Minister Hina Rabbani Khar, Communications Minister Dr. Arbab Alamgir Khan, Finance Minister Dr. Abdul Hafeez Shaikh, Makhdoom Shahabuddin, Federal Minister for Textile Industry, Syed Naveed Qamar, Federal Minister for Water and Power, Secretary General to the President M. Salman Faruqi and Chairman BOI Saleem H Manndviwala

New Gwadar International Airport to be completed by 2014 -- APP

ISLAMABAD, Dec 2 (APP): The under construction New Gwadar International Airport, which was due to be completed by end of 2013, would now be completed by December 2014. According to official sources here, the PC-1 of New Gwadar International Airport Project was approved in September 2008 with implementation schedule of 48 months. The initial Site Protection Work was started in January 2009 with a planned completion time of 10 months.

However, due to law and order situation of the area and frequent interruption extensions have been granted to the contractor. Consequently, the progress remained slow and the project schedule was affected adversely.

Presently, only 27.73 percent progress was achieved with regards to Site Protection Work by Frontier Works Organization (FWO).

The remaining works on the airside infrastructure, terminal building, cargo and allied services are at planning stage with consultant M/s NESPAK.

The sources informed that considering the uncertainty associated with the project, no definite date for completion of this project can be ascertained.

The planning of the project depends on successful launching of remaining works, provided peace and harmony prevailed in the area and subject to completion of Site Protection Work, amicable resolution of land disputes with the locals, remaining works can be planned to be completed by December.

Balochistan Chief Minister Nawab Aslam Raisani said on Sunday the Gwadar port had the potential to turn into a trade hub for the region and gateway to Central Asia and the Middle East. -- APP

Balochistan Chief Minister Nawab Aslam Raisani said on Sunday the Gwadar port had the potential to turn into a trade hub for the region and gateway to Central Asia and the Middle East.

Addressing a ceremony held to inaugurate the civil secretariat in the coastal town, he said: "Gwadar has strategic and geographical importance and the 21st Century belongs to such places."

Nawab Raisani said his government was endeavouring to make the port fully functional and Gwadar had been declared the winter provincial capital to expedite development.

He said some elements were waging propaganda against the decision that had been taken in the interest of the people of the region.

People claiming that the move will put financial burden on the poor province must visit Gwadar and witness the expenditure made by the provincial government, he said. The chief minister said he would concentrate on his development agenda for the province and its people.

"Pakistan's future is linked with the functioning of Gwadar port."

He said offices of all important departments had been set up in the town.

He said the port had become partially functional and ships carrying fertiliser from various countries were being offloaded there.

The chief minister said the rich mineral resources of the province had not been exploited so far and the government was making all out efforts to explore them for the benefit of the people.

He said his government had been striving from its first day to make the people of Balochistan the owners of those resources and bring a change in their lives as they had not been given their rights by all pervious rulers.

Provincial Finance Secretary Mir Dostain Jamaldani informed the chief minister that Rs20.8 million had been allocated setting up offices in Gwadar and Rs2.5 million would be spent on purchasing computers.

Govt released Rs 11.90bn under PSDP during last month -- Daily Times

Govt released Rs 11.90bn under PSDP during last month

* Amount is 230% more compared to last month releases

* If trend continues then by year-end, the developmental budget would be cut by 50%

By Ijaz Kakakhel

ISLAMABAD: The government has released Rs 11.90 billion under Public Sector Development Programme (PSDP-2011-12) from November 4 to December 2 during the current fiscal year against a criteria set by ministry of finance to release Rs 25 billion per month, sources told Daily Times here on Saturday.

With addition of this amount, total PSDP 2011-12 releases reached to Rs 74.7 billion by December 2. However, the releases in last month, from October 8 to Nov 4, the government (Planning Commission) released Rs 3.6 billion and by comparison, the per month releases increased by Rs 8.30 billion (showing 230

percent higher increase against last month).

But the Rs 11.90 billion release under PSDP from November 4 to December 2 is still lagging behind a criteria set by ministry of finance to release Rs 25 billion per month. The releases from current year PSDP shows a downward trend and if the same trend continues then by end of this year, the developmental budget would be cut by more than fifty percent as the case was in PSDP 2010-11, the sources claimed.

The total releases under developmental budget Rs 74.7 billion further classified as Rs 37.6 billion for infrastructure sector, Rs 36.3 billion for social sector and Rs 0.695 billion for others sectors. The whole allocation was made for 1263 developmental projects of national importance.

Total size of the PSDP 2011-12 is Rs 290 billion including Rs 36.5 billion as foreign exchange component (FEC) and Rs 33 billion as Special Programme. The releases against Special Programmes are being made by Cabinet Division, Finance Division. The Foreign Aid disbursement amount is received in the Economic Affairs Division. The Rs 74.7 billion releases are exclusive of Foreign Aid disbursement. Therefore above releases are against Rs 220.5 billion (290-36.5-33), the Planning and Development Division will release funds against this amount (Rs 220.5 billion).

Officials figure released issued here on Saturday revealed that the releases to communications division, NHA and Higher Education Commission are made one line within Rs 220.5 billion. Project wise expenditure is made by these organisations as per their priority.

Rupee component of Power Sector Projects is arranged by WAPDA from its own resources. Therefore, rupee component of Power Sector Projects is not part of budget and not released by Planning and Development Division.

Pakistan Atomic Energy Commission received Rs 4.576 billion for Chashma Nuclear Power Project (C3 & C4) being constructed in collaboration with China. Total cost of these two new nuclear power projects amounts to Rs 189.918 billion. PAEC also received Rs 633.500 million for Chashma Nuclear Power Project CII, Mianwali with a total cost of Rs 51.046 billion.

In the Water and Power Sector, Federal government has released Rs 3.600 billion for land acquisition for construction of Diamer Basha Dam the project land acquisition requires Rs 60.052 billion, the Dam will generate 4500MW power on completion. Federal government has released Rs 3 billion for Raising of Mangla Dam including resettlement project while and total cost of this project is Rs 62.553 billion.

Gomal Zam Dam project Rs 250 million, Kachhi Canal (Phase-I) Rs 750 million, Raineer Canal (Phase-I) Rs 750 million, Lower Indus Right Bank Irrigation and Drainage, Sindh Rs 500 million, Balochistan Effluent Disposal into RBOD, (RBOD-III) Rs 500 million, Revamping, Rehabilitation of Irrigation and Drainage System of Sindh Rs 180 million, Extension of Right Bank Outfall Drain from Sehwan to Sea, (RBODII), Dadu and Thatta District of Sindh Rs 1.3 billion, Lining of Distributaries and Minors in Sindh Rs 240 million, Construction of 100 Delay Action Dams, Balochistan Rs 120 million, Construction of 20 small Dams in Khyber Pakhtunkhwa Rs 100 million, re-construction of Shadi Kour Dam, District Gwadar Rs 100 million, Federal government had allocated Rs 5 billion for People's Works Programme-I and Rs 28 billion were allocated for People's Works Programme-II, that are flagship development programmes of the PPP government in the centre, have not received a single penny till November 4, 2011-12.

Out of the block allocation of Rs 8.2 billion Azad Jammu and Kashmir government was released only Rs 2.788 billion by end November 4. The government also released Rs 200 million for construction of Rathua Haryam Bridge across Reservoir Channel on Mirpur-Islamgarh Road.

Federal government had announced in the federal budget a total development

budget of Rs 730 billion for 2011-12, compared to Rs 663 billion last year, showing a 10 percent increase.

Among the total development budget PSDP, an amount of Rs 290 billion has been allocated for the projects of federal government, whereas Rs 430 billion have been earmarked for the provinces, to be spent through their Annual Development Programmes (ADPs), while Rs 10 billion have been allocated for the Earthquake Reconstruction and Rehabilitation Authority (ERRA).

Gwadar will be a centre for trade, says Raisani -- APP

QUETTA: Balochistan Chief Minister Nawab Raisani, while highlighting the importance of the Gwadar seaport, said that it would become a centre for trade and would be a gateway to access resource rich countries of Central Asia.

He said this while inaugurating the Campus of Civil Secretariat in Gwadar. Provincial Ministers Sayed Eshan Shah, Mir Hamal Kalmati, Hasim Kurd Gilu and provincial secretaries of different departments were also present on the occasion.

"Gwadar will be an importance trade centre for the world in the near future as it has geographical importance and would become a door to get access to Central Asia and the Middle East," the chief minister said, adding that the 21st century would be fruitful for a country having strategic importance like Gwadar.

He said that he was taking keen interest in making the Gwadar port completely functional because the future of the nation was attached to Gwadar. "All the necessary offices are being set up in Gwadar to smoothly run the affairs. It is a first step to bring prosperity and economic improvement, not only in the region, but also in Pakistan. It will boost the economy of the country if it is made completely functional," he added.

Raisani said that his government had been making efforts from the very beginning to give the right of ownership to the people of this region over their resources, adding that this would change the life of the people and would bring prosperity through socio-economic change.

Commenting on Gwadar's current status, the chief minister said that it was partially functional and that ships carrying cargo were being anchored and off-loaded. "Declaring Gwadar as the winter provincial capital would pave the way to expediting the process of development." Referring to criticism over making Gwadar the winter capital, the chief minister said that some elements were engaged in a propaganda campaign and that it had to be made clear to everyone that decision was taken in the interest of the people of the region. "Those people saying that it would ill be a financial burden for the economy of Balochistan should visit Gwadar and witness the expenditure made by the provincial government," he added.

Finance Secretary Dosteen Jamaldini said that the provincial government had spent Rs 28.6 million to make Gwadar the provincial capital, while Rs 2.5 million were being spent on equipment and computers for offices. "Secretaries of different departments have resumed their duties in Gwadar," he said.

The Makran deputy inspector general said that law enforcement agencies were taking the necessary steps to ensure the protection of the life and property of the people in Gwadar. Later, the chief minister visited the newly set up Civil Secretariat.

Red China: PLA engineers operating multiple projects in Pakistan -- Russian News!

The PLA engineer corps is helping to build Pakistan's Gwadar Port, the Saindak Project in Baluchistan, the Chashma-I and II nuclear power plants, as well as the Karakoram Highway (KKH) and power projects in Pakistan-administered Kashmir. Linking the Gwadar Port with the KKH will reduce the cost of Chinese products in Central Asian markets and expand China's access to oil, gas, and minerals from Africa and the Middle East, Pakistan's Jang newspaper reports. Chinese-supported infrastructure projects under way in Gilgit-Baltistan and the Northern Areas include the Sadpara Dam, Bunji Dam (7000 MW), Kayalbo Dam (3000 MW), Diamer Bhasha Dam (4000 MW), the Naltar Power Project, the Gilgit-Skardu Highway, and the Praib Bridge. China is building several tunnels in Hunza, the Sost Dry Port, a fiber optic network, and several oil and gas projects. Beijing and Islamabad are also considering an oil pipeline from Gwadar to western China and a Pakistan-Iran gas pipeline to transport oil to China from Saudi Arabia and Iran.

Urea being discharged at Gwadar -- APP

Urea being discharged at Gwadar

Karachi—Trading Corporation of Pakistan (TCP) has informed that currently three vessels, carrying a total of around 120,000 tonnes of urea, MV Grate Mary carrying 27,500 tonnes, MV Medi Lisbon carrying 47,334 tonnes and MV Dubai Ambassador carrying 45,000 tonnes are under discharge at Gwadar Port. According to a press release issued here, six more vessels carrying around 200,000 tonnes of urea, (i) MV Lancelot carrying 49,500 tonnes, (ii) MV Magic Orient carrying 19,995 tonnes, (iii) MV Poavaosa Wisdom carrying 24,403 tonnes, (iv) MV Master carrying 22,624 tonnes, (v) MV Ocean Galaxy carrying 320,000 tonnes and (vi) MV Lycavitos carrying 51,996 tonnes are under voyage and scheduled to arrive during the next week on different dates.

With the arrival of above shipments the arrived quantity would work out to around 400,000 tonnes against the total contracted quantity of 700,000 tonnes being imported by TCP under the directives of Government. The process of cargo discharge as well as lifting and transportation of urea by National Fertiliser Marketing Limited (NFML) is underway, round the clock.

As per shipment schedules received, the balance around 326,000 tonnes would also arrive by the end of December 2011. However, TCP is vigorously pursuing the suppliers to further expedite the supplies.

Pak-China Institute signs MoU to enhance bilateral trade -- APP

Pak-China Institute signs MoU to enhance bilateral trade

ISLAMABAD: Pakistan-China Business Council of Federation of Pakistan Chamber of Commerce and Industry (FPCCI) and Pakistan-China Institute have entered into an agreement to jointly work for the promotion of trade relations between Pakistan and China.

The Memorandum of Understanding was signed at Federation House, Karachi by Tariq Sayeed, Patron-in-Chief of Pakistan-China Business Council and Mushahid Hussain Syed, Chairman, Pakistan-China Institute, according to a statement received here Friday.

While speaking on the signing ceremony both the signatories informed that the purpose of signing of Memorandum of Understanding was to make joint efforts in bringing the business community of the both countries closer and intensifying the economic and bilateral trade relations between the two countries.

Both the non Government institutions will jointly hold Seminars, Briefings, Conferences, Research projects and bilateral meetings on a regular basis in Pakistan as well as organizing joint delegations and joint ventures in various fields.

In accordance to the agreement they will organize participation in Trade Fairs in China to enhance the commerce and economy and trade.

The two institutions will hold bilateral as well as trilateral consultations periodically in cooperation with reputable counterparts in China for exchange of business leaders, delegations of private sector enterprises as well as scholars and students interested in these issues.

The two institutions will serve as the principal private sector platform between Pakistan and China to promote research, study and activities on various other areas well as that may be of interest to counterparts in China including geopolitics, energy, education, environment, culture, sports, climate change, poverty alleviation, good governance or any other challenges facing the two countries.

The websites of both institutions will be available to each other for dissemination of information by mutual consent.

The two institutions will endeavor to organize an annual Pakistan-China Business Summit alternatively in Pakistan and China, with the support of a counterpart from China, as well as including each others organizations in delegations visiting China or a third country with a focus on China.

Given the emerging regional cooperation, both the institutions will seek to promote closer collaboration between Pakistan and China in the broader context of economic interaction between two countries with reference to South Asia, East Asia, Central Asia and West Asia to pursue and promote the vision that is common namely, that the 21st century should be an "Asian Century" of peace, progress and prosperity for the entire Asia.

China wants to intensify amicable, cooperation relations with Pakistan:

Dai Bingguo -- APP

China wants to intensify amicable, cooperation relations with Pakistan: Dai Bingguo

ISLAMABAD, Dec 23 (APP) - State Councilor of China Dai Bingguo while reiterating China's commitment to further bolster the historic and deep-rooted ties with Pakistan said Friday, China wanted to intensify amicable and cooperative relations with Pakistan. "China is firmly committed to deepening friendship and partnership with neighboring countries. We want to intensify amicable and cooperative relations with Pakistan and other neighboring countries," Dai Bingguo said while addressing a reception hosted in his honour by Prime Minister Syed Yusuf Raza Gilani here at the PM House.

The reception, which marked the 60th Anniversary of China-Pakistan Diplomats Relations and the Closing of the Year of China-Pakistan Friendship, was attended, besides the Chinese delegation, by federal ministers and members of the parliament.

"Together, let's share peace, promote development, pursue cooperation and achieve win-win results for all", the Chinese State Councilor said.

Dai Bingguo spoke high of Pakistan-China relations and said "China and Pakistan are friendly neighbours connected by the same mountains and rivers."

"Sixty years ago, our two countries established diplomatic relations, an event that opened a new chapter in our relationship. Since then, the China-Pakistan political ties have become stronger after being tested by trying times," he added.

The Chinese State Councilor said, "Our all-round cooperation has drawn our interests closer. And the friendship between the brotherly Chinese and Pakistani people have grown stronger still as we have gone through thick and thin together."

He also quoted late Chinese Premier Zhou Enlai as pointing out that, "The friendly relations between China and Pakistan is not dictated by expediency; it is rooted in our mutual need and the interests of Asia-Africa solidarity and world peace. Our friendship manifests itself not just in ordinary times, but also in critical moments."

Dai Bingguo said during the past 60 years, China and Pakistan have forged a strategic partnership of cooperation that has produced fruitful results.

"Our two countries have treated each other with mutual respect and as equals, and we could always count on each other for sincere and selfless support and assistance."

"Our leaders, who have visited each other frequently as relatives do, have been in close communication and coordination on major issues. There have also been close exchanges between our parliaments, political parties and local governments," he added.

The Chinese State Councilor said, "Our bilateral trade has grown from a modest 10 million dollars in the early days of diplomatic relations to almost 10 billion dollars today."

"The signing of the bilateral free trade agreement further unleashed the potential in our economic and trade cooperation. The Karakorum Highway, Gwadar Port, Taxila Heavy Mechanical Complex, Chashma Nuclear Power Plant, Jinnah Sports Stadium and Pakistan-China Friendship Centre: these mega-projects bear testimony to the lasting China-Pakistan friendship," he added.

Dai Bingguo, however, mentioned the profound and complex changes taking place in today's world and added, "Confronted with the complicated and volatile international situation, it is all the more important for all-weather strategic partners like China and Pakistan to handle our own affairs well and maintain stability and growth, and to deepen and broaden our cooperation."

"Thus we can secure more favourable conditions for the stability and development of our own countries and make greater contribution to peace, stability, development and prosperity of the region and the world at large," he added.

The Chinese State Councilor stressed the need for further strengthen strategic coordination and "carry on the tradition of frequent high-level exchanges, and support and help each other on issues concerning each other's major interests."

"China always maintains that Pakistan's independence, sovereignty and territorial integrity should be duly respected; its contribution and sacrifice in the international counter-terrorism campaign should be fully recognized; and its effort to achieve

national stability and development should receive strong support and sincere assistance from the international community", he added.

He also stressed the need for further expanding Pak-China practical cooperation in various fields through various ways and means including enhanced people to people exchanges.

Pak-China partnership conducive to stability of Asia: Gilani -- Daily Dawn

Pak-China partnership conducive to stability of Asia: Gilani

Prime Minister Yousuf Raza Gilani shakes hand with Dai Bingguo State Councilor of China, during a meeting at PM House in Islamabad on Friday. – Photo by PPI

ISLAMABAD: Prime Minister Yousuf Raza Gilani on Friday said Pakistan-China comprehensive cooperation and robust partnership was in the fundamental interest of their peoples and conducive to peace, progress and stability of Asia.

"There is a complete convergence of views of our two countries on the global and regional issues and a commonality of approach to advance the international agenda for peace and prosperity," Gilani said while speaking at a banquet he hosted in honour of the visiting State Councilor of China Dai Bingguo here at the PM House.

The prime minister termed the friendship with China as the cornerstone of Pakistan's foreign policy and said, "the relations between Pakistan and China go beyond governments and are deeply rooted in the hearts and minds of our peoples."

"We rejoice with our Chinese friends on their remarkable national accomplishments. China's economic transformation, technological excellence and spirit of innovation elicit our respect and admiration," he added.

The prime minister said China also continues to make an admirable contribution to global peace and development, adding, "It provides an excellent example of wise conduct in international affairs."

He said Pakistan and China are close neighbours linked by common rivers and mountains.

Gilani said Pakistan supports China on all its core issues, adding, "We support One China policy and are totally committed to upholding of China's sovereignty and territorial integrity."

"We also appreciate China's invaluable support for Pakistan's socio-economic development," he added.

The prime minister said Pakistan also seeks to improve its relations with India and find a peaceful solution to all outstanding issues, adding, "in this context, we attach importance to the ongoing dialogue process with India and hope that it would be productive and result-oriented."

He said, Pakistan has been in the forefront of the campaign against terror. "We have registered significant success and offered enormous sacrifices. We remain committed to eliminating the specter of terrorism from our region."

Gilani said Premier Wen Jiabao's visit last December was another outstanding landmark in the all-dimensional friendship and cooperative partnership between Pakistan and China.

"I am certain that State Councillor Dai Bingguo's visit will also contribute to the further deepening and broadening of the horizons of our cooperation in all spheres," he added.

The prime minister on this occasion also conveyed to the Chinese leadership and

people warm greetings and good wishes of the people of Pakistan.

“Pakistan will remain a true and steadfast friend of the great Chinese nation. Long live Pakistan-China friendship,” he added.

Expanding oil refining infrastructure -- Daily Times

Expanding oil refining infrastructure

Demand for the POL (petroleum, oil, lubricants) products in Pakistan is growing stronger on a year-on-year basis.

It is projected that the annual demand of POL products would increase to 19 million tons by the year 2017-18 and over 34 million tons by 2025-26 against the present consumption of 20 million tons.

Current domestic refining capacity is insufficient to meet present demand of the POL products.

Today, the country has a total refining capacity to process around 287,000 barrels per day (bpd) or, equivalent 13 million tons, of crude oil annually.

There are seven oil refineries operating.

Major players in the sector are Pak-Arab Refinery Co Ltd (PARCO) of 100,000 bpd, National Refinery Ltd of 65,000 bpd, Pakistan Refinery Ltd of 50,000 bpd, Attock Refinery Ltd of 40,000 bpd and Byco (formerly Bosicar) Pakistan Ltd of 30,000 bpd output capacity.

The balance annual demand of 7 million tons oil is being met through imports.

Attock Refinery is totally dependent on local crude and gas condensate, whereas PARCO, which is a joint venture between the governments of Pakistan and the UAE, processes heavy crude from the UAE only.

Pakistan Refinery and National Refinery also process indigenous crude, blending with crude oil imported from the Gulf and Saudi Arabian sources.

It was planned for many years to undertake up-gradation and capacity expansion of the existing refineries and to set up new refinery projects in the private sector.

It was projected to achieve total capacity to 400,000 bpd by 2009, and, subsequently, 520,000 bpd in 2014.

The plans however could not be implemented as envisaged.

There has been a nominal increase in capacity expansion in the past years but no new refinery project could come on stream.

On the other hand, capacity utilisation of the existing oil refineries has been declining in recent years due to a variety of reasons.

At present, the refineries are not even operating at optimal available capacity, as a result of the circular debt issue.

This situation would result in further widening the gap between demand and oil supply in coming years, rather there are already signs of the country facing a severe oil crisis in the short-term.

In a latest development, the industry has revived its plans for modernisation and capacity expansion aiming to develop capability to produce large quantities of ultra-clean fuels in line with global trend of stricter quality specifications.

Now, Attock Refinery plans to expand its installed capacity to 53,000 bpd within four years or so, with an investment of \$100 million.

Likewise, Pakistan Refinery plans to install isomerization unit (for improving the octane value), diesel hydro desulfurization (DHDS) complex and thermal gas oil unit at a total cost of \$250 million.

Another investment of \$300 million will be made by National Refinery for further expansion of its facilities including installation of isomerization and DHDS units.

Bosicar Refinery claims that its throughput has recently increased to 35, 000 bpd, as a result of revamping and de-bottlenecking of existing refinery, and may further enhance shortly to 40,000 bpd.

A new refinery by Byco Oil Pakistan Ltd at Mouza Kund in Balochistan is the only project being undertaken at present.

This new unit of 115,000 bpd capacity to refine crude oil, relocated and currently under construction at a cost of \$430 million is scheduled to commence its operations by 2012.

The company is also establishing a petrochemical complex, with an initial capacity of 17,100 bpd to produce aromatics like benzene, toluene and xylenes, for which plant machinery has already been imported.

The proposed Khalifa Coastal Refinery, of capacity to process 250,000 bpd or 13 million tons of crude oil annually, would be the largest refinery in Pakistan on completion.

To be installed near Hub in Balochistan, the refinery was approved by the ECC of the Cabinet in 2007 at a cost of \$5 billion, now revised to \$6 billion.

The project, a joint venture of PARCO and International Petroleum Investment Co (IPC) of the UAE, was scheduled for commissioning in 2011.

Sadly, there has been no physical progress on the construction of Khalifa Refinery as yet, for which the government has provided 1,000 acres of land to the investors as free-hold lease without charging any rent.

The reported, the project is being revived.

The Trans-Asia Refinery project of 100,000 bpd capacity was planned at Port Qasim, Karachi with the help of Kuwait and South Korea.

Also, Kuwait and Saudi Arabia had shown interest to set up refineries of 200,000 bpd at Port Qasim and 300,000 bpd capacity at Hub, respectively.

China wanted to construct a refinery and petrochemical complex at Gwadar.

Nonetheless, there has been no progress on any of these projects.

Availability and affordability of energy is essential for sustainable economic growth.

To effectively meet the future oil demands, the existing oil-refining infrastructure is to be augmented.

For the purpose, the government needs to intervene and expedite implementation of the planned refinery projects within agreed, time schedules, ensuring a conducive environment for investment.

Pak-China CSA to boost trade and investment -- Daily Times

Pak-China CSA to boost trade and investment

Staff Report

KARACHI: Pakistan and China have signed Currency Swap Agreement (CSA) for promoting bilateral trade and enhancing financing of direct investment between the two countries in their respective local currencies.

State Bank of Pakistan (SBP) Governor Yaseen Anwar Thursday stated this while explaining CSA with Peoples Bank of China (PBC).

The CSA has been executed for a tenor of three years in respect of local currencies, Rs 140 billion and 10 billion yuan.

This is the second CSA that SBP has signed, the first one being with the Central Bank of Turkey on November 1, 2011.

SBP governor said that the principal objective of these swaps is to promote the use of regional currencies for trade settlement purposes and specifically in the case of China because the agreement will enhance the role of the yuan in international trade and investment.

Since the CSA is a bilateral financial transaction, all terms and conditions apply equally to both countries and the pricing is based on standard market benchmarks, which are widely acceptable in the respective domestic markets of the two countries, he added.

Both central banks will have the ability to draw on the swap line any time during the tenor of the swap.

SBP can purchase yuan from PBC against its local currency, and repurchase its local currency with the same Chinese currency on a predetermined maturity date and exchange rate.

Similarly PBC can also purchase rupee against Chinese currency but standard market pricing will apply on the date of utilisation. Like any swap, the pricing is linked to interest rates differentials between the two currencies.

Anwar said that the announcement of the CSA between the two central banks will give a positive signal to the market on the availability of liquidity of the other country's currency in the onshore market.

This means, SBP will have the ability to draw on the swap line and provide yuan to banks in Pakistan. Banks will on-lend this liquidity to importers/exporters involved in trade denominated in yuan.

At maturity, the importer/exporter will repay the foreign currency to the lending bank; and the bank will repay to the respective central bank. The trade financing regulations in foreign currencies are already available in Pakistan for providing liquidity and facilitating trade. The same concept will also apply in the case of PBC borrowing rupees for trade or investment in Pakistan, the SBP governor said.

On the maturity date of the letter of credit (LC), the importer will pay off the overseas supplier by borrowing in yuan. Assuming borrowing is for six months, the importer will save on the rupee cost and after six months the importer will buy yuan against rupee and pay off the yuan loan. Availability of onshore yuan financing will encourage importers to open yuan denominated LCs.

Once the contract is established, the exporter will borrow in yuan, sell yuan against rupee and utilise rupee for its local operations. On the maturity date of the contract, the exporter will receive yuan from the overseas buyer and payoff the yuan loan locally.

Utilisation of rupee in China: Same concept will apply to PBC drawing rupee against the swap line and lending the same to banks in China. China has significant investments in various projects in Pakistan and rupee proceeds of the swap can be channelised to such long-term projects in Pakistan via Chinese banks.

Concurrently with the arrival in Pakistan of the Industrial Commercial Bank of China (ICBC), the largest bank in China (and the world in terms of capital), the CSA provides a strong boost towards building offshore investor confidence that will encourage other investors to capitalise on the economic opportunities in Pakistan, Anwar concluded.

The title "Gwadar's largest commercial scheme" Al-Noor cargo city holds this distinct. Al-Noor cargo city is also known as Gwadar's first strategic commercial scheme. Al-Noor cargo city is situated in the mid of Gwadar airport and Gwadar sea port. It has one-kilometer wide front on the 205ft wide main Baluchistan Broadway and 150ft wide Existing coastal highway.

Al-Noor Cargo City gives an eye-catching stance to both local and international investors due to its strategic location. In addition, just 1500 yards distance to Deep Sea East Bay gives another edge to Al-Noor Cargo City.

BISP acting as bridge for Sino-Pak social sector coop' -- Observer

BISP acting as bridge for Sino-Pak social sector coop'

Staff Reporter

Islamabad—Federal Minister and Chairperson Benazir Income Support Programme (BISP), Farzana Raja has said that Pakistan and China are all weather friends and the government and people of Pakistan fully acknowledge and appreciate the support of China, especially in the social sector of Pakistan. She said this while talking to Mr. Liu Jian, Chinese Ambassador to Pakistan here at BISP Secretariat Thursday who visited to deliver relief goods from All China Women Federation (ACNF) to the flood affected beneficiaries of BISP in Sindh.

Farzana Raja while appreciating the support of ACNF to recent flood affectees of Sindh said that China is always first to stand by Pakistan in the hour of need. It should be remembered that ACNF had also sent relief goods for the flood affectees in 2010. Chairperson BISP said that BISP has emerged as an on organization which is proving to be a bridge for enhanced Pak-China cooperation in the social sector. She added further that BISP is willing to explore new facets of mutual cooperation with China in the year 2012 as a part of its resolve to benefit the under privileged segments of society.

Chairperson BISP appraised visiting Chinese ambassador about the ongoing initiative to promote vocational and technical skills in Pakistan with the collaboration of China Federation for Peace and Development. Under the programme, she said, hundreds of individuals from beneficiary families are being trained as part of graduation scheme of BISP to enable financially vulnerable families to break the vicious circle of poverty on long term basis.

Farzana Raja said that BISP would happily share the data collected through national poverty survey with Chinese organizations that are willing to work in the social welfare projects in Pakistan under their corporate social responsibility.

Mr. Liu Jian admired the vision and working of BISP for poverty alleviation and underpinned the need of enhanced cooperation between the two countries, especially in the social sector. He said that due to transparency and objectivity of BISP operations, China would not only continue its support for the programme in the forthcoming year but will also like to explore the avenues for further collaboration and cooperation with BISP.

China to be the largest importer of Pak products' -- Daily Times

China to be the largest importer of Pak products'

Staff Report

KARACHI: People's Republic of China is going to be the largest importer of Pakistani products in the coming future, as Karakoram Highway (KKH) would be re-linked with Western China in 2012.

Trade Development Authority of Pakistan (TDAP) Chief Executive Tariq Iqbal Puri said in a meeting with Karachi Chamber of Commerce and Industry (KCCI) members that regional countries should be focused on enhancing Pakistani exports.

"Regional countries like Afghanistan, China, India, Iran, Russia, Association of South East Asian Nation (ASEAN) countries and Gulf Cooperation Council (GCC) countries are showing interest in Pakistani products," he highlighted.

He said there is a huge potential and opportunity in China for Pakistani business.

He highlighted the participation of Pakistan in more than 12 exhibitions and four

business forums in China that would be increased to 20 exhibitions in 2012.

Exploring different foreign markets for Pakistani products, he highlighted Russia for potatoes and cement, Japan for mango, etc.

He said TDAP is making intellectual contribution in promoting Pakistani products to foreign markets and KCCI should organise workshops and seminars to create awareness for the unexplored potential in these markets among the business community.

“Currently the European Union (EU) crisis are hitting Pakistani exports, that is why the exports are going down and the country is facing uncertainty. Now the markets should be diversified.”

He said textile sector contributes a huge portion in Pakistani exports but is showing decline at present due to low cotton prices, so the export of non-textile sector like Halal food manufacturing, cosmetics and many other products to these countries might help achieve export target for this year.

He suggested various measures to promote Pakistani products and brands in overseas markets and emphasised on web portals and video conferencing. “Contents in the web portal play a significant role in exploring the potential,” he added.

He also agreed to allocate Pakistan Pavilions to KCCI for several international exhibitions including TDAP’s WEXNET for woman entrepreneurs scheduled to be organised in Dubai soon.

KCCI President Mian Abrar Ahmad said the existing exports of Pakistan do not lie with the country’s export potential due to deteriorating law and order situation and negative perception of the country in foreign markets.

“Even Saudi Arabia has imposed restrictions on remittance to Pakistan,” he added.

He highlighted Halal food has a big market, even non-Muslim countries take interest in this sector. Also agriculture, engineering and value-added sector have much potential.

He said Pakistan has become an aid-dependant country chronically.

Former KCCI president Majyd Aziz highlighted the Turkish consul general witnessed mineral efficiency in Pakistan but feared in visiting such areas like Balochistan and Khyber Pakhtunkhwa due to negative perception of the country.

Zardari orders prompt off-loading of urea at Gwadar -- APP

Zardari orders prompt off-loading of urea at Gwadar

KARACHI, Jan 3 (APP): President Asif Ali Zardari on Tuesday directed to expedite off-loading and transportation of the imported urea to other parts of the country, currently clogged up at the Gwadar Port. The President directed the National Fertilizer Marketing Ltd (NFML) to speed up the process of transportation and distribution of urea while ensuring transparency in the distribution mechanism. In a meeting held at the Bilawal House here, the President stressed for resolving the issue of availability of fertilizer in far-flung areas of the country and controlling the rising price besides saving the imported stock from the impact of extreme weather. The meeting was held to discuss the current situation with respect to urea and price of rice, where it was informed that so far 700,000 tons of imported urea had arrived at the Gwadar port and 480,000 tons had been off-loaded.

The President observed that all efforts should be undertaken to resolve operational limitations as any adverse change in weather was likely to cause damage to the imported fertilizer lying at the port.

It was also informed that the Trading Corporation of Pakistan (TCP) had offered their support to NFML for the transportation of 0.2 MT urea to up-country destination at the rates and other formalities fixed by NFML.

The President was also briefed about province-wise share, distribution and the quantity of urea fertilizer that had been distributed so far among various parts of the country.

In the later part of the briefing, it was informed that according to Rice Exporters Association of Pakistan (REAP), at present roughly 5,00,000 metric tons of Irri-6 rice was available in the market with a price of about Rs. 29000 PMT.

It was informed that the TCP at present was not involved in local procurement, price mechanism or export of rice and would only intervene if required by the Government.

Spokesperson Farhatullah Babar said that in another meeting that followed this briefing, President Asif Ali Zardari reviewed situation with regards to communication network that was destroyed or partially damaged as a result of July 2010 floods.

Babar said that it was informed that as a result of huge floods, extensive damage was caused to NHA network throughout Pakistan that included damages to roads, bridges, culverts, retaining walls and causeways etc.

It was informed that approximately 800 km of national highway network was either completely or partially damaged which is 6.6 percent of the total 12131 Km of NHA network. It was informed that 46 bridges were also damaged as a result of 2010 floods.

The NHA Chairman while briefing the President informed that the NHA has completed Damage Need Assessment (DNA) and has provided details to the donors i.e Asian Development Bank which is the lead agency for communication/transport sector.

It was informed that the cost of damages was assessed to be Rs. 18.38 billion while the cost for restoration was Rs. 22.41 billion without cost of social and environment impact safeguards, land cost, design and escalation etc.

It was informed that Chinese consultants have started design surveys and the design of South Section would be completed by January 2012. The construction work would commence in March 2012, it was told. The design of North Section would be completed by February and by first week of March this year construction work would commence.

The President directed the NHA to facilitate Chinese consultants and contractors working on these projects and also to ensure their security and provide them with historical data.

Representatives of Chinese consultants and contractors were also present during the meeting.

Those who were present during the meetings, included among others Sindh Chief Minister Syed Qaim Ali Shah, provincial ministers, federal secretaries, NHA Chairman and TCP Chairman besides other senior officials.

China's biggest web portal lauds Pak-China friendship -- Beijing

China's biggest web portal lauds Pak-China friendship

Date : 09-01-2012

Beijing; Jan 9:China's biggest web portal, People's Daily Online has published three pictorial articles in its today's edition praising Pakistan-China friendship and cooperation in various fields including diplomacy, defense and strategic cooperation over the last six decades.

The articles have brief write-ups in which Pakistan China friendship has been hailed along with a total of 72 pictures. These include pictures of the leadership of the two countries, jointly made defense equipment including JF-17 frigates, Naval Ships and Heavy Mechanical Complex in Taxila as well as the 300-kw Chashma nuclear power plant and Jinnah Sports Stadium Islamabad.

The paper said these are significant milestones in Pakistan-China friendship and regarded them as "fruits of Pakistan-China cooperation."

The pictures of diplomatic friendship include photos of the older leadership such as Chairman Mao Zedong, Zhu Enlai, Deng Xiaoping, Ayub Khan, Zulfikar Ali Bhutto and Mohtarma Benazir Bhutto Shaheed as well as the current leadership including Presidents Asif Ali Zardari, Hu Jintao and Prime Ministers Syed Yusuf Raza Gilani and Wen Jiabao.

The online paper makes reference to a historic quote of Chairman Mao Zedong dated May 21, 1951, the day when Pakistan and China established diplomatic relations. He said: "China and Pakistan have long-term friendship, and both the countries have common aspirations of facilitating bilateral economy, developing cultural relations and striving for permanent peace in Asia and the world."

People's Daily Online is the web version of People's Daily China's most influential newspaper which belongs to the ruling Communist Party of China and has an average of 200 million hits every day.

Currently a five-member delegation of People's Daily Online is on a week-long tour of Pakistan to interview the top leadership of the country.

Pakistan, Oman agree to strengthen cooperation in diverse areas -- APP
Pakistan, Oman agree to strengthen cooperation in diverse areas

ISLAMABAD, Jan 9 (APP): Pakistan and Oman have agreed to further strengthen mutually beneficial cooperation in a number of areas including trade and commerce, finance and banking, law enforcement, education and health care. This was agreed during the fourth round of Pak-Oman Annual Bilateral Political Consultations held in Muscat on Monday, a press release issued by the ministry of foreign affairs here said.

Foreign Secretary Salman Bashir and Omani Under Secretary for Diplomatic Affairs, Ahmed bin Yousuf bin Obaid Al Harthy discussed whole range of bilateral cooperation between Pakistan and Oman.

Both sides also exchanged views on regional and international situation.

Foreign Secretary Salman Bashir also called on His Highness Sayyid As'ad bin Tariq Al-Said, Advisor to His Majesty the Sultan of Oman and the Minister Responsible for Foreign Affairs Yousuf bin Alawi bin Abdullah.

Pakistan's Ambassador in Oman, Nawabzada Aminullah Khan Raisani and Director General Middle East at Ministry of Foreign Affairs Mr Manzoor ul Haq also participated in the consultations.

American Pakistanis keen to facilitate investment -- Express News
American Pakistanis keen to facilitate investment

Faryal Najeeb
Tuesday, January 10, 2012

KARACHI: American-Pakistanis are keen to aid Pakistan but challenges are equally great which puts off both investors and philanthropists, said Awais Khan, President and CEO of American Pakistan Foundation (APF).

"Even if you are dealing with the private sector, you have to go through government channels to get all the legal paperwork done, and that's where you face suggestions of underhand dealings," he said.

Khan said that his foundation also had to face a lot of corruption offers and getting past it to work within the legal parameters had been a huge challenge that they still continue to face.

APF is currently focusing on dealing with two issues - the energy crisis of Pakistan and the high unemployment rate, he said while speaking to The News on Monday at the US Counsel General's residence.

"High unemployment rate is directly linked to poverty and we are looking to facilitate vocational training to unemployed people along with facilitating job opportunities both in Pakistan and abroad," he said.

Khan was of the opinion that entrepreneurship in Pakistan has high potential and can really flourish. However, he stated that this can only be possible if the government is strong of the country, which it is not.

"Four things are pivotal for an entrepreneur," he said, terming them to be the availability of cheap capital, sufficient energy supply, a strong government and legal system and the access to relevant networks and stakeholders.

He said that entrepreneurship is successful in the US due to the above four reasons, which sorely lack in Pakistan. "Security and image issues of Pakistan are other challenges that we have to face as facilitators of investment into the country," he added. On the matter of energy crisis he said, "We have set a goal to provide energy to one million individuals by 2015," adding that lack of sufficient energy was leading the nation's industries towards a rapid decline.

Pakistan has an abundance of resources, Khan said. The entire Balochistan can run on solar energy, while the northern areas can utilise hydroelectricity. The wind corridor from Karachi to Gwadar alone can generate 50,000 megawatts, he said, further adding that huge amount of energy can also be generated from biogas.

Green energy may seem costly in the short term, he said, but over the long run it's actually much cheaper. The former venture capitalist, who is a strong advocate for green energy and its innovation and commercialisation, said that banks in Pakistan need to be convinced to provide leasing or financial deal for energy equipments.

When asked how local individuals/businessmen can also play their part towards bringing investment into the country similar to the performance of APF, Khan said that while there are no hard and fast guidelines, institutions here need to work on capacity building and management teams.

The love for Pakistan is what has motivated Khan to move forward. "I left a very sound career as a venture capitalist to do this and people question me on my decision all the time," he candidly shared.

"It may seem like a drop in the ocean and it can be very challenging too but it's worthwhile as it's for our country," he said passionately. Speaking about his foundation, Khan shared that all their funding is from the American private sector

such as banks and corporate firms.

APF has especially played a very active role in providing flood relief and had received a \$700,000 grant from Pepsi this year for its flood relief programme.

In all, they have managed to raise \$800,000 so far and directly helped more than 42,000 individuals, which is commendable for an institution which is just two years old. However, Khan admitted that transparency of funds is always a concern and often NGOs in Pakistan have a tainted name due to their unaccountability of funds received.

"We deal only with people who have a strong creditability and due diligence is always required," he stated, adding that his foundation does a lot of leg work personally also. Khan repeatedly stressed on the need for a good government and honest leadership. "The media should play an important role and urge the people to choose their leadership wisely as it can make or break a country," he said.

All Day

Korean investors to enter JV in energy, agri sectors -- Daily Times

Korean investors to enter JV in energy, agri sectors

KARACHI: Korean investors can enter into joint ventures with Pakistan businessmen in the alternate energy, agriculture and engineering sectors. Karachi Chamber of Commerce and Industry (KCCI) President Mian Abrar Ahmad while meeting with the Ambassador of Pakistan to South Korea Shaukat Ali Mukadam said there was a need of building trading blocks of Pakistan with Asian countries, Central Asian Republics and SAARC countries.

He lamented Pakistan was never allowed economic independence and liberty by the developed countries which they allowed to Bangladesh, India, Malaysia and Vietnam in the region. He focused that the regional trade would uplift the economy of Pakistan to new horizons. Pakistan should not rely on aid and remittances.

He voiced to enhance exports and trade and was of the view the aids received from USA and Western world were never spent properly to boost the economy and for the benefit of masses. After establishment of the Gwadar port, Pakistan has been facing severe unrest by design because the leading economies never liked this progressive development.

The aim of KCCI is to develop regional trade and he suggested envoys to convince the Seoul chamber to form Karachi-Seoul Joint Chamber of Commerce and Industry on the pattern of Pakistan-Afghanistan Joint Chamber, which KCCI formed last year. He articulated that Pakistan possess great potential to multiply its exports and \$25 billion export alone can be made to USA if allowed.

He expressed discontentment on meagre 7 percent trade among SAARC countries and asserted to execute Indo-Pak trade via Karachi and Mumbai ports to bring prosperity and alleviate poverty in the region.

He requested the ambassador to invite business delegation and exhibitors to participate in the KCCI's My-Karachi Oasis of Harmony Exhibition being organised in July 2012.

Ali said, "South Korea sees Pakistan as the most promising country for investment." He said owing to a great trade potential the recent trade of \$1.36 billion could reach \$2-3 billion if trade potential is effectively utilised.

He admired despite of negative travel advisory, the Koreans do not hesitate to visit Pakistan. He said Korean premier had also signed multi-billion dollars memorandum of understanding with Central Asian Republics. He said efforts were underway to negotiate and sign Pak-Korea Free Trade Agreement. staff report

0.08pc Balochistan solar energy can serve national needs -- Pakistan Today

0.08pc Balochistan solar energy can serve national needs

- APF chief wants risk-averse banks to extend energy finances
- Says corruption, lack of good governance, security keeping investors at bay

KARACHI - Being a patriotic Pakistani one tends to do some good for his homeland only to find a deep-rooted corruption, lack of good governance, transparency and well-thought-out policies hindering his way in one way or another. Awais Khan, the president and chief executive of American Pakistan Foundation (APF), is one such overseas Pakistani who is striving hard to bring economic development and social change in, what he believes to be, a resource-rich Pakistan. Policymakers in Pakistan are desperately wandering here and there to find a sustainable solution to the fast ingraining energy crises in the country. Khan, who lives outside Pakistan, has a clearer vision to find a 'scalable' remedy to this economy-crippling menace.

Pakistan, he says, through employing right governance and a well-thought-out energy policy, could generate thousands of megawatts electricity using its vast but still untapped sources of solar, hydro, hydroelectric, wind and waste energy scattered across the country. Khan, a leading American businessman of Pakistani origin, refers to a study revealing that if tapped only 0.08 per cent of the solar energy reserves in Balochistan province could cater to energy needs of the entire country. "The banks could step up to lease and finance the energy equipment," APF chief said during a roundtable discussion with a group of journalists here at the residence of the US Consul General.

Singling out the fast disappearing energy-crises-hit cottage industry, the investment banker said the country has a potential of generating 43,000MW electricity using hydro and hydroelectric energy sources available in the country's northern areas. Some 50,000MW of wind power could be generated from the coastal corridor stretching from Karachi to Gwadar, Balochistan. Khan said agri-waste like cow dung, etc could also be used for energy generation in the country. Lack of funding, energy policy, security and corruption are major stumbling blocks, APF chief underlined, for achieving these goals. "There are lots of (financing) vehicles but not a lot of people know how to access these vehicles," Khan lamented.

He said multilateral finders like World Bank and International Finance Corporation (IFC) were present in the country to fund these mega energy projects but, unfortunately, 99.9 per cent of the local institutions were falling short of meeting the "broader criterion" set for getting funding from these multinational organisations.

Institutional capacity building, bringing domestic work standards at par with that of international ones and experienced and skilled managers are the three prerequisites, Khan said, constituting this broader funding criterion. The risk-averse banks, he said, could bridge this financial gap through extending more advances to the private individual and institutional borrowers willing to install the sophisticated energy generating equipment.

Khan complained about the deeply-ingrained corruption in Pakistan which deters his organisation, APF, from working on big projects. "To a personal perspective, I found it (corruption) a frequent occurrence and biggest challenge besides security," Khan told the journalists. "To get permission from the government (to undertake a certain project) a lot of under-the-table things happen," he elaborated. Attributing this menace to lack of right system and right people, the American businessman urged the need for creating political awareness among voters in the forthcoming general elections. "Tell them that your vote matters so use it in right way," Khan urged the journalists.

For making entrepreneurship a success story in Pakistan, the APF CEO suggested an easy access to cheap capital, good governance, a right legal system and a business-friendly security climate which he said was lacking in case of Pakistan. "Pakistan has been suffering from the image issue. And number one concern of every entrepreneur is whether my people and finances are safe," he said.

About APF, Khan said the privately-funded organisation had a goal to provide one million individuals with energy by 2015 under its "rural electrification" plan in areas the most neglected or where the need was more pressing. He said, having benefited over 42,000 flood affectees in Pakistan, APF was set up in Dec 2009 to

leverage the Pak-American diaspora for economic development and social change in Pakistan.

Construction of roads in 6 months: Govt spends 41% of developmental budget -- DAILY TIMES

Construction of roads in 6 months: Govt spends 41% of developmental budget

* Releases Rs 23.331bn to 4 provinces and Gilgit-Baltistan thru Ministry of Communication against total allocation of Rs 39.900bn

By Ijaz Kakakhel

ISLAMABAD: The government has released and utilised Rs 23.331 billion to all four provinces and Gilgit Baltistan through Ministry of Communication against the total allocation of Rs 39.900 billion, showing 41 releases of the total by end of first six months of the current fiscal year 2011-12, sources told Daily Times here on Tuesday.

The government has allocated Rs 12.949 billion for Punjab national importance construction of roads with Foreign Exchange Component (FEC) of Rs 2.418 billion, which made total allocation of Rs 15.368 billion for the province. Against these allocations, the government has released and utilised Rs 8.421 billion, showing 55 percent total releases to Punjab province only through the Ministry of Communication.

In the annual budget 2011-12, the government has allocated Rs 5.09 billion for Sindh province (only through Ministry of Communication) with FEC of Rs 1.200 billion, which made total allocation of is Rs 6.809 billion for the province. Against these allocations, the government has released and utilised Rs 6.521 billion, showing 96 percent total releases to Sindh province.
